†Resistance of Model 1521 0-25 Mics is 5500 Ω.

EDGEWISE PANEL INSTRUMENTS STACK HORIZONTALLY or VERTICALLY 1½", 2½"

Simpson's new miniature edgewise panel meter has a unique Self-Shielding Core Magnet Movement* that eliminates the protruding barrel which is prevalent in other edgewise meter designs. It lends itself to a design that is sharp, modern, extremely compact and with a meter scale that extends nearly to the full width and height of the meter. An optimum scale display area allows for the use of large, easy-to-read numerals on a horizontal plane.

*Patent Pending

Simpson NEW! DIGITAL PANEL INSTRUMENT

MODEL 2800

ACCURATE: ±0.1%, ±1 DIGIT

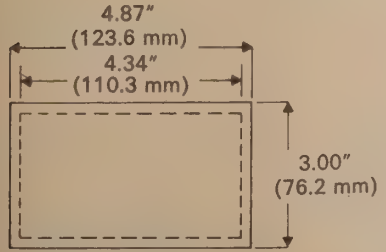
EASY TO READ NON-BLINKING DISPLAY

STORAGE CIRCUITRY HOLDS NUMBER UNTIL INPUT CHANGES

MODERN COMPACT DESIGN — FRONT PANEL ZERO ADJUSTMENT

dds so much to your new equip-ent design: easier readouts, etter accuracy, and the most -to-date appearance. Simpson's odel 2800 digital panel meters e reliable miniature instru-ents, which easily mount on quipment panels. The non-inking readouts, with storage rcuitry to hold the number, sures fast and clear readings. olid state circuitry (except for e readout tubes) is used roughout for reliability. Bezel s an attractive black matte ish with tinted window.

RANGES



DC Voltage Range	Maximum Indication (with Overrange)	Input Impedance	Catalog Number	Price

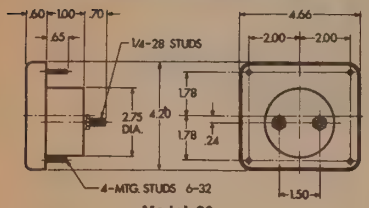
* Overrange limited to 10% on this unit.

SPECIFICATIONS

Accuracy: ±0.1% (F.S.), ±1 digit.
Resolution: 1 part in 1000.
Sample Rate: 5 readings per second, continuous.
Display: Non-blinking, with storage.
Number of Full-Time Readout Digits: 3
Readout Digits: Cold-gas glow tubes, 200,000 hour rated life.
Circuitry: Integrated circuits and solid-state components (except readout tubes).
Overrange: 100%. Number "1" automatically lights to the left of other digits to indicate overrange. When measured value exceeds overrange capacity, the "1" flashes — preventing erroneous readouts.
Underrange: Reverse polarity is automatically indicated by a light to the right of other digits. Linear 15% underrange permits reading negative values. Readout is a complement of actual reading.
Common Mode Rejection: Greater than 90 dB at 60 Hz with 1K-ohm unbalance.
Series Mode Rejection: Greater than 35 dB at 60 Hz.
Ambient Temperature Range: To maintain rated accuracy: +15°C to +35°C.
Power Required: 117 volts, 60 Hz., 9 VA (nominal).



PANEL CUTOUT REQUIREMENT:
4.37" (111.0 mm) x 2.80" (71.1 mm)

Simpson 4½" PYROMETERS

Available in two versions: Standard phenolic Model 29 and Model 3324 Rugged Seal for extreme conditi
Both models are compensated for ambient temperature changes and include copper circuit compensat
±2% accuracy.

Each pyrometer is furnished with an external adjustable series resistor to permit use of lower re
tance thermocouples in the field.

Simpson ELECTRO-MECHANICAL COUNTERS

NEW! SIMPSON COUNTERS

Simpson Electro-Mechanical Counters provide accurate counting in vending machines, duplicating equipment, packaging machinery, and in many production line applications. They feature instant number switching, so that only complete numbers are visible.

SPECIFICATIONS

RATED SPEED: 1 count per 100 milliseconds (10 counts per secon
600 counts per minute).
MINIMUM PULSE DURATION: 50 milliseconds "on", 50 milliseconds "off
VOLTAGE INPUT: ±15% of the rated voltage.
POWER CONSUMPTION: 4.2 watts (nominal).
MAXIMUM INDICATION: 9,999.
NUMERALS: White on black, 0.2" high, 0.15" wide.
NUMERAL SWITCHING: Ratchet principle, adding one count each time t
operating coil is opened. At any given time only whole numbers a
visible, for clear readouts.
NUMERAL RESET: Front-panel push-button instantly resets numerals to 000
CONSTRUCTION: Bezel of rugged thermosetting materials; black mat
finish. Heavy steel frame with a formed aluminum cover.

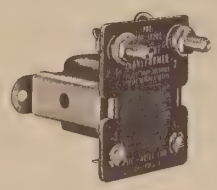
Simpson PANEL INSTRUMENT ACCESSORIES

HERMOCOUPLES

ock thermocouples are iron-constantan, calibrated to 5 or 10 ohms ±1% per table.



Types 21221 and 21224 are iron constantan thermocouple wire in a ainless steel overbraid for rugged service application where flexing or brasion would cause deterioration of standard thermocouples.

Types 21222 and 21223 are iron-constantan thermocouples with a ass cloth overbraid. These thermocouples are suited for most general rpose use or for permanent mounting in protected sheaths or conduit.

Cat. No.	Type	Resistance	Overbraid*	Length	Gauge	Price
21221	I/C	5 ohms	SS	162 in.	20	$15.60

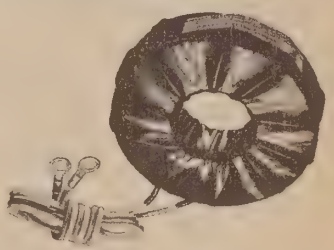
CURRENT TRANSFORMERS — FOR USE WITH 0-10 VAC METERS AND CONTROLLERS

Model 186



Designed for use with 0-10 volt AC meters. Available **from stock**, they convert meter relays to AC current control units. Transformer may be located remotely from indicating meter. Ranges from 0-50 milliamperes up to 0-50 amperes are available for immediate delivery. Frequency Range: 30 Hz. to 5 kHz. Accuracy: ±2%. (May be used with any 0-10 volt, 1000 Ω/volt, or 2000 Ω/volt, AC rectifier type meter.) Not for use in circuits where sustained overloads are possible.

Range	V.A.	Cat. Number	Price
0- 50 mA	0.40	01294	$15.15

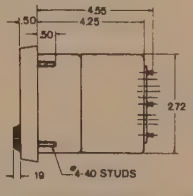
Simpson INSTRUMENT RELAYS and CONTROLLERS

• "RUGGED SEAL" CONTACTLESS TYPE

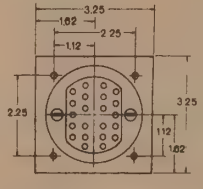
Maximum reliability design and control, alarm, or limit applications. Photoconductor sensing eliminates all interference wth the indicating meter. High gain transistor switch circuit provides accurate switching and a "dead band" of no more than 0.5% of full scale. Fail safe circuitry opens output relays in the event of power failure. Output relays are DPDT, with 10-ampere contacts. New pyrometer types are available for use with I/C or C/A thermocouples. Taut band types are available from stock with 10 μA full scale sensitivity. Rugged Seal construction withstands rigorous environmental conditions.

• PHENOLIC CASE CONTACTLESS TYPE

Now available with **contactless** control point sensing... same as used in Simpson's "Rugged Seal" controllers. C tactless operation offers better control accuracy, sma "dead band," and absolute freedom from interference w the indicating meter. High gain amplifier is all solid-state maximum reliability.



• PHENOLIC CASE CONTACT TYPE



Model 29XA is also available in a contact type design. T type is well suited for general purpose applications wh cost and reasonable reliability are primary consideratio

CONTROLLER ACCESSORIES

CURRENT TRANSFORMERS

Designed for use with 0-10 volt AC meters. Available from stock, they convert meter relays to AC current control units. Transformer may be located remotely from indicating meter. Ranges from 0-50 milliamperes up to 0-50 amperes are available for immediate delivery. Frequency Range: 30 Hz to 5 kHz. Accuracy: ±2%. (May be used with any 0-10 volt, 1000 Ω/volt, or 2000 Ω/volt, AC rectifier type meter.) Not for use in circuits where sustained overloads are possible.

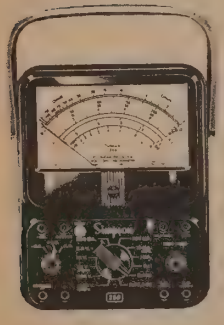
Simpson VOLT OHM MILLIAMMETERS



World Famous 260®

New 260® Series 6 for today's testing needs!

New 260® Series 6 has 150% better resolution of low level circuits with new 0-1 DC volt range. Also features new 0-500 volt AC and DC ranges plus new external access battery and fuse compartment. 50 μA movement is self-shielding and shock-resistant — protected from overloads of up to 200,000%! Wide selection of accessories include high voltage probes, carrying cases, and Add-A-Tester adapters.

Supplied complete with test leads (Cat. No. 07500), batteries, and operator's manual.

260-6 ..... $65.00
260-6RT (in roll-top protective case) 71.00
260-6M (with mirror scale) 67.00
260-6MRT (with mirror scale, roll-top case) 73.00
Ever-Redy Vinyl Carrying Case for above, Cat. No. 00805 ..... 14.00

PUSH-BUTTON OVERLOAD PROTECTION!

260-5P The Famous GOOF PROOF VOM

Virtually 100% protected! Makes burned components, bent pointers, and blown rectifiers a thing of the past. Ideal for use when exploring unfamiliar equipment, especially if no schematic is available. Also popular in schools, or wherever a VOM must be used by inexperienced personnel. No other VOM has all these features:

1. Reset button pops out to indicate overload.
2. Circuits cannot be reset while overload is present.
3. Does not require massive overloads to activate.
4. All ranges protected except those not feasible in a portable instrument (100Ω and 5000 VDC, 10 Amperes DC).

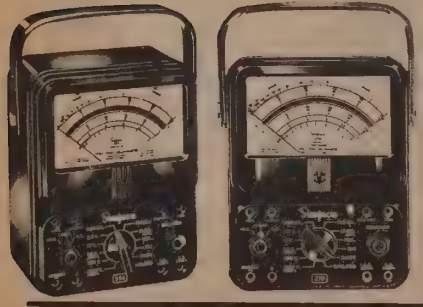
Uses same accessories as the 260-6, including Add-A-Tester adapters.

260-5P ..... $ 97.00
260-5PRT (with roll-top protective case) 103.00

250 VOM with 50 MILLIVOLT DROP

Makes testing new solid-state circuits easier. All the features of the famous 260® including a 1-ampere fused input, self-shielding varistor protected movement and Adjust-A-Vue handle which folds to use as a stand. Plus modified range coverage and 50 millivolt drop on DC current ranges . . . specifically for solid-state circuits. Taut band movement is shock-proof.

250 ..... $70.00
Ever-Redy Vinyl Carrying Case, for above. No. 00805 ..... 14.00



255 VOM with TEMPERATURE RANGE

Designed by Simpson for a major utility company to meet the specific needs of servicemen in the gas appliance, electrical heating and appliance fields. Has important features of 260® VOM plus temperature range of +100°F. to +1050°F. Low millivolt drop on DC current ranges for servicing new solid-state controls.

Complete with operator's manual, test leads with prods (No. 00115), 5 foot thermocouple lead (No. 00163), and batteries.

255 ..... $90.00
10,000 volt AC High-Voltage Probe Cat. No. 00161 ..... 17.00
Specially designed Carrying Case for 255. No. 00549 ..... 20.00
Probe Case, snaps onto above Carrying Case No. 00574 ..... 8.00

261-2 and 270-3 HIGH ACCURACY VOLT-OHM MILLIAMMETERS

Designed for VOM applications requiring higher accuracies. They have all the features of the 260-5M, including mirror scale, varistor protected self-shielding movement, and Adjust-A-Vue handle. Special calibration circuits and components, combined with strict manufacturing controls produce outstanding accuracy. 270-3 has built-in temperature compensation. Both use all 260® accessories, including plug-in Add-A-Tester® adapters.

261-2 ..... $73.00
261-2RT (Roll-top protective case) 79.00
270-3 ..... 78.00
270-3RT (Roll-top protective case) 84.00
Complete with operator's manual, test leads (No. 07500), and batteries.
Ever-Redy Vinyl Carrying Case, for above. No. 00805 ..... 14.00

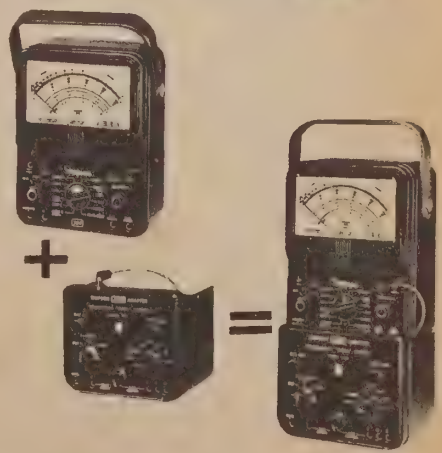
AMP-CLAMP PLUG-IN ADAPTER FOR AC AMPERE MEASUREMENTS

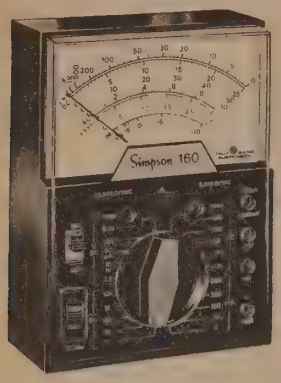
Amp-on AC ammeter adapter allows measurement to be made without breaking circuit being tested. Simply plugs into 260®, 261, 270, 250 or 255 VOM. Ranges: 0-5, 10, 25, 50, 100, 250 AC Amperes. Readout is on VOMs 0-2.5 VAC scale. May be used with any VOM having 0-2.5, or 0-3 VAC range. When used with 0-3 VAC adapter ranges are from 0-6 to 300 AC Amperes. Rugged construction, and easy to use.

Model 150 Complete with No. 0533 test lead, Cat. No. 00532 ..... $30.00
Test Lead, Cat. No. 0533 ..... 2.25
Carrying Case No. 00548 ..... 8.00



NEW AMP-CLAMP

260 ADD-A-TESTER ADAPTERS



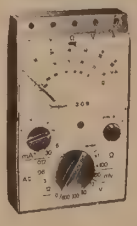
MODEL	RANGE	ACCURACY
TRANSISTOR TESTER MODEL 650 — $44.00	BETA: 0-5, 50, 250. Ico: 0-100 μa.	BETA: ±5%* Ico: ±3%*
AC VTVM MODEL 651 — $52.00	VOLTS: 0-0.5, 1.0, 2.5, 10,25, 50, 100, 250, 500 INPUT IMPEDANCE: Greater than 10megΩ on all ranges.	±3% F.S.*
TEMPERATURE TESTER MODEL 652 — $49.00	−50°F to 100°F, 100°F to 250°F. Sensing Element: Thermistor.	±2°F from −30° to +220°F. ±4°F over remainder of range.
AC AMMETER MODEL 653 — $30.00	0-0.25, 1.0, 2.5, 12.5, 25 Amps. Frequency range: 50-3000 cycles.	±3% F.S.
AUDIO WATTMETER MODEL 654 — $34.00	LOAD RANGES: 4, 8, 16, 600 ohms. WATTAGE: 25 watts (8, 600Ω), 50 watts (4, 16Ω) continuous. Intermittent duty: 50 and 100 w.	±10% (±7% with 261 and 270)
MICROVOLT ATTEN. MODEL 655 — $30.00	2.5 to 250,000 microvolts in decade steps. Frequency: DC to 20kc.	±1 DB
BATTERY TESTER MODEL 656 — $30.00	Up to 90 volts.	±3% F.S.*
MILLIOHMMETER MODEL 657 — $54.00	0-0.1 (150 ma. max. output), 0.25 (103 Ma.), 0.5 (90 Ma.), 1.0 (80 Ma.).	±2% F.S. (±1½% with 261 and 270).
DC AMMETER MODEL 661 — $33.00	DC AMPERES: 0-10, 2.5, 5, 10, 25.	±2% F.S. (±1½% with 261 and 270).

* 1% better accuracy when used with 261 or 270.

Simpson MULTI-TESTERS

NEW! IMPROVED 160 HANDI-VOM

Now even better... with ±2% DC and ±3% AC accuracy. Just 3⅝" wide, and a mere 12 ounces in weight, yet the 160 Handi-VOM has the accuracy and sensitivity of a full size VOM. The self-shielding Taut Band movement features outstanding repeatability and freedom from stray magnetic fields. And the movement is varistor protected from even 200,000% overloads. Built for today's VOM needs, including solid-state circuit testing, the 160 has 0-0.25 VDC and 0-50 DCμA ranges. Five resistance ranges are provided for easy and accurate ohms measurements. Optional accessories include probe-tip leads, and a new vacuum-formed carrying case.



Complete with test leads and operator's manual.

160 Handi-VOM $55.00

SPECIFICATIONS	160
Ranges — DC Volts	0-0.25, 1.0, 2.5, 10, 50, 250, 500, 100

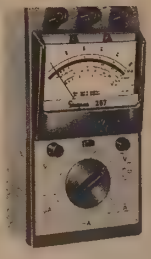
Net Weight	12 ounces
Price	$55.00

Model 208 and 209 AC/DC VOMs

Both of these new Simpson VOMs have **AC Current** ranges built-in. Separate inputs for voltage and current make combined readings easy — using two sets of leads you simply flip the range switch. Other new features: illuminated scale and light-up continuity checker. Complete with one set of test leads, batteries, and operator's manual.

Model 208 .....$72.50
Model 209 ..... 68.00

Manufactured in West Germany



Model 355 MIDGETESTER®

So small (2¾" x 4½" x 1") it easily slips into your shirt pocket. No wonder the 355 Midgetester® is popular with those who must make basic voltage and resistance measurements "in the field."

Complete with test leads and operator's manual.

355 Midgetester® $50.00

NEW MULTITESTER

MEASURE CAPACITANCE AND AC CURRENT

PUSH-BUTTON OVERLOAD PROTECTED!

Both of these new Simpson VOMs have built-in capacitance a high Megohm ranges! The high voltage necessary for the measurements is supplied from an external source (which c simply be line voltage where AC is required). Overload circ breaker protects all ranges except 100 volts and high Supplies complete with test leads and operator's manual.

Model 256 .....$105.
Model 257 .....$ 95.

Manufactured in Austria

Simpson VOLT-OHM-MILLIAMMETERS

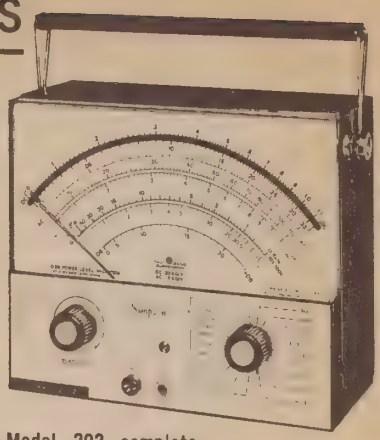
IODEL 202 — ACCU-LOG®— A NEW CONCEPT IN VOMS

he first VOM to give you consistent "percent-of-reading" ccuracy . . . anywhere on the readout scale!

CCU-LOG has a special quasi-logarithmic scale. It gives you "percent-of-ading" accuracy anywhere on the readout scale, yet still allows easy zero ad-ıstment with a linear portion at the low end. There's no need to keep readings t the high end of the scale, or worry about "percent-of-full scale" accuracy mitations. Other features you'll like: two low power ohmmeter ranges, over-ıad protected taut band movement, and a large 7" antiparallax mirror scale.

xternal battery compartment makes battery changing faster, easier!

VOLTAGE RANGES
DC: 0.03 - 0.33; 0.1 - 1.1; 1 - 11; 10 - 110; 30 - 330; 100 - 1100 volts
AC: 1 - 11; 10 - 110; 30 - 330; 100 - 1100 volts



CURRENT RANGES
DC: 0.01 - 0.11; 0.1 - 1.1; 1 - 11; 10 - 110; 100 - 1100 milliamperes

LOW POWER RESISTANCE RANGES
Rx1 (4 ohm center, 2.7 mW maximum load); Rx10 (40 ohm center, 0.27 mW maximum load)

RESISTANCE RANGES

7-INCH VOMs

NEW 269-3
EASIER TO READ 7" SCALES

MODEL 269 Series 3
100,000 Ω/V!

Now improved! . . . with a self-shielding Taut Band meter movement that gives better repeatability, plus faster pointer action. This new meter movement is combined with a new mirror scale; and knife-edge pointer, eliminating parallax errors. Large, readable scale is over 6 inches long. Accuracy is ±2% DC and ±3% AC, with new range coverage, too. One switch selects all 27 ranges. Battery replacement is quick and easy with the snap-on compartment. And the new 269-3 is protected from overloads with a replaceable 1.5 Ampere fuse at the input, and a varistor at the meter movement.

Complete with No. 00115 test leads, 4000 volt DC probe extension, and operator's manual.

Model 269-3 ..... **$98.00**

MODEL 263

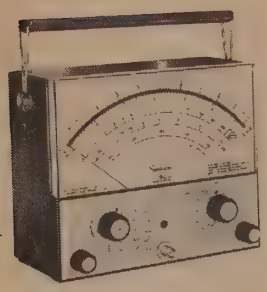
64-RANGE DUAL-SENSITIVITY VOM
1½% DC ACCURACY

Dual sensitivity Volt-Ohm-Milliammeter has overlapping ranges — let's you place reading at the high end of scale for optimum accuracy. Large 7" scale makes readouts easier, too. Varistor protects the movement from even **200,000 per cent** overloads! 1½ volt alkaline battery assures maximum stability on low ohms range. External battery compartment for easiest replacement. See the chart below for complete specifications.

Complete with No. 00115 test leads, batteries, and operator's manual.

Model 263 ..... **$97.00**

MODEL 262 Series 3



Popular 7" VOM has 34 ranges, movement overload protection, and more. See complete specifications below. Complete with No. 00115 test leads, batteries, and operator's manual.

Model 262-3 ..... **$83.00**

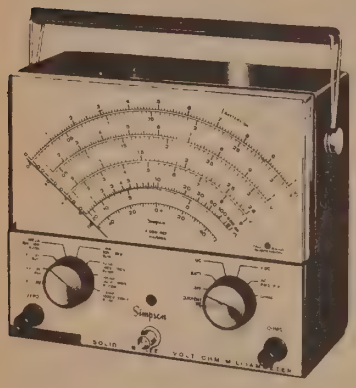
Simpson ELECTRONIC MULTIMETERS

NEW! MODEL 314 Solid-State VOM

- **7 Low Power Ohms Ranges**
- **Current Ranges as low as 10 μA at Full Scale**

For today's circuit designer and tester . . . won't load or burn out IC's and transistorized circuitry. Draws just 70 μW on low power ohms ranges. 10 Megohm input impedance on all voltage ranges plus 10X probe switch for 100 Megohm input. 21 AC and DC ranges. Offers 100 mA and 1 amp measurement ranges, AC and DC. Large 7″ mirror scale with knife-edge pointer eliminates parallax errors. External access battery compartment makes battery replacement easy.

Model 314 complete with AC/DC probe, battery, and operator's manual **$150.00**



Ranges: 0-0.05 to 1000 DC V in ranges. 0-0.01 to 1000 AC V in ranges. 0-0.01 to 1000 mA AC a DC in 7 ranges. Rx1 (10 Ω center) Rx1 Meg in 7 ranges. −40 to + dB.

Accuracy: ±2% (FS) DC, ±3% (FS) A

Input Impedance: 10 Meg Ω AC and (10x probe switch for 100 Meg

Frequency Response: Flat to 100 kH

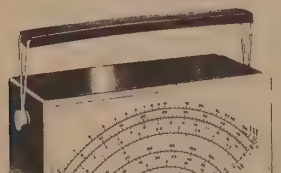
MODEL 313 Solid-State FET VOM

- **11 Meg Ω DC Input — Battery Operated**

The high impedance of a VTVM in a battery operated instrument! Operates for 300 hours or more on a single set of batteries. FET-input. All voltage ranges fully overload protected. Large, easy-to-read 7″ scale. Built-in "battery check" switch. Self-shielding movement.

Model 313 complete with AC/DC probe, batteries, and operator's manual **$125.00**

Ranges: 0-0.3 to 1000 V AC and DC 7 ranges. 0-0.1 to 1000 mA DC in ranges. Rx1 (10 Ω center) to R Meg in 7 ranges.



Accuracy: ±3% AC and DC.

Input Impedance: 11 Meg Ω DC, Meg Ω AC.

Frequency Response: Flat to 100 k (voltage ranges up to 3 volts F

VACUUM TUBE VOLT—OHMMETERS

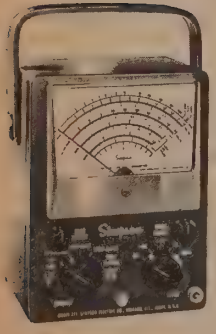
MODEL 312 AC/DC VTVM

- **16 Meg Ω DC Input Impedance**

Offers 40% less circuit loading than most conventional VTVMs. Also features large 7″ scale with a tracking error of 1% or less and full scale accuracies of ±3% on all AC and DC ranges. Built-in movement overload protection. ½-volt DC range for today's solid-state circuits.

Model 312 for 105/125 V, 50/60 Hz. Complete with AC/DC probe, operator's manual **$95.00**

Model 312 for dual voltage, 110/220 V **102.00**



Ranges: 0-0.5 to 1500 DC V in ranges. 0-1.5 to 1500 AC RMS V 7 ranges. 0-4 to 4000 AC P-P V 7 ranges. Rx1 (10 Ω center) to R Meg in 7 ranges.

Accuracy: ±3% (FS) AC and DC.

Input Impedance: 16 Meg Ω DC, 1 M Ω AC.

Frequency Response: ±3% from 15 to 3 MHz (useable to 250 MHz w optional RF probe).

MODEL 311-3 AC/DC VTVM

- **22 Meg Ω DC Input**

Supplied complete with AC/DC probe, ground lead, operator's manual. For 117 V, 50/60 Hz.
311-3 .....**$91.00**

Ranges: 0-1.5 to 1500 DC V and AC RMS V in 7 ranges. 0-4 to 4000 AC P-P V in 7 ranges. 0-1.5 to 1500 AF V in 7 ranges. Rx1 (10 Ω center) to Rx1 Meg in 7 ranges.

Accuracy: ±3% (FS) DC, ±5% (FS) AC.

Input Impedance: 22 Meg Ω DC, 2.2 Meg Ω AC.

Frequency Response: Flat to 100 kHz (useable to 250 MHz with optional RF probe).

MODEL 303-2 AC/DC VTVM

- **Rugged Companion to the 260®**

Supplied complete with AC/DC probe, ground lead, operator's manual. For 117 V, 50/60 Hz.
303-2 .....**$92.00**
303-2RT (in roll-top case) **97.00**
303-2 for 117/220 V, 50/60 Hz **98.00**
303-2RT for 117/220 V, 50/60 Hz **104.00**

Ranges: 0-1.2 to 1200 DC V and AC RMS V in 6 ranges. 0-1.2 to 60 AF V in 3 ranges. −20 to +63 dB in 6 ranges. Rx1 (10 Ω center) to Rx1 Meg in 6 ranges.

Accuracy: ±3% (FS) DC, ±5% (FS) AC.

Input Impedance: 10 Meg Ω DC, 275k Ω AC.

Frequency Response: Flat to 100 kHz (useable to 100 MHz with optional RF probe).

MODEL 715 AC VTVM

- **dB Markings for Audio Work**

Supplied complete w shielded input cat operator's manual. 115 V, 50/60 Hz.
715 .....**$84**
715 for 115/220 V, 50/60 Hz **91**

Ranges: 0-0.01 to 300 AC RMS V in 10 rang −52 to +52 dB in 10 ranges (1 mW into 60 = "0" dB).

Input Impedance: 1 Meg Ω.

Accuracy: ±5% (FS).

Frequency Response: ±1 dB from 10 Hz to 400 k

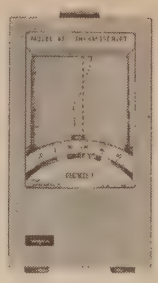
Simpson TEMPERATURE TESTERS

IEW! MODEL 413 "THERMOSCRIPT"

Records Temperatures — Unattended for up to 32 days

Uses No Batteries — No Electrical Power



e fool-proof way to monitor temperatures of perishable goods in shipment storage. Gives a written record for any hour, any day. Precision clock tor drives chart for up to 32 days — can be packed right in shipping tes. Inkless recording system never needs re-fills. The model 413 is also al for air balancing specialists and other temperature monitoring appli-ions.

pplied complete with chart paper, three chart speed gears, protective stic bag, and operator's manual $130.00

ilable in 3 range models:

30° to +150°F ..... Catalog No. 23310
0° to +120°F ..... Catalog No. 23312
30° to + 90°F ..... Catalog No. 23314

Accuracy: ±1.5% of range span. (Speed accuracy: 1%).
Response Time: 15 minutes for a 50% change, when subjected to a sudden temperature drop.
Chart Speeds: 24, 48, 96 mm-per-day with interchangeable gears (supplied).
Chart Paper: Pressure sensitive.
Sensor: Shock-resistant bi-metal type, internally mounted.

ACCESSORIES

MODEL 385-3L TEMPERATURE METER
Model 385-3L is ideal for those fast, accurate temperature checks from —50°F. to +70°F. Lightweight, portable, fits easily in your hand. Three lead model. Takes temperature readings in three different locations with a simple flick of the selector knob. Standard Model has Fahrenheit scale. Supplied with one No. 00010 15 ft. thermistor lead and operator's manual.
Size: 3"x5⅞"x2½". **Wt.** 1½ lbs. **$45.00**

*** ALL MICROTESTERS HAVE RUGGED PHENOLIC CASES AND MEASURE APPROXIMATELY 3" x 5⅞" x 2½". WEIGHT: 1½ LBS.**

(Microtesters not illustrated are similar in appearance to those shown above.)

MODEL	DESCRIPTION	RANGES	PRICE
230 AC/DC VOM	One of the smallest AC and DC service instruments, yet it contains sufficient ranges to do a complete servicing job. Specifically designed for telephone, teletype and marine use. Excellent troubleshooter. Case, including the front panel, is molded of black phenolic for protection against high voltages.	**1,000 Ohms per Volt AC-DC. Voltage Ranges DC:** 10v; 50v; 250v; 1,000v. **AC:** 10v; 250v; 1,000v. **Current Ranges DC:** 10 ma; 50 ma; 250ma. **Resistance Ranges:** 0-1000Ω, 0-100kΩ **Accuracies:** DC volts ±3% F.S.; AC volts ±4% F.S.; DC resistance ±3° of linear arc from absolute value of resistance measured.	**$45.00** Complete with tests leads N 08375 and operator's manu
371 AC Voltmeter	Designed primarily for testing line voltages applied to motors, heating equipment and many other industrial applications.	**Ranges:** 0-150, 0-300, 0-600 volts. **Accuracy:** ±3% of full scale.	**$39.00**
376 AC Voltmeter	Rectifier type, 1000 ohms per volt. Useful in circuits where limited current is present. An excellent output meter when used with proper condenser.	**Ranges:** 0-5, 10, 25, 50, 100, 250, 500, 1000 AC volts. **Accuracy:** ±5% of full scale.	**$39.00**
377 DC Voltmeter	Resistance, 1000 ohms per volt. Useful in radio servicing and industrial applications.	**Ranges:** 0-1, 2.5, 5, 10, 25, 50, 100, 250, 500, 1000 DC volts. **Accuracy:** ±3% of full scale.	**$39.00**
240 AC/DC VOM	The "Hammeter." Specially designed for general application around labs, class room, ham shack, etc. Has voltage ranges of 3000 volts AC or DC to check high voltage on transmitters and receivers.	**1,000 Ohms per Volt AC-DC. Voltage Ranges DC:** 15v; 75v; 300v; 750v; 3,000v. **AC:** 15v; 150v; 750v; 3,000v. **Current Ranges DC:** 15ma; 150ma; 750ma. **Resistance Ranges:** 0-3,000Ω (30Ω center); 0-300KΩ (3KΩ center). **Accuracies:** DC volts ±3% F.S.; AC volts ±4% F.S.; DC resistance ±3° of linear arc from absolute value of resistance measured.	**$45.00** Complete with tests leads N 08375 and operator's manua
362 Low-Ohmmeter	The two ranges are essentially linear and permit highly accurate readings between 0.1 and 25 ohms. For checking motor armatures; switch and relay contact resistances; shorts between windings and grounds in radio chassis wiring; electrical equipment, etc.	**Ranges:** 0-5, 0-25 ohms. **Accuracy:** ±3% of linear arc length.	**$39.00** Complete with calibrat test leads No. 08376
372 Ohmmeter	Provides wide range of resistance measurements in a small package. .2 ohm to 500 megohms. Ideal for use in schools, on test benches or at inspection facilities.	**Ranges:** 0-500, 0-5000, 0-50,000, 0-500,000 ohms; 0-5, 0-50 megohms. **Center Scale:** 5, 50, 500, 5,000, 50,000, 500,000 ohms. **Accuracy:** ±3° of linear arc length.	**$39.00** Complete with tests lead 08375 and operator's manu
375 DC Ammeter	Provides complete range from a fraction of an amp to 25 amps without external shunts. Ideal unit for use with unmetered power supplies.	**Ranges:** 0-1, 2.5, 5, 10, 25 amperes. **Accuracy:** ±3% of full scale.	**$39.00**
370 AC Ammeter	Ideal for checking small motors, line loads, etc., where AC current measurements are required. 60 Hertz. Self-contained current transformer.	**Ranges:** 0-1, 0-2.5, 0-5, 0-10, 0-25 amperes. **Accuracy:** ±5% of full scale.	**$39.00**
373 DC Milliammeter	General purpose tester. Valuable in a number of applications. Provides DC current measurements from .02 to 1000 ma.	**Ranges:** 0-1, 5, 10, 25, 50, 100, 250, 1,000 ma. **Accuracy:** ±3% of full scale.	**$39.00**
378 AC Milliammeter	Five separate ranges. Typical applications are transformer vacuum tube tests. Contains current transformer and indicating instrument in one case.	**Ranges:** 0-5, 25, 100, 250, 1,000 ma. **Accuracy:** ±5% of full scale.	**$39.00**
379 Battery Tester	Provides accurate indications of condition of all standard flashlight, hearing aid (mercury cells), radio batteries.	**Ranges:** 0-1.5, 4.5, 6.0, 7.5, 9.0, 15.0, 22.5, 30.0, 45.0, 67.5, 90.0v.	**$39.00** Complete with tests leads No 08375 and operator's manual
374 DC Microammeter	Can be used with external resistors or multipliers as high sensitivity voltmeter at 20,000 ohms per volt. Can be shorted out of circuit by use of selector knob.	**Ranges:** 0-50, 100, 250, 500, 1,000 microamperes. **Accuracy:** ±3% of full scale.	**$39.00**
390 AC Volt-Amp-Wattmeter	The most popular tester for AC/DC volts, AC amps and AC watts with one meter. Rugged . . . useful for practically any appliance.	**Volts:** 0-150, 300. **Amps:** 0-3, 15. **Watts:** 0-300, 600, 1,500, 3,000. **Accuracy:** ±5% of full scale.	**$70.00** complete with test cord assembl No. 08418 and operator's manua
391 AC-DC Volt-Wattmeters	Simultaneous reading of volts and watts. Has separate meters, built-in cord and plug for connection to line outlet . . . separate switches for range selection.	**3,000 Watts Maximum AC or DC Range** **Volts:** 0-130, 0-260. **Watts:** 0-1,500, 0-3000. **Accuracy:** ±5% of full scale.	**$64.00** Supplied with cord, plug, and operator's manual **Leatherette Carrying Case Part No. 03413 — $12.00**
392 AC-DC Volt-Wattmeters	Simultaneous readings of volts and watts. Has separate meters, built-in cord and plug for connection to line outlet . . . separate switches for range selection.	**5,000 Watts Maximum AC or DC Range** **Volts:** 0-130, -260. **Watts:** 0-1,000, 0-5000. **Accuracy:** ±5% of full scale.	**$69.00** Supplied with cord, plug, and operator's manual **Leatherette Carrying Case Part No. 03413 — $12.00**

Ever-Redy Carrying Case, Part No. 04299 **$10.50** — for all Micro-Testers except Models 391 & 392.

Models 391 & 392 Carrying Case, Part No. 03413 **$12.00**

Simpson AC CURRENT LEAKAGE TESTER MODEL 229

FOR INDUSTRY • FIELD SERVICE • LAB • PRODUCTION

NEW!

Meets proposed U.S. Standards Committee specification (C101.1) for A.C. curren leakage tests.

Small leakage currents can be dangerous! And even when they're not, current above the "threshold of perception" can cause a violent reaction from fear, resulting in serious physical injury.

Simpson's new model 229 is designed to test 120 volt AC appliances and electrical equipment in accordance with the proposed U.S. standard. It approximates the normal perception curve to within ±1.0 dB, and measures currents as small as 5 microamperes.

The 229 is ruggedly built for use on production lines and "in field" servicing. Operation is simple, and all ranges are protected from damage if accidentally subjected to line voltage. It's the ideal instrument for checking the safety of your equipment.

SPECIFICATIONS

RANGES: AC Current: 0-0.3; 1; 3; 10 mA.
AC Voltage: 0-150 Volts.
Battery Test: Replace — Good.

RESOLUTION: 5 μA on 0-0.3 mA range.

ACCURACY: ±2% at 60 Hz.

ACCURACY vs. FREQUENCY: Approximates Dalziel's "Percentile 50 Threshold of Perception Curve within ±1.0 dB.*

INPUT IMPEDANCE: 1.5 k-ohms, shunted by a shaping network, on all current ranges.

INPUT RESISTANCE: 500 k-ohms on voltage range.

OVERLOAD PROTECTION: Fully protected up to 150 VAC on all ranges.

* See AIEE Proceedings, Volume 69, Section 0184. The mean value of perception on individuals in test was 1.067 mA at 60 Hz. (Available at major technical libraries.)

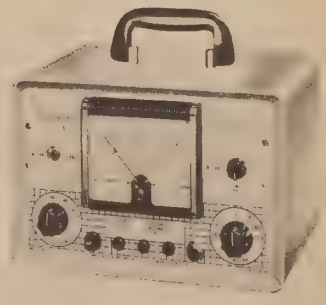
MODEL 229 CURRENT LEAKAGE TESTER
Complete with test leads, batteries, and operator's manual $90.00
Carrying Case, Leather, No. 00805 ..... $14.00

Model 466 HANDISCOPE®

Compact, light weight, and rugged. 5" general purpose oscilloscope has vertical deflection sensitivity of 30 mV/inch. Frequency response: 15 Hz to 100 kHz, ±1 dB. 6 dB down at 250 kHz. Usable to 1 MHz. 7⅞" x 12¼" x 16⅛". 19 lbs.

446 Handiscope® for use on 110 VAC, 50-60 Hz. Complete with test leads and operator's manual **$190.00**

Dual Voltage 466 Handiscope® As above, but for 110 or 220 VAC, 50-60 Hz **$214.00**



Model 458 COLORSCOPE

7" oscilloscope with both wide band (40 mV/inch sensitivity) and narrow band (15 mV/inch sensitivity) operating modes. In wide band operation, frequency response is flat (±1 dB) up to 4.5 MHz. Faithfully displays color burst frequency. Narrow band flat (±2 dB) up to 300 kHz. Weight: 29 lbs.

458 Colorscope, for use on 110 VAC, 50-60 Hz. Complete with operator's manual **$420.00**

Dual Voltage 458 Colorscope. As above, but for 110 or 220 VAC, 50-60 Hz. **$430.00**

Model 739 Probe Kit (see page 31) **$50.00**

Model 383A CAPACOHMETER

In-circuit capacitor leakage tester checks paper, mica, and ceramic capacitors. Pulse technique detects many marginal capacitors. Also directly indicates capacitance of good components, from 10.0 pF to 10.0 μF Weight: approximately 10 lbs.

Model 383A Capacohmeter, for use on 110 VAC, 60 Hz. Complete with test cord and operator's manual **$150.00**

Simpson STRIP CHART RECORDERS

4 BUILT-IN CHART SPEEDS

OPTIONAL AUTOMATIC TAKE-UP REEL

NEW MODEL 603 RECORDERS

Available in a wide selection of ranges, these new Simpson chart recorders u **inkless** pressure sensitive paper. No pens to re-fill. No ink mess. The special formulated paper will not fog or blur with age, assuring clear and accurate rcord The rugged Taut Band movement is shockproof. In addition to recording, the met provides continuous readings of the measured value. **Four** built-in chart speeds a **switch selected.** Available in AC voltage, AC current, DC voltage, and DC curre measuring ranges. Each has a built-in event indicator, too. The 603 is compact f easy panel mounting and portable use. Mounting hardware included.

SPECIFICATIONS

Accuracy of Recording	
DC range models	±2.5% of Full Scale
AC range models	±4.0% of Full Scale
Event channel response time	10 milliseconds (nominal)
Event Indicator Voltage	115 volts/60 Hz.
Built-in Chart Speeds (Switch Selected)	1½/6/12/18 inches-per-hour (38/152/305/457 mm-per-hour)
Impression Rate	2 seconds
Chart Paper	Pressure Sensitive, 3" wide, 63 feet long.
Take-up Reel	Optional
Motor Drive	Synchronous, 115 volts/60 Hz.
Size	7½" x 4 3/16" x 2 25/32"
Weight	2½ lbs.

255 only, Thermocouple lead (5 ft.)	0183	6.00

OSCILLOSCOPE PROBE KIT

For use with Model 458 Oscilloscope. Includes *low capcity probe, voltage doubler, detector, 100:1 voltage divider and dual direct — resistive. (Isolation.)

Complete with 4 poles, plastic roll, and operator's manual $50.00

* For Model 458 only.

	Cat. No.	Price
Voltage Doubler	0740	$18.00
Low Capacitance	0741	18.00
100:1 Voltage Divider	0742	19.00
Direct-Resistive Dual Purpose	0743	15.00

METER SAFE/GUARD

Same protection as built-in new 260-5. Installs in minutes. Complete instructions for 260 series —1, 2, 3, 4. Cat. No. 12621. Complete only $1.95 ea.

ACCESSORY SHUNTS

Used with models 256 and 257 for DC current measurements up to 100 amps full scale. Convenient plug-in design.

Range (F.S.)	Cat. No.	Price
25 DC Amperes	06527	$15.00
50 DC Amperes	06528	15.00
100 DC Amperes	06531	15.00

HIGH RESISTANCE MEGOHMMETER

MODEL 29-U

20,000,000 MEGOHMS

Direct Reading: Unusual stability, fast in operation, high accuracy.

11 Ranges: From 300,000 ohms to 20 million megohms.

Power Supply: 115 volts AC, 60 cycles.

Test Potentials: 100 volts DC and 500 volts DC. Also: 0.5 volts to 1000 volts by external supply.

SPRAGUE TEST EQUIPMENT

TO-6 TEL-OHMIKE® CAPACITOR ANALYZER

The TO-6 TEL-OHMIKE capacitor analyzer is a must for checking all capacitors. It is a moderately priced instrument with laboratory quality and accuracy—the highest accuracy of any instrument of its type available to the service trade!

- **LEAKAGE CURRENT** of electrolytics measured directly on meter. Four ranges; .06, .6, 6, and 60mA. Three ranges of DC voltage (continuously variable within each range) permit testing capacitors at exact rated voltage up to 600 volts.
- **POWER FACTOR** of electrolytics, up to 50% measured by Wien Bridge.
- **METER PROTECTOR** of solid-state design allows severe accidental over-loads without burn-outs.
- **MAGIC-EYE TUBE** simplifies bridge balancing for capacitance and power factor measurements. High gain amplifier provides greatly improved sensitivity.
- **PUSH-BUTTONS** color-keyed for instant range selection.
- **MODERN CASE:** Silver-grey hammertone finish, panel is charcoal grey with highly contrasting white designations. Measures 8⅞" high, 14⅝" wide, 6⅛" deep. Weight only 13 pounds.

MODEL TO-6 ..... 115 VAC/50-60 cy
MODEL TO-6S ..... 115-230V/50 cy

Call Your Sprague Distributor for Current Prices

- **CAPACITANCE BRIDGE** measures up to 2000 μF. Five overlapping ranges include exclusive 1 pF to 100 pF range. Special shielded transformer for bridge voltage. Extremely low AC voltage; 1.35 volts for electrolytic capacitors, 2.85 for all others, permits safe testing of all low voltage capacitors.
- **INSULATION RESISTANCE** of papers, ceramics and micas directly read on large meter. No guessing with neon lamps. Dual range—to 10KMΩ@ 30V for low voltage units . . . to 50KMΩ@ 150V for higher voltage components. Fast charge feature speeds testing of high capacitance units.

TEL-OHMIKES FOR RACK MOUNTING

Electrically identical to TO-6 and TO-6S. These models have a standard 19"w. x 10½"h. panel so that it can be mounted in standard relay racks.

MODEL TO-6RM.....115 VAC/50-60 cy
MODEL TO-6SRM.....115-230 V/50 cy

M-3 MIKE-O-METER® MOTOR CAPACITOR ANALYZER

- **ACCURATELY MEASURES** capacitance and power factor of any motor-starting, motor-running capacitor or any other capacitor within the range of .1 μF to 1000 μF. Uses the highly reliable Wien Bridge method.
- **SIMPLIFIES** capacitor testing for the air conditioning, refrigeration, and electric motor technician.
- **DIRECT READINGS** on highly visible, calibrated scales.
- **MAGIC EYE** tube makes bridge-balancing easy.
- **SAFE OPERATION** is assured by the automatic discharge of the capacitor when test switch is released. The M-3 is transformer operated. Instrument case is isolated from AC line.
- **BUILT FOR SERVICE** and a long dependable life, whether in your shop, or on the job in the field.
- **COMPONENTS IN THE M-3** were selected to provide reliability. Highest quality capacitors and resistors are used. The power transformer is specially treated to resist moisture.
- **ELECTRON TUBES** resistant to shock and vibration were chosen for the M-3. They can be obtained from any electronic parts distributor.
- **ALSO CHECKS** capacitors for open, shorted, or intermittent conditions.
- **SLOPING PANEL** and recessed eye designed to improve visibility, especially when working in lighted areas.
- **STEEL CASE** measures 9 inches high, 6 inches wide and 5¾ inches deep. Has folding metal carrying handle. Weighs only 6 pounds.
- **ATTRACTIVELY FINISHED** in blue hammerloid. Panel is light grey with black markings.

MODEL M-3, 110-125 VAC, 50/60 CYCLES . . . . . .
MODEL M-3S, 110-125/220-230 VAC, 50-60 CYCLES . . . .

GENERAL MULTI-PURPOSE V-O-Ms

310

310C

Volt-Ohm-Milliammeter MODEL 310 TYPE 2

1. **Hand size V-O-M with provision for attaching AC clamp-on ammeter.**
2. **20,000 Ohms per volt DC sensitivity; 5,000 AC.**
3. **One selector switch minimizes chance of incorrect settings and burnouts, plus diode overload protection.**

Self-shielded for checking in strong magnetic fields.
Rugged, high torque, bar-ring instrument.
Unbreakable plastic meter window.
Fitting interchangeable test prod into top of tester makes it the common probe, freeing one hand.
Standard sensitivity 20,000 ohms per volt DC, and 5,000 ohms per volt AC.
Spring-backed instrument jewels for ruggedness.
Accuracy 3% DC, 4% AC.

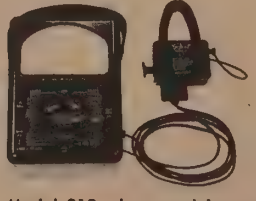
RANGES

DC Volts: 0-3-12-60-300-1,200 (at 20,000 ohms per volt). **AC Volts:** 0-3-12-60-300-1,200 (at 5,000 ohms per volt). **Ohms:** 0-20,000-200,000. **Megohms:** 0-2-20. **DC Microamperes:** 0-600 at 250 millivolts. **DC Milliamperes:** 0-6-60-600 at 250 millivolts. **Weight**—Approx. 14 oz., complete with batteries.
Case—Molded, black, 2¾" x 4¼" x 1$\frac{5}{16}$". Batteries: NEDA #910, 220.
Complete with leads, battery and instruction manual. Shipping wt. 2 lbs.
Model 310 Catalog No. 3018 **$44.00**

MODEL 310-C TYPE 3

New 310-C is the same as Model 310, above, (except 600 volt ranges replace 1200 volt ranges of model 310) plus the following features: (suspension meter).

1. **Hand size V-O-M with provision for attaching AC clamp-on ammeter.**
2. **15,000 Ohms per volt AC sensitivity; (20,000 DC same as 310).**
3. **Single fully enclosed lever range switch, plus DC polarity reversing and diode overload protection.**



Model 310-C Catalog No. 3022 **$56.00**

Clamp-On Adapter

MODEL 10

CHECKS LINE LOADS WITH MODEL 310 (Also can be used with Models 630, 630-A, 631, 630-PL, 630-APL, 630-APLK, 630-PLK, 630-L by means of 611 leads.)
Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switching. Model 10 Clamp-On Adapter AC Ammeter ranges: 0-6-12-30-60-120-300. Clips around single wire to read A.C. Amperes direct. Used with Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to

Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC V-O-M only. The only change is to remove the lead plug from the Model 310 V-O-M jack and insert it in the jack provided in the Model 10 housing. Case black molded plastic.
Model 10 Catalog No. 60211 **$20.00**
Model 10-C Catalog No. 60210
For use with Model 310-C **$20.00**

Clamp-On Ammeter Set

MODEL 100

Handsomely packaged set includes: Model 310 V-O-M, Model 10 Clamp-On Ammeter Adapter; Model 101 Line Separator; Model 379 Leather Case; Model 311 Leads. ($83.20 Value Separate Unit Purchase Price.)
Model 100, as above, you save $5.20 over individual purchase price. Shipping wt. 7 lbs.
Model 100 Catalog No. 3014 **$78.00**
Model 100-C Same as above but with Model 310-C, and Model 10-C.
Model 100-C Catalog No. 3010 **$88.00**
Model 100-FET Catalog No. 3013 **$109.00**

Leads

No. 611 LEADS
In addition to use with the Model 310, the No. 10 Adapter also can be used as a Clamp-On Ammeter with any Volt-Ohm-Milliammeter having a 3 AC Volt scale at 5,000 Ohms per Volt or above, such as Triplett Models 630, 630-A, 630-PL, 630-APL, 630-APLK, 630-PLK, 630-L, 631, etc. (see illustration). This is done by means of a long lead attachment (No. 611) making possible easy readings in difficult locations.
611 Leads Catalog No. 79A-160 **$3.40**

No. 311 LEADS
The Model 10 can be separated from the Model 310 (in the same way as above) by using No. 311 lead attachment. This permits readings in difficult locations. Also used with Models 310-C and 10-C.
311 Leads Catalog No. 79-161 **$3.40**

Line Separator

MODEL 101

Plugs into AC outlet to divide instantly two-conductor cords. Increases ammeter sensitivity 10X and 20X. Use up to 30 AC amperes from 0.3 to 30 in nine steps. Also has provision for Voltmeter prods for voltage measurements. Case, black molded plastic with engraed markings.
Model 101 Catalog No. 60218 **$8.00**

TRIPLETT CORPORATION

GENERAL MULTI-PURPOSE V-O-Ms

Volt-Ohm-Milliammeter MODEL 630 TYPE 2

1. **One selector switch minimizes chance of incorrect settings and burnouts.**
2. **4.4 Ohm center scale, reads from 0.1 ohm up to 100 megohms resistance in 4 ranges.**
3. **20,000 ohms per volt DC sensitivity; 5,000 AC.**

Popular streamlined tester with long meter scales arranged for easy reading. Outstanding resistance ranges: low reading .1 ohm, high 100 megs. Fuse affords protection to the resistors in the ohmmeter circuit, especially the X1 setting.

Spring-backed instrument jewels for ruggedness. Accuracy ±2% DC, ±3% AC. Meter movement diode protected against instantaneous overloads.

RANGES

DC Volts: 0-3-12-60-300-1,200-6,000 at 20,000 ohms per volt. **AC Volts:** 0-3-12-60-300-1,200-6,000 at 5,000 ohms per volt. **Ohms:** 0-1,000-10,000. **Megohms:** 0-1-100. **DC Microamperes:** 0-60 at 250 millivolts. **DC Milliamperes:** 0-1.2-12-120 at 250 millivolts. **DC Amperes:** 0-12. **DB:** −20 to +77 (600 ohm line at 1 MW). **Output Volts:** 0-3-12-60-300-1,200; jack with condenser in series with AC ranges. **Usable** with frequencies through 500 kHz. **CASE**—Molded, black, 3-7/32" x 5½" x 7½". Batteries: NEDA #210, 13F.

Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.

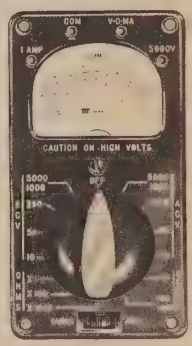
Model 630 Catalog No. 3030 **$64.00**

Pocket Volt-Ohm-Milliammeter MODEL 666-R

1. **One selector switch.**
2. **Three resistance ranges to 3 megohms.**
3. **Five volt ranges to 5,000 AC and DC volts.**

Hand-size—the ideal tester for electrical maintenance. Recessed range knob enables tester to fit in tool kit.

AC rectifier pre-calibrated unit for easy replacement. Banana jacks at top of the panel lessen possibility of leads falling over the meter dial. Accuracy 3% DC, 4% AC.



RANGES

DC Volts: 0-10-50-250-1,000-5,000 at 1,000 ohms per volt. **AC Volts:** 0-10-50-250-1,000-5,000 at 1,000 ohms per volt. **Ohms:** 0-3,000-300,000. **Megohms:** 0-3. **DC Milliamperes:** 0-10-100 at 250 MV. **DC Amperes:** 0-1 at 250 MV.

CASE—Black molded, streamlined, handy pocket size; $3\frac{1}{16}$" x 5⅞" x $2\frac{9}{16}$".

Complete with leads, alligator clips, batteries and instruction manual. Shipping wt. 3 lbs. Batteries: NEDA #814, 13F.

Model 666-R Catalog No. 3066 **$46.00**

Volt-Ohm-Milliammeter MODEL 630-PL TYPE 2

1. **One selector switch minimizes chance of incorrect settings and burnouts. Polarity reversing for DC.**
2. **4.4 Ohms center scale, reads up to 100 megohms resistance.**
3. **Meter movement diode protected against instantaneous overloads.**

Polarity reversing switch. Tester usable with frequencies through 500 kHz. Instant-vision, wider spread scales; streamlined case, handsome modern design. Unbreakable plastic window.

Fuse affords extra protection to the resistors in the ohmmeter circuit, especially the X1 setting. Spring-backed instrument jewels for ruggedness.

High sensitivity: 5,000 ohms per volt AC; 20,000 ohms per volt DC.

Accuracy ±2% DC, ±3% AC.

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000—at 20,000 ohms/volt. 0-0.25 at 100 microamperes. **AC Volts:** 0-3-10-50-250-1,000-5,000—at 5,000 ohms/volt. **Decibels:** −20 to +11, +21, +35, +49, +61, +75; "0" DB at 1 MW on 600 ohm line. **DC Microamperes:** 0-100—at 250 millivolts. **DC Milliamperes:** 0-10-100-1,000—at 250 millivolts. **DC Amperes:** 0-10—at 250 millivolts. **Ohms:** 0-1,000-10,000—(4.4-44 at center scale). **Megohms:** 0-1-100—(4,400-440,000 at center scale). **Output V (AC):** 0-3-10-50-250-1,000—at 5,000 ohms/volt, jack with condenser in series with AC ranges.

Case: Molded, black, 3-11/32" x 5½" x 7½". Batteries: NEDA #210, 13F.

Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.

Model 630-PL Cat. No. 3050 **$64.00**

Volt-Ohm-Milliammeter MODEL 630-PLK TYPE 3

1. **Burnout proof solid state overload protection.**
2. **One selector switch minimizes chance of incorrect settings. DC polarity reversing.**
3. **4.4 Ohm center scale, leads up to 100 megohms resistance in 4 ranges.**

Transistorized electronic switching circuit (exclusive patent) guards against accidental burn-outs. Now you can virtually eliminate bent pointers, burned-out resistors, damaged pivots, overheated springs, burned-out coils, changes in accuracy due to overheating, in fact nearly any need for repairs. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. Overload protection on meter in addition to transistorized circuit that protects tester.

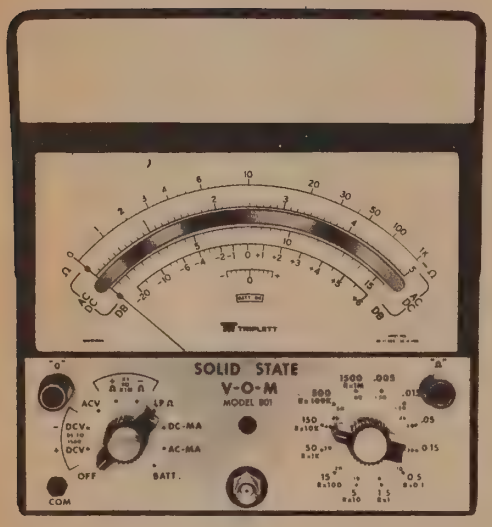
Accuracy ±2% on DC, ±3% AC. High sensitivity: 20,000 Ω/V DC; 5,000 Ω/V AC. Shipping weight 5 lbs.

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt; 0-0.25 at 100 microamperes. **AC Volts:** 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. **Decibels:** −20 to +11, +21, +35, +49, +61, +75; "0" DB at 1 MW on 600 ohm line. **DC Microamperes:** 0-100 at 250 Mv. **DC Milliamperes:** 0-10-100-1000 at 250 Mv. **DC Amperes:** 0-10 at 250 Mv. **Ohms:** 0-1,000-10,000 (4.4-44 at center scale). **Megohms:** 0-1-100 (4,400-440,000 at center scale). **Output Volts (AC):** 0-3-10-50-250-1,000 at 5,000 ohms/volt; jack with condenser in series with AC ranges. **Case:** Molded, black, 3-11/32" x 5½" x 7½". Batteries: NEDA #210, 13F.

Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.

Model 630-PLK Cat. No. 3055 **$98.00**



TRIPLETT CORPORATION

FET V-O-M with LOW POWER OHMS

MODEL 801

1. **Low Power Ohms—8 ranges with 35 mV power source and 1 Ohm center scale.**
2. **High Sensitivity—0.005 V AC full scale at 10 Megohm input resistance.**
3. **Simplified Scale—8" meter with only 2 arcs for 46 AC/DC ranges.**

Designed to be one of the most useful instruments in the electronics lab and electronics field service, the Model 801 V-O-M offers 73 measurement ranges embracing a very broad span of measurements at accuracies to please the most exacting user. Featured are: 15 resistance ranges including 8 low-power ranges applying only 35 mV to the device under test; common AC and DC scales to simplify meter dial; low ranges reading 100 Ohms, 0.005 V AC, 0.05 V DC and 5 μA AC and DC full scale; rugged 8", 25 μA suspension meter. Low-power resistance ranges are ideal for in-circuit checking of ICs, transistors and other solid-state components . . . permit measurements without triggering amplifying and semi-conducting devices. Accuracy: ±2% on all DC voltage ranges except 1500 V ±3%; ±3% on all AC voltage ranges and DC current ranges; ±4% on AC current ranges; ±3% of DC V arc on all resistance ranges. AC ranges for frequencies from 50 Hz to 50 KHz.

RANGES

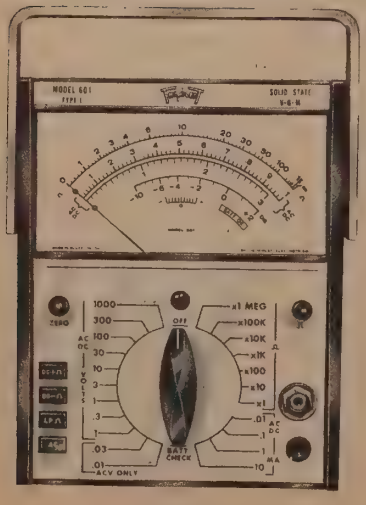
Ten DC Volt Ranges: 0-0.05-0.15-0.5-1.5-5-15-50-150-500-1500. Input resistance 11 Megohms with 1 Megohm series resistor in probe tip. Includes 40 dB 60 Hz rejection filter. **Twelve AC Volt Ranges:** 0-0.005-0.015-0.05-0.15-0.5-1.5-5-15-50-150-500-1500. Input resistance 10 Megohms. Frequency range 50 Hz to 50 KHz. Capacitance at input jack 60 mmfd max. **Fifteen Resistance Ranges:** Low-power ranges of 0-100-1K-10K-100K-1 Meg-10 Meg-100 Meg-1000 Meg at 35 mV and 1 Ohm center reading on the low range. Conventional ranges of 0-1K-10K-100K-1 Meg-10 Meg-100 Meg-1000 Meg at 1.5 V and 10 Ohm center reading on the low range. **Twelve AC and Twelve DC Current Ranges:** 0-5μA-15μA-50μA-150μA-500μA-1.5mA-5mA-15mA-50mA-150 mA-500mA-1.5 A at 45 mV. Optional external shunt for 0-5A-15A measurements. **Twelve dB Ranges:** −50 to +60 dB in 10 dB steps. **Case:** Molded, black, high-impact material with metal handle that can be used to support instrument at approximately 25° angle; etched aluminum panel; 8"x7"x5".

Batteries: 3-4½ V mercury or alkaline; 1-1½ V "D" cell.

Model 801, complete with leads, alligator clips, batteries and instruction manual. Cat. No. 3071 **$200.00**

High Voltage Probe 50 KV Cat. No. 79-292 **$25.20**

RF Probe 250 MHz/20 V Cat. No. 79-289 **$9.50**



Leather Case Cat. No. 10-2467 **$31.00**

15 Ampere Shunt Adapter Cat. No. 91-620 **$10.00**

FET V-O-M with LOW POWER OHMS

MODEL 601

1. **14 Ohmmeter ranges with 7 Low-Power ranges (LPΩ) at 75 mV DC for Transistorized and Integrated circuits.**
2. **Voltage ranges from 10 mV AC and 100 mV DC full scale; plus AC & DC Current ranges from 10 ua full scale.**
3. **Modern easy-to-use push button selection of DC polarity, AC, and Low-Power Ohms (LPΩ) functions.**

Single range selector switch, easy to use. Large 4½" Suspension meter movement. Special Low-Power Ohms circuit has only 0.1 mW of power, permits in-circuit resistance measurements in solid state circuitry. Simple to read uncluttered dial provides quick readings using only four scales for all 52 ranges. 11 Megohm input resistance on all voltage ranges. AC and DC current ranges never before available on a similar unit. Accuracy is ±2% of Full Scale on DC, ±3% AC, (Current, ±3% and ±4%).
Usable with frequencies from 50 Hz to 50KHz.

RANGES

Nine DC Volt Ranges: 0-0.1-0.3-1-3-10-30-100-300-1000 at 11 Meg. **Eleven AC Volt Ranges:** 0-0.01-0.03-0.1-0.3-1-3-10-30-100-300-1000 at 11 Meg. **Fourteen Ohms Ranges:** 0-1K-10K-100K-1 Meg-10 Meg-100 Meg-1000 Meg (Standard 1.5 V, 55 mW.) 0-1K-10K-100K-1 Meg-10 Meg 100 Meg-1000 Meg (Low-Power 0.1 mW, 75 mV). Center Scale value 10 ohms on x1 range. **Four DC Current Ranges:** 0-10-100-1000-10,000 μA at 100 mV. **Four AC current Ranges:** 0-10-100-1000-10,000 μA at 100 mV. **Eleven dB Ranges:** −40 to +60 dB in 10 dB steps.

Case: Molded, black high impact material, $3\frac{3}{16}$" x 5⅛" x 6½".

Batteries: 10 "AA" cells NEDA #15A. Complete with leads, alligator clips, batteries, instruction manual with complete calibration instructions. Shipping weight 5 lbs.

Model 601 Catalog No. 3033 **$158.00**

High Voltage Probe, 30 kV, Cat. No. 79-270 **$26.50**

TRIPLETT CORPORATION

FET V-O-M with AUTO-POLARITY

MODEL 602

1. **Auto-polarity—convenient and time-saving; creates memory and suppressed scale.**
2. **High sensitivity—0.3 V range with 10 Megohm AC and 11 Megohm DC input resistance.**
3. **Simplified scale—only 2 arcs for 24 AC/DC ranges.**

Designed to speed testing by reading upscale regardless of circuit polarity, yet handy push-buttons allow selection and determination of polarity when required. 0.3 V full scale in lowest range on both AC and DC. Tester offers 38 ranges, but 24 AC/DC ranges are read from only two arcs on 4½" meter to keep dial clean and readable. Input amplifier incorporates a high degree of feedback so both AC and DC meter tracking scales are linear. In Auto-Polarity mode, instrument is not adjusted for zero, but for zero or lowest null. This means zero adjustment can be made from virtually any angle without introducing a parallax error. 50 μA suspension-type meter movement absorbs shocks and jars that would disable ordinary meters. Accuracy: ±3% on all Voltage ranges except 1000V ±4%; ±4% on all current ranges; ±3% of DCV arc on resistance. AC ranges for frequencies from 50 Hz to 50 KHz.

RANGES

Eight DC Volt Ranges: 0-0.3-1-3-10-30-100-300-1000 at 11.12 Megohms all ranges. **Eight AC Volt Ranges:** 0-0.3-1-3-10-30-100-300-1000 at 10 Megohms with frequency compensation on all but two top ranges. **Six Resistance Ranges:** 0-1K-10K-100K-1 Meg-10 Meg-1000 Meg. Center scale 10 Ohms on X1 range. **Four DC and Four AC Current Ranges:** 0-1-10-100-1000 mA at 300 mV. **Eight dB Ranges:** −10 to +60 dB in 10 dB steps.

Case: Molded, black, high-impact material with metal handle that can be used to support instrument at approximately 25° angle. 5⅛" x 6½" x 3$\frac{3}{16}$".

Batteries: 2-9V NEDA 1604; 1-1½ V "D" cell.

Model 602, complete with leads, alligator clips, batteries and instruction manual. Cat. No. 3036 **$100.00**

High Voltage Probe 30 KV Cat. No. 79-370 **$26.50**

RF Probe 250 MHz/20V Cat. No. 79-264 **$9.50**

Leather Case Cat. No. 10-1793 **$15.40**

HANDSIZE FET V-O-M

MODEL 310-FET

1. **All Solid-State (F.E.T.) with 10 Megohm input resistance, Battery operated.**
2. **High sensitivity (300 mV DC fs) for transistor bias measurements, resistance measurements to 5,000 Megohms.**
3. **Handsize with single selector switch and provision for attaching AC clamp-on adapter.**

Resistance measurements to 5,000 Megohms. Open Ckt. voltage 1.5V on all ranges. Max. short ckt. current 30mA. Max. pwr. across device under test 11 mW. Rugged Suspension Movement. Accuracy is ±3% of full scale on DC, and ±4% on AC. ±3% of DC arc on Ohms. High Sensitivity (300 mV fs DC) allows transistor bias measurements. Zero center mark for null measurements. Polarity reversing switch for DC and ohms.

RANGES

DC Current: 0-0.12-1.2 milliamperes at 300 mV.

DC Volts: 0-0.3-1.2-6-30-120-600 at 10 megohms.

AC Volts: 0-3-12-60-300-600 at 5,000 ohms per volt.

Ohms: 0-5K-500K-50 Megohms—5,000 Megohms at 50 ohms center scale.

Case: Molded, black, measures 2¾" x 4¼" x 1⅛". 42" leads.

Battery operated, 7V NEDA #1501, 1½V ASA Type N. Battery check on selector switch.

Model 310-FET, complete with leads, instruction manual and batteries. Suggested U.S.A. User Net Price **$74.00**

Catalog Number 3027.

LABORATORY ACCURACY V-O-Ms

Volt-Ohm-Milliammeter MODEL 630-M TYPE 1

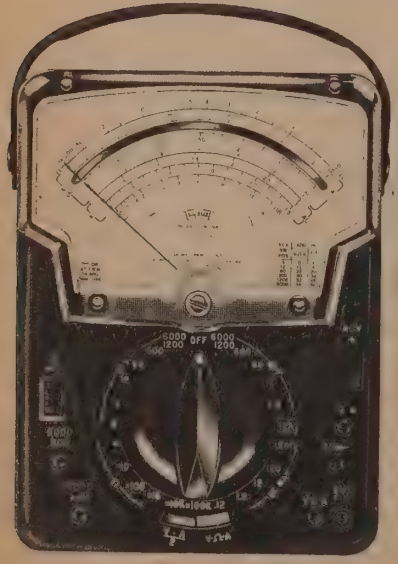
1. **1,000,000 Ohms per volt DC for greater accuracy on high resistance circuits. 20,000 ohms per volt AC.**
2. **1 μa Suspension Meter Movement. No pivots, bearings, or rolling friction. Extremely rugged. Greater sensitivity and repeatability.**
3. **61 Ranges, usable with frequencies through 100 kHz. Temperature compensated. 1½% DC accuracy, 3% AC in horizontal position.**

Now the input impedance of a VTVM with the convenience of a V-O-M. Reads as low as 20 nanoamperes. Components mounted on quality glass epoxy etched circuit board. Meter protected by diodes against accidental overload.

RANGES

D.C. Volts: 0-0.6-3-12-60-300 at 500,000 Ohms/Volt.
0-0.3-1.5-6-30-150 at 1,000,000 Ohms/Volt.
0-1200 at 125,000 Ohms/Volt.
0-600 at 250,000 Ohms/Volt.
A.C. Volts: 0-3-12-60-300-1200 at 10,000 Ohms/Volt.
0-1.5-6-30-150-600 at 20,000 Ohms/Volt.
DB: −20 to +63 in 10 ranges.
D.C. Microamperes: 0-1 at 300 M.V.
0-60-600 at 300 M.V.
0-120 at 600 M.V.
D.C. Milliamperes: 0-6-60-600 at 300 M.V.
0-1.2-12-120-1200 at 600 M.V.
D.C. Amperes: 0-6 at 300 M.V.
0-12 at 600 M.V.
Ohms: 0-1K-10K-100K (4.4-44-440 at center scale)
Megohms: 0-1-10-100 (4400-44,000-440,000 Ohms center scale)
Output: Condenser in series with AC Volt ranges
Case—Heavy, molded black case, 3-11/32" x 5½" x 7½", with removable black leather strap handle. Shipping wt. 5 lbs. Batteries: NEDA 13F.
Model 630-M Cat. No. 3108 **$231.00**

Volt-Ohm-Milliammeter MODEL 630-NS TYPE 2



1. **200,000 Ohms per volt DC sensitivity for greater accuracy on high resistance circuits. 20,000 ohms per volt AC.**
2. **Suspension Meter Movement. Diode overload protected. Extremely rugged.**
3. **62 Ranges. Temperature and frequency compensated. ±1½% DC Accuracy, ±3% AC. Polarity reversing for D.C.**

The unit is precision designed to give maximum coverage, to withstand accidental overloads and to offer greater reading accuracy. Usable with frequencies through 100 kHz. Accuracy 1½% DC, 3% AC.

RANGES

DC Volts: 0-0.6-3-12-60-300-1200 at 100,000 Ohms/Volt.
0-0.3-1.5-6-30-150-600 at 200,000 Ohms/Volt.
0-0.150 at 60 microamperes.
AC Volts: 0-3-12-60-300-1200 at 10,000 Ohms/Volt.
0-1.5-6-30-150-600 at 20,000 Ohms/Volt.
DB: −20 to +63 in 10 ranges.
DC Microamperes: 0-60-600 at 150 Mv.
0-5-120 at 300 Mv.

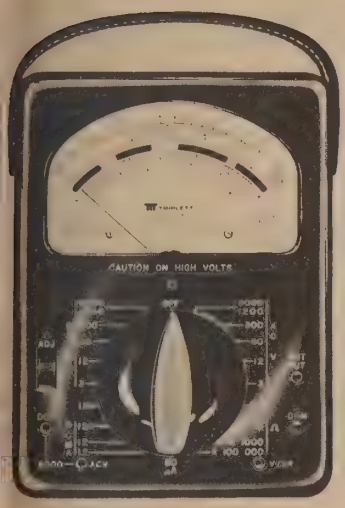
DC Amperes: 0-6 at 150 Mv. 0-12 at 300 Mv.
Ohms: 0-1K-10K-100K (4.4-44-440 at center scale).
Megohms: 0-1-10-100 (4400-44,000-440,000 Ohms center scale).
Output: Condenser in series with AC Volt ranges.
CASE—Molded, black, 3-11/32" x 5½" x 7½".
Shipping wt. 5 lbs. Batteries: NEDA #815, 13F.
Model 630-NS Cat. No. 3102 **$116.00**

Volt-Ohm-Milliammeter MODEL 630-NA TYPE 3

Suspension Movement

1. **One selector switch minimizes chance of incorrect settings and burnouts.**
2. **70 Ranges: 1½% DC accuracy on meter; with mirrored scale and diode overload protection.**
3. **Temperature and frequency compensation. Polarity reversing.**

The super deluxe of V-O-Ms. Usable with frequencies through 500 kHz.
Large open front meter easy to read.
Unbreakable window. Mirror scale.
Meter has special diode protection against the most severe overloads. A fuse affords protection to resistors in the ohmmeter circuit (especially the X1 setting) should too high a voltage be applied.
Accuracy 1½% DC, 3% AC.



RANGES

DC Volts: 0-.6-3-12-60-300-1,200-6,000 at 10,000 ohms per volt.
0-.3-1.5-6-30-150-600-3,000 at 20,000 ohms per volt.
0-0.120 at 60 microamperes.
AC Volts: 0-3-12-60-300-1,200-6,000 at 5,000 ohms per volt.
0-1.5-6-30-150-600-3,000 at 10,000 ohms per volt.
Ohms: 0-1K-10K-100K.
Megohms: 0-1-10-100.
DC Microamperes: 0-120 at 240 millivolts.
0-60-600 at 120 millivolts.
DC Milliamperes: 0-1.2-12-120-1,200 at 240 millivolts.
0-6-60-600 at 120 millivolts.
DC Amperes: 0-12 at 240 millivolts. 0-6 at 120 millivolts.
DB: −20 to +77 (600 ohm line at 1 MW).
Output Volts: 0-3-12-60-300-1,200; jack with condenser in series with AC ranges.
Case—Molded, black, 3-11/32" x 5½" x 7½".
Batteries: NEDA #210, 13F.
Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.
Model 630-NA Cat. No. 3042 **$98.00**

LABORATORY ACCURACY V-O-Ms

Volt-Ohm-Milliammeter MODEL 630-A TYPE 3

1. **±1½% DC, ±3% AC accuracy.**
2. **One selector switch minimizes chance of incorrect settings and burnouts.**
3. **Rugged 5½" suspension meter movement with 4½" mirrored scale.**

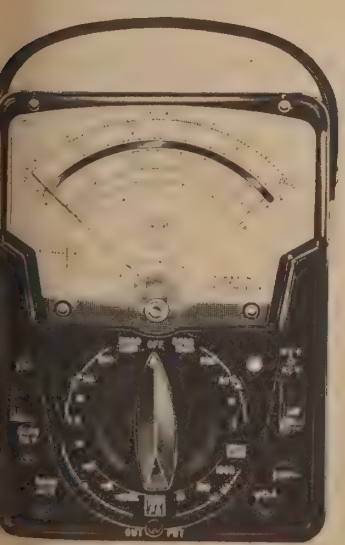
Other features same as Model 630.

A laboratory type Volt-Ohm-Milliammeter with mirrored scale and suspension type movement. Greater accuracy made possible through the use of special ½% resistors. Accuracy ±1½% DC, ±3% AC. Outstanding resistance ranges: low reading .1 ohm, high 100 megs. Fuse affords protection to the resistors in the ohmmeter circuit, especially the X1 setting. Diode overload.

RANGES

DC Volts: 0-3-12-60-300-1,200-6,000 at 20,000 ohms per volt.
AC Volts: 0-3-12-60-300-1,200-6,000 at 5,000 ohms per volt.
Ohms: 0-1,000-10,000.
Megohms: 0-1-100.
DC Microamperes: 0-60 at 250 millivolts.
DC Milliamperes: 0-1.2-12-120 at 250 millivolts.
DC Amperes: 0-12.
DB: −20 to +77 (600 ohm line at 1 MW).
Output Volts: 0-3-12-60-300-1,200; jack with condenser in series with AC ranges.
Usable with frequencies through 500 kHz.
Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.
Model 630-A Catalog No. 3034 **$75.00**

Volt-Ohm-Milliammeter MODEL 630-APL TYPE 3



1. **±1½% DC, ±3% AC accuracy.**
2. **One selector switch minimizes chance of incorrect settings and burnouts. Polarity reversing for DC.**
3. **Suspension meter movement diode protected against instantaneous overloads.**

laboratory type Volt-Ohm-Milliammeter with mirored scale and suspension type movement. Greater ccuracy made possible through the use of special ½% resistors. Accuracy ±1½% DC, ±3% AC. High ensitivity: 20,000 ohms per volt DC; 5,000 ohms per olt AC. Polarity reversing switch. Tester usable with requencies through 500 KHz.

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000—at 20,000 ohms/volt. 0-0.25 at 100 microamperes.
AC Volts: 0-3-10-50-250-1,000-5,000—at 5,000 ohms/volt.
Ohms: 0-1,000-10,000—(4.4-44 at center scale).
Megohms: 0-1-100—(4,400-440,000 at center scale).
DC Microamperes: 0-100—at 250 millivolts.
DC Milliamperes: 0-10-100-1,000—at 250 millivolts.
DC Amperes: 0-10—at 250 millivolts.
DB: −20 to +11, +21, +35, +49, +61, +75; "0" DB at 1 MW on 600 ohm line.
Output V (AC): 0-3-10-50-250-1,000—at 5,000 ohms/volt, jack with condenser in series with AC ranges.
Case: Molded, black, 3-11/32" x 5½" x 7½". Batteries: NEDA #210, 13F.
Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.
Model 630-APL Cat. No. 3038 **$75.00**

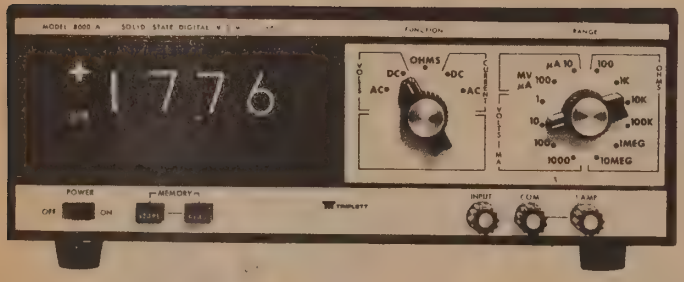
Volt-Ohm-Milliammeter MODEL 630-APLK TYPE 2

WITH OVERLOAD PROTECTION

1. **Burnout proof solid state overload protection.**
2. **One selector switch minimizes chance of incorrect settings. DC polarity reversing.**
3. **4.4 Ohm center scale, reads up to 100 megohms resistance in 4 ranges.**

Suspension meter movement, 4½" mirror scale.
Transistorized electronic switching circuit (exclusive patent) guards against accidental burn-outs. Now you can virtually eliminate bent pointers, burned-out resistors, damaged pivots, overheated springs, burned-out coils, changes in accuracy due to overheating, in fact nearly any need for repairs. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. Overload protection on meter in addition to transistorized circuit that protects tester.
Accuracy ± 1½% on DC, ±3% AC. High sensitivity: 20,000 Ω/V DC; 5,000 Ω/V AC. Shipping weight 5 lbs.

RANGES



DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt; 0-0.25 at 100 microamperes.
AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt.
Ohms: 0-1,000-10,000 (4.4-44 at center scale).
Megohms: 0-1-100 (4,400-440,000 at center scale).

LABORATORY ACCURACY V-O-Ms

Digital Volt-Ohm-Milliammeter MODEL 8000A

8000A

1. **True 0.1% DC accuracy. Virtually no kickback current*. Allows voltage measurements in high resistance circuits at stated accuracy.**
2. **High AC accuracy with nearly perfect linearity and 10 Megohm input resistance.**
3. **Low profile design in shielded case with modular construction for ease in use and maintenance.**

*There is virtually no internally-generated current from the V-O-M input circuit to affect measuring accuracy (Patent pending on this feature).

8000

Recognizing that the kickback current which occurs in every other digital V-O-M seriously affects accuracy in voltage measurements in high resistance circuits, Triplett has virtually eliminated that deficiency through the use of a new circuit (patent pending). The result . . . the Model 8000A Digital V-O-M delivers "true accuracy," up to 50% overrange, test-after-test on any kind of circuit. Also featuring automatic zeroing, 38 measurement ranges, protective circuitry that prevents damage when up to 1000 V AC or DC is applied on any voltage range, and an instant replay circuit that displays a previously-stored reading for on-demand comparison with a current reading. Ohmmeter voltage for full-scale measurement on any range is on 0.1 V DC.

RANGES

Five DC Voltage Ranges: 0-0.1-1-10-100-1000. Input resistance 10 Megohms. Accuracy ±0.1% of reading ±1 digit.

Five AC Voltage Ranges: 0-0.1-1-10-100-1000. Input impedance 10 Megohms. Accuracy ±0.2% of reading ±1 digit except ±0.3% of reading ±1 digit on 100 and 1000 V ranges. **Six Resistance Ranges:** 0-100-1K-10K-100K-1 Meg-10 Meg. Maximum applied voltage 0.1 V DC at full-scale on any range . . . proportionately less for other than full-scale measurements. Accuracy ±0.2% of reading ±1 digit except ±0.3% of reading ±1 digit on 1 Meg and 10 Meg ranges. **Five DC and Five AC Current Ranges:** 0-10 µA-1 mA-10 mA-100 mA-1A at 100 mV on all ranges. Accuracy ±0.2% of reading ±1 digit on DC ±0.4% of reading ±1 digit on AC.

The Model 8000A/8000 Digital V-O-M also features three gas-filled readout tubes and a neon lamp to indicate 1000, a movable decimal point, automatic over-range indication, and auto-polarity on DC. Sample rate is 6 times per second.

Case: All-steel case and internal module covers provide strength and electrical shielding. Etched aluminum panel for long wear. Self-contained stand may be used to elevate the panel approximately 25° for easy viewing. Weight is approximately 9¼ pounds.

Power Requirements: 115 ±10 V AC at 50/60 Hz -12 W. 230 ±20 V AC available on request.

Complete with leads, alligator clips and instruction manual with calibration instructions.

Model 8000-A with Memory Cat. No. G 150 **$630.00**

Model 8000 without Memory Cat. No. G 100 **$575.00**

DELUXE LAB STYLE

Volt-Ohm-Milliammeter MODEL 800 TYPE 2

1. **8" Suspension Meter with 6.95" mirror scale for greater readability plus diode overload protection.**
2. **1½% DC and 3% AC accuracy with temperatures and frequency compensation.**
3. **70 Ranges with a DC polarity reversing switch and fused ohmmeter circuit.**

No other V-O-M offers all the Deluxe features of the Model 800. 3% AC ACCURACY to 1200 volts; mirror and knife-edge pointer to eliminate parallax; USABLE with frequencies to 100 kHz; WIRED CIRCUIT, HIGH FLUX BAR-RING self-shielded magnet; DUAL SENSITIVITY provides extra ranges, DC volts at 20,000 and 10,000 ohms per volt, AC at 10,000 and 5,000 ohms per volt. Shatterproof meter window, molded transparent plastic; fully antistat treated.

RANGES

DC Volts: 0-0.6-3-12-60-300-1200-6000 at 10,000 Ohms per Volt. 0-0.3-1.5-6-30-150-600-3000 at 20,000 Ohms per Volt. 0-.120 at 60 Microamperes. **AC Volts:** 0-3-12-60-300-1200-6000 at 5,000 Ohms per Volt. 0-1.5-6-30-150-600-3000 at 10,000 Ohms per Volt. **DB:** −20 to +70 in 10 ranges. **DC Microamperes:** 0-60-600 at 120 MV. 0-120 at 240 MV. **DC Milliamperes:** 0-6-60-600 at 120 MV. 0-1.2-12-120-1200 at 240 MV. **DC Amperes:** 0-6 at 120 MV. 0-12 at 240 MV. **Ohms:** 0-1K-10K-100K (4.4-44-440 at center scale). **Megohms:** 0-1-10-100 (4400-44,000-440,000 Ohms center scale). **Output:** Condenser in series with AC volt ranges. Batteries: NEDA #13F, 210. **CASE**—Heavy, molded black case, 7½" x 6¼" x 3⅞", with movable handle, which can also serve as a tester stand. Shipping wt. 7 lbs.

Model 800 Cat. No. 3070 **$116.00**

SPECIAL FEATURE V-O-Ms

Solid State Volt-Ohm-Milliammeter MODEL 630-L TYPE 2

1. **2 low power ohms ranges (X1 and X10). 140 Mv. ohmmeter circuit voltage.**
2. **One selector switch minimizes chance of incorrect settings and burnouts.**
3. **Designed for testing in solid-state circuitry.**
   Fused ohmmeter circuit. Diode overload protected meter.

RANGES

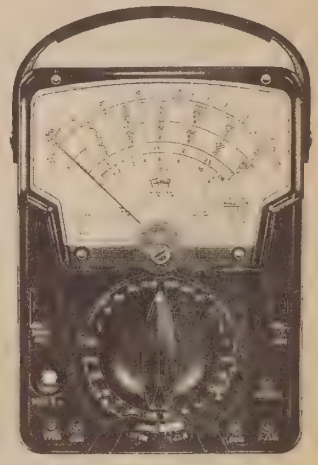
DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt.
AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms per volt.
Decibels: −20 to +75; "0" Db at 1 Mw on 600 ohm line.
DC Microamperes: 0-100 at 120 millivolts.
DC Milliamperes: 0-10-100-1000 at 120 millivolts.
DC Amperes: 0-10 at 120 millivolts.
Ohms: 0-1,000-10,000 (13-130 at center scale).
Megohms: 0-1-100 (4,400-440,000 at center scale).
Output V (AC): 0-3-10-50-250-1,000 at 5,000 ohms/volt, jack with condenser in series with AC ranges.
Case: Black molded, 3-11/32" x 5½" x 7½". Batteries: NEDA #210 & Burgess #13.
Model 630-L Cat. No. 3040 **$69.00**

Combination V-O-M and VTVM MODEL 631

1. **Combination Volt-Ohm-Milliammeter and battery operated Vacuum Tube Voltmeter.**
2. **11 Megohm input to VTVM.**
3. **One selector switch, 34 ranges.**

Large meter easy to read; unbreakable meter face.
Spring-backed instrument jewels for ruggedness.
Accuracy 3% DC, 4% AC, VTVM 4%. Usable to 500 kHz.

V-O-M RANGES



DC Volts: 0-3-12-60-300-1,200 (20,000 ohms per volt).
AC Volts: 0-3-12-60-300-1,200 (5,000 ohms per volt).
Ohms: 0-1,500-15,000.
Megohms: 0-1.5-150.
DC Microamperes: 0-60 at 250 MV.
DC Milliamperes: 0-1.2-12-120-1,200 at 250 MV.
DC Amperes: 0-12 at 250 MV.
DB: −20 to +63. (600 ohm line at 1 MW).
Output Volts: 0-3-12-60-300-1,200; jack with condenser in series with AC ranges.

VTVM RANGES

DC Volts: 0-1.2-6-30-120.
Case: Molded, black, 3-11/32" x 5½" x 7½". Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs. Batteries NEDA #13F, Burgess XX15.
Model 631 Catalog No. 3058 **$86.00**

RF PROBE FOR 631

With this probe and Model 631 RF measurements can be made up to 20 volts at 250 MHz.
RF Probe Catalog No. 79-145 **$10.00**

Electronic Volt-Ohmmeter MODEL 850

1. **Long 7" easy-to-read scale.**
2. **.5 DCV range for transistor circuits.**
3. **High stability—meter connected in cathode circuit of 12AU7.**

Among its outstanding features:
ELECTRICAL PROTECTION of meter against burnout. SEPARATE SCALE on easy-view meter for Peak-to-peak readings. SINGLE UNIT PROBE—with built-in switch for AC/DC/OHMS. Line voltage: 115 VAC 50-60 cycles. Ground type plug. Spring-backed instrument jewels for ruggedness.
Accurate within ±3% on AC and DC. Ohms accurate within ±3% of full scale based on DC scale.

RANGES

Eight DC Volts Ranges: 0-.5-1.5-5-15-50-150-500-1500. **Seven AC RMS Volts Ranges:** 0-1.5-5-15-50-150-500-1500. **Seven Peak-to-Peak Volts Ranges:** 0-4-14-40-140-400-1400-4000. **Seven Resistance Ranges:** 0-1000-10,000-100,000-1 Meg-10 Meg-100 Megohms-1000 Megohms. **Frequency Range:** 15 Hz to 3 MHz; (up to 250 MHz with accessory diode probe available extra). **Input Resistance:** DC Volts 11 Megohms; AC Volts minimum of .83 Megohms.
CASE—Molded black case, 7⅝" x 6 7/16" x 3¾". Carrying handle also can be used to place the tester at 25° angle for ease in reading. Shipping wt. 7 lbs.
PANEL—Etched aluminum.
Model 850 Cat. No. 3074 **$98.00**
MODEL 850 (Foreign—220V, 50 to 60 Hz.) Cat. No. 3075 **$105.00**
Auxiliary Diode Probe for voltages to 20 volts with frequencies to 250 MHz.
Catalog Number 79-215 **$9.50**
High Voltage Probe for DC voltages to 50 KV.
Catalog Number 79-196 **$26.50**

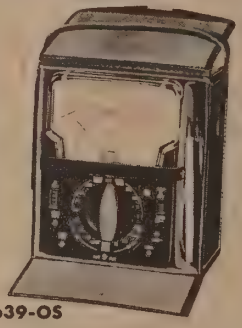
ACCESSORIES LEATHER CASES

For Models 630, 630-A, 630-PL, 630-APL, 630-NA, 630-M, 630-NS, 631, 630-L, 630-PLK, 630-APLK; 601, 602 USES 639-OS CASE ONLY

639-N

Model 639-N black cowhide leather carrying case. Center-cover flaps snap back allowing full view of scales and permitting complete access to instrument without removal from case. Tester stand is included at no extra cost.

Model 639-N
Cat. No. 10-1189 **$13.20**



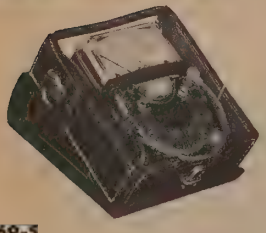
639/639-P

Model 639 black leather case.

Model 639
Cat. No. 10-823 **$13.20**

Model 639-P black cowhide leather carrying case lined with ⅜" sponge rubber.

Model 639-P
Cat. No. 10-921 **$18.80**



639-OS

Model 639-OS—Black leather case, has built-in stand on back. Flaps open to permit use of tester in case. Compartment for accessories. Used with Model 601, and 602, or any 630 series.

Model 639-OS
Cat. No. 10B-1793 **$15.40**

For Models 310-310-C

369-S

Model 369-S leather carrying case for use with Models 310 or 310-C. Has removable leather shoulder strap. The case flap folds back to form a handy stand. Contains a retractable hook for hanging from nails, pipes, etc., freeing both hands. Test leads store in case and remain plugged into tester jacks while flap is closed keeping your 310 or 310-C ready for instant use. Soft shock absorbent lining.

Model 369-S
Cat. No. 10-1791 **$10.50**

379

Model 379 as above, large 310-10 in combination. Has pocket for 101.

Model 379
Cat. No. 10-1456 **$8.40**

Model 369-T Neckstrap Carrying Case for Model 310.

Model 369-T
Cat. No. 10B-1608 **$10.00**

369

369-T

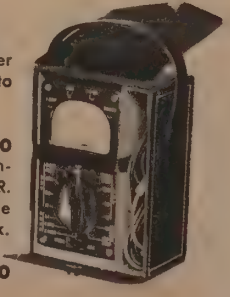
Model 369—Handsome black cowhide leather carrying case for Model 310. Trouser belt slips through loop on back of the case for out-of-the-way carrying.
Cat. No. 10-1258 **$4.40**

TESTER STAND

For Models 800 and 850

Model 859-OP black leather carrying case, lined with sponge rubber. Flaps open to permit use of tester without removal from case. Built-in stand on back.

Model 859-OP
Cat. No. 10-1669 **$24.30**



For Model 666-R

Model 669 black leather case for 666-R. (Similar to Model 639 above).

Model 669
Cat. No. 5616 **$8.80**

Model 669-OS black leather case for Model 666-R. Tester can be used in the case. Built-in stand on back.

Model 669-OS
Cat. No. 10B-1792 **$9.50**

50 Amperes (Portable)	91-244	**16.60**
100 Amperes (Portable)	91-191	**16.60**

REPLACEMENT LEADS

LEADS for Models 630, 630-A, 630-PL, 630-APL, 630-PLK, 630-APLK, 631, 666-R, 630-NA, 630-M & 630-NS, 630-L, 800 ....79-127 **$3.40**

REPLACEMENT LEADS for Models 310, 310-C 79-153 **$3.40**

REPLACEMENT AC-DC—Ohms probe lead assembly for Model 850 .....79-192 **$7.80**

RF PROBE FOR 631

With this probe and Model 631 RF measurements can be made up to 20 volts at 250 MHz. 79-145 **$10.00**

HIGH VOLTAGE PROBES

Completely insulated polystyrene test probe with guard-type handle. Probe is 11¾" long, with 48" high-voltage wire lead with banana plug at tester end.

MODELS 630, 630-A, and 631		
0-30,000 D.C. Volts	79-70	**$18.80**
0-30,000 A.C. Volts	79-71	**18.80**
0-60,000 A.C. Volts	79-152	**18.80**
Models 630-PL, 630-APL, 630-PLK, 630-L		
0-10,000 D.C. Volts	79-83	**$18.80**
0-25,000 D.C. Volts	79-130	**18.80**
0-25,000 A.C. Volts	79-166	**18.80**
Models 630-NA and 800		
0-30,000 D.C. Volts	79-152	**$18.80**
0-30,000 A.C. Volts	79-71	**18.80**
0-60,000 A.C. Volts	79-152	**18.80**
For Model 630-NS		
0- 6,000 D.C. Volts	79-229	**$18.80**
0- 6,000 A.C. Volts	79-230	**18.80**
0-30,000 A.C. Volts	79-152	**18.80**
For Model 630-M		
0-30,000 A.C. Volts	79-152	**$18.80**
0- 6,000 A.C. Volts	79-230	**18.80**
0- 6,000 D.C. Volts	79-247	**18.80**
For Models 601 and 602		
0-30,000 DC Volts	79-270	**$26.50**
RF Probe 50V/250 MHz	79-271	**9.50**
GRD Lead	79-261	**2.50**

Hook-Type Probe

For Model 630 Series and Model 800 .....79-293 **$4.50**

TESTER STAND

Metal stand holds Model 630, 630-A, 630-PL, 630-APL, 630-NA, 630-NS, 630-PLK, 630-APLK, 631, 630-M or 630-L tester in approximately a 45° angle; will enable you to make easier readings.

STAND ONLY—Shipping wt. 1 lb. 255A-35 **$2.20**

PROBES FOR MODELS 310 AND 310-C

PROBE EXTENSIONS for 310 & 310-C leads, insulated, 3 inches long. 11968A **$1.80**

MINIATURE ALLIGATOR CLIPS for use with 310-310-C Probe extensions. 2451A-59 **$.80**

PROBES FOR MODEL 850

Auxiliary Diode Probe for voltages to 20 volts with frequencies to 250 MHz. 79-215 **$9.50**

High Voltage Probe for DC Voltages to 50 KV 79-196 **$26.50**

Special Features—1. High accuracy & mirror scale 2. Sensitivity switch 3. Two low power ohmmeter ranges for semiconductor measurements 4. Overload protection for complete VOM 5. Rack mounted 6. Large 7" scale 7. Suspension meter 8. 1 million ohms/volt sensitivity 9. Battery-operated VTVM (d-c volts) 10. Low cost 11. Miniature size 12. Enclosed selector switch 13. Long scale VTVM. Note: VTVMs have constant input Z 14. F-E-T amplifier circuit 15. AC current ranges same as DC 16. Low-Power ohms (LPΩ) 0.1mW, 75 mV & 7 ranges 17. Automatic Polarity 18. Digital display 19. Memory circuit ‡ N/A Not applicable to this type instrument * 4.4 ohms on X1K & X100K ** Overload diodes protect meter only † Mercury type *** Burgess No. (no NEDA # available)

PYROMETERS & THERMOCOUPLES

PYROMETERS

Both styles incorporate cold junction compensation and copper (resistance) compensation. The pyrometers are calibrated for 5 ohms or 10 ohms as noted in the table below. Pyrometers are supplied less thermocouples.

THERMOCOUPLES

Both Types J and K can be supplied as the exposed junction type with either glass cloth or stainless steel sheathes. Resistance tolerance is ±1% on both the 5 ohms and 10 ohms versions. Both types of insulation sheaths will provide continuous operation to 900°F or a single reading to 1400°F. Stainless steel sheathing improves abrasion resistance.

Special ranges and thermocouples are available on request. Consult factory. As a guide, a 300°F span is the minimum obtainable.

PYROMETERS

TRIPLETT CORPORATION

2¾-Digit Panel Meter

1. **2¾ DIGITS . . . Provides double the accuracy, (.25% of reading ±½ digit) and double the resolution at lower cost.**
2. **INSTANTANEOUS RESPONSE . . . 16 millisecond display rate with 60 times per second sampling rate.**
3. **FOOL PROOF READINGS . . . Numeral display cannot be read if test measurements are beyond range or of negative polarity.**

MODEL 4228-N

Model 4228-N With 2¾ digit feature, indicating capabilities to 199.5 and accuracy of 0.25% of reading ±½ digit.
Suggested Price **$140.00**

Model 4225-N Available with indicating capabilities to 99.5 and accuracy of ±0.5% of reading ±½ digit, retaining all other features of the Model 4228-N.
Suggested Price **$125.00**

Model 4220-N Available with indicating capabilities to 99 and accuracy of ±1% of reading ±1 digit, retaining all other features of Model 4228-N except negative polarity indication.
Suggested Price **$110.00**

3½-Digit Panel Meter

1. **Low-cost, bipolar 3½ digit instrument reads to 100% over-range.**
2. **Dual-slope analog/digital conversion gives high noise rejection, stability and accuracy.**
3. **Single-plane, seven-bar readout for accurate wide-angle readability.**

Accuracy (Voltage): ±0.1% of reading ±1 Digit.
Accuracy (Current): ±0.15% of reading ±1 Digit.

Model 4235-F Suggested Price **$240.00**
($265 with BCD Output)

Model 4230-F Available with indicating capabilities to .999 and accuracy of 0.1% of reading ±1 digit, retaining all other features of Model 4235-F except autopolarity. Over-range indicated by blinking numeral display.
Suggested Price **$220.00**

COLE-FLEX
polyvinylchloride plastic tubing

CONFORMS TO MIL-I-631D

OPERATING TEMPERATURES —20°C to +105°C

***STOCK COLORS:** 1—Clear, 2—Black, 3—White, 4—Yellow, 5—Red, 6—Green.

Type F, Form U, Grade C, Class I, Category 1.

DESCRIPTION: The superior mechanical thermal, and electrical properties of **Cole-flex P-105,** coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of P-105 is its high degree of flexibility which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, P-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. P-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Cole-flex P-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions P-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, P-105 "snakes" well under all environmental conditions.

APPLICATIONS: Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

PF-130 is the toughest and most pliable of insulating materials and is formulated to provide the maximum in electrical characteristics, chemical resistance, heat stability and abrasion resistance.

A Class B, Grade B, insulating material, PF-130, is recommended for conditions requiring continuous operation at temperatures up to 130°C. Prolonged baking at this high temperature does not affect the tubing's retention of color.

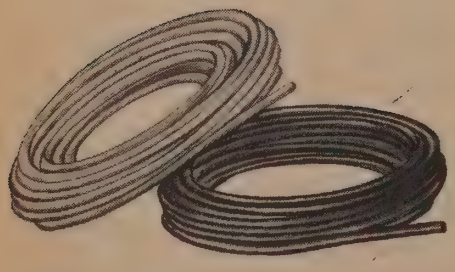
The tubing is constructed from an inorganic fiberglass base sleeving coated with a heat resistant, extremely flexible, tough plastic insulation.

PF-130 has excellent "cut-through" characteristics and is heat-treated to permanently set the glass fibers assuring perfect roundness and ends that will not fray, when cut. Neither the fiberglass base sleeving nor the plastic coating will support combustion.

APPLICATIONS: Because of its toughness and flexibility the material is widely used where tubing is subject to bending, knotting, and high torque. PF-130 will not peel or crack or lose its dielectric values even under conditions involving extreme abuse.

Other applications include use in electric motors, generator or resistor leads where maximum push-back of insulation is desirable.

COLE-FLEX CORP.



COLE-FLEX
extruded teflon tubing

CONFORMS TO MIL-I-22129B, AMS-3653, AMS-3654, CS252-63

Cole-flex Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

Because of its resistance to soldering iron temperature, **Cole-flex** Teflon Tubing will not shrink back during the soldering process. **Cole-flex** Teflon Tubing will not melt and flow as do conventional thermoplastic materials. At high frequencies, its dielectric strength is many times that of other insulating materials.

Cole-flex Teflon Tubing is chemically inert, has zero moisture absorption and its insulation resistance properties are unaffected by heat aging or temperature use up to 250°C.

ALL SIZES CAN BE FURNISHED CUT TO LENGTH ON ORDER.

TUBING CAN BE ETCHED ON THE OUTSIDE SURFACE FOR BONDING PURPOSES. CONTACT FACTORY FOR PRICES. 10 STANDARD MIL-STD-104 COLORS AVAILABLE ON ORDER.

STANDARD PACKAGE ST-221 Tubing is available ONLY in the specified packages. When ordering, indicate package desired (6 inches or 4 foot).

Cole-flex ST-221 Shrinkable Tubing, when heated, forms a tight-mechanical bond, even over irregularly shaped materials. ST-221 is available in a range of colors and in clear.

ST-221 is an all-purpose polyolefin extruded tubing that is simple to use and provides a tight mechanical bond. ST-221 is an irradiated, thermally stable, modified polyolefin base product. ST-221 Clear may be used so that labeled, printed components or cable data is clearly visible and inspection of insulated components, cables or terminations is simplified.

The tubing is supplied in an expanded form and easily slips over the object to be covered. When a temperature of approximately 275°F. (135°C.) is applied, it immediately returns to its predetermined size (approximately one-half smaller) and forms a permanent tight-fitting mechanical bond. ST-221 Tubing will not cold-flow or melt but retains form stability throughout its temperature range. No radioactivity exists in or on the material and it will not emit radiation. Longitudinal shrinkage is 5% maximum when completely recovered.

Controlled shrinkage to the correct predetermined size takes place within seven seconds at 225°F. to 255°F. Shrinkage will begin at 235°F., but at a somewhat slower rate. When using an oven, temperature may range from 225°F. to 300°F. Prolonged exposure to these temperatures will not affect the physical or electrical properties of ST-221 Shrinkable Tubing. ST-221 Clear Tubing remains transparent over its entire operating range of −55°C. to 135°C.

FLAMMABILITY: Although ST-221 Clear is a high temperature material, it is flammable and will burn. However, when the tubing is shrunk over non-flammable or flame-resistant components, such as connectors, terminals and wire, the entire assembly will not support combustion.

Assorted sizes and colors per box — contains an assortment of 6″ lengths in various sizes and colors. Every length identified as to size and supplied in Black, White, Red, Yellow, Blue, and Clear.

ST-205-1"	1	1.000	.500	.040	25, 100

Supplied in Continuous Lengths — No More than 3 Lengths per Put-up.

Cole-flex ST-205 is an easy to use **irradiated** polyolefin tubing supplie in long lengths which make it an excellent cable jacketing material.

Although manufactured to commercial specifications it will meet MIL-I-631 Type F, Form U, Grade C, Class I, Cat. 1. for PVC tubing. Rated at 105° expanded to twice its recovered diameter, flexible, tough, it is an ide material for insulating harnesses, cable cores and components.

Economically priced it is well suited for countless applications not requi ing the temperature ratings of our other shrinkable products. ST-205 ha an indefinite shelf life and will not shrink by aging.

Shrinkage occurs at 245°F. Shrinking Temperature recommended 245° to 275°F.

ST-105-MS — Assorted sizes per box—contains an assortment of 6" lengths in various sizes. Every length identified as to size and supplied in black only.

Cole-flex Number	Tubing Size Range	Lengths Per Box
STA-5	3/64" thru 1/4" (6 sizes)	10 lengths per size (60 lengths)
STA-6	3/8" thru 1" (4 sizes)	10 lengths per size (40 lengths)
STA-7	1½" and 2" (2 sizes)	7 lengths per size (14 lengths)

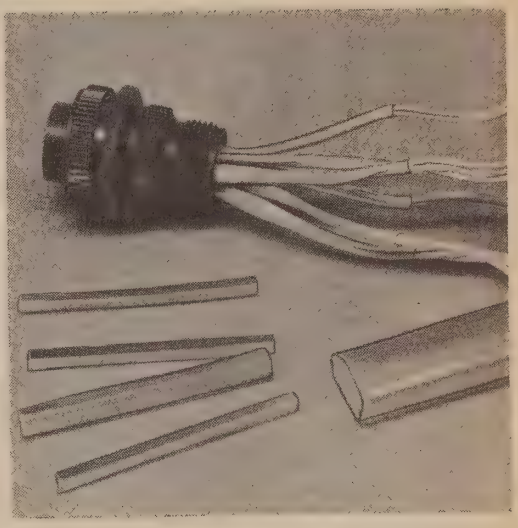
COLE-FLEX



rradiated polyolefin semi-rigid shrinkable tubing

ONFORMS TO MIL-I-23053/6

PERATING TEMPERATURE: —55°C. to +135°C.

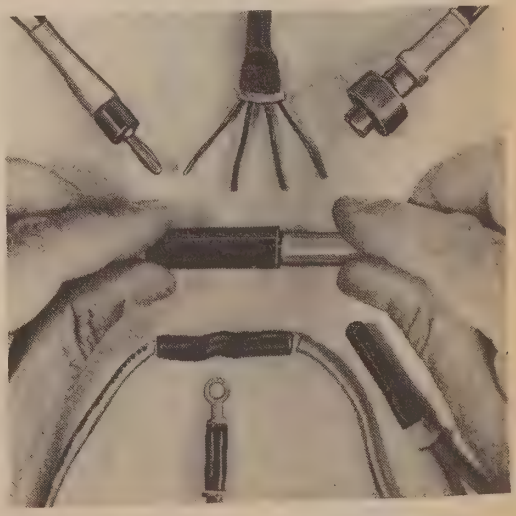
AXIMUM STRENGTH AT STRESS POINTS

HRINKAGE RATIO: 2:1 (50% Shrinkage)

T-295 Shrinkable Tubing is designed to provide maximum mechanical rength at stress or connection points. An extremely strong, heavy wall, rasion-resistant, extruded tubing ST-295 is supplied in expanded form and sily slips over the object to be covered.

hen a temperature of approximately 275°F. (135°C.) is applied, ST-295 mediately returns to its predetermined size (approximately ½ smaller) and rms a permanent tight-fitting mechanical bond. ST-295 will not cold-flow melt but retains form stability throughout its temperature range. No dioactivity exists in or on the material and it will not emit radiation. Longi-dinal shrinkage is less than 5% when completely recovered.

ntrolled shrinkage to the correct predetermined size takes place within ven seconds at 275°F. to 300°F. When using an oven, temperature may nge from 235°F. to 300°F. Prolonged exposure to these temperatures will t affect the physical or electrical properties of ST-295 Tubing.



AMMABILITY: Although ST-295, Clear, is a high temperature material, it flammable and will burn. However, when the tubing is shrunk over non-mmable or flame-resistant components, such as connectors, terminals and res, the entire assembly will not support combustion.

* T.M. PENNSALT.

Cole-flex ST-350 is a new shrinkable tubing with outstanding temperatur and physical characteristics and high dielectric strength. **Longitudina shrinkage is only 5%.**

ST-350 is an extremely tough extruded tubing that can be repeatedly flexed bent, or twisted without loss of its mechanical or electrical strength. Sup plied as a clear tubing, ST-350 may be used where inspection or identifica tion of the item covered is necessary.

When a temperature of approximately 347°F. (175°C.) is applied, the tubin immediately returns to its predetermined size (approximately one-hal smaller) and forms a permanent, tough mechanical bond.

ST-350 will never cold flow or melt and will not split when shrunk ove sharp or irregularly shaped objects.

ST-350 is non-flammable and will operate continuously at temperatures fron −55°C to +175°C. It will withstand intermittent heat shock at tempera tures up to 350°C.

Compared with other fluorocarbon tubing types, ST-350 has markedl superior abrasion, cut-through, and cold flow properties.

SHRINKING METHODS: The use of a hot air gun is recommended as bein generally the easiest heating method. However, excellent results may b achieved by the use of an oven, radiant heat, dipping in hot liquids, o heating with a soldering iron, burner, or even the flame of a match.

COLE-FLEX

NEW – light-weight heat gun for shrinkable tubing

REVOLUTIONARY NEW ORTABLE ELECTRIC EAT GUN FOR EAT-SHRINK APPLICATIONS:

modern design	• versatile
light weight	• reliable
compactness	• no maintenance
quiet	• fast, easy repair
maneuverable	• low cost

rief Specification and Description

OTAL WEIGHT (including cord set): 2 lbs.

VERALL HEIGHT; LENGTH; THICKNESS (Max): 7.50" x 6.50" x 2.75"

VERALL LENGTH (with deflector): 7.75"

OISE LEVEL: Audible — None; R.F. — None

OWER REQUIREMENT 115 vac; 3A (max.): 60 cps.

EAT OUTPUT AT 0.5" (max.)
Measured with dry bulb: > 650°F
Measured with thermocouple: > 1000°F

FM @ FPM: 3 @ 600

UNCTION: Hand held or bench top without modification.

XTERNAL CONSTRUCTION: Stainless steel; high impact polymer.

AINTENANCE: None (Brushless, self-lubricating motor).

EPAIRABILITY: Excellent (less than ten minutes).

ATALOG NUMBER: GUN-1 — Supplied with deflector & U.L. approved 8 ft. 3 wire, grounding wire & plug.

UGGESTED USER PRICE: $37.95

The new Heat Gun has been developed by **Coleman** to answer the need for a modern, compact, reliable, and low-cost portable electric heat-gun for use in heat shrink applications. The Gun offers a unique combination of features and benefits to all users of heat-shrinkable products.

OFF-THE-SHELF

DABURN TRANSISTOR HEAT SINKS and RETAINER CLIPS

IMMEDIATE DELIVERY

Transistor heat sinks made with beryllium oxide, which is unique among inorganic materials, insulates electrically like a ceramic, but conducts heat like a metal. Where electrical applications require both dielectric insulation and hi-heat transfer from device to chassis, only beryllium oxide (BeO) can provide a satisfactory solution to design problems. Heat generating devices will operate at higher power levels longer and more reliably, with beryllia cooling.

BERYLLIUM OXIDE HEAT SINKS OFFERS THESE ADVANTAGES:

- Extremely resistant to shocks, vibration and moisture.
- High resistivity — low dielectric loss
- Increased transistor life and output
- Freedom from outgassing, infinite shelf life

PHYSICAL PROPERTIES & DIELECTRIC STRENGTH

GREATER THAN: 300 Volts/MIL
CHEMICAL PURITY: 99+% Beryllium oxide
DENSITY: 2.9 Grams/CC
MELTING POINT: 4650°F
HEAT CAPACITY AT 350°: 0.3 BTU/LB
THERMAL EXPANSION: 3.2 x 10^{-6}/°F
THERMAL CONDUCTIVITY: 140 BTU/FT² HR°F-FT
TRANSVERSE STRENGTH: 25,000 PSI
ELASTIC MODULES: 40 x 10^{6} PSI

BERYLLIUM OXIDE FOR TRANSISTOR RETAINER CLIPS, HEAT DISSIPATION AND ELECTRICAL INSULATION

TRANSISTOR RETAINERS: Optimum thermal conductivity, with absolute electrical insulation reliability, is offered by spring clip transistor retainers. The retainers provide electrical isolation for the semiconductor by means of a disc of beryllium oxide ceramic brazed to the base of the beryllium copper retainer. Solid ceramic disc, in contrast to a thin insulating coating, is practically immune to loss of insulating value thru cracking, abrasion, chipping or other results of rough treatment in assembly. Heat transfer from the semiconductor to chassis or heat sink is not sacrificed since the high purity BeO has thermal conductivity to that of aluminum metal. Maximum soldering temperature —300°C.

FOR SOLDER MOUNTING

JB® Polystyrene

ROD TUBING SHEET

For radio and electronic applications, because of its very low loss factor at ultra high frequencies, Polystyrene is the ideal material for insulators, coil forms, shields, etc. It has excellent arc resistance, is non-tracking and has splendid insulating properties. Because its water absorption is practically zero it has excellent dimensional stability.

POLYSTYRENE ROD — Transparent
AVAILABLE IN 12" OR 48" LENGTHS

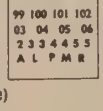
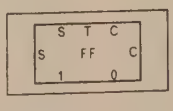
Dial Marking Kit
Contains dial patterns, arc, wedges, lines, dots, switch symbols, graduation lines, lines for rotary tap switches, potentiometers and calibrated meter dials.
DM-1 (14 Pages black — 13 Pages white)

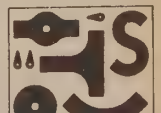


Electronic Symbol Sheets



Electronic Words MarKit®
An electronic glossary with over a thousand words from "AC" to "zooms" in alphabetical order for easy application to control panels, prototypes, drawings, terminal boards, electrical and mechanical components. Size 1/8" high.
EM-1 (black) **EM-1W (white)**

Terminal and Chassis MarKit®
Contains numbers (through 200, 1 through 0 and 01 through 09) plus complete alphabets. All numbers 1/8" high. For application in prototypes and production.
TC-1 (15 Pages black — 12 Pages white)



Logic Diagram Symbols MarKit®
Contains flip flops, arrows, arrow heads, time delays, and, nand, or, nor, registers, shift registers, connection dots, Schmidt triggers, single shots.
LD-1 (black)

DST-1 Thermistors, photocells, Zener Diodes, SCR's.
BRS-1 Bridge Rectifiers, Diodes, SCR's.
UNP-1 FET, Unijunction, NPN and PNP Transistors.
RCT-1 Capacitors, Tubes, Resistors, Potentiometers, Varistors.
BFP-1 Plugs, Jacks, Switches, Lights, Fuses.

Printed Circuit Pads MarKit®
Thousands of printed circuit pads: circles (with center hole), teardrops, teardrops (with vanishing point), double end teardrops, double end teardrops (with vanishing points), elbows, elbow (terminal), T-connectors, fillets, ovals.
PC-1 (black)

MARKETCH® ETCHING SOLUTION
Adhere any desired MarKit® symbol to copper surface of printed circuit boards. Burnish thoroughly. Then deposit entire board into etching solution until all exposed copper is completely etched from board. Symbol will remain as it is, unaffected by etching solution. Wash board under running water. Wipe board dry. Then use thinner or fine sandpaper until bright copper is exposed.
PCE-1 — PRICE $3.00
One pint liquid in unbreakable plastic container. Weight approx. 28 oz.

CC-1 Grounds, Shields, Contactors, Connections.
IRM-1 Relays, Contactors, Heaters, Reactors, Rotating Components, Thermal Delay Relays, Industors, Transformers.
LAB-1 Antennas, Amplifiers, Speakers, Mikes, Boxes.
SHEET SIZE — 8½" x 13½" BLACK ONLY

INTEGRATED CIRCUITS, MONOLITHIC DIGITAL

FJ—FAMILY OF MONOLITHIC DIGITAL INTEGRATED CIRCUITS

High speed, high fan-out and high noise margin (Typ. 1.0V) transistor-transistor logic supply voltage of 5V. Operating temperature 0 to 70°C. Storage temperature −55 to +150°C. Available in the 14-lead dual-in-line package with Amperex "two-in-one" ultra reliable construction. (See drawing 52) except FJJ-101, FJJ-181, FJJ-191 which are 16 leads. (See drawing 54).

Classic

Motors and Gearmotors

Carter Motor ®

Available up to 1/7 hp. Gearmotors from 1 to 750 rpm, up to 13 in. lbs. torque, continuous duty. Universal and DC shunt models, induction and variable speed types, base or flange mounted. Ball bearing, high quality, die cast construction. Ideal for SCR motor controllers, pumps, lab stirrers, machine drives. 3 5/16" dia., 6 1/16" long. Shaft, 5/16" dia., weight 5 lbs. Ask for "Classic" catalog.

115 V. DC SHUNT MOTORS

4 lead reversible, self ventilated, totally enclosed available

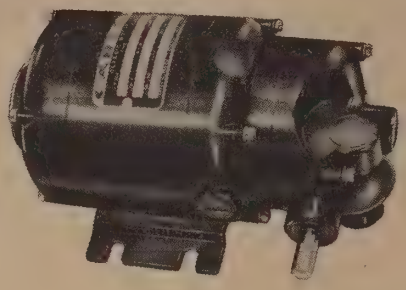
Model	HP	RPM	List
CSA1840A	1/40	1800	$49.50
CSB1830A	1/30	1800	51.00
CSA3628A	1/28	3600	49.50
CSB3620A	1/20	3600	51.00
CSA5020A	1/20	5000	49.50
CSB5015A	1/15	5000	51.00

Other ratings and voltages from 12 V. to 115 V. DC available.

115 V. AC/DC UNIVERSAL MOTORS

2 lead — uni-directional ventilated only

Model	HP	RPM	Rot.	List
CUA3620A	1/20	3600	CCW	$43.00
CUB7510A	1/10	7500	CCW	45.00
CUB1007A	1/7	10000	CCW	45.00



Other ratings and voltages from 12V. to 230 V. DC available.

115 V. CLASSIC PM DC MOTORS

2 lead reversible, base mount totally enclosed

Model	HP	RPM	List
CPA1840E	1/40	1800	$49.50
CPB1830E	1/30	1800	51.00
CPA3628E	1/28	3600	49.50
CPB3620E	1/20	3600	51.00

Other ratings and voltages from 12 V. to 115 V. DC available.

Any of the shunt or PM models listed are available for 12 to 115 volt DC. Universal types from 12 to 230 volts. Add $2.00 to list. Motors can be modified promptly at slight extra cost. Make Carter your specialty motor source.

"CLASSIC" PM DC TACH-GENERATORS

A high output DC Tachometer-Generator for slow speed industrial and commercial purposes. Barium ferrite magnet. Couples to motor shaft and to meter for direct readings without belts or gears to step up speed. Requires no batteries, or external excitation. 2 lead reversible. Face or flange mount available. 5/16" dia. shaft. 1% linearity. Up to 15 watts capacity.

Model Number	DC Output per/1000	Mounting	Max. Speed RPM	List
CTA60AA	60 v.	base	3000	$78.00
CTA50AA	50 v.	base	4000	76.00
CTA25AA	25 v.	base	8000	74.00

Built-in capacitor filter assures ripple of less than 3%. Unfiltered models will average 5% or less AC ripple. Other voltages available.

"ECLIPTIC" TACHOMETER GENERATORS

Converts rotation rate into reference voltage for speed indication. Ideal for motor controllers and various industrial applications such as variable speed drives, textile machines, machine tools, etc. Can couple direct to drive motor, requires no belts or gears. 2 lead, reversible. Linearity below 1%, 5 to 20 MA capacity. May be connected to a DC meter calibrated for RPM, FPM, GPH or other measurements. Size 1-3/8" x 2-1/4" plus shaft, .118 dia. 19/32" long.

M176T1	2.5	v. per 1000 RPM — 10,000	Max.	$51.00
M176T2	5	v. per 1000 RPM — 10,000	Max.	53.00
M176T3	12	v. per 1000 RPM — 4,000	Max.	56.00
M176T4	20	v. per 1000 RPM — 2,500	Max.	70.00
M176T5	1.25	v. per 1000 RPM — 10,000	Max.	51.00
M176T6	10	v. per 1000 RPM — 5,000	Max.	56.00
M176T7	7	v. per 1000 RPM — 6,000	Max.	56.00

CALL ON hurst-POWER HEAVY DUTY HYSTERESIS SYNCHRONOUS MOTORS

HEAVY DUTY SYNCHRONOUS MOTORS

NEW! Mini-Bee

MODEL MB

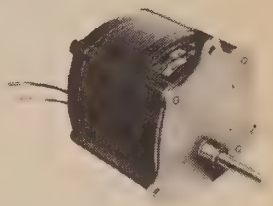
Just 2 13/32" x 2 5/8" long. 1/100 H. P. Start torque 6 in. oz. at 1800 RPM. Sync torque: 5¼ in. oz. Reversible.

- VIDEO RECORDING
- INSTRUMENTATION
- DATA HANDLING
- TAPE RECORDING
- TELEMETERING
- TURNTABLES
- AND NUMEROUS OTHER DIRECT DRIVE APPLICATIONS

Hystereris synchronous. 40°C heat rise, full load. Inverted rotor for reduced flutter. Sealed ball bearings. Stainless steel shafts, lifetime lubrication.

Honey Bee

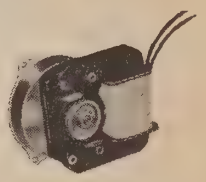
MODEL HB



1/50 H.P. Start torque 12 in. oz. at 1800 RPM. Sync torque: 11 in. oz. Avail. 1800 RPM. 3¾" dia. x 3⅝" long. Reversible.

hurst MODEL GA
600 IN. OZ. OF TORQUE AT 1 RPM (Reversible)

For long life and higher torque applications. Offers instrument manufacturers high performance and economy.

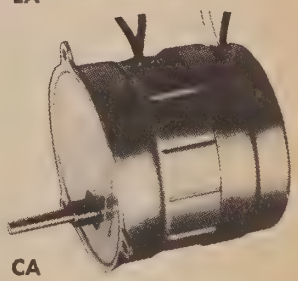


- HEAVY DUTY GEARING
- NO LUBRICATION REQUIRED
- CAPACITOR INCLUDED

MODEL GA

hurst MODEL EA
150 IN. OZ. OF TORQUE AT 1 RPM (CW Rotation)

Open frame, shaded pole, extremely cool running. Bronze bearings, brass gears, hardened steel pinions and wheel shafts, stainless steel output shaft. For dependable, low-cost timing applications. Wide range of speeds.



MODEL EA

hurst MODEL DA
150 IN. OZ. OF TORQUE AT 1 RPM (Reversible)

Timing accuracy both clockwise and counter-clockwise. SPDT switching. Case 2½" diam., 1¾" long. Will not overheat. Capacitor included.

hurst MODEL CA
100 IN. OZ. OF TORQUE AT 1 RPM (Reversible)

Features 1200 rpm rotor speed for quiet performance. Extremely versatile (animated displays, program instruments, outdoor advertising, etc.). Wide range of output speeds. Will not overheat. Capacitor included.

MODEL CA

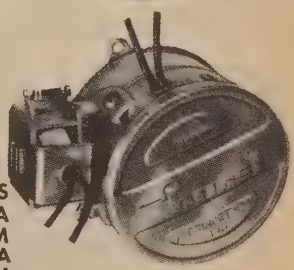
hurst MODEL SM
RATED 40 IN. OZ. OF TORQUE AT 1 RPM (CW Rotation)

For tough jobs demanding accurate timing. Excellent shock and vibration resistance. Starts instantly at full torque. Will not overheat. Wide range of output speeds.

hurst MODEL PC-SM / MODEL PC-DA
CLUTCH AND BRAKE MOTOR 40 IN. OZ. OF TORQUE AT 1 RPM (CW Rotation)

CLUTCH AND BRAKE MOTOR 120 IN. OZ. OF TORQUE AT 1 RPM (Reversible)

Both are positive clutch and instantaneous brake motors. For extremely fast starts and stops. Motor runs continuously with clutch and brake controlled by switching actuator only. Clutch starts output shaft within 20 milliseconds; brake stops output shaft within ⅛° at 1 rpm; within 12° at 60 rpm. Motor on AC voltage; actuator AC. Will not overheat.

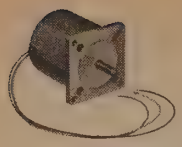


MODELS DA SM

hurst MODEL AR-DA / MODEL AR-SM
100 IN. OZ. OF TORQUE AT 1 RPM (Reversible)

40 IN. OZ. OF TORQUE AT 1 RPM (CW Rotation)

Automatic reset. Planetary-type clutch operates directly upon output shaft. When de-energized, shaft is manual or automatic reset. Addition of external return spring to output shaft provides automatic reset on either model. Motor on AC voltage; actuator AC. Will not overheat. Capacitor included.



MODELS PC-DA PC-SM AR-DA AR-SM

ALL MOTORS 115 VAC, 60 Hz. CAPACITOR FURNISHED ON ALL 'REVERSIBLE' MODELS. MODELS CA, SM, DA, EA, PC-DA, AR-DA, PC-SM, AR-SM STAINLESS STEEL SHAFTS 1" LONG, 3/16" DIA. FLATTED, ¾" USABLE. MODELS MB AND HB STAINLESS STEEL SHAFTS 1" LONG, 3/16" DIA. ROUND. MODEL GA STAINLESS STEEL SHAFT 1" LONG, ¼" DIA. FLATTED, ¾" USABLE.

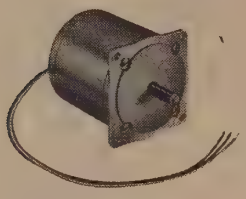
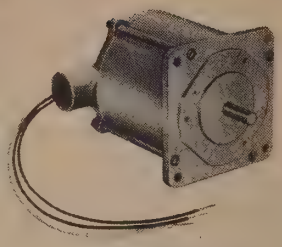
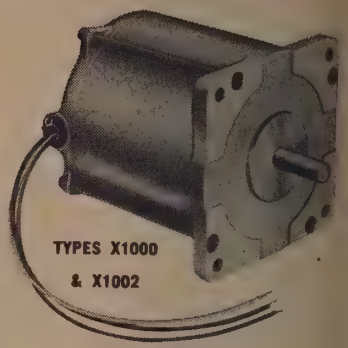
SLO-SYN®



TYPE SS25



TYPES SS400 & SS402



TYPES SS150 & SS152

TYPES TS50 & TS52

TYPES X250 & X252

TYPES X1000 & X1002

A-C OPERATION — Standard SLO-SYN Synchronous/Stepping Motors are permanent magnet a-c motors having extremely rapid starting, stopping and reversing characteristics and a slow basic shaft speed of 72 rpm synchronous with a line frequency of 60 hertz. Three-lead types need only a single-pole, three-position switch for complete forward, reverse and "off" control. No excessive inrush current when energized because starting and operating current are nearly identical. Can be completely stalled without overheating and with no harmful effects on components. Starts or stops in less than 5° of shaft rotation; no need for mechanical or electrical braking. When used with an auxiliary high speed motor, the SLO-SYN motor can remain coupled to the load and safely overdriven. Phase shifting resistor and capacitor must be used when operating from a single-phase source but not from two-phase. All standard motors are rated for continuous duty at maximum ambient temperature of 40°C. Types SS150 and SS152 use Class A insulation; all others have Class B.

D-C STEPPING — When used for phase-switched d-c stepping, the motors can be connected to provide either 100 or 200 steps per revolution. Accuracy of the steps is ±.09° noncumulative. Three-lead types require a center-tapped d-c supply and single-pole, double-throw switching; four-lead types require a single-ended power supply and single pole, double-throw switching. Bifilar motors can also be used with transistorized switching circuits. With a suitable control potentiometer instead of switches, a SLO-SYN motor can be made to rotate steplessly, permitting extremely accurate positioning. All motors have lubricated-for-life bearings.

PRECISION STEPPING

For phase-switched d-c stepping, types HS25, HS50, HS50D and HS50L make 200 steps per shaft revolution. Each 1.8° step is accurate within ±3% (.06°) noncumulative. May be operated at speeds greater than 500 steps per second if accelerating and decelerating circuits are used. With proper circuitry, the motors may be operated at speeds of 1000 steps per second or higher without missing any steps.

200 RPM

Types TS25, TS50 and TS52 are similar to standard models but operate at synchronous speeds of 200 rpm and take 36 or 72 steps per revolution when used for d-c stepping.

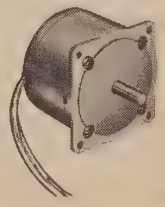
BIFILAR

Used for d-c stepping where use of push-pull circuitry and center-tapped power supply is not possible or where increased torque at high stepping speeds is required.

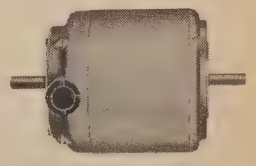
SPECIAL ENVIRONMENT

High Vacuum types for vacuums to 10^{-6} Torr; High Temperature types for temperatures to 130°C; High Radiation types withstand dosage of 3,000 megarads. All available from 50 to 1800 oz-in; High Vacuum 25 oz-in also.



PLANETARY GEAR

Basic 50 and 150 oz-in types and type X250 available with planetary gear assemblies in speeds of 16.6, 3.32, 0.665, 0.133 or 0.027 rpm; 16.6 rpm available in other 250 and on 400 oz-in types.



FOUR-LEAD

Designed for d-c stepping to provide the flexibility needed for use with equipment requiring isolated windings with no common connection.

DOUBLE END

Three-lead, bifilar and four-lead types with output shaft at each end of motor available in all listed torque ratings. 50, 150 and 250 oz-in types available also with planetary gear assemblies in 16.6, 3.32, 0.665, 0.133 or 0.027 rpm speeds.

VISCOUS DAMPED

Type HS50D precision stepping motor has a unique fluid system resulting in a step function approaching critical damping. Speed of response and running characteristics are essentially unaffected by the silicone viscous damping fluid. Possesses characteristics of types described under PRECISION STEPPING on facing page.

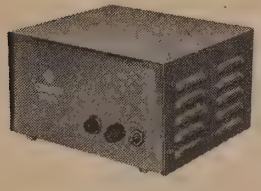
SLO-SYN® *Preset Indexers*

TWO-AXIS
TYPE 2SP1800-4

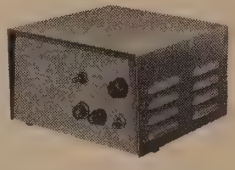
SINGLE-AXIS
TYPE SP1800B-4



ABSOLUTE
TYPE SA1800-5

Used to control indexing of SLO-SYN bifilar motors. The index angle, or position, can be preset by dial setting on the control panel the number of 1.8° steps to be driven. Have provision for actuating any external equipment needed to perform related operations. Index, jog and free run can be initiated manually from the control panel or from an external switch. Can be made to cycle automatically with proper external switching. Single- and two-axis models are available with counting ranges to 99,999 steps. Two-axis models provide independent control of two SLO-SYN motors. Speed adjustable from 4 steps/second up to maximum possible with motor used. Optional backlash take-up circuit.

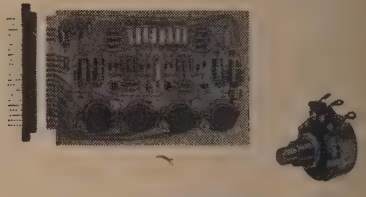
ABSOLUTE PRESET INDEXERS permit either absolute or incremental positioning modes. In the absolute positioning mode, the number set on the controls determines the final position of the motor relative to the starting, or "zero" point. When incremental positioning is used, the motor will move the preselected number of steps each time the INDEX button is pressed. Optional backlash take-up circuit.



SLO-SYN® *Translator*

TYPE ST1800B

Pulse-to-step converter designed for use with appropriate bifilar SLO-SYN motors converted for incremental stepping. Convert low level signal pulses or square waves into the correct switching sequence needed to step a SLO-SYN motor at 200 steps/revolution (1.8° per step). Input is 105-125 volts a-c, 1 ampere. Signal input impedance is 500 ohms. Used for programmed positioning, indexing and indicating operations.

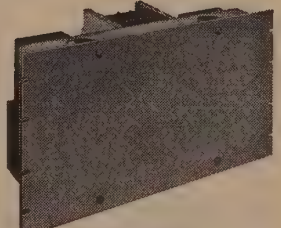


SLO-SYN® *Adjustable Speed Drive*

TYPE ST1800BV

Essentially, SLO-SYN Adjustable Speed Drive type ST1800BV is a translator which includes a built-in oscillator to supply the triggering signals. Oscillator frequency can be adjusted to vary the speed from 4 steps/second up to the maximum permissible with the motor used. Direction of rotation can be controlled either from the front panel or from a remotely located switch.

SLO-SYN® *Translator Module*

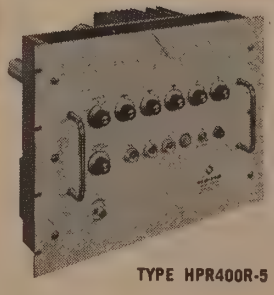


TYPE STM1800V

Plug-in circuit boards with logic capabilities for stepping a SLO-SYN motor in 1.8° increments. Type STM1800 is a basic translator which will provide bi-directional motor operation. Type STM1800V is similar but includes a built-in oscillator which can be adjusted to drive the motor at speeds from 4 steps/second up to maximum at which the motor will drive the load.

SLO-SYN® *High Speed Drives*

Translator



Drive SLO-SYN Precision Stepping Motors up to 2000 steps per second without losing any steps. Triggering the translator circuits is an internal oscillator which can supply a variable frequency range adjustable from 50 to 2000 steps per second. Triggering pulses can be supplied by tape readers, computers, oscillators, pulse generators and other signal producing equipment.

TYPE HTR400

Preset Indexer

Drive SLO-SYN Precision Stepping Motors in indexing and other positioning operations. Acceleration and deceleration circuits permit driving motors up to 2000 steps per second without missing any steps. Decade counter controls on front panel allow the operator to select any desired positioning increment. Optional backlash take-up circuit.

AUTOTRON

Transistorized A725 ON/OFF Control A750 and A750DA Timing Controls

AUTOTRON, INC., Danville, Ill. 61832

Features of A725, A750 and A750DA

One connection changes from LIGHT- to DARK-energized operation (or vice versa).

5.8, 4.7, 3.3, 2.5, 2.2 and 1.1 Light Source Voltages makes available minimum suitable voltage for maximum lamp life and maximum speed of sensing cell response.

Rugged, 5-amp DPDT Plug-in Relay.

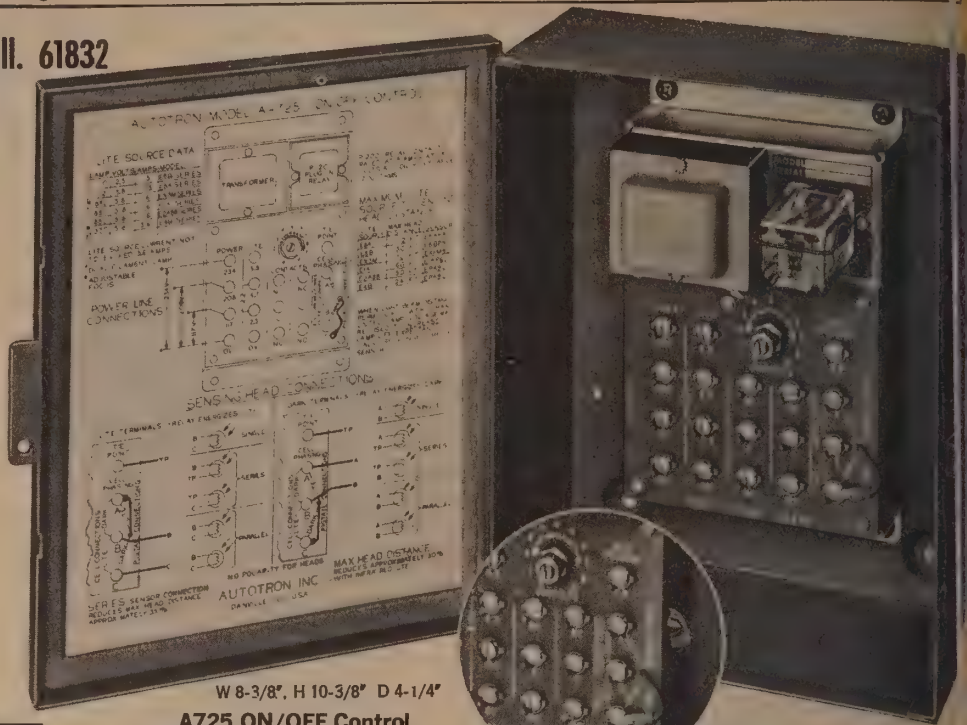
a. **Plug-in mounting** permits replacement in seconds without special skill or tools

b. **Transparent enclosure** protects against dust, physical injury and tampering.

Rectified output current for positive and QUIET operation of control relay.

Transistors protected from transient voltages.

Cad Cells are exceptionally well shielded from extraneous light.



All circuit components are securely mounted on a modern circuit board.

All contacts of the DPDT Relay wired to large, screw type terminals.

Operate at ambient temperatures to 115°F.

In JIC enclosures at $12.50 extra.

Operate from 234, 208 and 117 V, 50-60 c.

W 8-3/8", H 10-3/8" D 4-1/4"

A725 ON/OFF Control
A750 and A750DA models come in the same cabinet with wiring diagrams mounted in the cover.

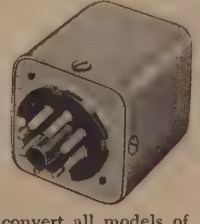
Sensitivity adjustment on A725M, A750P, A750M, A750DA and A750DAM Controls

A725 ON/OFF Control

FAST ACTING – .025 sec. light time and .025 sec. dark time minimum.

SENSITIVE – Adjustment has shaft lock.

Power Consumption, 25 VA.



Energizes LIGHT connected to LIGHT terminals.

Energized DARK connected to DARK terminal.

A870 Solid State AC Switch

Replaces plug-in relay to convert all models of A725, A750 and A750DA series for solid state operation **from 117 VAC power supply ONLY.** Wiring diagram included with each switch.

Output: 117 VAC; 400 watt, 3.4 amperes maximum load, 100 milliamperes minimum.

Ambient Temperature: 115° maximum.

Module temperature increases with load current. At 3 amp. load current, case temperature is normally 130° max.

A870 Solid State AC Switch including Jumper Wires and Fuse Holder with Fuse.....**$52.50**

A870 Solid State Switch can also be furnished for other applications. Information on request.

A750 Timing Control

Timing Ranges (specify)

Range No. .7 adjustable 1 to 8 seconds, approx.
Range No. 1.0–2 to 16 seconds, approx.
(other ranges available–tell us what you need)
Timing adjustment has shaft lock.

Energizes LIGHT and times out DARK connected to LIGHT terminal. Recycle time is almost instant (.015 sec. max.) and is independent of light level on the sensing cell. Timing control is voltage regulated and variation in timing between 100 and 130 volts is negligible.

Energizes DARK and times out LIGHT connected to DARK terminal. Recycle time is 50 milliseconds min. depending on light intensity on the sensing cell. For minimum recycle time reduce light intensity to minimum operating value.

Power consumption, 25 VA.

■ **The suffix "M" in A725M, A750M, and A750DAM identifies extremely sensitive controls with sensitivity adjustment that operate with very short light change. The "M" type controls have been developed for operation by photo sensors that have the "5A Feature" described on the opposite page. This combination is used for scanning register marks, for sensing fast moving objects and other applications where light change is short. Sensors with the 5A Feature are also used where the sensing head is exposed to high temperature.**

A750DA Extra Fast Timed Output Pulse Width Control

Timing Ranges same as A750

The Control Relay of the A750DA energiz instantaneously with adequate light change ar de-energizes at expiration of pre-set timing p riod as follows:

With LIGHT Terminal connection the contr relay energizes instantly when the cell receiv enough light; remains energized even though th cell goes dark and de-energizes when the Timir Period expires, except: while the relay is ene gized, if the cell goes **DARK and then go LIGHT** before the Timing Period expires th relay remains energized **and a NEW Timir Period starts.**

With DARK terminal connection, DARK on th cell produces the same relay action as LIGH does in the above.

Timing and Sensitivity Adjustments are insic cabinet.
Adjustable time delay repeat accuracy 1%. Tim Delay adjustment has shaft lock.

Power consumption, 25 VA.

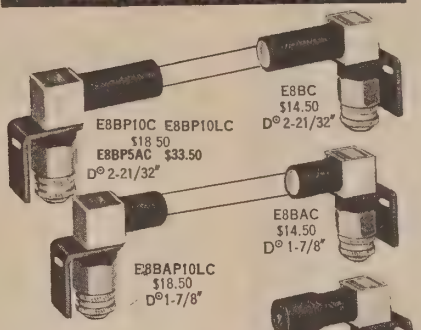
Remote Sensing and Light Source Heads including UL listed, Fiber Optic and Retro-reflective.

AUTOTRON

E8AP/E8A Remote Heads

Series E8A and E8B Construction

Housings are machined from aluminum. Lenses are ground and polished. Lens assemblies are easily removed without dismounting to provide accessibility for inspection or replacement of cell or lamp.



Heads can be turned to any position in the mounting brackets. Overall height, including bracket, 2¼"; including cord grip, approx. 2½"; overall width, including bracket, 15/16". Dimensional diagrams on request.

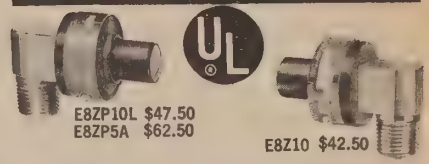
The 5A Feature for High Speed Sensing and High Temperatures.

Sensing Heads with the **5A Feature** rise in 4 milliseconds and decay in 60 milliseconds. The sensing cell withstands temperatures up to 200°F. When required, practically any AUTOTRON photo sensing head can be furnished with the 5A Feature at extra cost.

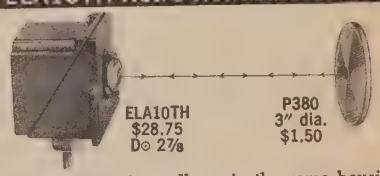
Sensors with the 5A Feature are designed for use with A725M, A750M and A750AM described on the facing page.

E8BP/E8B Remote Heads

Infrared Filter for E8B Heads Easily installed and removed. Gives Light Source invisible infrared beam. Shields sensor from ambient fluorescent light. Reduces max. distance about 50%



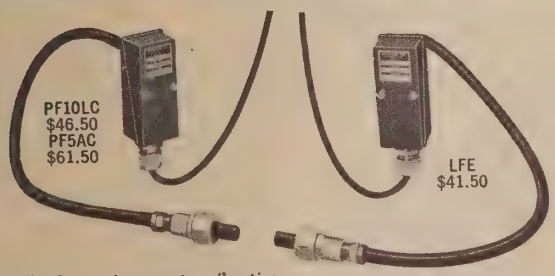
ECP10LC-ECC Subminiature Heads



Each head is ¾" diameter by 2½" long; equipped with 6-foot cord potted to the head, equipped with ¾ NPT fitting for connection to control. Lamp rating; .38 amps at 2.5 volts. Life expectancy, 7,500 hours. Cell and lamp is easily replaceable.

UL listed E8Z Series Heads

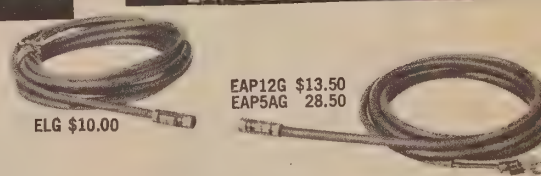
Series E8B cells, lamps and lenses in explosion proof housings, for use in hazardous locations. Underwriters' Laboratories listing: Class I, Groups C and D; Class II, Groups E, F, and G. E8Z10 rated 1.25 w, 2.5 v; E8ZP10L rated 0.125 va. maximum, 40 v. maximum; E8ZP5A rated 0.250 va maximum, 10 v, dc maximum. Mounting threaded for ½-14 NPT. Potted leads, 24" long. Overall size: Approx. 2 15/16" long; 2" high, 1 9/16" wide.



ELA10TH Retro-Reflective Sensor

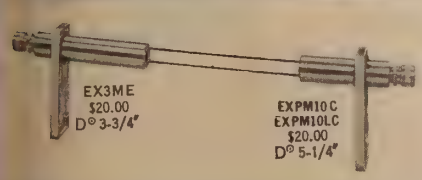
Lamp and sensing cell are in the same housing. Light projected through the lens strikes a retro-reflective surface and returns through the same lens to the sensing cell. The retro-reflective surface may be tilted up to 15° from perpendicular to the light path.

Gasket-sealed, cast aluminum case with 6-foot multi-conductor cable. Slots in mounting flanges are 1" long on 3 1/16" centers. Overall width 3 15/16", height 2 13/16"



PF10LC-LFE Fiber Optic Remote Heads.

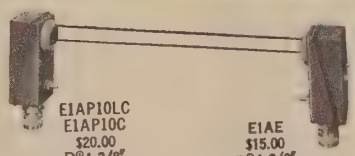
Developed especially for resistance to vibration as well as simplicity of application and alignment in hard-to-get-at places. The Fiber Optic Cables may be bent in any direction with curves of ¾" radius or more.



Each sensing head or light source has a gasket sealed case housing the lamp or cell. The lens tube is assembled to a Fiber Optic Cable, 24" long which is connected to the housing. A 6-foot factory installed cable connects the lamp or cell housing to the control. The heads are equipped with infrared filters for screening out fluorescent light. The lamp is rated .38 amperes at 2.5 volts. Life expectancy is 7,500 hours.

EAP12G-ELG Assemblies

Lens, cell or lamp and 6-foot cable connection are potted in a tube, 9/32" diameter by 1" long. Potting for protection against application conditions and mechanical injury makes the assembly permanent. In case of failure the entire assembly must be replaced. Lamp rating; .38 amps. at 2.5 volts. Life expectancy, 7,500 hours.



EXPM/EX3M Remote Heads

EX3ME Adjustable Focus Light Source has light beam adjustable from focal size of ⅛" x ¼" at 2" focal length to 7/16" x 1" focal size at 6" focal length. Also adjustable to straight light beam. No. 88, 1.6 ampere lamp is housed with ¾" diameter lens in brass tube mounted in aluminum bracket. Height 4¾"; width 1½".

EXPM9C Sensing Head has cad cell housed with ¾" diameter lens in brass tube mounted in aluminum bracket. Height, 4¾"; width, 1½".

E1AP/E1A Remote Heads

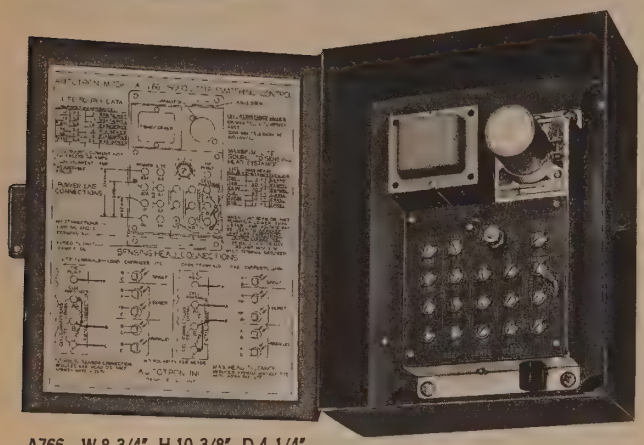
Series E1A heads have ¾" diameter lenses mounted in flexible silicon rubber. Gasket sealed aluminum cases are tapped for ½" conduit. May be adjusted with rigidly positioned on ½" pipe or conduit with lock nut. Case easily opened for inspection of lamp or cell with mounting undisturbed. Depth of case in direction of light beam, 1⅜"; width, 1-7/16"; height 3⅝".

36-page Catalog including 51 application diagrams mailed promptly on request.

In the illustrations and in the Control-Paks photo sensors and light sources are shown in matched pairs for simplicity of arrangement. Any sensing head can be used with any light source if the light source provides enough light to operate the sensor.

EPB10C-E3BE and E4CE

Each above unit has 1½ inch diameter lens in an aluminum lens holder mounted in a gasket sealed cast aluminum case with adjustable mounting bracket. Case is tapped for ¾" conduit. Weight 3½ lbs. Depth 5 11/16", Width 4" Height 5¼".



E3BE has No. 88L lamp, rated 1.6 amp. at 5.8 v. Focusing adjustment provides ½x⅛" focal size at 12" focal length; ⅞x¼" focal size at 24" and 1¼x⅜" focal size at 36" focal length.

E4CE has No. 2330B **prefocused two-filament** lamp rated 3.6 amps. at 5.8 v. The two filaments maintain light source continuity; when one fails a built-in relay switches on the other filament and a signal lamp; also operates SPDT contacts which may be used for remote warning control. The prefocused lamp is replaceable with minimum change in light beam. **Extra** low voltage connection for prolonged life.

A766 Photo-Control with Solid State Switching
A741B High-Speed Counting Eye

A766 - W 8-3/4", H 10-3/8", D 4-1/4"

A766 Transistorized Photo Control with Solid State Switching

A766 Photoelectric Control uses Solid State Switching instead of conventional relays, thereby avoiding weaknesses inherent with mechanical contactors.

Features

24 VDC Fused Output, 30 watt max.—20-ohm load min.

LIGHT- or DARK-actuated—a single connection adjusts phasing.

FAST ACTING—.04 second DARK time; .02 second LIGHT time.

Sensitivity Adjustment with shaft lock.

Transistors are protected from transient voltage.

Choice of 5.8, 4.7, 3.3, 2.5, 2.2 and 1.1 Light Source Voltage provides optimum operating voltage for prolonged lamp life and increased speed of sensing cell response.

All circuit components are securely mounted on printed circuit board.

Operates at ambient temperatures up to 115°F.

Furnished in JIC enclosures at $12.50 extra.

Power consumption, 45 watts, maximum.

Operates from 234, 208, and 117 V, 50-60 C.

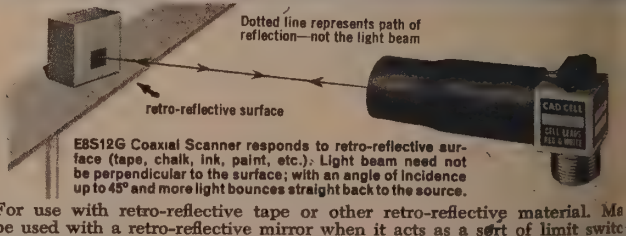
E8LP12G Specular Reflective Scanner Head



For high speed scanning service in minimum space. E8LP12G Scanner Head combines the fast acting cadmium selenide cell and the light source lamp in a single miniature housing (approximately ⅞ inch in all three dimensions plus ⅜" male pipe thread connection. See dimensional diagram below.)

The light sensing element is a fast response, cadmium selenide cell. The lamp has a built-in lens. An infrared filter helps protect against ambient light. The lamp rating is 2.5 volts at .5 amperes-life expectancy up to 75,000 hours depending on operating voltage.

E8LP12G Scanner Head including mounting bracket, also 6-foot factory-connected cable with cable grip and seal for connecting to 800 control. **$28.75**

E8S12G Retro-Reflective Scanner Head

For use with retro-reflective tape or other retro-reflective material. Ma be used with a retro-reflective mirror when it acts as a sort of limit switc or for detecting or identifying objects with retro-reflective marking code marks, labels, etc.

The light beam does not need to be perpendicular to the retro-reflecti surface; beams at angles up to 15° and more (depending on condition bounce straight back to the cell.

E8S12G Scanner Head† with mounting bracket, 6-foot factory connecte cable, cable grip and seal for connection to the control..... **$28.7**

E8S12G-6A has a fixed pin-point beam; focal size 1/16x5/16 at 3¼"

E8S12G-4A has 1/32x⅛" focal size at ⅞" from the end of the light shield.

E8S12G-6A and E8S12G-4A complete with mounting bracket, 6-foot fac tory connected cable, cable seal and grip.....each **$32.2**

High Sensitivity, Transistorized, Compact Photoelectric Controls

AUTOTRON

A579C ON/OFF and A579CP Timing Controls

eatures of above controls

ransistorized. Light Energized

owerful Cad Cell is shock-protective nounted in fixed alignment.

ad Cell is exceptionally well shielded rom extraneous light.

ast Acting – .02 second light; .03 econd dark time, minimum.

ensitive–5 fc minimum light.

ugged, 5-ampere DPDT plug-in re-ay, in plastic enclosure.

ens, ¾" diameter, mounted in flex-ble silicon rubber.

ower consumption, 5 VA. For 115/ 30 v, 50-60 c.

erminals for 2.5 v light source.

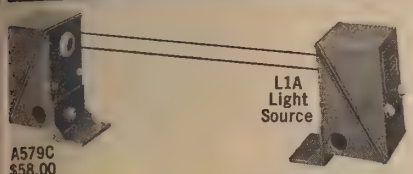
Rectified output for positive and QUIET DC control relay operation.

Transistors are protected from transient voltage.

All circuit components are securely mounted on printed circuit board.

All relay contacts are wired to large, screw type terminals.

Cast aluminum case is gasket-sealed.

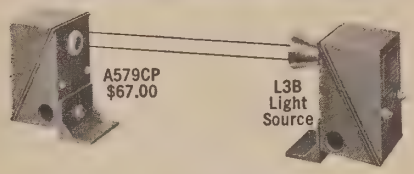


Maximum ambient temperature is 115°F.

Gasket-sealed cast aluminum case, tapped for ¾" conduit, has adjustable mounting bracket.

D° 3 9/16, W 4", H 5½". Weight 3 lb.

A579C ON/OFF Control



Control relay energizes when light is on the cell; de-energizes when light beam is interrupted.

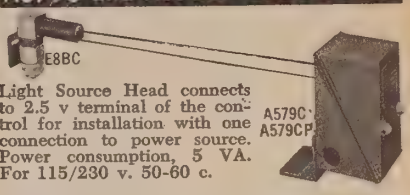
Time Delay is easily added by connecting capacitor to marked terminals. The delay times out DARK (delays de-energizing of control relay when light beam is interrupted). Instructions included with each control.

Control-Pak Numbers Control-Light Source	Max. Feet betw. heads	Control-Pak Net Prices
A579C-L1A	15	$ 77.75
A579C-L2B	30	81.80
A579C-L3B	30	85.50
A579C-L4	15	107.50
A579C-L6C		94.00
A579C-L6R		106.00

Light Sources are described on page 6

A579CP Timing Control

Relay energizes LIGHT: times out DARK (when light beam is interrupted timing elapses before relay de-energizes) Time Delay adjustment from outside case; equipped with shaft lock.



Repeat accuracy 4%.

Timing Ranges { Adjustable } No. 0.4: 0.1 to 5 sec. No. 2.0: 1.0 to 20 sec.

Control-Pak Numbers Control-Light Source	Max. Feet betw. heads	Control-Pak Net Prices
A579CP-L1A	15	$ 86.75
A579CP-L2B	30	90.80

Sensing and Light Source Heads described on Page 2

800C and 800CM Dark-energized ON/OFF Controls

Energizes with the sensing cell DARK.

Chatter free relay operation–due to square wave signal sent to relay coil.

The latest silicon transistors assure extreme temperature stability.

FAST ACTING: .02 second light, .03 second dark, minimum. 800CM is exceptionally fast; 4 microseconds rise time, 60 microseconds decay time.

Sensitivity adjustment has shaft lock.

De-energizing delay can be added by user. Instructions included with each control.

Operate at temperatures up to 115°F. 800CM operates at temperatures to 200°F.

Has terminals for 2.5 v light source.

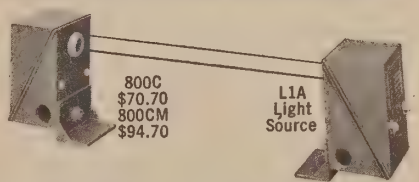
Rugged 5-ampere DPDT Relay, plug-in mounted with "see-thru" plastic cover.

All contacts of the relay wired to screw type terminals.

Transistors are protected from transient voltage.

All circuit components are mounted on a circuit board.

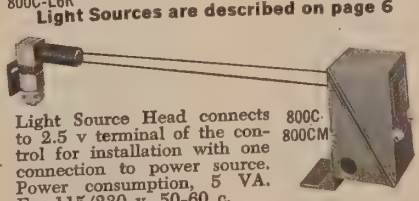
Gasket-sealed cast aluminum case, tapped for ¾" conduit, has adjustable mounting bracket.



Lens, ¾" diameter, mounted in flexible silicon rubber.

Power Consumption, 5 VA. For 115/230 v, 50-60 c.

D° 3 9/16", W 4", H 5½". Weight 3 lbs.



M suffix identifies extremely sensitive controls with sensitivity adjustment that operate with very short light change. The "M" type controls have been developed for operation by photo sensors that have the "5A Feature" described on Page 2 This combination is used for scanning register marks, for sensing fast moving objects and other applications where light change is short.

800C ON/OFF Control-Paks

Control-Pak Numbers Control-Light Source	Max. Feet betw. heads	Control-Pak Net Prices

AUTOTRON

Retro-Reflective Photoelectric Controls
Tube Type Photoelectric Controls

A990 ON/OFF and A990P Timing Controls

A900 and A900P each is a Control-Pak in one case. Sensing cell, light source, amplifiers, sensitivity adjustment and control relay are all in the same housing. Only one connection to power is required. A retro-reflective surface completes the installation.

Light projected through the lens is reflected back through the same lens to the sensing cell. The retro-reflective surface can be up to 15° from perpendicular to the light beam. Retro-reflective tape, paint, etc. may be used. Retro-reflective quality of the target affects operating distance.

A990 and A990P Features

High Sensitivity. Available with and without sensitivity adjustment.

Provides dependable operation when objects block the light beam; also with limited light change such as may be provided by retro-reflective tape on a moving carton.

Transistorized.

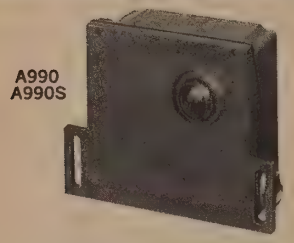
Rugged 5-amp DPDT plug-in relay, with dust cover.

Rectified output for DC operation of Relay.

Transistors protected from transient voltage.

All circuit components securely mounted on modern printed circuit board.

All Relay Contacts wired to screw type terminals.



Maximum ambient operating temperature, 115°F.

Gasket-sealed cast aluminum case tapped for ¾" conduit.

D (direction of light beam) 3⅛", W 6¼", H 5 1/16". Shipping weight, 3½ lbs.

Power Consumption, 10 VA. For 115/230 v, 50-60 c.

A990 ON/OFF Controls

Control relay energizes LIGHT; de-energizes DARK.

Fast Acting: .02 second light; .03 second dark, minimum.

Max. distance, lens to Retro-reflector, 12 ft.

A990 Retro-Reflective ON/OFF Control
Has pre-adjusted sensitivity.....**$59.00***

A990S Retro-Reflective ON/OFF Control
Has sensitivity adjustment from outside case.....**$65.00***

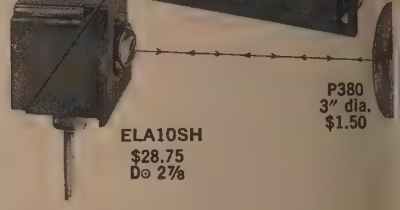
*P380 Retro-reflector, 3" dia. $1.50 extra
*P380A Retro-reflector, 1½" dia. $0.75 extra
*P380B Retro-reflector, ⅞" dia. $0.40 extra

A990P Timing Controls

A single switch adjusts Control Relay to **Energize LIGHT and time out DARK** or to **Energize DARK and time out LIGHT.** Max. distance, lens to Retro-reflector, 15 ft.

Timing Range
No. 0.5 — 0.5 to 4.5 seconds
No. 0.7 — 1 to 8 seconds

A990P Retro-Reflective Timing Control
Has pre-adjusted sensitivity.....**$69.00***



A990PS Retro-Reflective Timing Control
Has sensitivity adjustment from outside case.....**$75.00***

Retro-Reflective Control-Pa

ELA10SH is a remote Retro-reflective Sen Head designed for use with **A990A** and **A99** Controls described below.

A990A and **A990PA** have the same feature **A990** and **A990P** respectively except the sen element is omitted and terminals are prov for connecting ELA10SH Retro-reflective S ner Head. For 115-230 v., 50-60 c. Power sumption 10 VA.

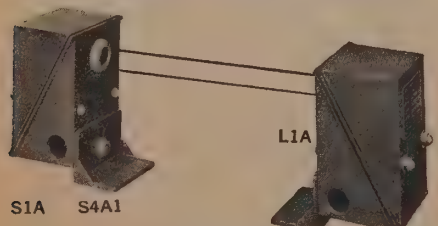
A990A-ELA10SH A990A has pre-adjusted se sitivity **$82.7**

A990AS-ELA10SH A990AS has sensitivity a justment from outside case.....**$88.7**

Retro-Reflective Timing C-Paks

A990PA-ELA10SH A990PA has pre-adjust sensitivity **$92.7**

A990PAS-ELA10SH A990PAS has sensitivi adjustment from outside case.....**$98.7**



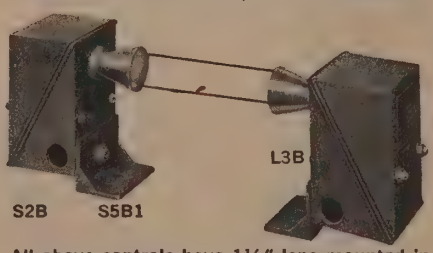
With above controls maximum distance betwe ELA10SH and P380 Retro-reflector is 15 fe

ON/OFF and Timing Photo Controls with Tube Type Sensors

S Series ON/OFF Controls

Rugged, industrial Photoelectric Controls, factory adjusted for use where object interrupts the light beam 100%. Minimum dark time, .06 second; minimum light time, .06 second. Control relay contacts, SPDT, rated 8 amps. at 115 VAC, noninductive load. Splashproof cast aluminum case with adjustable bracket; tapped for ¾" conduit. Power consumption 10 watts.

S1A and S4A1 ON/OFF Controls



All above controls have ¾" lens mounted in flexible silicon rubber. Require 20 foot-candles minimum light. Weight, 2 lb. Dimensions, diagram 24A.

Light Sources for use with Photoelectric Controls
Compact Photoelectric Controls

AUTOTRON

Series L1 Light Sources

A, L1D and L1DA Light Sources all have se features—

Lens, ¾" diameter, mounted in flexible silicon rubber.

Lamp, 88L, rated 1.6 amps. at 5.8 volts.

5.8V. and 4.8V. transformer tap leads for lamp operation; the EXTRA 4.8V. lead permits low voltage operation where feasible to prolong lamp life.

Gasket-sealed cast aluminum case that provides access to the lamp with mounting alignment undisturbed.

L1A Light Source

D⊙3⅜, W 4, H 5½

Has gasket-sealed cast aluminum case tapped for ¾" conduit with adjustable and reversible mounting bracket. Weight, 3½ lbs.

L1A Light Source.....$19.75

L1AR	L1AY	L1ARY	L1ABA	L1ARBA
31.75	$24.75	$36.75	$29.75	$41.75

L1D Light Source

L1D: D⊙ 1.93", W 3.28", H 5.62"

Space-saving gasket-sealed cast aluminum case has mounting flanges front and bottom. Front flanges have four mounting slots; bottom flanges have four mounting holes for ¼" bolts on ⅞" x 2⅝" centers.

Lamp operates at low voltage for extended life. Case is tapped for ½" conduit. For 115/230V 50-60C. Weight 1¾ lbs.

L1D Light Source Net $18.50

L1DA Light Source

L1DA: D⊙ 2.18", W 1.96", H 5.62"

Another space saver—Gasket-sealed cast aluminm case is tapped in center of bottom for ¾" pipe. Use of lock nut permits rigid positioning. Adjustable bracket described below. For 115/230V 50-60C. Weight 1¼ lbs.

Lamp operates at low voltage for extended life.

L1DA Light Source Net $18.50

Adjustable Mounting Bracket

For L1DA Light Source and BC3A Control. Clamp fits ¾" pipe which screws into tapped opening in bottom of above housings. Pipe may be raised, lowered and rotated. Two socket-head set screws lock pipe in desired position.

P381 Adjustable Mounting Clamp ..... Net $3.25

L2B Light Source

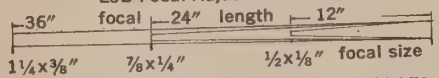
D⊙5⅜, W 4 H 5½

Has 88L lamp, rated 1.6 amps. at 5.8V. 1½" diameter lens in aluminum lens holder. Splashproof cast aluminum case tapped for ¾" conduit with adjustable and reversible mounting bracket. Weight 3½ lbs.

L2B Light Source
.....Net each $23.80

L2BR	L2BY	L2BRY	L2BBA	L2BRBA
$35.80	$28.80	$40.80	$33.80	$45.80

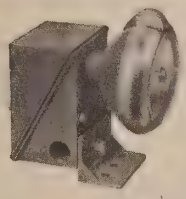
L3B Adjustable Focus Light Source



D⊙5⅜, W 4, H 5½

Has 1½" diameter lens in an aluminum lens holder. Gasket sealed cast aluminum case; tapped for ¾" conduit and with adjustable and reversible mounting bracket. Has 88L lamp rated 1.6 amps. at 5.8V. Transformer taps for 5.8 and 4.8 volt lamp operation which permits low voltage operation where feasible to prolong lamp life. Also has 3-way lamp positioning adjustment shown below with focusing adjustment from ½x ⅛" beam at 12" focal length, and ⅞x¼" beam at 24" focal length to 1¼x⅜" beam at 36" focal length. Weight, 3½ lbs.

Three-Way Lamp-positioning Bracket provided in L3B Adjustable Focus Light Source. The lamp can be positioned to adjust alignment without moving the case. Moving the lamp closer or farther from the lens changes the focus, depending on the size of the lens, as shown in the diagram.



L3B Focal Adjustment Range

L3B Light Source.....$27.50

L3BR	L3BBA	L3BRBA
$39.50	$37.50	$49.50

L6C Hi Intensity Light Source

D⊙6¾, W 4½, H 6

L6C Light Source is recommended for adverse conditions such as steam, vapor, fog, and rain fall where extra light intensity is required. Has #4515 sealed beam spot light swivel-mounted for alignment adjustment. Transformer has 5V and 3.8V taps for lamp operation. Average lamp life is 3000 hours at normal voltage and 10000 hours at low voltage. Gasket-sealed cast aluminum case has adjustable and reversible mounting bracket and is tapped for ¾" conduit. Weight, 6 lbs.

L6C High Intensity Light Source.....$36.00

L6R Hi Intensity Light Source

Has High-Intensity Lamp and SAFETY RELAY.

D⊙ 6,
W 7-1/4
H 5-1/4

L6R has the same operating features as L6C **plus a built-in SAFETY RELAY.** The SAFETY RELAY energizes when the lamp comes on; de-energizes when the lamp fails or goes off. The Safety Relay may be arranged to stop a machine, close a valve, operate a signal or other circuit in case the lamp burns out. Relay contacts are SPDT, rated 5 amperes at 115 VAC, non-inductive. Gasket-sealed cast-aluminum case with rigid mounting feet, tapped for ½" conduit. Weight 7 lbs.

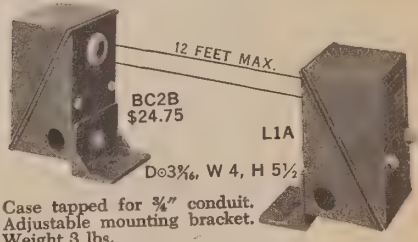
L6R Light Source.....$48.00

36-page Catalog including 51 application diagrams mailed promptly on request.

L4 Dual Filament Light Source

Has Two-filament Lamp to avoid shutdowns.

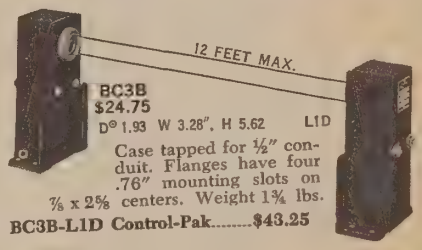
D⊙7¾, W 7¼, H 5¼



Has 2330B prefocused two-filament lamp rated 3.6 amps. at 5.8V. The two filaments maintain light source continuity: when one fails, a built-in relay switches on the other filament and a signal lamp in the housing; also operates SPDT contacts which may be used for remote warning control.

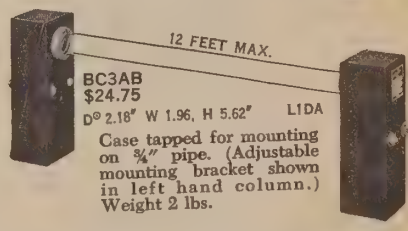
The prefocused lamp permits replacement with minimum change in light beam. Extra low voltage connection for prolonged lamp life. 1½" lens in aluminum lens holder. Gasket-sealed cast aluminum case with rigid mounting feet, tapped for ½" conduit. Weight, 6 lbs.

L4 Light Source.....$49.50



BC2B, BC3B and BC3AB Controls

Light-Energized. Cad Cell sensing element.
¾" lens mounted in flexible silicone rubber
Min. dark time .06 sec.; min. light time .06 sec.
Contacts SPDT, 3-amps at 115 VAC resistive.
Relay plastic enclosed. Power Consumption 0.5 w.
Gasket-sealed cast aluminum cases.
For 115 v. 50-60 cycle operation only.



Case tapped for ¾" conduit. Adjustable mounting bracket. Weight 3 lbs.

BC2B-L1A Control-Pak.....$44.50

Case tapped for ½" conduit. Flanges have four .76" mounting slots on ⅞ x 2⅝ centers. Weight 1¾ lbs.

BC3B-L1D Control-Pak.....$43.25

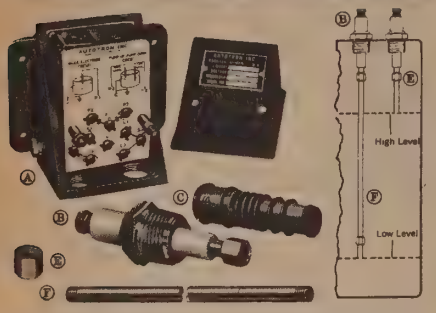
Case tapped for mounting on ¾" pipe. (Adjustable mounting bracket shown in left hand column.) Weight 2 lbs.

BA feature: BEAM INTENSITY ADJUSTMENT

Built-in potentiometer inside light source case but adjustable with screwdriver from outside case, for dimming lamp. To order add suffix BA to Light Source Number and add $10.00 to Price. Example: L1ABA, $29.75.

R feature: SAFETY RELAY

Safety Relay built into the Light Source which may be used to stop a machine, close a valve, operate a signal or other circuit in case the lamp burns out.



The Safety Relay energizes when the light comes on; de-energizes when the lamp fails or goes off. Relay contacts are SPDT, rated 5 amperes at 115 VAC, non-inductive. To order, add suffix R to Light Source number and add $12.00 to price.

AUTOTRON

Specialized Electronic Controls

Electronic Liquid Level Control

For use with liquids up to 750,000 ohms resistance such as acids, bases, salts, milk, beer, water, alcohols, ammonia, distilled water, anti-biotics.

Ⓐ **A744 Control** supplies 20VDC (safe for personnel) maximum probe voltage. Stepless sensitivity adjustment with shaft lock. Plug-in 5 amp. SPDT relay, plastic enclosed. Gasket-sealed cast aluminum case 6-3/16″ wide, 5⅜″ high, 3⅜″ deep. 4 mounting holes for ¼″ bolts on 5½″ x 3″ centers. Power Consumption, 5 W. For 115 or 230v (specify) 50-60c.....**Each $74.50**

Ⓑ **P-304 Electrode** has ½″ pipe threads—may be installed in top or side of tank....**Each $10.60**

Ⓒ **P-305 Elastic Seal** for electrode wiring connection ..... **Each $1.00**

Ⓔ **P-310 hex nut,** stainless steel, ⅝″ long—¼-20 thread.....**Each $1.00**

Ⓕ **P-309 18-8 stainless steel rod** ¼″ x 12″—¼-20 thread both ends.....**Each $1.50**

Type of System Components	One Electrode Quan.	Price	Two Electrode Quan.	Price
Ⓐ A744 Control	1	$74.50	1	$ 74.50
Ⓑ P-304 Electrode	1	10.60	2	21.20
Ⓒ P-305 Dri-Seal	1	1.00	2	2.00
Connecting Cable	10 ft.	3.00	20 ft.	6.00
Price Totals		$89.10*		$103.70*

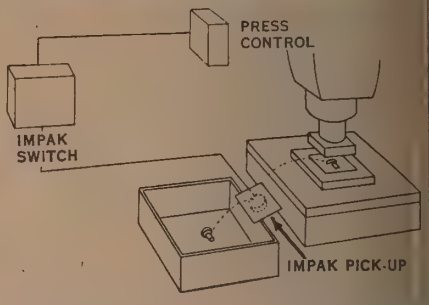
*P-309 Rod and P-310 Nuts not included

Current Surge Overload Protection

Unique Protection for tools, equipment, personnel

The Surj-Switch uses electronic amplification for instant reaction to variations from normal load current. Easily adjusted on the job to operate at the desired value.

The 10-amp, SPDT Control Relay may operate a warning signal, a lubricating circuit, feeding rate control, etc. without interrupting operation or may be used to stop operation.



Used on surface grinders to warn when excessive pressures are applied; on machine tools to warn when tools become dull; on automated installations; **whenever load change indicates trouble.**

Model K1 Surj-Pick-up. Required for operation of Surj-Switch Controls—for 50-60 cycle, 0 to 80 amperes, one or 3-phase, any voltage..**$35.00**

Model J Surj-Switch. For overloads,.....**$55.00**

Model JA Surj-Switch. For under loads....**$65.00**

Impak-Switch Die Protection

In the above diagram each piece properly ejected from the die strikes the impact sensing plate which actuates the Impak Control and the Control re-cycles the press control for another stroke.

The impact of falling parts against the sensing plate of the Impak-Pick-up activates the Impak-Switch. Objects may be of practically any reasonably uniform size, ranging from ball bearings to heavy stampings, etc.

In other die protection applications the Impak Control has time delay set to barely exceed the complete stroke cycle of the press. Each properly ejected piece re-cycles the Impak Control before the timing period expires.

Model V Impak-Pick-up—with 6-ft. shielded plastic-covered cable.....Net $30.00

Model A750V Impak-Switch Control Can be operated by impacts as small as 1/10 ounce falling two inches but impact of each piece against the impact plate must be greater than the vibration to which the Impak-Pickup is subjected.
A750V Impak-Switch (less pickup).....$98.00

A2BX Solar ON/OFF Control

Automatically turns lights "ON" at preset light value—and turns lights "OFF" when light exceeds preset value.

DPDT Control Relay energizes when light exceeds intensity for which control is set; de-energizes when light falls below the preset level.

In case of tube failure the relay de-energizes; providing same control action as when light falls below preset level.

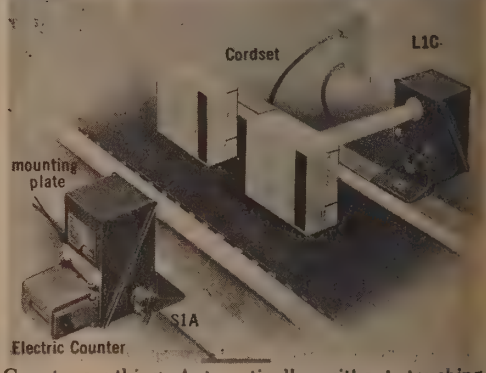
Dual Time Delays prevent operation by either momentary light flashes or shadows. Modern, simple circuitry uses one rugged, premium type power tube. Light intensity adjustment from outside of housing. Gasket-sealed cast aluminum housing, tapped for ½″ conduit. For 115/230 v, 50-60 c. Power consumption, 20 watts

Available with three adjustment ranges:

No. A2BX-.2; 1 to 5 fc for street lighting; parking lots
No. A2BX-.5; 15 to 50 fc for signs, parking lots
No. A2BX-1; 20 to 150 fc for obstruction or tower lights

A2BX Solar Control (all models) Net $76.95

Tubeless Bin Level Control



Tubeless Photoelectric actuation—unaffected by pressure of material in the bin. Only rigid, non-moving Lucite probes project into the bin. Cast aluminum, gasket-sealed housing mounts to bin wall as shown. Removal of cover makes all parts accessible. Dust-covered plug-in DPDT 8-ampere relay provides ON/OFF control for either high or low bin level. All wiring connections brought out of case in 3-foot oil-proof cable. For 115/230V, 50-60 C.

A700—Relay operates from cad cell output, light-energized. Power Consumption, 10 watts. .....**Net $68.00**

A700S—has transistor circuit and sensitivity adjustment—dark-energized. Power Consumption, 5 watts.....**Net $98.75**

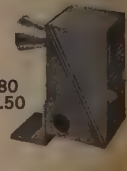
Includes 3-ft cable, face gasket and template.

AUTOTRON Counting Eye

Counts anything—Automatically—without touching the object. Each object must interrupt the light beam .06 second or more. Space between objects must permit restoration of the light beam .06 second or more. Max. distance between lenses, 8 feet.

Counting Eye Components	
S1A Photoelectric Control (see page 5)	$43.75
L1A Light Source (see page 6)	19.75
Cordset: two 6-foot rubber covered cords with plugs and attachment clamps	3.00
Plate and hardware for mounting counter (4 mounting holes on 3-15/16 x 1-23/64″ centers)	1.50
CE-600AS602 Electric Counter (6-digit, knob reset)	41.60

A-138A Counting Eye, 115v, 50-60c. **Net $115.50**



Includes above items wired ready to plug in.

Photoelectric Controls with Infrared Light Beams

For burglar alarms, safety and other applications where an invisible light beam offers advantages. The control lens is shielded from normal light so operation continues night or day whether lights are on or off.

A880-L160A Infrared Control-Pak.....$121.00
For 115/230v, 50-60c. Daylight Range, 50 feet; Night Range, 100 feet.

Photoconductive Cells

This listing represents less than half of the Clairex standard and special photocells available. A 16-page design manual is available on request.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL5M2	.55 X .18	55K	1:100	250	2000-500[1]
CL602	.25 X .5	1 meg.		300	75
CL702	.36 X .18	1 meg.		300	125
CL902	.21 X .15	1 meg.		250	50

Type 2 CdS (photosensitive material designated by last number in ordering abbreviation, i.e. CL5M2). Peak spectral response 5150 angstroms, bluest response photosensitive material, high stability, lowest temperature error.

CL503	.5 X .5	7.2K	1:10,000	250	500-250[1]
CL5M3	.55 X .18	7.2K		250	2000-500[1]
CL603	.25 X .5	133K		300	75
CL603A	.25 X .5	75K		300	75
CL603AL	.25 X .5	3.5K		170	75
CL703	.36 X .18	133K		300	125
CL703A	.36 X .18	67K		300	125
CL703L	.36 X .18	2.7K		100	125
CL903	.21 X .15	133K		250	50
CL903A	.21 X .15	67K		250	50
CL903L	.21 X .15	6.0K		100	50

Type 3 CdSe, peak spectral response 7350 angstroms, fast response, and very high light-to-dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps.

CL504	.5 X .5	1.5K	1:1000	250	500-250[1]
CL5M4	.55 X .18	1.5K		250	2000-500[1]
CL504L	.5 X .5	0.25K		170	500-250[1]
CL5M4L	.55 X .18	0.25K		170	2000-500[1]
CL604	.25 X .5	30K		300	75
CL604L	.25 X .5	1.5K		170	75
CL704	.36 X .18	30K		300	125
CL704L	.36 X .18	0.6K		100	125
CL904	.21 X .15	30K		250	50
CL904L	.21 X .15	2K		100	50

Type 4 CdSe, peak spectral response 6900 angstroms, lowest resistance photocells available. Can be used for "on-off" applications when low resistance is desired. For use with incandescent or neon lamps.

CL505	.5 X .5	9K	1:100	250	500-250[1]
CL5M5	.55 X .18	9K		250	2000-500[1]
CL505L	.5 X .5	1.5K		170	500-250[1]
CL5M5L	.55 X .18	1.5K		170	2000-500[1]
CL605	.25 X .5	166K		300	75
CL605L	.25 X .5	7.5K		170	75
CL705	.36 X .18	166K		300	125
CL705L	.36 X .18	3.3K		100	125
CL905	.21 X .15	166K		250	50
CL905L	.21 X .15	10K		100	50

Type 5 CdS, peak spectral response 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps.

CL705HL	.36 X .18	28K	1:1000	100	125
CL905HL	.21 X .15	100K		100	50
CL905HN	.21 X .15	700K		100	50

Type 5H CdS, peak spectral response 5500 angstroms (closely matches the human eye). Combines high speed, stability, linearity, and uniform color temperature response.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL507	.5 X .5	7.2K	1:1000	250	500-250[1]
CL5M7	.55 X .18	7.2K		250	2000-500[1]
CL607	.25 X .5	133K		300	75
CL707	.36 X .18	133K		300	125
CL707L	.36 X .18	2.7K		100	125
CL907	.21 X .15	133K		250	50
CL907N	.21 X .15	66K		100	50

Type 7 CdS, peak spectral response 6150 angstroms, moderate speed and ratio. Can be used in generat beam breaking applications. For use with incandescent, neon or fluorescent lamps.

CL707H	.36 X .18	500K	1:1000	300	125
CL707HM	.36 X .18	100K		250	125
CL707HL	.36 X .18	10K		100	125
CL907HN	.21 X .15	300K		100	50
CL907HL	.21 X .15	24K		100	50

Type 7H CdS Peak Spectral response 6200 angstroms. Very fast decay time coupled with low resistance and high linearity. Ideal for beam breaking applications.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)	Type
CL703/2	.36 X .18	50K	1:10,000	300	125	3 CdSe
CL703L/2	.36 X .18	6.5K	1:10,000	100	125	3 CdSe
CL704L/2	.36 X .18	1.5K	1:1000	100	125	4 CdSe
CL705/2	.36 X .18	166K	1:100	300	125	5 CdSe
CL705L/2	.36 X .18	7.5K	1:100	100	125	5 CdS

DUAL ELEMENT

Photocells contain two separate elements with two separate leads and one common lead.

COMPLETE INSTALLATION INSTRUCTIONS WITH EVERY UNIT

THREE-UNIT CONTROLS

Model 63 Series represents a line of three high speed, precision Amplifiers; each engineered for a highly specialized use.

Each amplifier is designed for amplification of energy developed by one set of Series 33/23 Fotolectric Heads listed below.

Heavy duty construction throughout, size 9¼" x 11½" x 5". Engineered for 110/120v. 50/60 cy. a.c.

Model 63, the Worner Master Unit, serves most industrial uses. It is generally recommended for supervising fast moving objects and will operate normally up to 750 times a minute.....**Each $144.12**

Model 63-A, equipped with Time Delay Circuit giving delay from 0 to 45 seconds .....**Each $160.77**

Model 63-B, has added amplification to operate on less active change of light .....**Each $171.87**

Model 64. Economy Unit. Operates up to 450 times a minute..**Each $87.90**

WIDE RANGE OF FOTOLECTRIC HEADS

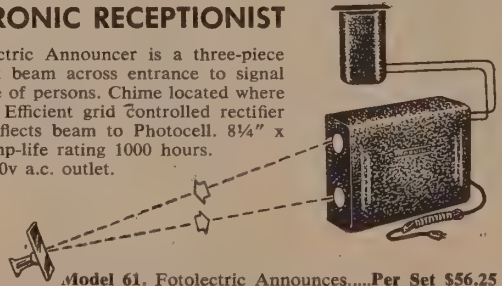
Series 33 Light Sources
Series 23 Photocells

Selection of any of the following seven combinations, with current flow amplified by a choice of any of the above Amplifiers, provides unbeatable control supervision. Units are alike externally.

Model 33 Series Light Sources and Model 23 Series Photocells are heavy duty units. Components are housed in solid metal castings equipped with conduit fitting. Size of case 3" x 3" x 4½".

DIRECTIONAL BEAM for objects over 2" square. Distances listed cover area of supervision (between units).

DISTANCE	LIGHT SOURCE	EACH	PHOTOCELL	EACH
1 to 10 ft.	**Model 33-10**	$23.40	use with **Model 23-10**	$28.80
	Made moisture-proof upon order at $7.50 per unit.			
10 to 25 ft.	**Model 33-25w**	$39.78	use with **Model 23-25w**	$40.32
	These units are moisture-proof.			



FOR SUPERVISING LARGE OBJECTS UP TO 75 FT.

Model 33-C Light Source and Model 23-C Photocell supervise over an indoor distance over 25 ft. up to 75 ft. from unit to unit. 6¼" x 7" x 4½". Use with any of the above Amplifiers.

Model 33-C.....**each $23.88**.....use with **Model 23-C**.....**each $32.76**

THE ELECTRONIC RECEPTIONIST

Model 61 Fotolectric Announcer is a three-piece set. Projects light beam across entrance to signal entry or departure of persons. Chime located where signal is desired. Efficient grid controlled rectifier circuit. Mirror reflects beam to Photocell. 8¼" x 6½" x 3¾". Lamp-life rating 1000 hours. Plugs into 110/120v a.c. outlet.

Model 61. Fotolectric Announces.....**Per Set $56.25**

Model 61-T. Fully transistorized. Size 7¾" x 5¾" x 3⅛"....**Per Set $64.80**

SOLID STATE TWO-UNIT FOTOELECTRIC SET

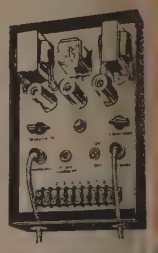
Amplifier, Photocell and Relay are combined in the Receiver unit. Light Source unit is designed with interchangeable optical system for supervising any specified distance up to 25 feet.

TWO-STAGE amplifier system provides: (A) operation direct from the relay to a solenoid, and (B) operation direct to the control of the task. Heavy duty, aluminum units 2½" x 3" x 7½". .....**Per Set $126.60**

SOLID STATE THREE-UNIT FOTOELECTRIC SETS

Model 118 Amplifier
6" x 8" x 5" ..**$111.00**

THREE-STAGE TRANSISTOR AMPLIFIER remotely installed to operate with a choice of Photocell and Light Source combinations according to distances to be handled.



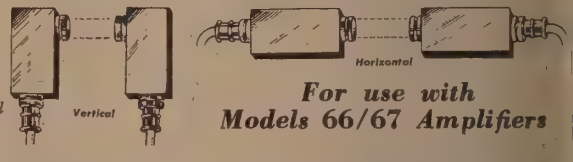
The Amplifier Relay operates at 450 **plus** per minute. Instant-On Feature, no waiting for tubes to warm up. Plug-in relay. D.P.D.T. 5 amp. Inductive per set of contacts. Sensitivity control for photocell input. Light Source control for required amount of light. Send for Model 118 Bulletin with complete descriptions and recommendations for Photocell and Light Source combinations.

AMPLIFIERS FOR MINIATURE HEADS

Model 66/67 Series Amplifiers are available in a choice of four units. For positive and accurate performance, the maximum speed rating of each unit can be regulated provided light projected to the Photocell will have an "on-period" equal to the "off-period" with wiring to Photocell having zero (0) capacity. 110/120v. 50/60 cy. a.c.

Model 67 Amplifier for general applications where fine detection at high speeds is not a factor or Relay is not required to operate in excess of 450 times per minute .....**Each $97.83**

Model 66 Amplifier, operates up to 900 counts a minute. Double-pole, double-throw relay with contact rating 110v. 60 cy. a.c., 10 amp.-non-inductive and 5 amp. inductive. Has light beam intensity control .....**Each $154.80**



Model 66 Amplifier Door removed to show components.

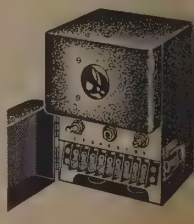
Model 66-A Amplifier, designed for use with ultra high speed electronic decade counters. Accurate counts of light beam interruption or variation of intensity up to 10,000 counts per minute. Output pulses up to 50 volt d.c. regulated by the sensitivity control.....**Each $166.9**

Model 66-T Amplifier, same operating features as Model 66 with added Time Delay circuit to give regulated time delay from 0 to 45 seconds. Efficient for synchronizing operations.....**Each $186.4**

"MINIATURE" FOTOLECTRIC HEADS

For use with Models 66/67 Amplifiers

Machined out of solid aluminum blocks. Light weight, unbreakable, one piece, dependable. Only 1¼" x 2½" x ¾". Unsurpassed for pin-point detection. Distance to cross-over point 3" to 12". Distance of directional beam up to 8 feet. For desired speed, select Amplifier accordingly. Six foot cable equipped both ends with prong-type connectors having screw band tighteners. For 110/120v. 50/60 cy. a.c.

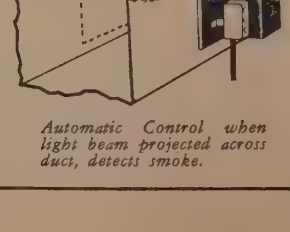


Model M-36 Vertical Light Source.....$37.2
Model M-26 Vertical Photocell Receiver..... 41.3
Model M-37 Horizontal Light Source..... 37.2
Model M-27 Horizontal Photocell Receiver..... 41.3

TWO-UNIT CONTROL

For Indoor Use

Amplifier includes photocell, relay and components. Efficient for distances from a few inches to 75 ft. For use where Relay is not required to operate over 400 times a minute, such as; counting, sorting large objects; limit switches; start, stop operations; opening doors, etc.



Model 62 R & L "Two-Unit Set".....**Per Set $110.25**

STOP Smoking Smokestacks!

GET into Air-Pollution Business Now!

Control smoke at its source. Insure maximum boiler efficiency, profit by fuel economies, prevent waste, protect against violation of smoke control ordinances.

Automatic Control when light beam projected across duct, detects smoke.

A predetermined density of smoke passing through the boiler breaching intercepts the light beam and activates whatever alarm or automatic control equipment is employed. The Amplifier Control unit is remotely installed for observation of its jewel lights which indicate whether correct Ringleman Unit is maintained.

For comprehensive details, please address your distributor for "Worner Combustion Control Bulletin".

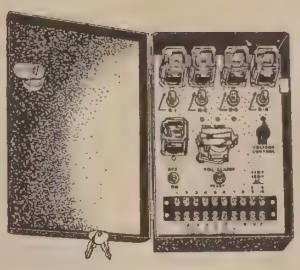
WORNER FOTOLECTRIC PROTECTION



WORNER ELECTRONIC DEVICES

NET PRICES

COMPLETE INSTALLATION INSTRUCTIONS WITH EVERY UNIT

THE WORNER MASTER CONTROL SYSTEM

MODEL 9000 SERIES

onsists of Model 9000-S Master Control Panel. Can ıpervise ONE to FOUR Light Source and Photo-ll detection sets, hereafter referred to as "Foto-ectric Sets".

n separate circuit, the Master Control Panel will so supervise foil tape, door traps and window vitch systems. Both circuits operate independently nd simultaneously. Sounds continuous alarm (until eset) when either of these detection circuits is pened or wiring of Fotolectric system is tampered ith.

his control panel prevents false alarms should ower fail or drop momentarily and resets auto-natically when power is restored. Also operates with ny type electrical devices employed by professional urglar alarm companies.

he unit contains Relays which energize alarm cir-uits. The cabinet size is 7" x 10¼" x 4⅜" and its peration is safeguarded by a pick-proof lock. The nit is installed remotely. Designed for 110/120v. 0/60 cy. a.c.

llustration shows FOUR Relay plug-in location for , 2, 3 and 4 Relays as needed; one Relay for each otolectric (detection) Set used. Model 9000-S Master ontrol Panel is priced "less Relays," as only NE Relay is automatically supplied with each Model o. 9000 series Fotolectric Set ordered.

Model 9000-S Master Control Panel .....**Each $91.08**

Model	Range	Fotolectric Set	Per Set
9100	100 ft.	Light Source & Photocell	134.67
9150	150 ft.	Light Source & Photocell.....	153.57
9075	75 ft.	Light Source & Photocell.....	167.73
9250	250 ft.	Light Source & Photocell.....	175.71
9500	500 ft.	Light Source & Photocell.....	207.00

MODEL 7000 SERIES

Comprises (light Source and Photocell) Fotolectric Sets that operate in conjunction with burglar alarm companies' central control equipment. The Fotolectric Sets do not interfere with operation of Central Alarm Companies', foil tapes or window traps. For 110/120v. 50/60 cy. a.c. For 24v. 60 cy. use Worner Step-Down Transformer.

Model	Range	Fotolectric Set	Per Set
7100	100 ft.	Light Source & Photocell.....	$134.67
7150	150 ft.	Light Source & Photocell.....	153.57
7075	75 ft.	Light Source & Photocell.....	167.73
7250	250 ft.	Light Source & Photocell.....	175.71
7500	500 ft.	Light Source & Photocell.....	207.00

MODEL 5000 SERIES

There are 2 Models. Each model has Light Source and Photocell units. The Photocell unit of each Model contains all amplifier components. Thus each Model is a Two-Unit alarm set. Each is designed for indoor use and not intended for use with foil systems, etc.

Has on-off switch, phone jack to test plate current, sensitivity control. Lock. Alarm can be turned off or trespass trap reset only by the possessor of the key. For 110/120v. 50/60 cy. a.c.

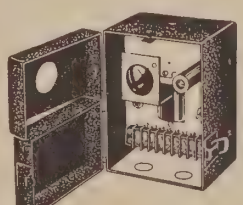
Model	Range	Fotolectric Set	Per Set
5100	100 ft.	Two-Unit System	$134.67
5150	150 ft.	Two-Unit System	153.57

LIGHT SOURCE & PHOTOCELL SETS

All light beams are infra-red (invisible) light.

Sets for 100 and 150 ft. ranges are for indoor use. Sets for 75, 250, and 500 ft. ranges are for both indoor and outdoor use.

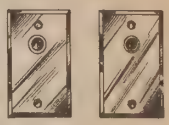
Sets for 75, 150, 250 and 500 ft. ranges have unwanted light rejector for maximum daytime operating efficiency.



Some cases are similar, but circuits vary greatly.

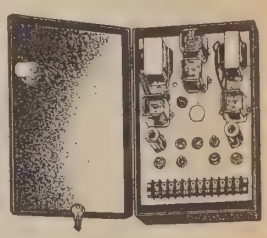
Light Sources and Photocell Units for 100 ft. Ranges. Models: 9100, 7100, 5100.

Light Sources for 150 ft. Range. Models: 9150, 7150, 5150.



Photocells for 150 ft. Range. Models: 9150, 7150, 5150.

Sets for 75, 250 and 500 foot ranges have hooded weather-proof cases. Photocell cases have locks.

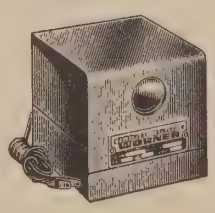


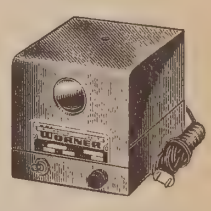
BURGLAR DETECTION UNITS CONCEALED IN THE WALL

Light Source and Photocell Receiver units concealed behind light-switch-type face plates. Projects invisible light beam ranging up to 30 feet (indoors). Standard size wall plates concealing Fotolectric detection units are high finish stainless steel. Light bulb rated 2000 hours. For guaranteed efficiency Model 81/82 Fotolectric sets must be used only with specially engineered Amplifiers listed below. Complete installation instructions enable any electrician to install.

Model 81 "In-Wall" Light Source.....**Each $32.67**
Model 82 "In-Wall" Photocell Receiver.....**Each 38.22**

AMPLIFIERS FOR ABOVE FOTOLECTRIC SET





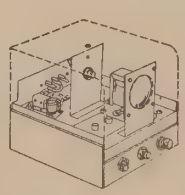
Two specially engineered units for amplifying the energy of the above concealed units.

Circuits with no-voltage control relay prevent false alarms due to line voltage irregularities and will sound alarm if tampered with. Standard alarm continuous, Regulated warning signal "special" upon order. For 110/120v. 60 cy. a.c.

Model 86-1 is a single channel Amplifier Panel that will amplify current flow of one Fotolectric Set.....**Each $140.76**

Model 86-2 is a dual channel Amplifier Panel that will amplify current flow of two Fotolectric Sets, guarding separate areas. Will also supervise one Fotolectric Set, providing for future addition of a second Fotolectric Set **Each $214.83**

TWO-UNIT WORNER WATCHMAN



This Two-Unit Set consists of a Light Source and a Photocell unit that supplies 6-volt energy for activating the alarm circuit.

The Light Source is equipped with removable infrared filter providing visible light beam ranging up to 50 feet. The Photocell unit is equipped with toggle switch for either continuous alarm or to sound only while light beam is broken. Extraneous light rejector maintains daylight range. Two-piece case construction enables removal of cover without mounting. Identical cases 5" x 5" x 5½" welded steel, mahogany hammerloid finish. For indoor use; 110/120v. 60 cycle a.c.

Model 4000 Two-Unit Watchman (Indoors).....**Per Set $ 96.30**
Model 4100 Two-Unit Alarm (Weatherproof)...**Per Set 167.73**

SOLID STATE BURGLAR ALARM

Two-Unit Combination. Indoor Use.

Photocell - Amplifier has 2-piece case for convenient installation and servicing.

The Photocell unit supplies 6-volt a.c. energy to activate a 6-volt a.c. alarm, thus providing a Two-Unit alarm set.

Alarm may be sounded at one or more remote locations. Knob control for continuous, limited or reset alarm. Built-in device minimizes unwanted light. Infrared filter provides invisible light beam ranging up to 50 feet. Both Light Source and Photocell units are externally alike, 5" x 5" x 5½". Two-piece hammerloid cases simplify installation and servicing.

Model 8002 R & L, Solid State Burglar Alarm Set **$99.00**

SOLID STATE INVERTERS

All Units are Frequency Stable and have Automatic Frequency Control

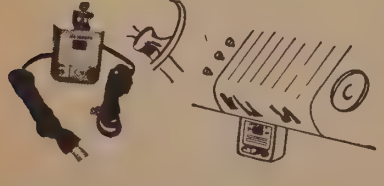
Specially Designed to Provide 117 Volt 60 Cycle AC Power for the Operation of Tape Recorders, VTR Equipment, Publi Address Systems, TV Sets, Ham Gear, Small Portable Tools and Appliances, Test Instruments, Closed Circuit TV, Scientifi Laboratory and Hospital Equipment, Small AC-DC Universal Motors, Fluorescent and Incandescent Lamps from 12 Volt D Storage Battery Power in Automobiles, Buses, Trucks, Campers, Mobile Homes, Boats, and Aircraft.

Illustrates ATR Model 12U-S2A (275-300 Watts)
Overall Dimensions: 11" x 9" x 4"
Shipping Weight: 17 lbs.

Illustrates ATR Model 12U-S4G (400-450 Watts)
Overall Dimensions: 11" x 9¾" x 5¼"
Shipping Weight: 27 lbs.

ATR Model 12U-S6M (600-650 Watts) not illustrated, similar to illustration above
Overall Dimensions: 11" x 11¼" x 6¾"
Shipping Weight: 34 lbs.

ATR SOLID STATE Inverters are Universal Type Inverters recommended for the applications as listed above plus hundreds more! These Inverters are very well filtered and feature quick starting, frequency stability with varying load and input voltage, rugged heavy-duty construction, reverse polarity protection, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated here are equipped with heavy duty power transistors and plug-in frequency reed for automatic frequency control. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is approximately 80%. To figure approximate current consumption from storage battery, divide the rated input wattage of the load being operated by the storage battery voltage, and further divide this answer by .80 which will give the approximate current consumption from the battery based on the actual load being operated. These Inverters are recommended primarily for use with loads having power factors in excess of 70%. Inverters come complete with battery cables ready for operation.

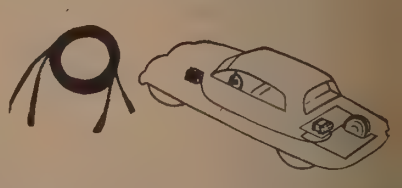


Type	DC Input Volts	AC Output 60 Cycles (Volts)	Output Wattage		Dealer Price
			Int.	Cont.	
12U-S2A	12	117	300	275	$139.50
*12U-S2A-P	12	117	300	275	139.50
12U-S4G	12	117	450	400	198.45
12U-S6M	12	117	650	600	249.75

"-P" model is equipped with cigarette lighter cord set to plug into dash receptacle. Caution — Do not load beyond 150 watts due to possible damage to cigarette receptacle wiring.

All ATR Inverters are housed in attractively finished brown-hammeroid metal cabinets and are complete with battery cables ready for operation.

For Inverters having larger or smaller output capacities, or for operation on other DC input voltages from 6 volts to 220 volts, please consult available ATR Inverter catalog sheets.



ACCESSORIES

REMOTE CONTROL UNIT — for under-dash mounting permitting installation of Inverter in auto-trunk compartment.
Dealer Price $10.95

MOUNTING BRACKETS — to securely mount Inverter in trunk compartment of car or under-dash, as illustrated.
Dealer Price $5.45 pr.

EXTENSION CABLES — to provide additional cable lengths for installation of Inverter in trunk compartment.
Dealer Price $21.75 pr.

ATR UNIVERSAL INVERTERS

Specially Designed for Operating Standard A.C. Tape Recorder, Television Set, Dictating Machine, Radio Set, Ham Gear, Public Address System, Amplifier, Record Player, Electric Razor, Food Mixer, Vacuum Cleaner, Sewing Machine, Business Machine, Electric Drill, Fluorescent and Incandescent Lamp, and Electronic Test Equipment from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, Planes, and D.C. Districts. Ideal for Emergency Lighting Applications for Civil Defense, Red Cross, Rescue Work, etc., Simply Using Extension Cords.

ATR Universal Inverters are actually a combination of 4 Inverter designs in one unit! These Inverters are especially recommended for applications as mentioned above and feature complete RF frequency interference suppression, instant starting, frequency stability, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated are equipped with ATR heavy duty plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulator which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of 75%. To figure approximate current consumption from storage battery, divide the rated input wattage of the recorder (or load) being operated by the storage battery voltage and further divide this answer by .75 which will give the actual current consumption based on the actual load and efficiency. The battery current consumption required for a tape recorder is normally less than that drawn by ordinary automobile headlight(s). These Universal Inverters are recommended only for use with loads having power factors in excess of 70%.

Featured cut above illustrates Model 12U-RHG.

All Units are Frequency Stable and have Automatic Frequency Control.

"—P" models equipped with cigarette lighter cord set to plug into dash receptacle.

All ATR Universal Inverters are housed in attractively finished brown-hammerloid metal cabinets.

Dimensions of Standard (RSF) Model Universal Inverters, 8½" x 9⅞" x 5¼"; shipping weight 22 lbs.

Dimensions of Heavy Duty (RHG) Model Universal Inverters, 6⅞" x 11¼" x 8½"; shipping weight 27 lbs.

Dimensions of Super Heavy Duty (HSJ) Model Universal Inverters 6½" x 12⅞" x 8½"; shipping weight 37 lbs.

For correct replacement Vibrator, consult Inverter Vibrator Guide.

* Recommended for 24 volt battery systems.

ACCESSORIES for 6, 12, and 28 Volt D.C. Input Inverters.

REMOTE CONTROL UNIT — for under-dash mounting permitting installation of Inverter in auto-trunk compartment.

Dealer Price $10.95

MOUNTING BRACKETS — to securely mount Inverter in trunk compartment of car or under-dash, as illustrated.

Dealer Price $5.45 pr.

EXTENSION CABLES — to provide additional cable lengths for installation of Inverter in trunk compartment.

Dealer Price $10.95 pr.

PORTABLE — Plug-in Type INVERTERS

All Units are Frequency Stable and have Automatic Frequency Control.

Specially Designed for Operating Standard A.C. Dictating Machines, Record Players, Incandescent Lamps, Electric Razors, Electronic Test Equipment, and Other Small Electrical and Electronic Devices from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Planes, Trains, and D.C. Districts.

ATR Portable Inverters are light-weight plug-in units for applications as recommended above. These Inverters feature instant starting, frequency stability, and high efficiency and reliability. Inverters have partial RF filtering which is only suitable for small insensitive type radios. For sensitive radio sets, ATR Universal Inverters, catalog sheet 657U, must be used. The 6 and 12-volt units are equipped with cigarette lighter cord set to plug into dash receptacle; whereas, the other higher input voltage units are equipped with standard two-blade plug-in cord sets. With ATR Inverters the need for special equipment is eliminated. They are designed for quiet, long-life operation. All ATR Models indicated are equipped with ATR plug-in Inverter Vibrators. Models RME and RMF come equipped with a four-point voltage regulator which makes possible the correct output voltage for minimum to maximum loads. The battery current consumption required is normally less than that drawn by one ordinary automobile headlight. The operating efficiency is approximately 75%. To figure battery current consumption see catalog sheet 657U. These Inverters are recommended only for use with loads having power factors in excess of 80% and should be used only for the applications as outlined above and on the reverse side of this sheet. These Portable Inverters are not recommended for tape recorder operation, except as specified in (2) below.

Illustrates ATR Mighty Midget (DME) Model Inverter having Cigarette Lighter Plug Attachment.

Illustrates ATR Medium (RME and RMF) Model Inverter having Four-Point Voltage Regulator and Cigarette Lighter Plug Attachment.

EASY TO INSTALL
EASY TO OPERATE

Illustrates Under-Dash Mounting for ATR Models RME and RMF.

Ideal for Emergency Lighting Applications for Civil Defense, Red Cross, Rescue Work, etc., Simply Using Extension Cords.

220-RME	220	110 Volts	150	100	12 lbs.	54.95

* Recommended for 24-Volt Battery Systems.
For Inverters having larger or smaller output capacities, or for operation on other D.C. input voltages, please consult available ATR Inverter catalog sheets.
All models designated above are housed in attractively finished brown-hammerloid metal cabinets. Dimensions of Medium (RME and RMF) Model Inverters, 8⅜" x 8" x 3¾"; shipping weight, 12 lbs. Dimensions of Mighty Midget (DME) Model Inverters, 5¼" x 4¾" x 2¾"; shipping weight, 5 lbs. For correct replacement vibrator, consult Inverter Vibrator Guide.

(1) These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Soundscriber (with engine of car not running).
(2) Primarily recommended for Dictaphone's Time Master, Gray Audograph and DeJur Stenorette dictating machines, or other similar types. Also, highly recommended for Norelco Tape Recorder Model EL-3516 and Geloso Model G255-S.
(3) THIS INVERTER SPECIALLY DESIGNED AND RECOMMENDED ALSO FOR USE WITH PORTABLE TV SET.

INVERTERS, VIBRATORS, "A" ELIMINATORS, ETC. — ATR ELECTRONICS, INC.

DC TO AC UNIVERSAL INVERTERS

New, universal inverters for operating 110-v., 60 cycle AC equipment from DC voltages in autos, buses, trucks, boats, trains, planes and DC districts. Designed especially for standard 110-volt AC tape recorders, TV sets, radios, PA systems, electric razors, test equipment, etc. Units are carefully engineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stability. Have operating efficiency in excess of 75%. Four-point voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or higher than normal. Inverters are recommended for use with loads having power factors in excess of 70%. Built-in toggle switch selects most efficient operation for use with TV sets or tape recorders. Inverters are not recommended for use with large motor driven appliances such as refrigerators, washing machines, etc. All have On-Off switches. Housed in attractive brown hammerloid metal cabinet with convenient leather carrying strap. Sizes: Standard Model RSF, 8½x9⅞x5¼"; Heavy-Duty Model RHG, 6⅞x11¼x 8½"; Extra-Heavy-Duty Model HSJ, 6½x12⅞x8½". With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles. *Recommended for 24 volt battery operation. **Before ordering, check wattage of equipment with which inverter will be used.**

PORTABLE PLUG-IN TYPE INVERTERS

Specially Designed for Operating Standard AC Dictating Machines, Record Players, Incandescent Lamps, Electric Razors, Electronic Test Equipment, and other Small Electrical and Electronic Devices from DC Voltages in Automobiles, Buses, Trucks, Boats, Planes, Trains, and DC Districts.

Lightweight inverters for operating 110 v. AC equipment from DC voltage sources. Feature excellent frequency stability and high efficiency. 6 and 12-volt units plug into cigarette lighter receptacle of any vehicle; others are equipped with standard 2-prong plugs. All are designed especially for use with dictating machines; record players, electric razors, test equipment, etc. Not recommended for large tape recorders and motor driven appliances such as refrigerators, washing machines, etc. Brown Hammerloid case with leather carrying strap. Sizes: DME, 5¼x4¾x2¾"; RME and RMF, 8⅜x8x 3¾". *Recommended for 24-volt operation. **Check wattage rating of equipment before ordering. RMF/RME Model Inverters equipped with voltage regulator.**

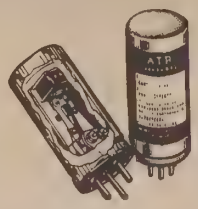
	220-RME	220	110	150	100	12	82.45	54.95

[1] These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Soundscriber (with engine of car not running).
[2] Primarily recommended for Dictaphone's Time Master, DeJur Stenorette, and Gray Audograph dictating machines or other similar types. Also recommended for use with Norelco tape recorder Model EL-3516 and Geloso Model G 255-S Tape Recorder.
[3] **This Inverter specially designed and recommended also for use with portable TV set.**



SOLID STATE INVERTERS

Specially Designed to Provide 117 Volt 60 Cycle AC Power for the Operation of Tape Recorders, VTR Equipment, Public Address Systems, TV Sets, Ham Gear, Small Portable Tools and Appliances, Test Instruments, Closed Circuit TV, Scientific Laboratory and Hospital Equipment, Small AC-DC Universal Motors, Fluorescent and Incandescent Lamps from 12 Volt DC Storage Battery Power in Automobiles, Buses, Trucks, Campers, Mobile Homes, Boats, and Aircraft.

ATR SOLID STATE Inverters are Universal Type Inverters recommended for the applications as listed above plus hundreds more! These Inverters are very well filtered and feature quick starting, frequency stability with varying load and input voltage, rugged heavy-duty construction, reverse polarity protection, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated here are equipped with heavy duty power transistors and plug-in frequency reed for automatic frequency control. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is approximately 80%. To figure approximate current consumption from storage battery, divide the rated input wattage of the load being operated by the storage battery voltage, and further divide this answer by .80 which will give the approximate current consumption from the battery based on the actual load being operated. These Inverters are recommended primarily for use with loads having power factors in excess of 70%. Inverters come complete with battery cables ready for operation.

Type	DC Input Volts	AC Output 60 Cycles (volts)	Output Wattage Int.	Output Wattage Cont.	Dealer Price
12U-S2A	12	117	300	275	$139.50

12U-S4G	12	117	450	400	198.45
12U-S6M	12	117	650	600	249.75

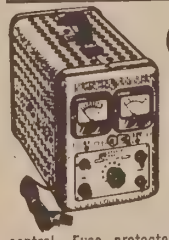
"P" model is equipped with cigarette lighter cord set to plug into dash receptacle. Caution — Do not load beyond 150 watts due to possible damage to cigarette receptacle wiring.
All ATR Inverters are housed in attractively finished brown-hammerloid metal cabinets and are complete with battery cables ready for operation.
For Inverters having larger or smaller output capacities, or for operation on other DC input voltages from 6 volts to 220 volts, please consult available ATR Inverter catalog sheets.

VIBRATORS

For All Auto Radio Sets Since 1954 Use One of the ATR Vibrators Listed Below.

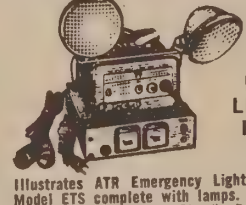
ATR Vibrators Feature:
Ceramic Stack Spacers with Two-Bolt Stack construction. Instant Starting — as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.
Large Oversize Tungsten Contacts having Full Wiping Action — for greater reliability and longer life.
Perforated Reed of Highest Quality Swedish Spring Steel.
Highest Precision Construction and Workmanship — practically all parts used are held to within a tolerance of 0.0005 of inch.
Value Plus — as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship. Available in TEN-PAK.

ATR No. 1400 (Bulk), 4-Prong, 6-Volt For All 6-Volt Sets Since 1954.



ATR No. 1843 (Bulk), 3-Prong, 12-Volt For All 12-Volt General Motors Since 1954.
ATR No. 1843 also used in following automobiles: 1956 Ford (Philco), Lincoln (Bendix), and Mercury (Bendix); 1956 Chrysler (Philco); 1955-57 Packard; 1956-57 Plymouth (Philco); 1956 Studebaker (Philco) and 1957 Mercury (Philco).

ATR No. 1840 (Bulk), 4-Prong, 12-Volt For 12-Volt Cars other than GM Since 1954.



SHAV-PAKS

Every man should have this lightweight ATR Inverter in his car for that "Keep Clean-Shaved Look." Will operate standard AC Electric Shavers from your CAR or Boat. Complete with 3 ft. cord set. Plugs into cigarette lighter receptacle. Fuse protected, rugged construction, and attractively housed in grey hammerloid-finish steel case. Size: 4x2⅝x2¾". Ship. wt., 2½ lbs.
Model 6-SPB (6 volt) ..... Net **$16.50**
Model 12-SPB (12 volt) ..... Net **14.25**

"A" BATTERY ELIMINATOR

For Demonstrating and Testing Transistor or Vibrator - Type Auto Radios. Designed for testing DC Electrical Apparatus on regular 110 volt AC lines — equipped with full-wave dry disc-type rectifier, assuring noiseless, interference - free operation. Fully Automatic and Fool-Proof; has voltmeter, ammeter, and 8-position voltage control. Fuse protected and housed in heavy gauge brown hammerloid-finish metal case. 6 ft. cord set included. Size: Model 610C-ELIF, 6½x9⅛x8½", ship. wt., 22 lbs.; Model 620C-ELIT, 6½x12⅞x8½", ship. wt., 33 lbs.
Ideal as a Power Supply for Model Railroad Trains, Radio Sets, Electro Plating Outfits, and other 6 or 12 Volt, DC Equipment. May also be used as a Battery Charger.
Model 610C-ELIF (6 volt at 10 amps. or 12 volt at 6 amps.) ..... Net **$65.80**
Model 620C-ELIT (6 volt at 20 amps. or 12 volt at 10 amps.) ..... Net **$87.75**

EMERGENCY LIGHTING AND POWER UNIT

Illustrates ATR Emergency Lighting and Power Unit, Model ETS complete with lamps.
Completely Automatic Standby-Power Units Specially Designed to Permit the Instantaneous Continued Operation of Critical Lighting Equipment, PA Systems, Amplifiers, Intercom Systems, Burglar Alarms, Fire Alarms, Synchronous Electric Clocks, Electric Time and Recording Clocks, Incubators, Gas Valves, Telephone and Test Equipment, and Similar Critical Devices in the Event of 115 Volt AC Commercial Power Line Failure. For Use: In Hospitals, Banks, Hotels, Theatres, Factories, Office Buildings, Schools, Homes and Other Areas of Operation.

Custom DC to AC CONVERTERS

115 v. AC 60 HZ Output, 250 to 750 Watts

Carter Motor ®

Dependable rotary power for operating office business machines, professional tape recorders, railroad, mobile and marine radio and radar equipment. Finest construction. Sealed ball bearings require no lubrication. Long life, continuous duty, high efficiency on all models. Only popular models listed here. For 50 Hz output, add $7.50 to list prices. All models 100% power factor. Size: 200 watts, 12⅝" l. x 6¾" w. x 7¼" h.; 210 and 300 watts, 11⅝" long; 500 watts, 12⅝" long; 750 watts, 13⅞" long.

Frequency Control Models

†Carter Number	DC Input Volts	Amps.	115 AC Watts	List Price
DR1021CP	115	2.5	210	$390.00

BR1030CP	12	35	300	400.00
BRS1040CP*	12	56	400	425.00

† Includes meter and control as shown
* One hour duty cycle

Models listed at left have manually operated frequency control and meter to maintain 60 HZ output over a ±10% input voltage variation. All other custom converters from 210 to 750 watt output can be supplied with frequency control at $100.00 additional to list price. Add 3" to height.

Filter available: add $60.00 to list prices, 3" to height. Add $20.00 for built in capacitor filter.

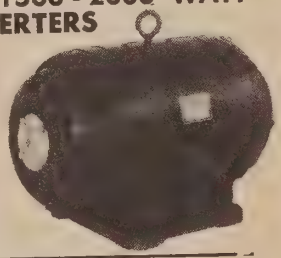
* One hour duty cycle.
All models listed are for 115 V. AC 60 HZ single phase output. 100% power factor.

STAND-BY LOAD-TRANSFER CONVERTERS



Starts automatically should AC power fail. Shuts off when power restored. Runs from batteries. Operates paging and control circuits for hospitals, schools, utilities, etc. Popular models listed. Other ratings from 200 to 750 watt output. Batteries or trickle charger not supplied.

For stand-by feature on other custom converters listed above, add Y to code number and $90.00 to list price.

Number	DC Input	AC	List

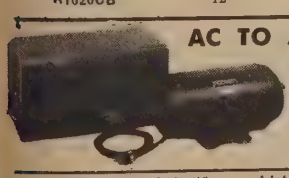
D1075CPY	115 v 8.8 A	750 w	470.00

230 v. output also available

Monarch 1000 - 1500 - 2000 WATT CONVERTERS

1000, 1500 and 2000 watt 60 HZ AC output, 24 to 230 volt input models. The Monarch series is ideal for heavy-duty industrial service, marine, mine, crane and railroad communications. Slow speed (1800 rpm), long life. 4-pole design; ball bearing equipped. No filter is necessary for most applications. Size: 19" x 11" x 12" high. Three-phase output available, add $60 to list. 24 v. Input at 1500 w. rating. Built-in capacitor filter available, add $30.00 to list.

Carter Number	DC Input Volts	Amps	Watts, AC at 60 HZ, 115 v.	List Price
E10100M	24	68	1000	$775.00
J10150M	28	80	1500	825.00
C10150M	32	69	1500	825.00
D10200M±	115	25	2000	875.00
K10200M±	230	12.5	2000	875.00



± Reduced voltage starters necessary, add $120.00 to list price.

"MARK II" SUPER CONVERTERS

Designed for high PF non-inductive AC loads such as amplifiers, lab and medical equipment, standby emergency lighting, telephone and marine communications. Not damaged by intermittent transients or sudden overloads. Will not operate refrigerators, large AC motors or low PF transformers. Ball bearing, con. duty. Size: 8¼" x 4½" x 5" high. Weight: 13 lbs. (*10¼" long, 4½" wide, 5" high. Weight: 10 lbs.)

Carter Number	DC Inputs Volts	Amps	Watts, AC at 60 HZ, 115 v.	List Price
D1010CB	115	1.7	100	$166.00
D1015CB	115	2.0	150	170.00

D1020CB*	115	2.6	200	185.00
B1020CB*	12	30	200	180.00

AC TO AC FREQUENCY CHANGERS

Produces 115 v., 50 or 60 HZ AC output from 25 to 400 HZ input. For operating standard equipment on non-standard frequencies. Standard units are for single phase input and output. Three-phase output available on order. For frequency meter, add $50.00 to list price. Non regulated.

Number	Output*	List	Number	Output*	List
FC1025CP	250 w	$800.00	FC10100M	1000 w	$1,500.00
FC1050CP	500 w	800.00	FC10150M	1500 w	1,650.00
FC1075CP	750 w	825.00	FC10200M	2000 w	1,725.00

* 60 HZ output. 50 HZ available

REFRIGERATOR-APPLIANCE MARINE CONVERTERS

Operates standard refrigerators, compressors (up to 1/6 hp only), vacuum cleaners and other appliances from DC; for use aboard commercial and pleasure boats. Converter operates only when power is called for. Has handy AC outlet to run most appliances from DC. Input from 24 to 230 v. DC. Size: 14" x 6¾" x 11" high. Net Weight: 85 lbs. 750 w. con. duty rating. Models from 24 to 230 v. DC input.

Number	Input	List	Number	Input	List
RF34	34 v.	$540.00	RF115	115 v.	$540.00

CARTER DC to AC GENEVERTERS

Compact model for low power marine and industrial applications requiring up to 60 watt 115 v. 60 HZ output. High power factor. Models listed are for 115 v. DC input. Others available for 12, 24, 32 or 48 v. input. Size: 7⅜" x 4¾" x 3½" high. Weight: 10¼ lbs.

Carter Number	DC Input Volts	Amps.	Output Watts	List Price
1020LD	115	.4	20	$104.00
1040LD	115	.6	40	105.00
1060LD	115	.85	60	106.00

"CUSTOM" DYNAMOTORS

For railroad and marine radio-telephone, industrial communications systems, locomotives, telephone emergency standby power, etc. Heavy duty construction. Low rpm speed, small temperature rise assure extra long life. Filter not normally required. Size: 12⅝" x 6-11/16" x 7¼". Weight: 47 lbs.

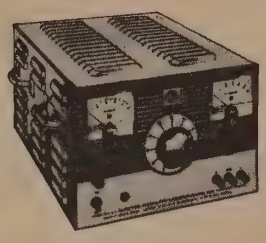
ELECTRO POWER SUPPLIES

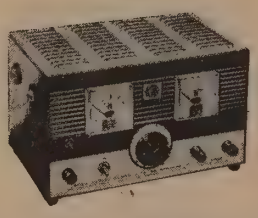
Stocked at your franchised **ELECTRO** *distributor*

PRECISION BUILT



The ELECTRO line provides a wide range of DC outputs up to 125 volts with adequate filtering for requirements ranging from critical transistor circuitry to applications permitting up to 5% ripple.

Every model is engineered to give unusual performance life per dollar. Each has an adjustable output voltage range. Meters indicating voltage and current are large easy to read. Controls clearly marked. Output terminal are isolated from the cabinet... several are rack mounte A one-year warranty on every ELECTRO power supply Designed for production line, industrial and educationa laboratory applications.



INDUSTRIAL

A

B

C

D

MODEL EF

(Fig. C) provides variable voltage 0-28v or 0-14v at 5 amps continuous, 10 amps, intermittent load. Ripple less than 1%. Uses selenium rectifiers. Input: 117 VAC, 60 Hz.

MODELS EFB AND EFBR

(Figs. C, D) designed for very low ripple requirements of transistor work. Continuously variable voltage control. Selenium rectifiers. Employs chokes and capacitors in ripple filter. Model EFB Federal stock number 6130-957-1450. Model EFBR (Fig. D) same except with standard EIA rack panel. Input: 117 VAC, 50/60 Hz.

MODELS NFB AND NFBR

(Fig. A) for continuous heavy-duty. Continuously variable output, 0-32v for loads to 15 amps. Ripple: less than 0.75% at 15 amps. Ripple filter circuit uses chokes and capacitors. Variable autoformer for smooth control. Bridge-type silicon rectifiers. Model NFBR same except with standard EIA rack panel. (Federal stock number 6130-853-3127.) Input: 117 VAC, 50/60 Hz.

MODELS GFL AND GFLR

(Fig. A) low cost, semi-regulated, low ripple, highe voltage. Ideal for designing and testing DC appliances telephone circuits, relays and solenoids; laboratory work Continuously variable output 0.125v DC at 5 amps. Ripple 0.5%. Silicon rectifiers. Overload protection. Model GFL same except with standard EIA rack panel. Input: 11 VAC, 50/60 Hz.

MODELS PS-5 AND PS-5R

(Fig. A) designed for 48-volt applications. Delivers 55 watts well-filtered DC output continuously variable 0-55 DC. Ripple: 0.5% rms at 10 amps. Silicon rectifiers. Mode PS-5R same except with standard EIA rack panel. Input 117 VAC, 50/60 Hz.

MODEL PS-1000 SERIES

(Fig. B) for continuous heavy duty. Continuously variabl output. Low ripple. Filter circuit uses chokes and capacitor Variable autoformer for smooth control. Bridge-type silico rectifiers. Three models are available with output voltag ranges 0-32v DC at 30 amps, 0-55v DC at 20 amps and 125 DC at 8 amps. Input: 117 VAC, 50/60 Hz.

GENERAL PURPOSE

G H I J E F

MODEL D-612T AND MODEL H

Figs. G, H) low ripple, less than ½% rms up to 5 amps; or servicing transistor auto and portable radios. Maximum utput power in this price range. Ideal for citizens' band ransceivers, battery charging, solenoids, etc., requiring up o 16v DC. Model H heavy duty; dual range. Ideal as storage attery replacement in school laboratories, thermoelectric ower source, and other high-current, low-voltage applica- ions. Both types have voltage and current output meters. nput: 117 VAC, 60 Hz.

MODEL EC-1

Fig. F) reliable, low cost. 12v DC with 5 amp output for chool labs and industrial research, production testing, etc. ow-cost source for FM and AM auto radio demonstrations. Maximum ripple ½%. Four-position voltage adjustment witch; off, low, medium and high. EPL patented rectifier onduction cooling. Used vertically or horizontally. Input: 17 VAC, 60 Hz.

MODEL EC-2

(Fig. E) low priced unit for auto, tape disk and transistor adio servicing. Wide applications in research and develop- ment. Continuously variable voltage adjustment provides versatility. Maximum ripple ½% rms at 5 amps. Patented conduction cooling. Used vertically or horizontally. Output: 0-16 VDC combination edge-view voltmeter/ammeter. Input: 117 VAC, 60 Hz.

MODELS PS-30 AND PS-50

(Fig. I) heavy duty adjustable 12-volt units for servicing auto, aircraft and marine communications equipment. Useful in industrial and educational labs, thermoelectric cooling power source, etc. Maximum ripple at maximum current 1%. Eight-position tap switch output voltage adjustable. Model PS-50 delivers 50 amps continuously. Model PS-30 delivers 30 amps continuously. Input: 117 VAC, 50/60 Hz.

MODEL 3301-U

(Fig. J) specifically designed for high school and college electrical and electronic experiments in science labs. Provides both AC and DC low-voltage outputs, adjustable and metered. Two circuit breakers protect primary and outputs, and line isolated transformer and three-wire line cord are safety features. Free 48-page manual of experiments supplied with each unit. Input: 117 VAC, 60 Hz.

EVEREADY® FLASHLIGHTS, LANTERNS, and BATTERIES

THE WORLD'S MOST TRUSTED BRAND FOR OVER 60 YEARS

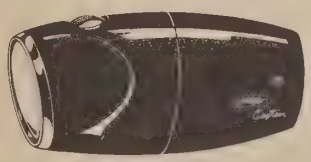
"CAPTAIN" FLASHLIGHTS... Classic Design

- Heavy-Duty Copper/Nickel/Chrome/Plated Steel
- Exclusive 3-Way Lock Switch and Flasher
- End-Loading . . . Ring Hanger

o. 9951 Magnet Lite. Uses 2 No. 950, D-99 or 95 Batteries, No. PR2 Lamp.

No. 9251 Uses 2 No. 950, D-99 or E95 Batteries, No. PR2 Lamp. Also available: **No. 9351** — Uses 3 No. 950, D-99 or E95 Batteries, No. PR3 Lamp.

No. 9231 — Uses 2 No. 935 or E93 Batteries, No. PR4 Lamp.



o. 9652 — Uses 6 No. 950, D-99 or E95 Batteries, No. R18 Lamp. Also available: **No. 9352** — Uses 3 No. 950, -99 or E95 Batteries, No. PR3 Lamp.

	No. 9231	No. 9251	No. 9351	No. 9352	No. 9652	No. 9951

RECHARGEABLE DEVICES

- Never need batteries
- Retain a charge up to a year when not in use
- One year warranty

No. 3210 "Captain" Rechargeable Mini-Spotlight — Smooth roll action switch. Ideal for pocket or purse. Available in Harbor Blue or Jet Black.

No. 6300 "Commander" Rechargeable Flashlight — Handy for pocket or purse. Available in Diablo Red/Oyster White finish. Gift boxed or blister packed.

o. 71A Display 1 "Captain" 200BL, 1 "Captain" 3300, 2 Commander" 6200's, 2 "Com- ander" 6300's.

No. 3112 "Commander" Rechargeable Lantern — Modern, easy-to-hold, cantilever handle with thumb-tip, push-button control.

No. 3300 "Captain" Rechargeable Flashlight — Twice the light of standard 2-Cell Flashlights . . . never needs batteries! Uses rechargeable battery, No. PR-3 Lamp. Gift boxed or blister packed.

No. 3400 "Captain" Rechargeable Lantern — Twice the light of other rechargeable lanterns, powerful sealed beam lamp generates 13,000 candle power, rugged carrying case. Easy grip cantilever handle with finger-tip switch.

	No. 71A	No. 3112	No. 3210	No. 3300	No. 3400	No. 6300

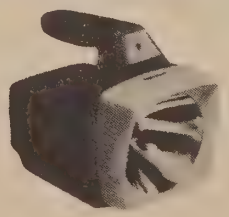
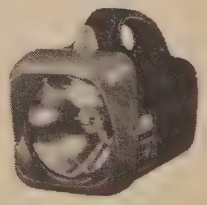
WEATHERPROOF LANTERNS



o. 100WB "Big Jim" Lantern w/ asher and 1 No. 731 Battery, No. 546 Lamp, No. 407 Signal Lamp.
o. 101WB Same without flasher.



No. 108A Waterproof All American Lantern. "Cordahide" polyethylene construction. Uses 1 No. 509 Battery. No. PR13 Lamp.

In display — order No. 108AD — Contains 3 No. 108A per unit carton All American Lanterns in Colors (white, red, black).

No. 112 Individually boxed (red) All American Lantern with unique power cartridge. "Cordahide" polyethylene construction. Uses No. PR12 Lamp, 5 No. 950, D99 or E95 batteries.

In display — order No. 112. 3 No. 112 All American Lanterns per unit carton in colors (red, blue, gray).

No. 459 Hercules Waterproof/ Floating Lantern. Explosion-proof, insulated case impervious to gasoline, alcohol, most oils and greases.

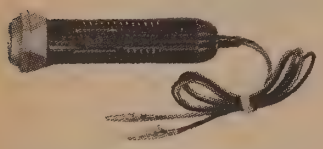
EVEREADY® FLASHLIGHTS, LANTERNS, and BATTERIE

THE WORLD'S MOST TRUSTED BRAND FOR OVER 60 YEARS

INDUSTRIAL and SPECIAL PURPOSE LITES



No. 330 Utility Lite. Uses 2 No. 950, D-99 or E95 Batteries, No. PR2 Lamp. Available individually boxed **(No. 330).**

Signal Spotlights
No. 307R or Y. 2 Cell with signal wand (8") specify color: Red (R) or Yellow (Y).

No. 459 Hercules Waterproof/Flo ing Lantern. Explosion-proof, in lated case impervious to gasoli alcohol, most oils and greases.

No. 308CT Combination spotlight/ continuity tester . . . a high-quality tool for professionals.

Industrial Flashlights
No. 1251 — 2 Cell, No. PR6 Lamp. **No. 1351** — 3 Cell, No. PR7 Lamp. Uses Nos. 950, 1050, D99 or E95 Batteries. Will not shatter, crack or dent.

Safety Flashlights
No. 1259 — 2 Cell, No. PR6 Lamp. **No. 1359** — 3 Cell, No. PR7 Lamp. Uses Nos. 950, 1050, D99 or E95 Batteries. Approved by U.S. Bureau of Mines. Listed by Underwriters' Laboratories, Inc.

No. 3452 Head-Lite. Uses 1 No. 5 Battery and No. PR13 Lamp. Ra proof pouch also available (1348).

	No. 51	No. 308CT	No. 330	No. 337D	No. 459	No. 307R or Y	No. 1251	No. 1259	No. 1348	No. 1351	No. 1359	No. 3452

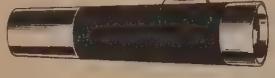
HEAVY-GAUGE, CHROME-PLATED METAL FLASHLIGHTS

Magnet Lites
No. 5MF Magnet Lite — 2 Cell, No. PR2 Lamp. No. 7MF — 3 Cell, No. PR3 Lamp. Use Nos. 950, D-99 or E95 Batteries. Available individually boxed. **No. 5MF** available in display of 6 with (order 6 No. 5MFD) Selling Tags.

Leader Lites
No. 356D Leader Lite — Uses 2 No. 950, D-99 E95 Batteries. No. PR2 Lamp. Available in Display



America's Standard
No. 2251 All-Purpose Flashlight — 2 Cell, No. PR2 Lamp. Use Nos. 950, D-99 or E95 Batteries. Available individually.

No. 4251 Wrangler Flashlight. Luxurious, inset, walnut grain vinyl, chrome-plated lens ring, 4-position switch, optically perfect reflector. Available individually boxed or in display of 6 (order 6 No. 4251D). Uses 2 No. 950, D-99 or E95 Batteries. No. PR-2 lamp.

No. 5251 "Commander" Flashlight. Triple-pla chrome finish, sturdy, safety-glow lens ring. Po tive action switch. Available individually boxed in display of 12 (order 5251D). Uses 2 No. 9 D-99 or E95 batteries. No. PR-2 Lamp.

No. 4MF "Pop-Out" Magnet Flashlight. Hidden magnet bulb into sleek case pops out when placed near steel, retracts into case when removed. Available individually boxed or in display of 6 (order 6 No. 4MFD).

	No. 4MF	No. 5MF	No. 356D	No. 2251	No. 4251	No. 5251

*NEDA number same as an "Eveready" battery number on a different battery. Omitted to prevent errors in shipping

**Equipped with screw terminals unless Fahnestock spring terminals are specified.

*Equipped with Fahnestock spring terminals unless screw terminals are specified

■Furnished with Fahnestock spring terminals. If socket terminals are required specify W-363P, W-365P.

†Flashlight Types

††These complete line specifications contain the basic data on all "Eveready" batteries in production at the time of preparation. Since the characteristics of individual batteries are sometimes modified, manufacturers who are designing their product to use a particular battery should contact the nearest Union Carbide Consumer Products Division Sales Office for verification of specifications.

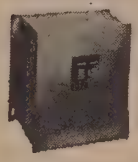
††These complete line specifications contain the basic data on all "Eveready" batteries in production at the time of preparation. Since the characteristics of individual batteries are sometimes modified, manufacturers who are designing their product to use a particular battery should contact the nearest Union Carbide Consumer Products Division Sales Office for verification of specifications.

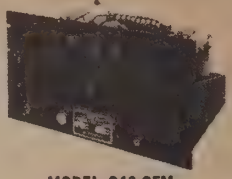
GATES POWER SUPPLIES



SILICON POWER RECTIFIER

For transister circuits & electronic equipment
MODEL G92F

INPUT: 115 volts AC 60 cycles, 1 phase
OUTPUT: 0-32 Volts DC, 0-10 Amperes D.C. continuous duty
REGULATION: No load to full load 15%
RIPPLE: Less than 0.3% RMS
METERS: 2% Accuracy
DIMENSIONS: 17" x 9" x 9"
PRICE: $169.50 NET
*Also available in 5 Amperes
PRICE: $114.50 NET



INDUSTRIAL POWER UNITS

MODEL A10

INPUT 115 or 230 AC Volts, 60 cycles—Single Phase.
DC OUTPUT 115 Volts DC 125 Watts
APPLICATION: Power sources for operating DC Motors, Relays, Solenoids, Magnetic Chucks.
DIMENSIONS: 11" H x 9" W x 6½" D
PRICE $63.00 NET
250 Watts — $72.50

SELENIUM POWER SUPPLY

MODEL G48-6FM

INPUT: 115 Volts AC 60 Cycles—Single Phase
OUTPUT: 0-48 Volts DC, 0-6 Amperes
CONTROL: Continuously variable over entire range
RIPPLE: 1% RMS
DIMENSIONS: 19" W x 13" D x 10½" H, Fits RETMA, Western Electric racks
PRICE: $190.00 NET

SILICON POWER SUPPLY

MODEL #GS 14-15F

INPUT: 115 Volts AC, 1 Phase, 60 cycles
OUTPUT: 0-14 Volts DC, 0-15 Amperes, continuous duty
RIPPLE: Less than 1% RMS
METER ACCURACY: 2%
DIMENSIONS: 9" H x 17½" W x 9" D
PRICE: $159.50 NET
Rack Model Same Price

SILICON RACK MOUNT SUPPLY

MODEL #GX30-10

INPUT: 115 Volts AC 60 Cycles, Single Phase
OUTPUT: 26, 28, 30 Volts DC 0-10 Amperes Continuous Duty
REGULATION: 10% No Load to Full Load
RIPPLE: 0.3% RMS
DIMENSIONS: 8¾" H x 19" W x 10" D
PRICE: $137.50 NET

AIRCRAFT BATTERY ELIMINATOR

MODEL #G101F

INPUT: 115 Volts AC 60 cycles, single phase
OUTPUT: 0-32 Volts DC, 0-20 Amperes, continuous duty
RIPPLE: 0.5% RMS
Unique overload device prevents needle slam and shows overload condition
REGULATION: D.C.V. at full load: 30
D.C.V. at 1/10 load: 35
METERS: 2% Accuracy
DIMENSIONS: 19" x 14¼" x 12¼"
PRICE: $275.00 NET
May be used for Rack or Bench

ECONOMY RANGE DC POWER SUPPLIES — Less Than 1% Ripple - Good Regulation - Rack Mount Type - Heavy Duty Construction - Powerstat - Fused 2% Meters - 115 Vac Input

ALL TYPES OF POWER SUPPLIES

SILICON POWER RECTIFIER
Model G50-50R

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-50 volts DC, 0-50 amperes continuous duty

RIPPLE: .3% RMS

REGULATION: No Load to Full Load 8%

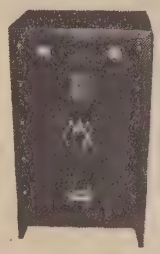
METERS: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON INDUSTRIAL POWER UNIT
Model G30-100

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-100 amperes continuous duty



RIPPLE: .3% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and at maximum output voltage setting

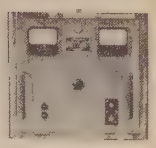
METERS: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON AIRCRAFT BATTERY ELIMINATOR
Model G30-200

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-200 amperes continuous duty also avail. 300A



RIPPLE .5% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and maximum output voltage setting

METERS: 2% Accuracy

DIMENSIONS: 25" x 25" x 43"

SILICON REGULATED POWER SUPPLY
Model G530-40M

INPUT: 115 Volts AC, 60 cycles, 1 phase

OUTPUT: 5-30 Volts DC, 0-40 amperes

RIPPLE: 1% RMS

REGULATION: ±1% from no load to full load

METERS: 2% Accuracy

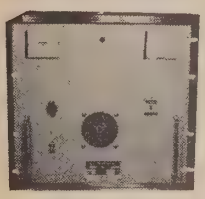
DIMENSIONS: 21" x 15" 19"

SILICON POWER SUPPLY

MODEL GX 30-5

INPUT: 115 Volts AC 60 cycles, single phase

OUTPUT: 28-30-32 Volts DC, 0-5 Amperes, DC Continuous Duty



REGULATION: 12% No Load to Full Load

RIPPLE: .5% RMS

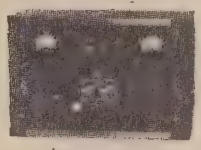
DIMENSIONS: 5" W x 13½" L x Overall Height 9"

PRICE: $85.00 — 6 Amps $95.00

SILICON GENERAL PURPOSE RECTIFIER

MODEL G-115

INPUT: 115 Volts AC 60 cycles, 1 Phase



OUTPUT: 0-32 Volts DC, 0-50 Amperes DC, Continuous duty variable over entire range

RIPPLE: 1% RMS

DIMENSIONS: 22"H x 19"W x 15"D

PRICE: $522.00 NET

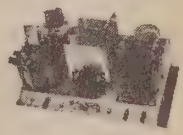
DC POWER SUPPLY

MODEL G94F

INPUT: 115 Volts AC 60 cycles, 1 Phase DC

OUTPUT: 0-300 Volts DC Continuous Variable 0-1 Amperes.

RIPPLE: 3 MV RMS



DIMENSIONS: Rack 8¾" H x 19" L x 9½" D

CABINET: 10½"Hx22"Lx12"D

PRICE: $275.00

Also 0-2 Amp. **PRICE:** $340.00

SILICON POWER SUPPLY

MODEL GX30-20

INPUT: 115 Volts, 1 Phase, 60 cycles

OUTPUT: 0-34, Volts, DC 0-20 Amperes, continuous duty

REGULATION: No load to full load: 18%

RIPPLE: Below 1% Silicon Rectifiers, High Efficiency

DIMENSIONS: 10" x 17" x 3"

PRICE: $185.00 NET

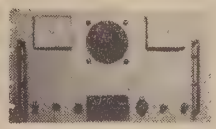
HIGHEST QUALITY-LOWEST PRICE

SILICON POWER SUPPLY
Model GX24-1

INPUT: 115 Volts AC, 60 cycles, 1 phase
OUTPUT: 24 Volts DC, 0-1 ampere DC, continuous duty
RIPPLE: 0.3% RMS
REGULATION: 8% no load to full load
DIMENSIONS: 3″ x 5″ x 10″
PRICE: $75.00
0-2 Amps **PRICE: $85.00**



PORTABLE SILICON BATTERY CHARGER
Model G612-20

INPUT: 115 volts AC, 60 cycles, 1 phase
OUTPUT: 6/12 Volts DC, 20 amperes continuous duty
METER: Amp. meter 2% Accuracy
DIMENSIONS: 11″H x 9″W x 6½″D
PRICE: $57.50

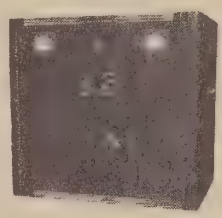
SILICON RECTIFIER
Model GT32-30

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 30 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1% RMS
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy volt meter, amp. meter
DIMENSIONS: 10½″ x 13½″ x 19″
PRICE: $350.00 — WT. 92 Lbs.

SILICON RECTIFIER
Model GT32-24

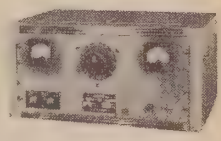
INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 24 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1%
VOLTAGE CONTROL: Powerstat
DIMENSIONS: 8¾″ x 13½″ x 19″
METERS: 2% Accuracy volt meter, amp. meter
PRICE: $325.00 — WT. 75 Lbs.

BENCH PLATING RECTIFIER
Model G50-8



INPUT: 115 volts, 50-60 cycles, 1 phase
OUTPUT: 50 amperes, 0-8 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $75. extra
VOLTAGE CONTROL: Powerstat
METER: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21″ x 15″ x 10″
PRICE: $175.00

BENCH PLATING RECTIFIER
Model G100-8



INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 100 amperes, 0-8 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $75. extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21″ x 15″ x 10″
PRICE: $275.00

BENCH PLATING RECTIFIER
Model G200-6

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 200 amperes, 0-6 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $100 extra
COOLING: Fan
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21″ x 15″ x 19″
PRICE: $385.00

BENCH PLATING RECTIFIER
Model G50-15

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 50 amperes, 0-15 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 2% $125 extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter, amp. meter
DIMENSIONS: 21″ x 15″ x 10″
PRICE: $210.00

MAGNETICALLY REGULATED D.C. POWER SUPPLIES

A single source for all possible types of "brute" force" and regulated power supplies that can fill 90% of your design and application needs. Gates Power Supplies give you absolutely lowest cost and long life. The units are excellently constructed of high rated components for trouble free, years of service.

Silicon or Selenium. Single and three-phase units. 1 to 1000 volts, 1 to 1000 Amps. Metered and unmetered Static or variable outputs. Rack, cabinet or chassis mounts. Unit or hundred quantities 48 hour delivery. Two year guarantees. Power supplies for OEM Application, Testing Prototype, Lab type units, Plating, Motor Control, Cathode Protection, Transistor power, Anodizing, Battery Charging, Battery Conversions, Marine types, Aircraft Starting.

GATES
ELECTRONIC COMPANY, INC.

AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment

General Electric a-c voltage stabilizers are static-magnetic transformer-type products which provide voltage maintained within ±1% variation while input line voltage fluctuates ±15%. They are offered in the following variations:

Unfiltered output: output voltage waveform is relatively flat-topped, with harmonic content from 15 to 20%.

Harmonic filtered output: output voltage is filtered to near sinusoidal waveshape, with a maximum of 3% harmonic content.

Enclosed construction: completely metal enclosed for safe external mounting.

Open construction: for installation within electronic or electric equipment

Cord/Receptacle units: for convenient temporary connections.

SINGLE PHASE — Magnetic-capacitor circuitry is frequency sensitive. Stabilizers designed for one frequency are not suitable for use on another.

THREE PHASE — Standard single-phase a-c voltage stabilizers can be connected for 3-phase, 4-wire loads with input connected delta. However, single-phase models cannot be connected for 3-phase, 3-wire loads: select from 3-phase delta-delta models.

STABILTRON* AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment Requiring PRECISE Voltage Control

General Electric Stabiltron a-c voltage abilizers can be used in a wide variety electronic equipment applications where ecise control of voltage is required. The abiltron consists entirely of static com-nents — there are no tubes to burn out moving parts to replace or maintain.

The Stabiltron senses deviations from predetermined output voltage level b\ error detector. The error signal, through e silicon-controlled rectifier circuit, au- ents the voltage stabilizer action and ovides almost instantaneous correction output voltage.

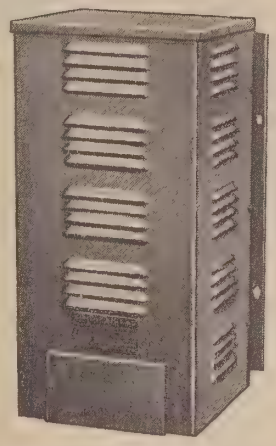
Typical applications include computers, dar and communications equipment, dustrial process control, and X-ray uipment.

put Voltage — The most common power urce voltages can be handled by the andard models listed. Stabiltron units n be provided for special voltage levels request.

utput Voltage — Stabiltron voltage stabi-ers maintain extremely precise voltage itput in spite of wide fluctuations of line ltage, frequency, load, load power factor, d ambient temperatures.

The table below illustrates the effect the output of the maximum steady state cursions, within rated limits of some of ese variables.

BLE 1 — TYPICAL OUTPUT VOLTAGE HARACTERISTICS

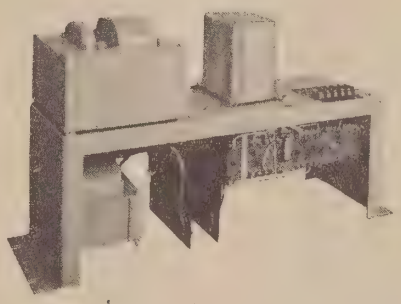


Variable	Excursion	Output Voltage Bandwidth¶
ne voltage†	95 to 130	0.02 to 0.2%
equency	57 to 63 Hertz	0.15 to 0.4%
ad	0 to 100% rated load	0.02 to 0.1%
ad power factor	0.4 lagging to unity	0.01 to 0.1%
nbient temperature	—25C to 40C	0.01%/degree C

† range is indicated because exact amounts are dependent on the static level of other variables.
¶ When the Stabiltron unit is operated at less than rated load, the line voltage can be reduced considerably below 95 volts without serious deterioration of the output voltage.

esponse — Under transient line or load nditions, elapsed time for correction of itput voltage and transient excursion om the normal bandwidth are key con-derations to equipment operation.

The Stabiltron provides fast response d small transient excursion through its nique combination of solid state and mag-tic circuitry.



*Trade-name of General Electric Co.

ENCLOSED CONSTRUCTION · 2-kva units are suitable for either wall or floor mounting. 5- and 10-kva units can be floor mounted only.

PANEL CONSTRUCTION is suitable for standard 19-inch rack mounting.

OPEN CONSTRUCTION is suitable for horizontal or vertical mounting surfaces in equipment enclosures.

57-63CPS; 3% HARMONIC: 0.4 LAG TO UNITY LOAD PF

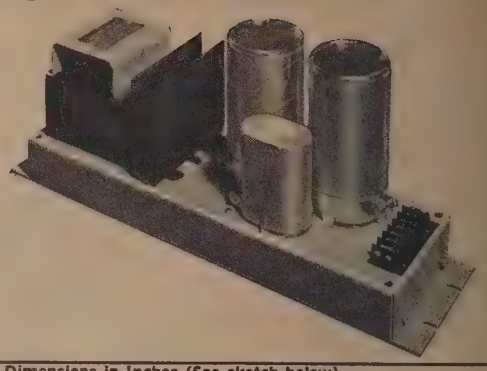
△ OEM quantity prices are available on request.

TABLE 2 — TYPICAL TRANSIENT RESPONSE CHARACTERISTICS

Transient Change	Percent Peak Output Voltage Excursion	Response‡ Time	Total Recovery§ Time
0 to 115V input	14%	4 Hertz	13 Hertz
95 to 130V input	14%	3 Hertz	8 Herzt
130 to 95V input	9%	5 Hertz	9 Hertz
0 to 100% rated load	24%	1 Hertz	2 Hertz
20% to 100% rated load	21%	1 Hertz	2 Hertz
100% to 20% rated load	34%	1 Hertz	10 Hertz

‡ The time required for the output to recover 63.3% from its maximum excursion.
§ The time required for the output to recover to normal bandwidth limits.

Harmonic Content — Under all rated ranges of line variation and most load conditions, the total harmonic content of the output wave form will not exceed three percent for a sine wave power source Even under adverse conditions, when the power source is not a sine wave, the Stabiltron voltage stabilizer will correct the wave form to the load to approximately three percent harmonic content.



Rectifier-filter Loading — Since the output wave form is low in harmonic content. the Stabiltron voltage stabilizer can be connected successfully to a rectifier (capacitor input) filter load to the input of a d-c power supply having capacitor input filters.

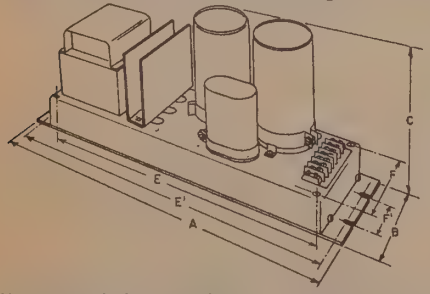
GENERAL ELECTRIC

REGULATED DC POWER SUPPLIES

Improve Performance of Computers and Other Electronic Equipment



These component power supplies can be used in a wide variety of applications where relatively constant d-c voltage is required despite fluctuating line voltages. Computers, process control equipment, and electronic measuring devices are typical applications where demands for accuracy require constant regulation of voltage.

Performance-proved GE d-c power supplies can be designed to suit your needs for either 50- or 60-Hertz power sources.

* OEM quantity prices are available on request.
† May vary ±1%. All standard units come equipped with a plate for 19-inch rack mounting.
‡ Indicates approximate percent increase in output voltage due to decrease of load current from full load.
§ Rack mounting plate has four mounting slots on each end. Distance between centers of two outer slots is 7½ in., between two inner slots 3 in.
¶ Not available for 19-inch rack mounting.

Mounting holes suitable for ¼-20 screws. Length of screw may vary with chassis height.

Typical circuit showing voltage stabilizers and filter components.

EFFECT OF INPUT VOLTAGE VARIATION

D-c power supplies can be designed for various input voltages and ranges. With all other variables constant, the output voltage will not vary more than ±1 percent for a change in input voltage over the rated range of 97 to 130 volts input.

EFFECT OF TEMPERATURE CHANGE

For every 40C change in the ambient temperature, the output voltage level will change approximately one percent.

EFFECT OF FREQUENCY

A change of one percent in frequency will change output voltage level approximately one and one-half percent.

ISOLATION

All d-c power supplies provide electrical isolation between the a-c power source and the d-c load.

POLARITY

GE d-c power supplies can be designed with the polarity you require. All standard units listed can be installed with either plus or minus grounded.

RIPPLE

Ripple levels of one percent RMS meet most requirements. However, other levels of ripple content can be designed into GE power supplies.

EFFICIENCY

Efficiency ranges from 70 to 85 percent for normal output voltage levels. For unusually low output voltages or low power ratings, some decrease in efficiency may occur.

REGULATION

Load regulation characteristics depend on the rated output voltage and rated power level of the power supply.

volt-pac® VOLTAGE REGULATORS

- **New solid-state control**
- **Precise output voltage control**
- **Fast voltage-correction rate**
- **Cabinet or rack-mounted models**
- **Magnetic circuit-breaker protection**

General Electric's new automatic voltage regulator line provides closely regulated output voltages from varying input voltages. They normally include a motor-operated Volt-Pac variable transformer, associated buck-boost transformers which handle a wide range of input-voltage variation, and a new solid-state SCR control.

These automatic regulators maintain a preselected output voltage level within 1 percent bandwidth, and are temperature compensated from −20 to +40C. They can be bench or floor mounted, or in smaller sizes, mounted in standard relay racks.

▲ Where narrow range input ratings are not listed for certain models, units can be custom designed as needed.

* Load kva is based on ontput voltage at midpoint in the output range.

¶ When output voltage is adjusted up or down from midpoint, the rated input range will shift proportionately.

Note: All dual input voltage range models are connected for the narrow range when shipped. Reconnection for the wide input range can be made when the unit is installed, if desired. For reconnection, follow directions included with the unit.

§ OEM quantity prices are available on request.

† This model is suitable for a wider input voltage range, i.e., 190-270V.

‡ These models can be used for 199-217V output and 181 to 236V input by changing connections as outlined in connection diagram included in shipping carton.

No Waveform Distortion

No harmonic waveform distortion is introduced at any load or with any input voltage. The output voltage waveform is a precise reproduction of applied input waveform.

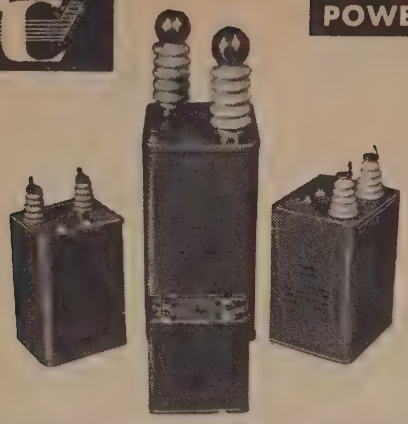
Adjustable Output Voltage

Output voltage for units nominally rated 115 volts is adjustable from 110 to 120 volts. Output voltage also is adjustable from 220 to 240 volts for units rated 230 volts; from 440 to 480 volts for nominally rated units of 460 volts. Please note that the specified input-voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage range shifts in proportion with the selected output voltage.

Accurate Static-sensing Control

Solid-state control combined with the new Sylvan-Kettler static-sensing device achieve the optimum in automatic accuracy. The voltage regulator is governed automatically by a dead-band-type voltage-sensitive control utilizing either lamp or zener bridges. The circuit includes magnetic input circuit breakers and an output voltmeter.

FEATURES



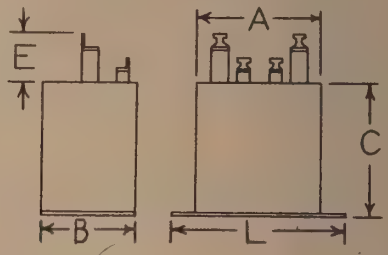
- No wave-form distortion
- Dual rated for wide or narrow input voltage ranges
- Adjustable output voltage
- ±1% output voltage band for rated input ranges
- Output voltmeter included
- Fused control circuit
- Fast voltage correction
- −20 to +40C ambient temperature range
- 0 to 100% rated load
- Not sensitive to load power factor
- Not sensitive to line frequency (59-61 Hz)
- Up to 99% efficient
- Solid State control using lamp bridge circuit (Zener diode bridge circuit is available at slightly higher price.)
- Easily replaceable control circuit

Prices subject to change without notice.

GENERAL ELECTRIC

POWER SUPPLIES

POWER SUPPLIES — COMPACT "M" SERIES



THE HV-M SERIES Power Packs have these important features:

1. **Input Voltage** 0 to rated input voltage* at 50 to 500 CPS.
2. **Output Ratings** 0 to 10 milliamperes in accordance with the rating of the power pack.
3. **Ripple** 1% RMS or 2.75% peak to peak at rated voltage.
4. **Output Voltage** can be varied from 0 to rated voltage and load by means of a variable auto transformer.
5. **Two Output Terminals** are isolated from the container, permitting either terminal or both to be operated away from ground. EXCEPTION: The HV750-152M and HV750-502M has a small and a large output terminal. The power pack is normally furnished to deliver a positive output.
6. **Ambient Temperature Range** is minus 55° C to plus 85° C (with limited ratings). EXCEPTION: The HV300-502M, HV500-502M and the HV750-502M are limited to operation at an ambient temperature of 50° C maximum.
7. **Design Life** 40,000 hours at 35° C and 25,000 hours at 65° C at rated output. Life is 5000 hours at 85° C if the output current is no more than 80% of the rated current. Useful life is generally double the figure given above if an approximately 3% drop in voltage is tolerable.
8. **Mounting Position:** Any.
9. **Altitude** up to 10,000 feet operating 50,000 feet non-operating.
10. **Vibration** 10 to 55 CPS with a total of 0.06 inches for 2 hours in each plane for all power packs which have a base dimension of 3 3/4" x 9/16" or less.
11. **Salt Spray** per MIL-Q-151 for 50 hours.
12. **Rectifiers** are long life selenium type.
13. **Filter Capacitors** are special film types designed for long life.
14. **Hermetically Sealed Container.**
15. **Oil Filled Container** prevents corona.
16. **Container Finish** Zinc chromate primer and light blue-gray lacquer per MIL-L-7178.
17. **Terminals** are steatite, solder seal type with solder lug terminals.

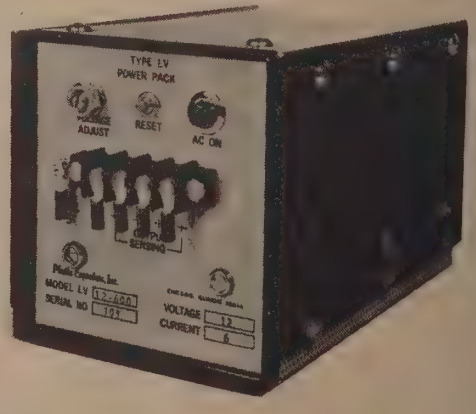
POWER SUPPLIES — LVE SERIES — REGULATED LOW VOLTAGE

AC Input 105 to 125 volts. 50 to 420Hz.

DC Output Voltage Catalog items are available in the most commonly used voltages between 12 vdc and 100 vdc.



Regulation

0.01% for line voltages 105 to 125 vac.
0.05% for no load to full load.
Temperature coefficient is negative 0.015% per degree centigrade over the temperature range.

SPECIAL FEATURES

- All Solid Sate
- All Silicon Semiconductors
- ±2% Output Voltage Control
- Remote Sensing Terminals
- Less than 3 MV P-P Ripple and Noise
- 0 to 55°C Temperature Operating Range
- Unique Heatsink Design
- Natural Convection Cooling (NO FORCED AIR)
- Control Circuit maintained in a stable environment
- Input electrically isolated from Output
- Protected from Overload and Short Cir
- Floating Output Potential allows Positive or Negative Output
- Output terminal, control, pilot light and reset button are mounted on the front panel
- Any mounting position

Lambda Power Kits

pre-designed power supply circuits and selected components for building your own power supply

SELECT-DON'T-DESIGN FROM OFF-THE-SHELF COMPONENTS:

power transformers | silicon rectifiers
filter chokes | regulator systems
computer grade electrolytic capacitors

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

Lambda Power Kits

pre-designed power supply circuits and selected components providing four levels of regulation and ripple . . . over 150 circuits

1. Define parameters

- output voltage
- current
- regulation
- ripple

2. Select power kit

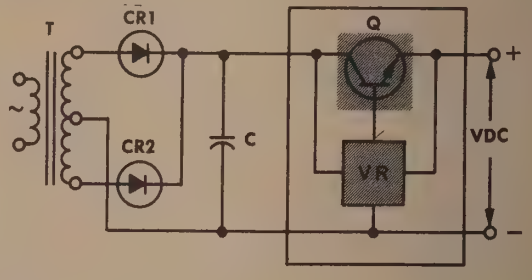
All the major components you need . . . pre-designed to meet your specific requirements.

TYPICAL POWER KIT COMPONENTS

Everything you need for a pre-designed power supply.

Lambda power kits are comprised of components selected for a pre-designed power supply circuit so that you can build your own dc power supply. The components vary depending upon the circuit selected, as well as the dc voltage and dc current required.

Major components supplied are:



- power transformers
- filter chokes
- computer grade electrolytic capacitors
- silicon rectifiers
- regulator systems

Designed for breadboard, pre-production and production models.

Lambda, with the introduction of standard power kits, leaves you free to design your circuit without having to bother with the power supply. Lambda now offers a wide selection of power supply kits to provide you with all the major components needed to build a power supply.

Wide selection of circuits for regulation and ripple.

Lambda offers a selection of pre-designed groups of circuits from which you can select the regulation and ripple characteristics required for your application. Specifications are available from 0.01% regulation 250 μV RMS ripple to 20% regulation at 2 V RMS ripple.

Wide selection of output voltages and currents.

In each group of circuits Lambda offers a wide selection of voltages and currents to meet your needs . . . both single and dual outputs. Voltage ranges up to 48 VDC and current ranges up to 50 amperes DC are provided.

Simply select what you need . . . no calculations or design necessary.

All the circuits supplied with the Power Kits are complete showing all components, and have been pre-designed, proved and tested by Lambda Engineering to assure you the same quality and performance achieved by Lambda's standard line of power supplies. In addition, thermal properties of rectifiers and transistors for heat sinking are provided. Lambda transformers and chokes carry the same 5 year guarantee as Lambda power supplies. Lambda transformers and chokes are fully varnish-impregnated and built to MIL-T-27C, grade 6, specifications.

Circuit Specifications

SERIES 1000 —
Capacitor-Input Filter Power Supply Circuits

line regulation: 1.2% per % @ full load
load regulation: 20% from ½ load to full load
output voltage tolerance: ±5% @ nominal line of 115 Vac
ripple: 1 v RMS, up to 12 Vdc
2 v RMS, 15 to 48 Vdc
dc output voltages: 5 to 48 Vdc (eleven ranges)
dc outut currents: 0.25 to 50 amps (seven ranges)
input voltages: 105-132 Vac, 57-63 Hz

SERIES 2000 —
Choke-Input Filter Power Supply Circuits

line regulation: 1% per % @ full load
load regulation: 10% from ½ load to full load
output voltage tolerance: ±5% @ nominal line of 115 vac
ripple: 2% (RMS) of dc output voltage
dc output voltages: 5 to 48 Vdc (eleven ranges)
dc output currents: 1.0 amp to 50 amps (five ranges)
input voltages: 105-132 Vac, 57-63 Hz

SERIES 3000 —
Regulated Power Supply Circuits

regulation: 0.15% + 10 mV — line or load
ripple: 5 mV RMS
dc output voltages: 5 to ± 18 Vdc (five ranges)
dc output currents: 0.25 to 50 amps (seven ranges)
input voltages: 105-132 Vac, 57-63 Hz
temperature coefficient: 0.03%/°C
remote sensing
automatic current limiting

SERIES 4000 —
Highly Regulated Power Supply Circuits

regulation: 0.01% + 1 mV — line or load
ripple: 250 μV RMS, 1 mV pk-pk
dc output voltages: 5 to ± 18 Vdc (five ranges)
dc output currents: 0.25 to 50 amps (seven ranges)
input voltages: 105-132 Vac, 57-63 Hz
temperature coefficient: 0.015%/°C
remote sensing
remote programming: 1000 ohm/v nominal or volt/volt
series/parallel operation: with similar single or dual units
automatic current limiting

How to Select Lambda Power Kits

1. Determine the regulation and ripple requirement for the circuit you wish to supply.
2. Select one of the four series of circuits that best satisfies your needs — 1000, 2000, 3000 or 4000 series.
3. Turn to the table for that series and select the power supply kit that meets your dc output voltage and current requirements. No need to design the power supply or to calculate voltage drops across components. This has already been done for you.
4. You may purchase either the entire kit, the transformer, the filter choke, or the capacitors, silicon rectifiers, and regulator.
5. Number System — The Lambda part number is an alpha-numeric designation in three parts:

Stock No. Prefix	Stock No.	Suffix
LPKT	2311	-3

The stock number prefix defines the kit or components you wish to purchase and the suffix identifies the circuit to be used within that series.

LPKT = Lambda Power Kit
LPTX = Lambda Power Transformer
LPFC = Lambda Filter Choke
LPCR = Capacitors and Rectifiers
LPCO = Capacitors, Rectifiers and Regulators

The stock number defines the circuit series (which identifies the regulation and ripple) in addition to output voltage and current. For stock numbers in the:

1000 series, see pages 782-783.
2000 series, see pages 784-785.
3000 series, see pages 786-787.
4000 series, see pages 788-789.

Capacitors and silicon rectifiers are only supplied as a unit package in series 1000, 2000 and 3000.

Capacitors, silicon rectifiers, and regulator are only supplied as a unit package in Series 4000.

EXAMPLE:

If you were to order part number LPKT 2311-3, you would be ordering a complete Lambda Power Kit in the 2000 series, a power supply with a choke input filter, which provides a dual + and − 18 volts dc output at 5 amps each, as shown in series 2000 circuit 3. The kit price on the chart is $138. If, on the other hand you only wanted the transformer, you would order LPTX 2311-3 at $44 or LPFC 2311-3 at $82 if you only wanted the filter chokes, etc.

ORDERING:

1. Turn to the page listing the circuit series that meets your requirement for regulation and ripple.
2. Select the voltage you need along the vertical axis of the selection chart.
3. Select the current you need along the horizontal axis of the selection chart.
4. Pick the stock number directly off the chart at the intersection of the axis.
5. You select the stock number prefix to the number depending upon whether you want the entire kit or just individual components. The price for each item is also listed in the same section of the chart. Prices for 1 to 4 units are listed in the left-hand column and prices for 5 or more units are listed in the right-hand column under each current rating.

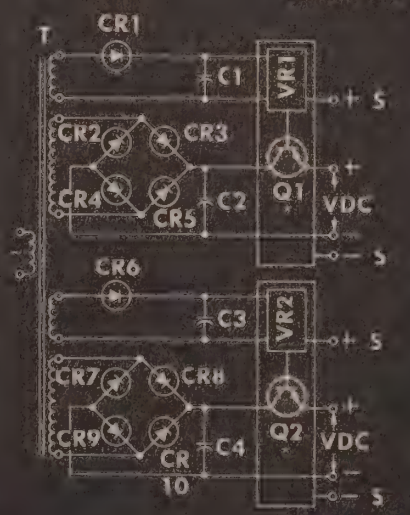
Lambda power kits 4000 series

transformers, capacitors, rectifiers, regulators and circuits



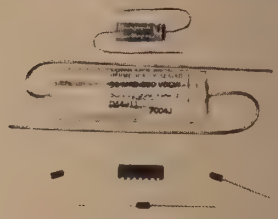
HIGHLY REGULATED POWER SUPPLY CIRCUITS (SIMPLIFIED DIAGRAMS)

CIRCUIT 1

CIRCUIT 3

CIRCUIT 5

*Complete circuit diagrams are provided with kits and components. Lambda does not supply those components shown in shaded areas.



Lambda transformers and chokes are guaranteed for five years.

LPKT
LAMBDA POWER KIT

LPTX
LAMBDA POWER TRANSFORMER

LPCO
CAPACITORS, RECTIFIERS AND REGULATOR

Regulation
0.01% + 1 mV, line or load
Ripple
250 μV RMS, 1 mV pk-pk
DC output voltages
5 to ± 18 Vdc (five ranges)
DC output currents
0.25 to 50 amps (seven ranges)
AC input
105-132 Vac, 57-63 Hz
Temperature coefficient
0.015%/°C
Remote sensing
Remote programming
1000 ohm/v nominal or volt/volt
Series/parallel operation
with similar single or dual units
Automatic current limiting

Com-Pak Mark II™ LC Series integrated circuit regulated modular power supplies

For O.E.M. systems and test equipment applications

Seven package sizes
Single and dual outputs
0.01% regulation line or load
250 μv rms ripple
Integrated circuit regulation system
Convection-cooled

LC series power supplies are listed in Underwriters' Laboratories Recognized Components Index.

© United Technical Publications

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

OUTSTANDING FEATURES OF THE LC SERIES

All-silicon DC power supply using integrated circuits to provide regulation system
xcept for input and output capacitors, rectifiers and series egulation transistors

Increased reliability
hrough use of integrated circuit which replaces 32 discrete omponents from conventional designs

Convection cooled
no external heat sinking required

Regulation
line or load .01% + 1mv

Ripple and noise
250 μv rms; 1mv p-to-p

Wide input voltage and frequency range
105-132 vac, 47-440Hz
lerate current 10% for 47-53Hz operation, except for LCS-1 eries (see listing). For 360-440Hz operation consult factory.

Wide temperature range
–20°C to +71°C

Temperature coefficient
.01% + 300μv/°C external programing resistor
.015% + 300μv/°C internal programing resistor

Remote programing
1000 ohm/v nominal or volt/volt

Remote sensing

Automatic current limiting

Series/parallel operation
with similar single or dual units

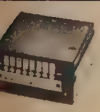
Multi-current-rated

More current per cubic inch

Complete serviceability

Overvoltage protection
available as accessory up to 70 vdc

No overshoot
on turn-on, turn-off or power failure



AC input option
add suffix "-V" to model number for operation at 205-265 vac, 47-440Hz, except LCS-1. Derate current 10% for 47-53Hz operation. For 360-440Hz operation consult factory. In U. S. and Canada, add 10% or $10.00 to price, whichever is greater.

Features of dual output models

Independent operation
Independent remote programing
Independent remote sensing
Each supply electrically isolated
and floating with respect to ground

LC SERIES VOLTAGE AND CURRENT RATINGS *
single output wide range models

LCS-1 SINGLE OUTPUT MODELS

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

LX series modular power supplies

Designed to power operational amplifiers, I-C circuits, transistor circuits...wherever high reliability is required.

LX series modular power supplies

Outstanding features

Single and dual tracking output models

Wide range and fixed voltage models
up to 150 Vdc, up to 9 amperes

Regulation
0.1% line or load

Ripple and noise
1.5 mV RMS; 5 mV pk-pk

Wide input voltage and frequency range
105-132 Vac, 47-440 Hz

Tracking accuracy
1% absolute voltage difference; 0.1% change for all conditions of line, load or temperature

All-silicon DC power supply using integrated circuits to provide regulation system
except for input and output capacitors, rectifiers and series regulation transistors

Increased reliability
through use of integrated circuit which replaces up to 32 discrete components from conventional designs

Convection cooled
no heat sinking or forced air required

Remotely programmable
200 ohms/volt, nominal

Remote sensing
available on all models

Multi-surface mounting
mountable in 3 planes and in any position

Multi-current rated

Completely protected
automatic current limiting and self-resetting thermostats

Overvoltage protection
available with all series up to 70 Vdc rating

No voltage spikes or overshoot
on turn-on, turn-off, or power failure—for maximum load protection

Complete serviceability
all components replaceable

Series operation
Single and dual output models may be connected in series.

5-year guarantee
to full performance specifications, includes parts and labor

DISTRIBUTOR DIVISION

Lambda-Pak specifications

DC output

Voltage range ..... see charts
Regulated voltage: Regulation.. 0.15% — line or load
Ripple and noise ..... 1.5 mV, 5 mV pk-pk
Temperature coefficient ..... 0.03%/°C
Tracking (dual output models only) ..... 2% absolute voltage difference. 0.2% change for all conditions of line, load and temperature.

AC input

105-132 Vac, 57-63 Hz

Ambient operating temperature range

continuous duty from 0°C to +50°C ambient.

Storage temperature range

−25°C to +85°C

Overload protection

fixed, automatic electronic current limiting circuit limits the output current upon external overloads, including short cuit, thereby providing protection for load as well as po supply.

Input & output connections

printed circuit solder pins on lower surface of unit.

Controls

simple screwdriver voltage adjustment over entire volt range.

Mounting

two 4 x 40 tapped holes on lower surface of unit.

NOTES:

(1) All models have adjustable voltage control and for load protection should be set to required voltage before connecting loads.

Lambda-Pak features

Three power packages

Single and dual tracking outputs

Fully repairable

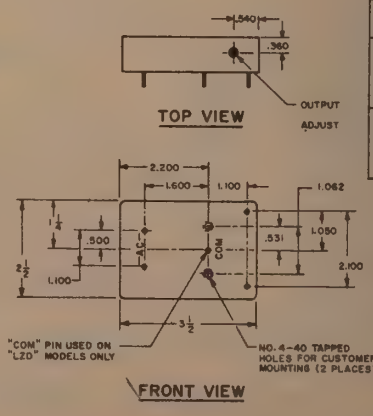
60-day guarantee

only repairable, plastic power supply offering 60-day guarantee that includes material and labor.

Impact resistant, flame retardant plastic housing

Foldback current limited

Continuously adjustable output voltage



Multi-voltage rated

Ambient operating temperature

continuous duty from 0°C to +50°C

Vacuum-impregnated transformer

LL Series IC regulated bench power supply with built-in, tracking overvoltage protection
0-10 volts, 1 amp, $90 with OV
0-10 volts, 1 amp, $75 less OV

LL series I-C regulated power supply

Also available 0-20, 0-40, 0-120 vdc

Regulation
line 0.01% + 1mv
load 4 mv

Ripple and noise
250 μv rms; 1 mv p-to-p

All silicon DC power supply using integrated circuits to provide regulation system
except for input and output capacitors, rectifiers and series regulation transistors

Multi-position operation
lies flat or stands erect

AC input
05-132 vac 47-440 Hz (Current ratings based on 57-63 Hz.)

Weight
less than 5 lbs.

Output
5-way binding posts

Ambient operating temperature
0—50°C

Temperature coefficient
0.015% + 300 μv/°C

Adjustable current limiting
0% to 110% of rating

Storage temperature
—40°C to +85°C

Convection cooled

Die-cast aluminum construction

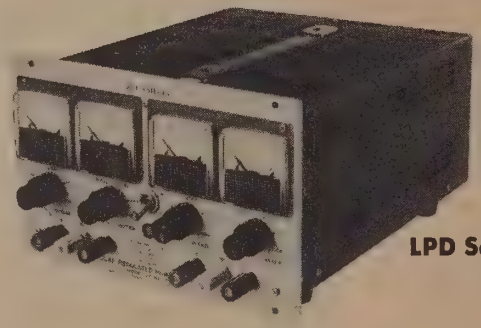
No overshoot
on turn-on, turn-off or power failure

Controls
coarse voltage adjust, fine voltage adjust, current adjust, ON/OFF switch, meter function switch.

Indicators
power ON light and dual-function meter

Guaranteed for 5 years material and labor

LL series bench-type supply 5⅜" x 5½" x 3⅞"



Model	ADJ. VOLT RANGE VDC	CURRENT RANGE(1)	Price
LL-901	0-10	0-1.0 amp	$75
LL-902	0-20	0-0.65 amp	85
LL-903	0-40	0-0.35 amp	85
LL-905	0-120	0-65 ma	99
WITH BUILT-IN TRACKING OVERVOLTAGE PROTECTION			
LL-901-OV	0-10	0-1.0 amp	$90
LL-902-OV	0-20	0-0.65 amp	99
LL-903-OV	0-40	0-0.35 amp	99

NOTES:
(1) Consult factory for operation at 50 Hz or temperatures above 50°C. Ratings apply 0-50°C.
(2) Independently adjustable OV protection available as accessory on LL-901, 902 (LC-OV-10, range 3-24 vdc) and LL-903 (LC-OV-11, range 3-47 vdc) price $20.

LAMBDA ELECTRONICS CORP.
DISTRIBUTOR DIVISION

LP and LPD Series general-purpose single and dual lab supplies

LP Series

LPD Series

Features of LPD series dual output power supply

5 models with two independent DC outputs
up to ±250 vdc, up to 1.7 amps. Either or both outputs may be + or −

Series/parallel operation
of both outputs yields two times the voltage or two times the current—up to 500 volts or up to 3.4 amps.

Auto series/auto parallel (master-slave)
permits tracking to a common reference.

4 meters
provide simultaneous monitoring of both voltage and current.

Regulation
line or load .01% + 1 mv.

Ripple
500 μv rms (1.5 mv p-p)

A-C input
105-132 vac 47-440 Hz (ratings based on 57-63 Hz operation). For operation at 205-265 vac, add suffix "-V" to model numbers and 10% or $25.00 (whichever is greater) to price.

Multi-current-rated

Additional features of LP and LPD series

All silicon semiconductors
Bench or rack use
Remotely programable
Remote sensing
Continuously variable
Designed to meet RFI per MIL-STD-826A
Fungus-proofing option
add suffix "R" to model number and add $15.00 to price.

Overvoltage protection
available as an option up to 70 vdc

LPD dual output models 5 3/16" x 8 3/8" x 10 3/32

LAMBDA ELECTRONICS CORP.

ISTRIBUTOR DIVISION

Two instruments in one
High-precision differential voltmeter
and high-precision power supply

Features of the high-precision, power, differential voltmeter:

Draw power as you measure voltage...
The first and only differential voltmeter to furnish high stability power output while being used as a voltmeter ...no need for a separate power supply.

Plus all power supply specifications.

Features of the metered, high-precision power source:

Regulation 0.0005% plus 100 μV
best of any high-stability power supply in this price range.

Ripple
35 μv rms; 100 μv p-to-p.

Accuracy
0.01% + 1mv.

2 Meters
nitor voltage and current simultaneously and continuously

Illuminated digital readout

Remotely programable
1000 ohms/volt nominal, or volt/volt

Constant voltage/constant current

Multi-current-rated
for 30°C, 40°C, 50°C, 60°C

Only 5¼" high
convenient half-rack size for rack or bench use.

Stability
0.001% + 100 μv over 8 hour period.

Convection-cooled
no blowers, no external heat sinks.

Auto series/auto parallel
with Master-Slave tracking.

AC input
105-132VAC, 47-440 Hz (derate dc output current 10% at 50 Hz) 205-265vac "V" option at extra charge of 10%.

Twice the power
in a convenient ½-rack package.

All silicon semiconductors
for maximum reliability.

Completely protected
short-circuit proof; continuously adjustable current limiting.

Fungus-proofing option
add suffix "R" to model number and add $20.00 to price.

Basic Non-Metered Model	VOLTAGE RANGE	MAX. AMPS AT AMBIENT OF (1) 30°C	40°C	50°C	60°C	Price [2]	Metered Accessory Model	Price [2]	Diff. VM Accessory Model	Price [2]	Over Volt. Protect. Adj. V. Model	Range	Price
LS-511A	0-10VDC	2.8A	2.5A	2.1A	1.7A	$445	LS-FM1	$55	LS-DM1	$125	LHOV-4	3-24	$35

Regulation
line or load less than 1%

Remote programing
200 ohms/volt nominal for models LD-802, 812, and 832

Response time
less than 50 msec.

All silicon semiconductors

Convection cooled
no external heat sinks

Sinusoidal output
less than 3% distortion added

High efficiency
greater than 80%

Wide power factor range
0.7 PF leading to 0 PF lagging

Remote sensing

EMI/RFI
designed to meet conducted portions of MIL-STD-461A

Remote programing
LD 802, LD 812 and LD 832

Wide operating temperature range
0 to 71°C

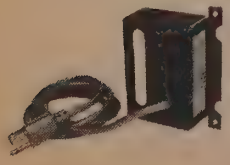
Wide input voltage range
100-132, 180-235, 200-265 vac

Automatic current limiting
protects load as well as power supp

Completely repairable
all components replaceable

Applications for LD series

Power conditioners stabilize ac lines to:



1. extend equipment life of lamps, relays, motors, etc.
2. assure constant speeds for motors and constant lamp intensities.
3. assure steady-state input power for long-term stability measurements and for precise production testing.
4. provide the facility to remotely program line conditions production testing.
5. help stabilize crt displays by providing stable input voltag for triggering circuits.
6. protect equipment against random, high-voltage, transie spikes.

LD series ac power conditioners

SOLA ELECTRIC STB
DIVISION OF SOLA BASIC INDUSTRIES

SOLATRON® ±½% LINE VOLTAGE REGULATORS

What It Is

The Solatron® LVR is the first regulator to combine in one unit the qualities of **fast response, "tight" voltage regulation, no moving parts, adjustable output, remote sensing, compactness, and high KVA capacity.**

The Solatron is a solid-state device with no moving parts, requiring no adjustment, maintenance, or attention. It combines the ruggedness typical of transformers with the light weight of electronic control circuitry, resulting in a regulator of remarkable compactness. It has great versatility in mounting, and installation.

Solatron® regulators are available as standard units in KVA ranges from ½ to 500 KVA, and yet they furnish a degree of regulation associated in the past with small VA capacity constant-voltage transformers and power supplies.

Units are available for single or three-phase applications, for either delta or wye connection depending on the service available or the load requirements of your equipment.

And What It Does

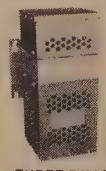
Regulation: ±0.5% for line changes. ±1% maximum for any combination of line, load, temperature and frequency changes within limits listed below.

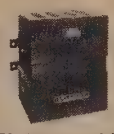
Variation limits: line ±10%, or + 10%/—20%. Frequency 57-63 cycles, 47-53 cycles, or 380-420 cycles depending on model chosen (see catalog listings). Load zero to full load. Temperature 15° to 40°C.

Response: correction begins in first ½ cycle and is typically 100% complete in less than 10 cycles of the AC frequency.

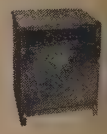
Harmonic content: no harmful wave-form distortion.

Adjustable output: output voltage is adjustable ±10% of nominal output voltage.





No maintenance: contains no relays, switches, contacts, solenoids, tap, bearings, or other moving parts. No drive motors, servos, or hand cranks. Requires no maintenance: operates completely unattended.



Current capability: withstands high inrush load currents and momentary overloads.

Motor loads: will handle inrush starting current without serious voltage collapse; provides adequate starting torque; no necessity to oversize KVA rating.

Mounting flexibility: may be mounted on wall, floor, or in equipment being regulated. Large terminal compartment, stud or screw-type terminals, knockouts for ease of wiring and installing.

Remote sensing: sensing leads easily connected to load for remote location of Solatron® LVR or for line drop compensation where desired.

SINGLE-PHASE (60 Hz ±3 Hz)

NOTE: 50 Hz units are also available.

Harmonic Filter Selection

Example: If you select a Solatron catalog number — 31-16-230 — and require a Harmonic filter, find the Catalog number series in chart A, B or C 31-16 and then the catalog number suffix 230. The Harmonic filter in this case would be 34-905.

Auxiliary Harmonic Filters

SELECTION CHART A[4]

Catalog Number Series	Catalog Number Suffix						
	—230	—250	—275	—310	—315	—325	—337
31-16	34-905	34-910	34-910	34-920	34-920	34-930	34-940
31-26	34-905	34-905	34-910	34-910	34-910	34-920	34-930
31-46		34-905	34-905	34-910	34-910	34-910	34-920

SELECTION CHART B (Three Units Required)[6]

Catalog Number Series	Catalog Number Suffix						
	—290	—315	—322	—330	—345	—375	—411
37-06	34-905	34-910	34-910	34-920	34-920	34-930	34-940

SELECTION CHART C (Three Units Required)[6]

Catalog Number Series	Catalog Number Suffix						
	—252	—285	—313	—317	—326	—343	—365
37-29	34-905	34-905	34-910	34-910	34-910	34-920	34-930
37-49		34-905	34-905	34-910	34-910	34-910	34-920

Auxiliary Harmonic Filters

Catalog Number Series	Suffix	USER OEM Contractor 1-9 Units	Catalog Number	Approximate Shipping Weight

	—940	272.15	34-940	80

FOOTNOTES

1. At unity power factor and nominal output voltage. Although the KW efficiency is greater than 90%, the VA efficiency under worst-condition operation can be 60% for +10/—20% input voltage range units.
2. The output voltage regulation is ±0.5% for line voltage changes or ±1% for any combination of line voltage, frequency, load or temperature changes within the limits specified.
3. The output voltage adjustability is accomplished by an internal multi-turn potentiometer. Regulation in accordance with note (2) will be maintained at any output voltage setting within the specified adjustable range.
4. The input voltage range (either ±10% or +10/—20%) is based on the output voltage setting. The output voltage is adjustable ±10% of the rated nominal output by means of an internal multi-turn potentiometer. Therefore, the input voltage range shifts lineally with the setting of this control.
5. Maximum additive RMS harmonic content at nominal frequency.
6. 3% maximum additive RMS harmonic content may be obtained by using an auxiliary harmonic filter. See selection chart A.

   3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-neutral). See selection chart B.

   3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-line). See selection chart C.
7. Special sensing circuit filters must be ordered when feeding a rectified load. These are furnished at no additional charge.
8. F.O.B. Goldsboro, North Carolina. All other units are F.O.B. Elk Grove Village, Illinois.
9. The lowest line-to-line load should not be less than 70% of the highest line-to-line load, and the highest line-to-line load equal to, or less than, ⅓rd of the three-phase delta nameplate KVA rating. Additionally, the lowest line current should not be less than 90% of the highest line current.

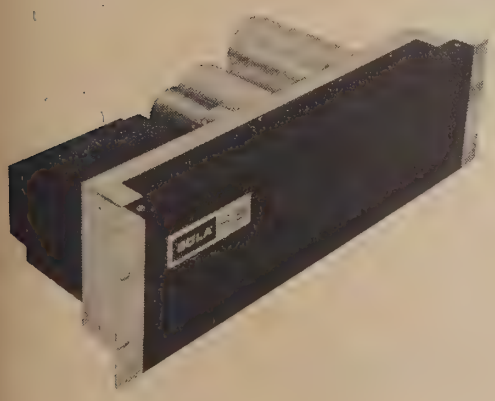
SOLA® CVDC power supplies, available off-the-shelf.

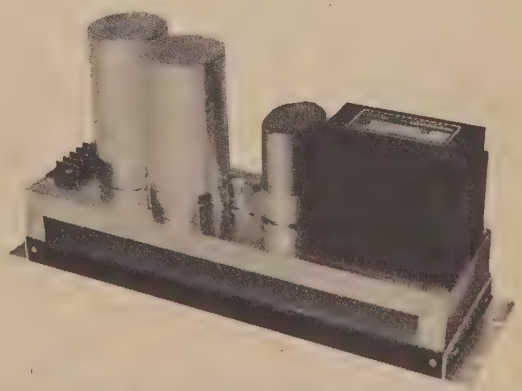
Sola offers a wide range of CVDC type power supplies which are available from stock of your local electronic parts distributor or the factory. These standard designs are available in any quantity and are the result of Sola custom engineering efforts.

Inherently highly reliable, the CVDC supplies are ruggedly built and use simple circuitry. Fast and dependable regulation, current limiting, and high efficiency are provided by the heart of the supply: the famous Sola Constant Voltage Transformer.

CHARACTERISTICS



- Fast, dependable line-voltage regulation: within ±1% for fluctuations of ±15%; voltage will return to regulation envelope in approximately 50 milliseconds.
- Load regulation: from 1/2% to 8%, one half to full load.
- Automatic current limiting: short circuit protection; withstands load faults; high overloads cannot damage power supply or equipment components.
- High efficiency: upwards of 75%; low input-power requirements.
- Simplified operation: no adjustments or maintenance; continuous duty.
- Convection cooling.
- Ripple: 1% rms maximum.
- Ambient operating temperature: 50° C maximum.



Constant-voltage Sola transformer provides ±1% regulation for line voltage variations as great as ±15%, serves as the heart of CVDC power supplies for voltage-sensitive equipment.

STANDARD CVDC MODELS

(fixed output for pulse, variable, intermittant and fixed loads-inputs 100-130 volts, 60Hz)

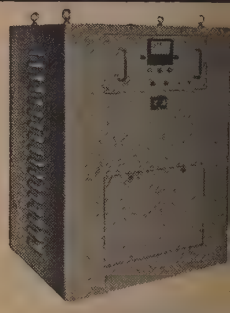
STABILINE® automatic VOLTAGE REGULATORS

- THE MOST EXTENSIVE LINE OF AUTOMATIC VOLTAGE REGULATORS
- RATED OUTPUTS FROM 0.25 TO 275 KVA

Deliver a constant output voltage regardless of variations in inpu voltage or changes in load current. Conservatively rated, ruggedl built, precision products. Submit specifications for ratings desired bu not given in the charts. Input voltage ranges shown are at nomin output voltage; input voltage range shifts with output voltage settin All are cabinet types; those with other construction also are indicate

EMT series



Electro Mechanical Transistorized types in ratings from 2.3 to 118 kva. Control circuit is completely transistorized. POWERKOTE Coils in power section permit higher output ratings. Rated accuracy ±0.75% for all variations of line voltage or load current within stated range of unit.

TYPE EMT4115B

EMS series

Electro Mechanical Transistorized types for single or three phase duty with ratings from 25 to 275 kva. Several types available with individual line control for greater application flexibility. Plug-in transistorized control circuit permits quick replacement in event of malfunction.

TYPE EMS42100

TYPE EMK4105R

EMK series

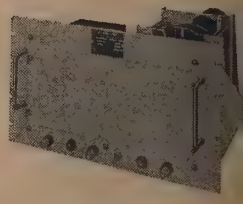
Electro Mechanical high speed, high accuracy assemblies in ratings of 2.5/5.0 KVA. Accuracy ±1.0% of nominal output voltage.

IES series

TYPE IES9101

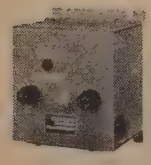
Solid-state types with accuracy within 100 millivolts bandwidth, efficiency up to 95%, fast response, low distortion and wide operating frequency range. No vacuum tubes, motors, blowers or relays are used. All units have provision for remote sensing and have removable plug-in solid-state circuit boards.

All-boost Marine



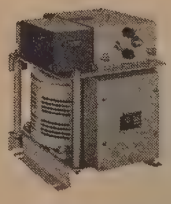
Electro Mechanical Transistorized type EMT10228 is fully enclosed in a weatherproof cabinet. Well suited for marine or industrial applications where equipment must withstand effects of dust and moisture. Has 6 KVA rated output.

TYPE EMT10228



Militarized

Standard Electro Mechanical and Electro Mechanical Transistorized types that meet the requirements of applicable military specifications. Type EMTH41007MH is 3½ x 6 x 4½"; type EM4108MCR fits standard 19" relay rack. Accuracy ±1.0%.



TYPE EM4108MCR

Overvoltage Detector OVK100

TYPE OVK100

Solid-state voltage level detector used with STABILINE Automatic Voltage Regulators. Actuates relay contacts when monitored voltage exceeds preset level. Relay contacts can be used to actuate protective equipment in a latching (relay remains closed) or nonlatching (relay automatically resets) connection. Trip level adjustable from 110 to 150 volts. Adaptable for higher voltage operation.

TYPE EMT4104BUT

Types EMT4104B, (U), (UT)

Have two primary windings for parallel or series (120 or 240 volt) duty. Type EMT4104B is cabinet enclosed; EMT4104BU is of open construction; EMT4104BUT has components screened or enclosed.

‡At 400 hertz. †Also available as rack model (suffix R when ordering). ¶For 60 hertz operation only.
§Can also be operated on an input range of 95 to 135 volts with a rating of 57 amperes, 6.6 kva and a correction rate of 0.075 seconds per volt.
*Also available as rack (suffix R when ordering) or wall mounted (suffix W when ordering) models.
**Unit can be converted for 208 volt operation by simple tap changes. Input and output voltage ranges change proportionally.
‖At nominal output. Shifts with output voltage setting but not proportionally.
††Also available in open construction (suffix U) and with screened and enclosed (suffix UT) construction.
▲At nominal output. Shifts proportionally with output voltage setting.

CTIONS 2100, 3500 AND 5600

STABILINE®

FULL RANGE REGULATOR CONTROLLERS

TYPE FR501MP

For use with any motor-driven POWERSTAT® Variable Transformer to provide full range:

1. REGULATED AC VOLTAGE

A type FR501 or FR501MP STABILINE Full Range Regulator Controller can regulate the output from any motor-driven POWERSTAT Variable Transformer designed for 120 or 240 volt, 50/60/400 hertz, single phase service. For three-phase applications the unit may be used to monitor one line-to-neutral or one line-to-line voltage, depending on the type of variable transformer used. The unit may also be used in 480 volt applications, but when sensing line-to-line voltage, a 480/120 volt step-down transformer, Superior Electric part no. T6026, is required. Output voltage will remain within a 2 volt band when used with 120 volt POWERSTAT Variable Transformers and within a 4 volt band when used with 240 volt POWERSTAT Variable Transformers. The output voltage will remain within the stated bands for any and all variations in line voltage that the variable transformer is capable of correcting and for variations in the control input between 95 and 135 volts.

2. REGULATED AC CURRENT

With the addition of a T6340 transformer and a user supplied current transformer, an FR501 or FR501MP Full Range Regulator Controller can be used with any motor-driven POWERSTAT Variable Transformer to automatically regulate current. The user-supplied current transformer should be of the proper rating to supply 0 to 5 amperes, 10 VA minimum to the transformer. The Full Range Regulator Controller will maintain constant output voltage accurate within ±1% of the maximum current setting. Current can be maintained at any point from zero to maximum.

3. REGULATED DC VOLTAGE

A type FR501DC STABILINE Full Range Regulator Controller is used to provide regulated d-c voltage. Required are a motor-driven POWERSTAT Variable Transformer, an FR501DC Full Range Regulator Controller and a user-supplied d-c power supply. The FR501DC requires 0 to 28 volts d-c, 16 milliamperes to the sensing terminals.

DEALER NET PRICES

CHARGERS, INVERTERS AND VOLTAGE ADJUSTERS

CHANGES BATTERY CURRENT TO 110 VAC, 60 CYCLE, ±½ CYCLE, REGARDLESS OF LOAD*

CAN BE ADAPTED FOR 50 CYCLE USE †

SOLID STATE

INVERTERS

FREQUENCY STABLE QUAD CONTINENTAL

Transistorized, 1200 watts

Converts 12 VDC to 117 VAC, 60 Hz, 1100 to 1200 watts. Frequency stable within ¼ Hz, not affected by change in input or load. Filtered for sensitive electronic equipment. Operates such equipment as small refrigerators, lights, tape recorders, video cameras and tape recorders, electric tools, laboratory test equipment, television, including color, and portable hospital equipment. Adjustable output control and accurate AC output meter. Sophisticated, solid state design at sensible cost. Variable control head may be installed from main unit with 4 optional plug-in extension cables. Size: 12" w. x 12" l. x 15" h. Shpg. Wt., 140 lbs.
Terado No. 50-110—Net Each..... $610.05

DUAL CONTINENTAL*†

Transistorized, 600 watts

Same as QUAD CONTINENTAL except: 550 to 600 watts capacity. Size 10¾" w. x 13" d. x 6" h. Shpg. Wt., 60 lbs.
Terado No. 50-202—Net Each..... $327.74

CONTINENTAL*†

Transistorized, 300 watts

Same as DUAL CONTINENTAL except: 275-300 watts capacity. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 30 lbs.
Terado No. 50-191—Net Each..... $158.40

ATLAS*†

Transistorized, 200 watts

Same as DUAL CONTINENTAL except: 175-200 watts capacity. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 21 lbs.
Terado No. 50-200—Net Each..... $114.53

TITAN*†

Transistorized, 175 watts

Same as DUAL CONTINENTAL except: less remote control; 150-175 watts capacity; on-off switch; AC receptacle. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-201—Net Each..... $100.51

SUPREME*†

Non-transistorized. Converts 12 VDC to AC. Power output, 175-200 W, filtered. Remote control has variable AC output switch and signal light. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-153—Net Each..... $84.07

RECORDER*†

150-175 watt version of SUPREME, less remote control. Plugs into cigarette lighter. Size: 10¾" w. x 6" d. x 6" h. Shpg. Wt., 21 lbs.
Terado No. 50-175—Net Each..... $76.67

CHIEF*†

Operates tape recorders, power tools, dictation machines, mixers, blenders, etc. Front AC receptacle connects direct to battery. Toggle switch output control. Ventilated steel case. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-137—Input, 6 V; AC power output, 75-100 watts. Net Each..... $53.90
Terado No. 50-138—Input, 12 V; AC power output, 100-125 watts. Net Each..... $53.90

AUTOMATIC*†

Operates automatically from 6 or 12 VDC without vibrator change or switching (6 V, 55-75 watts; 12 V, 85-110 watts). Easy installation into cigarette lighter. For dictation machines, radios, tape recorders, phonographs, heating pads, etc. Steel case. Seal brown baked enamel. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-134—Net Each..... $44.52

SUPER*†

Single input version of AUTOMATIC above. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-126—Input, 6 V; AC power output, 60-75 watts. Net Each..... $38.47
Terado No. 50-127—Input, 12 V; AC Power output, 75-100 watts. Net Each..... $38.47

MASTER*†

Voltage input, 12 V; AC power output, 60-75 watts. Size: 3½" w. x 6½" d. x 4" h. Shpg. Wt., 6 lbs.
Terado No. 50-122—Net Each..... $32.55

ELECTRAL*

Glove compartment size inverter, available in 12 volt input. Easy installation into cigarette lighter. Vinyl coated steel case with leatherette appearance. Size: 3" w. x 2¼" d. x 5½" h. Shpg. Wt., 3 lbs.
Terado No. 50-167—Voltage input, 12 V; AC power output, 42-52 watts. Net Each..... $21.30

SENIOR*

Operates radios, lights, phonographs and small tape recorders. Available in 6 V or 12 V input. Simple to install into cigarette lighter. Aluminum case. Seal brown baked enamel. Size: 2½" w. x 4½" d. x 2¼" h. Shpg. Wt., 3 lbs.
Terado No. 50-115—Voltage input, 6 V; AC power output, 35-40 watts. Net Each..... $18.47
Terado No. 50-116—Voltage input, 12 V; AC power output, 40-50 watts. Net Each..... $18.47

DYNAMO*

Permits operating AC radios and electric shavers on 12 VDC battery. Power output, 25-30 watts. Size: 2" x 2" x 3¾". Shpg. Wt., 2 lbs.
Terado No. 50-197—Net Each..... $13.80

AUTO SHAVER*

Operates all electric shavers. Available in 6 V (10-15 W) or 12 V (15-20 W) input. Plugs into cigarette lighter. Polyethylene non-breakable case. Size: 3⅝" w. x 2¼" d. x 4¼" h. Shpg. Wt., 2 lbs.
Terado No. 50-102—6 V. Net Each..... $11.85
Terado No. 50-103—12 V. Net Each..... $11.85

ULTRA FINE FREQUENCY STABLE INVERTERS

DUAL CONTINENTAL-3

Converts 12 VDC to 110 VAC, 60 Hz, 550-600 watts. Frequency variation plus or minus ⅛ Hz with changing input and load. Ideal for operation of fine or critical equipment as: video-tape equipment and instruments. Includes battery cables, remote control and variable AC output. Size: 10¾"x13"x6"; shipping weight 60 lbs.
Terado No. 50-202-3—Net Each..... $417.64

CONTINENTAL-3

Same as DUAL CONTINENTAL-3 Except 275-300 watts, capacity — Frequency stable to plus or minus ¼ Hz. Size: 10¾"x6"x6"; shipping weight 30 lbs.
Terado No. 50-191-3—Net Each..... $233.40

24 VOLT TRANSISTORIZED INVERTERS WITH ULTRA FINE FREQUENCY CONTROL

DUAL CONTINENTAL — 24 VOLT

Converts 24 VDC to 110 VAC, 60 Hz, 700-800 Watts, Frequency stable to ± ⅛ Hz with changing input and load. Designed for duty in aircraft or other 24 volt D.C. applications. Includes battery cables, remote control and variable A.C. output. Size: 10¾"x13"x7¼": shipping weight 60 lbs.
Terado No. 50-152—Net Each..... $621.23

CONTINENTAL — 24 VOLT

Same as 24 Volt Dual Continental; except 350-400 watt capacity—Frequency stable to ± ¼ Hz; Size: 10¾"x6"x6"; Shipping weight 30 lbs.
Terado No. 50-190—Net Each..... $305.35

BATTERY CHARGERS

DYN-A-MITE

Baked seal brown paint over aluminum case. Charge rate 1 amp, both 6 and 12 volts. Size: 1¾" x 1¾" x 3¼". Wt., 1 lb.
Terado No. 50-186—Net Each..... $7.19

CHARGRITE

Brown baked enamel, ventilated steel case. Charge rate 5 amps. tapers to trickle. 12 volts only. Charge rate meter. Brackets for coiling wire provided. Size: 4"x5"x6". 10 lbs.
Terado No. 50-194—Net Each..... $23.30

TAPERITE

Brown baked enamel case. Charges 6 amps, or in low position charge automatically tapers to 0. Will not overcharge battery; has charge rate meter. Size: 4" x 5" x 6". Wt., 7½ lbs.
Terado No. 50-192—Net Each..... $28.42

CHALLENGER

Brown baked enamel, ventilated steel case. Charge rate 6 amps, both 6 and 12 volts. Charge rate meter. Brackets for coiling wire provided. Size: 4" x 5" x 6". Wt., 5 lbs.
Terado No. 50-189—Net Each..... $23.92

SUPER CHARGER

Brown baked enamel, ventilated steel case. Charge rate 10 amps, both 6 and 12 volts. Color coded meter shows condition of battery and charge rate. Size: 4" x 5" x 6". Wt., 7½ lbs.
Terado No. 50-181—Net Each..... $29.05

POWERHOUSE

Heavy duty, heavy copper clad, ventilated steel case with handle. Full fast 20 amp charge rate on either 6 or 12 volt batteries, plus trickle charge. Full wave type with 4 silicon rectifiers. Complete with charge rate meter and 6 ft. cable with battery clamps. Size: 11" x 6" x 6" Ship. Wt., 20 lbs.
Terado No. 50183—Net Each..... $54.15

VOLTAGE ADJUSTERS

POLARIS & SATURN

For TV, hi-fi and AC motorized equipment. Change high or low voltage over range of 95-135 V to normal. Input: 110 VAC line. Size: 3" x 2¼" x 5½"
Terado No. 50-204 Polaris—Cap., 300 W cont., 500 W int. Wt. 3 lbs. Net Each..... $11.40
Terado No. 50-172 Saturn—Same as Polaris, but with accurate AV voltmeter. Net Each..... $18.77

APPOLLO

Cap. 1200 W Cont. 1500 W int. Wt. 8 lbs. Size: 3½" x 6½" x 4".
Terado No. 50-141—Net Each..... $22.75

KORECT-A-LINE

For CB and Ham radio equipment, monitor and correct abnormal voltage; accurate AC voltmeter. Cap., 300 W cont. Wt. 3 lbs.
Terado No. 50-150—Net Each..... $18.77

INVERTER-CHARGER COMBINATION

Transistorized — Solid State
Frequency Not Controlled

MARK I

Copper baked enameled case. Changes battery voltage to 117 volts, AC capacity 450 to 500 watts. Charges 12 volt storage battery at 20 amps, 10 amps or trickle. Has charge meter. Size: 12½" x 6" x 6". Shpg. Wt., 21 lbs.
Terado No. 50-131—Net Each..... $104.50

MARK II

Same specifications as MARK I above except inverter capacity is 275-300 watts.
Terado No. 50-132—Net Each..... $89.50

12 VDC POWER SUPPLIES with BATTERY CHARGING FEATURE

POWR-MITE

Brown baked enamel, ventilated steel case. Supply and charge rate 10 amps. 12 volts D.C. Filtered for 1 amp. loads. Includes output meter. Size: 3½" x 4" x 6½". Wt. 10 lbs.
Terado No. 50-105—Net Each..... $32.90

POWR-ALL

Same type as Powr-Mite except: Capacity 25 amperes—continuous 40 amps. intermittent. Two complete circuits. SEPARATE CIRCUIT BREAKERS. Battery Charge rate 25 amps. to trickle. Filtered for 1 amp. loads. Size: 12½" x 6" x 6". Wt. 21 lbs.
Terado No. 50-106—Net Each..... $61.20

PORTABLE 117 VOLT POWER SUPPLY

TRAV-ELECTRIC*†

Operates anything using 117 VAC, 60 Hz, from enclose 25 amp storage battery. Capacity, 125-175 watts. Fre quency stable within ½ Hz with load change. Recharge from AC outlet or car cigarette lighter. Meter show charge rate and hours of output. Size 12" x 5½" x 8" Shpg. Wt., including battery, 36 lbs.
Terado No. 50-160—Net Each..... $74.1

TRANSISTORIZED INVERTERS

Frequency Not Stabilized

GEMINI

(Transistorized, 450 to 500 watts)

Transistorized 12 VDC to 110 VAC. Designed t operate equipment not sensitive to frequency chang Size: 12½" x 6" x 6". Shpg. Wt., 20 lbs. $97.
Terado No. 50-128—Net Each.....
Remote Control No. 50-130—Net Each..... $11.5

FALCON

(Transistorized, 275 to 300 watts)

Transistorized 12 VDC to 110 VAC. Designed t operate equipment not sensitive to frequency chang Size: 12½" x 6" x 6". Shpg. Wt., 20 lbs. $78.
Terado No. 50-129—Net Each.....
Remote Control No. 50-130—Net Each..... $11.5

GALAXY

Transistorized 12 VDC to 110 VAC, 140-175 watts fi tered. Adjustable voltage and frequency. Ideal whe frequency is not critical, Size: 10¾" w. x 6" d. x 6" Shpg. Wt., 9½ lbs. $46.
Terado No. 50-205—Net Each.....

TEMPEST

Transistorized 12 VDC to 110 VAC, 125-150 watt Ideal where frequency is not important. Size: 10¾" w x 6" d. x 6" h. Shpg. Wt., 9½ lbs. $39.

WANLASS PARAX

WANLASS PARAFORMER™ PRODUCTS FOR OEM AND SYSTEM APPLICATIONS

MODEL NO. PEC-60

ORDER A PARAFORMER™ TODAY AND SEE FOR YOURSELF

Knowing that every conceptually new component must be carefully tested by prospective users before it can be included within their own equipment. Wanlass Electric has available for immediate delivery a 60 watt Paraformer (Model PEC-60). May we suggest that you buy one of these units and satisfy yourself relative to its amazing properties. When you place your order, be sure to ask for our new book entitled "The Wanlass Paraformer™". This treatise on the subject of parametric power conversion discusses the theory and application of parametric devices and will assist you in evaluating your PEC-60.

MODEL NO. PS 5-10
5V @ 0-10A D. C.

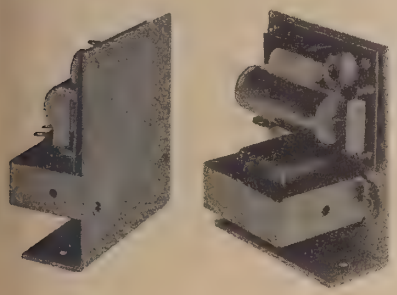
MODEL NO. PS 5-10 ONLY $150.00 (1-9 PRICE)

The Wanlass Paraswitcher™ DC power supply is a high performance, 50KH switching power supply incorporating the unique Wanlass Paraformer™ provide noise and transient free DC power for use in all applications. The supp provides high density power (2 watts/cubic inch) at high overall efficiency (ov 70%). Unique protective features inherent to the Paraformer™ componen incorporated in the supply include: overvoltage protection, undervolta protection, and overload protection.

SPECIFICATIONS

Output
Output voltage: 5 volts with ±10% adjustability
Output current: 10 amperes
Regulation Line: ±0.2%
Regulation for 10% to full load: ± 0.2%
Ripple: 10 millivolts RMS
Input:
160 volts DC ± 10% *

Physical Characteristics
Size: 3" x 4" x 2"
Cold plate type heat exchanger
Terminal strip for input and output
General Information
Maximum allowable cold plate temperature for full rated load: 70% typical
Operating Frequency: 50 KHz nominal



Overvoltage protection: standard feature
Overload protection: standard feature
Undervoltage protection: standard feature
Price — $150.00 unit quantity
Options available
Bolt on finned heat sink — $10.00
*AC input option for AC to DC conversion, 4 420 Hz, single phase, 117 VAC nominal $20.00

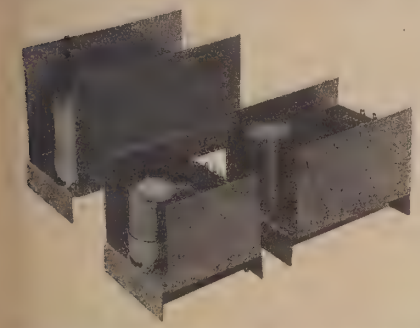
WANLASS ALL SILICON SOLID STATE STATIC D.C. POWER SUPPLIES

WANLASS DPS LINE – *Economy O.E.M. D.C. Power Supplies*



THE EPITOME OF "ECONOMY BY DESIGN"! 5 VOLT, 12 VOLT OR 24 VOLT REGULATED AND FILTERED DC POWER (UP TO 20 WATTS) AT LESS THAN $20.00 IN QUANTITY!*

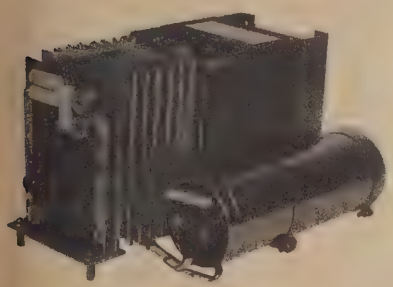
Operates from 115V ±10% 1 phase 47-63 Hz line, providing ± 1% line and load regulation and filtering of 1% RMS. Provides, 5 or 6V, 12 or 15V or 24V depending upon model selected (see tabulation of models & ratings). Has automatic "fold back" current limiting overload and short circuit protection! Output is floating — either positive or negative may be grounded. Has isolation type power transformer. Self cooled. Dimensions 4" x 2½" x 4½" H. maximum. Weight: less than 2 lbs.

Model No.	Rating	Prices
DPS-1	5/6V @ 3/2.5A	1-9 @ $24.95 10-24 @ $23.70
DPS-2	12/15V @ 1.5/1.2A	25-49 @ $22.45 50-99 @ $21.20
DPS-3	24V @ 1/.8A*	100-999 @ $19.95
DPS-5	5/6V @ 1.5/1A	1-9 @ $19.95 10-24 @ $18.95
DPS-6	12/15V @ .75/.65A	25-49 @ $17.95 50-99 @ $16.95
DPS-7	24V @ .4A	100-999 @ $15.95

*24V unit rated 1A over 115-125VAC line voltage range.
24V unit rated 0.8A over 105-115VAC line voltage range.

WANLASS PHASE II – *Wide Range O.E.M. D.C. Power Supplies*

ECONOMY REGULATED D.C. POWER SUPPLIES FOR MULTI PURPOSE SLOT APPLICATIONS.



Wanlass Phase II OEM Power Supplies available in four different D.C. output voltage ranges between 3.6 to 60 volts in current/wattage ratings whichever is less of 2.5A/30W.; 5A/60W.; 10A/120W.

Operate from 105-125V., 47-63Hz, 1ϕAC.; regulated ± 1% line and load, 0.1% plus 10 mV RMS ripple; output floating; positive or negative may be grounded; short circuit protected; open chassis construction; adjustable by taps and by fine voltage adjust potentiometer; convection cooled for 0 to 45°C operation.

Model No.	D.C. Output Ratings	Prices

**WHICHEVER IS LESS

WANLASS "BRUTES" – *High Power D.C. Slot Supplies*

WIDE RANGE (0-50V) HIGH CURRENT (300-1200 WATTS — UP TO 50A.) D.C. POWER SUPPLIES PRICED AT LOWER THAN "FIXED SLOT" PRICES!

300 Watts of 0.1% regulated power as low as $118.00 in quantity!

NOT FREQUENCY SENSITIVE

Operates from 115/230V. ± 10%, 1 phase, 50/60 Hz and is regulated ± 0.1% with ripple of 1% RMS. Adjustable in 2 ranges either 2-25V. and/or 5-50 volts in ratings of 300, 600 or 1200 watts as shown below. Open OEM construction with voltage adjustment potentiometer. Unit features high efficiency, low cost, quiet operation and is frequency insensitive! Adjustable current limiting provides automatic overload and short circuit protection and current regulation ideal for battery charging and other similar constant current applications.

Model No.	Ratings	Prices 1-9	10-24	25-49	50-99	100-99

WANLASS MARK III – *Precision Regulated D.C. Power Supply*

IDEAL D.C. SOURCE FOR IC, OP-AMP AND MOS/FETS OR OTHER VOLTAGE SENSITIVE LOADS. HAS "BUILT-IN" OVERVOLTAGE AND OVERLOAD PROTECTION!

Operates from 115/230V., 47-63Hz 1 phase A.C. source and is available for D.C. output voltages of 5, 6, 12, 15, 18, 24 and 28 rated at 5A or 60 watts D.C. (whichever is less) as shown in table below. Regulated ± 0.1% for line and load with ripple typically 1 mV or less RMS at full load. Voltage is adjustable ± 2% (± 20% with proper derating) unit features floating output (either positive or negative output may be grounded), adjustable overvoltage protection and adjustable current limiting for overload. Short circuit proof. 0 to 55°C operating (higher with derating) temperature. Open chassis construction 5.5"H. maximum x 6"L. x 5"W. Weight: 6 lbs.

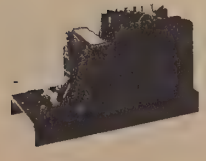
WANLASS CLIP-AC C-3000
117V. A.C. VOLTAGE REGULATORS



C-3003

C-3006

C-3012

C-3025

C-3050

C-3100

HERE ARE SOME OF THE OUTSTANDING CHARACTERISTICS OF TH WANLASS C-3000 VOLTAGE REGULATORS USING THE CLIP-AC™ PRINCIPLE

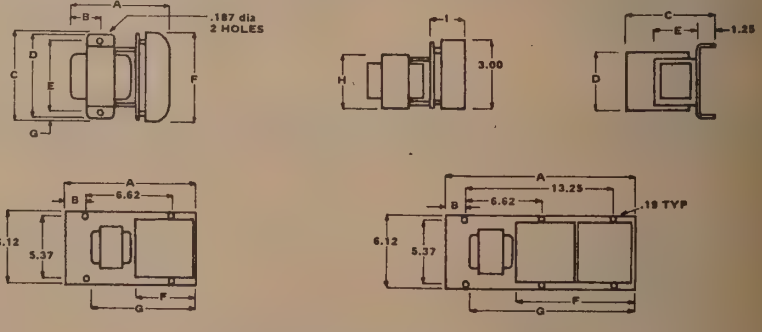
C-3000 FEATURES

- Line and Load Regulator
- Wide Input Voltage & Frequency Range
- Peak Clipping Regulation Technique
- Quiet Operation—No Magnetic Noise
- Repairable All Silicon Solid-State Circuits
- High Efficiency
- Suppresses Line Transients
- Excellent Surge Loading Characteristics
- Instantaneous Response
- "Clipped" Sinusoidal Output
- Excellent Temperature Coefficient
- No "Magnetic" Fields Nor RFI

C-3000 APPLICATIONS

- Instruments Pre-Regulator
- Electronic Systems
- Electrical Systems
- Photo-Optical Systems
- Initial Surge Loading Applications
- Motor Starting and Regulation
- All Resistive Loads such as Lighting an Heating

APPLICATION



The CLIP-AC™ type AC regulator is the logical successor to the ferroresona transformer for the bulk of the AC regulation requirements for up to 1 KV

	CLIP-AC™ Principle	Ferroresonant Principle
Input Frequency	Wide range acceptable without degradation in regulation (47-420Hz typical)	Single frequency (output voltage shifts 1.5% for 1% change in input frequency)
Line Regulation	Any reasonable degree of precision (0.1% easily achievable)	Cannot be modified (1-3% typical)
Load Regulation	Load compensation circuitry inherent in design (1% typical)	No compensation (5-7% typical)
Power Factor	No problem	Shifts output voltage level appreciably
Phase Shift	None	Appreciable — dependent on load current
Response Time	Typical 10-50 μsec	Typically 25,000 μsec
Cost	Smaller and Cheaper-less	Inherent weight and expense of
Size	material content	iron and copper
Weight	(typically 50%)	

C-3000 SPECIFICATIONS

A.C. INPUT: 100-130V., 1-Phase, 47-420 Hz
A.C. OUTPUT: 117V. nominal (see table of Model Numbers and ratings below)
Surge output rating: 400% of full power rating for 10 seconds
REGULATION (RMS): ±0.5% (for ±10% A.C. line change)
±0.5% (for 10% to full load change)
TYPE OF VOLTAGE REGULATION: True RMS with RMS sensor type reference
REGULATION TECHNIQUE: Peak Clipping
POWER FACTOR REGULATION: ±0.5% (+0.7 to —0.7)
FREQUENCY REGULATION: ±0.5%
EFFICIENCY: 75% minimum at nominal input voltage an full load
PHASE SHIFT: None
RESPONSE TIME: 10-50 microsecond
TEMPERATURE COEFFICIENT: 0.025% per degree C
OPERATING TEMPERATURE: —20°C to +50°C. Convection self-cooling; no external heat sinking required
OVERLOAD PROTECTION: Fused against overloads and short circuits

© United Technical Publicati

QST. Ranks high among the leading technical publications of the world. The oldest continuously published radio magazine (it was founded in 1915), its technical articles are aimed at all classes of radio enthusiasts. Construction articles are clearly illustrated with pictures and diagrams. Typography and clarity are tops. General interest articles and special columns abound. Complete advertising coverage. Truly, the "complete magazine on amateur radio." ..... QST and ARRL membership, **$6.50** in USA and Canada (US Funds), **$7.00** Elsewhere.

The RADIO AMATEUR'S HANDBOOK. Internationally recognized as one of the most valuable and widely used books in electronics, the Radio Amateur's Handbook is universally consulted by both amateur and professional alike. Its more than 700 pages are annually revised and modified in the light of current application and technique. The Handbook is found on the desks of executives, engineers, technicians and purchasing agents of the radio industry as often as in the shacks of radio amateurs throughout the world. Twenty-five chapters plus a catalog section including data on all types of vacuum tubes and semiconductors. **$4.50**

HOW TO BECOME A RADIO AMATEUR. Pointing the way for the beginner, tells how to get started in this fascinating hobby. Special emphasis given to the needs of the Novice licensee with several complete simple stations featured **$1.00**

The RADIO AMATEUR'S LICENSE MANUAL. Study guide and reference book, the License Manual points the way toward the coveted amateur license. Complete with typical questions and answers to all of the FCC amateur examinations — it provides an ideal means of self-study and examination. Continually kept up to date. Complete FCC regulations included. **$1.00**

The ARRL ANTENNA BOOK. A complete book on antennas. Its fifteen chapters are divided into two principal divisions: (1) a basic text on antennas and transmission lines, wave propagation and its relationship to antenna design, and the performance characteristics of directive antenna systems, and (2) specific designs for a multitude of antennas for various amateur bands. **$2.50**

The MOBILE MANUAL FOR RADIO AMATEURS. It is a collection of articles on tried and tested equipment that have appeared in QST. Contents include a section on receivers, transmitters, antennas and power supplies. A "must" for anyone interested in the installation, maintenance and operation of mobile stations ... **$2.50**

The RADIO AMATEUR'S OPERATING MANUAL. A ready reference source and guide to good operating practices. Written for the amateur who prides himself on good operating procedures.... **$1.50**

A COURSE IN RADIO FUNDAMENTALS. A complete course of study for use with the Radio Amateur's Handbook, it applies the time-tested principle of "learning by doing." Study assignments, experiments and examination questions make this book equally applicable to individual home study or classroom use..... **$1.00**

HINTS AND KINKS. If you build equipment and operate an amateur radio station you will find Hints and Kinks a mighty valuable book in your shack and workshop. More than 300 practical ideas give you a helping hand at all times..... **$1.00**

UNDERSTANDING AMATEUR RADIO. Written for the beginner. Explains in simple language the elementary principles of electronic and radio circuits, tells how transmitters, receivers and antennas work. Includes complete how-to-build-it information on low cost gear — receivers, phone and code transmitters up to 150 watts, v.h.f., measurements, and easy-to-build antenna systems. A "must" guide for every newcomer in setting up and operating his amateur station **$2.50**

THE RADIO AMATEUR'S V.H.F. MANUAL. A thorough treatment of v.h.f. Contains the first authentic history of v.h.f. ever written. Covers receiving and transmitting principles, techniques and construction; antenna and feed system design, construction and adjustment; u.h.f. and microwaves; test equipment, construction and use; interference, causes and cures; v.h.f. hints and kinks. Emphasis throughout is on tried and tested equipment and practice. A book about things that work and the ideas behind them. **$2.50**

SINGLE SIDEBAND FOR THE RADIO AMATEUR. This third edition of a popular ARRL publication is a digest of the best SSB articles that have appeared in QST. The newcomer to Single Sideband as well as the experienced SSB user will find it indispensable. Includes discussions of theory and practical how-to-build-it descriptions of equipment. Covers reception and transmission. **$3.00**

LEARNING THE RADIOTELEGRAPH CODE. Supplying the key toward mastery of the International Morse Code, this publication trains you to handle the code skillfully and easily. Based on the accepted method of "sound conception," it is a boon to the beginner without access to the help of an experienced operator or code machine. Practical material for both home study and classroom use is included **50c**

ARRL WORLD MAP. Printed in eight colors on heavy map paper with countries clearly outlined. Call letter prefixes printed on the countries and in the margin. Continental boundaries and time zones plainly marked. Thirteen countries have call districts indicated. An equi-distant azimuthal projection centered on Wichita, Kansas. Prepared by ARRL and Rand-McNally. **$2.00**

QST BINDERS. No need to let your copies of QST rest in a disordered pile. . . . A QST Binder will keep them neat and orderly. Sturdy binders hold a one year file, protecting and preserving your copies. QSTs in the Binder open and lie flat at any page permitting quick and easy reference. **$4.00**

ARRL CALCULATORS: Quick as a flash the answer is yours when you use an ARRL Calculator to solve radio problems.

L/C/F, Type A, solves problems of inductance, capacitance, frequency; coil winding data. ..... **Each, $2.00**

Lightning Type B, solves Ohm's Law problems involving resistance, voltage, current, power. ..... **Each, $1.50**

LOG BOOK. Record keeping made easy. Fully ruled 8½ by 11 inch pages with legible headings permitting all necessary entries. Spiral bound to lie flat when open. **50c**

MINILOG. Mobile and portable operational needs are met by this pocket size log. Spiral bound, 4 by 6 inch pages. Headings for all necessary information. **50c**

RADIOGRAMS. First impressions are important. Official ARRL Radiogram Forms add prestige; informs the addressee about amateur radio. ..... Per pad of 70 blanks, **35c**

The AMERICAN RADIO RELAY LEAGUE, Inc.

RCA

TECHNICAL LITERATURE

THE MOST AUTHORITATIVE IN THE INDUSTRY

TECHNICAL MANUALS

These 9 easy-to-understand and well illustrated manuals (8¼" x 5¼") cover theory, application and circuits, as well as performance data, for RCA electronic components and devices. Inexpensive and current reference sources on receiving tubes, transmitting tubes, photosensitive devices, transistors, tunnel diodes, and other semiconductor products.

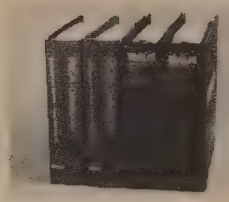
■ **RCA SOLID-STATE HOBBY CIRCUITS MANUAL — HM-90** — 224 pages. A remarkable book for electronic hobbyists, experts, teachers, and students. Features 35 different solid-state circuits. Contains theory, circuit operation, construction practices, and trouble shooting. Price $1.75.*

■ **RCA TRANSISTOR, THYRISTOR AND DIODE MANUAL — SC-14** — This new 656-page manual, the successor to the popular RCA TRANSISTOR MANUAL series, contains text, data, and circuit information on bipolar and MOS transistors, thyristors, silicon rectifiers, and other types of semiconductor diodes. Price $2.50.*

■ **RCA LINEAR INTEGRATED CIRCUIT FUNDAMENTALS — IC-41** (8⅜" x 5⅜") — 352 pages. Well-illustrated manual covering the basic principles involved in the design and application of linear integrated circuits. Includes description of silicon monolithic fabrication process, derivation of design equations and performance criteria, and schematic diagrams and performance data for RCA multiple function silicon integrated circuits for use in a variety of linear applications. Price $2.00.*

■ **RCA SILICON CONTROLLED-RECTIFIER EXPERIMENTER'S MANUAL — KM-71** (8⅜" x 5⅜") — 136 pages. Contains schematic drawings and practical working control circuits which can be made with one or more basic RCA experimenter's kit (KD2105) and two add-on sensor kits (KD2106, KD2110). Also contains basic semiconductor device theory, construction tips, and trouble-shooting procedures. Price 95 cents.*

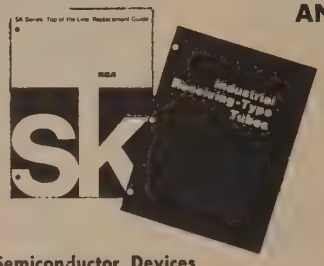
■ **RCA PHOTOTUBES AND PHOTOCELLS — PT-60.** First edition contains 192 pages on phototubes and photocelis . . . selection chart for multiplier phototubes . . . data for 90 photosensitive devices. Price $1.50.*



■ **RCA TRANSMITTING TUBES — TT-5.** More than 180 power tubes described in 320 pages . . . circuits for transmitting and industrial applications . . . application guide. Price $1.00.*

■ **RCA POWER CIRCUITS — SP-51** — 448 pages — Contains design information for a broad range of power circuits using RCA silicon transistors, rectifiers, and thyristors (SCR's, triacs, and diacs). Shows design examples and practical circuits. Price $2.00.*

■ **RCA RECEIVING TUBE MANUAL — RC27.** 672 pages containing data for 1400 Tube types including black-and-white and color picture tubes . . . new circuits including parts list . . . 48 page chart streamline data on RCA discontinued and renewal types. Price $2.00.*



■ **RCA HIGH-SPEED, HIGH-VOLTAGE, HIGH-CURRENT POWER TRANSISTORS — PM-80.** 96 pages of theory and application of RCA medium-frequency power transistors. Covers physical theory, structures, geometries, packaging, critical application-limiting factors, and the operation and requirements of power transistors in typical circuits that illustrate amplification, switching, and control applications. Selection charts are included to facilitate choice of the optimum type of power transistor for a variety of military, industrial, and commercial applications. Price $2.00.*

ELECTRON TUBE HANDBOOK HB-3
SEMICONDUCTOR PRODUCTS DATABOOK SPD-100

Featuring over 7000 pages of design data, these Handbooks represent the most complete and up-to-date reference source for the design engineer. They contain definitive data on over 2300 tubes and semiconductor devices, as well as comprehensive selection and application charts. Frequent mailing service keeps the subscriber up-to-date on the latest new type developments and revisions. Prices for the RCA Electron Tube Handbook and the RCA Semiconductor Products Databook (including subscription service for the first year) are $25 and $20 (foreign $30 and $25), respectively. Both are available at a special rate of $35 (foreign, $40).

RCA CATALOGS AND APPLICATION BOOKLETS

These fact-filled publications are a valuable guide to the practical use of electron tubes, semiconductor products, integrated circuits, memory products, and batteries. Convenient 10⅞" x 8⅜" size handy for 3-ring binders. (For complete technical data on individual RCA tubes and semiconductor devices, RCA Technical Bulletins contain authoritative and up-to-date specifications, and fully descriptive design curves.)

Semiconductor Devices

■ **DESIGN OF TRANSISTOR SWITCHING CIRCUITS FOR DATA-PROCESSING EQUIPMENT — CTG-161.** Price 75 cents.*

■ **GUIDE TO RCA SOLID-STATE PRODUCTS — SPG-201-F.** Price 35 cents.*

■ **MOS FIELD EFFECT TRANSISTORS PRODUCT GUIDE — MOS-160B.** Price 25 cents.*

■ **MOUNTING HARDWARE FOR RCA SEMICONDUCTOR DEVICES — MHI-300B.** Single copy free on request.

■ **PHOTOCELLS — SOLID-STATE PHOTOSENSITIVE DEVICES — CSS-800A.** Price 35 cents.*

■ **POWER TRANSISTORS, TYPICAL AUDIO AMPLIFIER CIRCUITS — ATC-500.** Single copy free on request.

■ **RECTIFIER STACKS AND BRIDGES, DIFFUSED JUNCTION SILICON—SRS-300A.** Price 20 cents.*

■ **RF POWER TRANSISTORS — RFT-700F.** Single copy free on request.

■ **SILICON SIGNAL TRANSISTOR QUICK CROSS-REFERENCE DIRECTORY — PHP-150A.** Price 15 cents.*

■ **SILICON VHF TRANSISTORS APPLICATION GUIDE — 1CE-228.** Price 50 cents.*

■ **THYRISTOR CATALOG — THC-500.** Price 30 cents.

■ **TOP-OF-THE-LINE SOLID-STATE REPLACEMENT GUIDE — SPG-202J.** Price 20 cents.*

■ **TRANSISTORIZED VOLTAGE REGULATOR APPLICATION GUIDE — 1CE-254.** Price 25 cents.*

Integrated Circuits

■ **INTEGRATED CIRCUITS MOUNTING AND CONNECTION TECHNIQUES — 1CE-338.** Single copy free on request.

■ **PRODUCT GUIDE, LINEAR-DIGITAL — CDL-820C.** Price 35 cents.*

■ **MPDTL INTERCHANGEABILITY GUIDE — 1CE-368B.** Single copy free on request.

Electron Tubes

■ **GAS LASER SYSTEMS AND TUBES — PWR-512A.** Single copy free on request.

■ **GUIDE TO RCA INDUSTRIAL TUBE PRODUCTS — TPG-200E.** Single copy free on request.

■ **IMAGE ORTHICONS — CAM-800.** Price 40 cents.*

■ **INDUSTRIAL RECEIVING-TYPE TUBES — RIT-104G.** Price 20 cents.*

■ **NUVISTORS — INDUSTRIAL AND MILITARY — NIT-140.** Price 35 cents.*

■ **PENCIL TUBE CLASSIFICATION CHARTS — MWD-102B.** Single copy free on request.

■ **PHOSPHORS — TPM-1508B.** Single copy free on request.

■ **PHOTOMULTIPLIER TUBES — PIT-700A.** Price 80 cents.*

■ **PICTURE TUBE PRODUCT GUIDE — COLOR AND BLACK & WHITE — PIX-300D.** Price 55 cents.*

■ **POWER TUBES FOR NEW EQUIPMENT DESIGN — PWR-505B.** Price 75 cents.*

■ **PRODUCT GUIDE FOR POWER DEVICES — PWR-506C.** Price 30 cents.*

■ **RECEIVING TUBE AND PICTURE TUBE DIRECT REPLACEMENT GUIDE — ERT-198B.** Price 25 cents.*

■ **RECEIVING TUBES AND PICTURE TUBES — ERT-1275Q.** Price 40 cents.*

■ **MICROWAVE SOLID-STATE DEVICES AND SUBSYSTEMS — MWD-104D.** Single copy free on request.

■ **STORAGE TUBES AND CATHODE RAY TUBES — STC-900B.** Price 20 cents.*

■ **TRAVELING-WAVE TUBE CLASSIFICATION CHARTS — MWD-101D.** Single copy free on request.

■ **VIDICONS — CAM-700A.** Price 60 cents.*

Batteries and Microphones

■ **BATTERIES — BAT-134H.** Price 35 cents.*

■ **BATTERY MANUAL — BDG-111B.** Price 60 cents.*

■ **BATTERY REPLACEMENT GUIDE — BAT-137.** price 25 cents.*

■ **CHOOSING AND USING YOUR MICROPHONE — MIC-640.** Price 25 cents.*

■ **RECHARGEABLE ALKALINE BATTERIES — BAT-135A.** Price 20 cents.*

* Optional Retail Price.

REFERENCE *and* TV SERVICE PUBLICATIONS

■ **RADIOTRON DESIGNER'S HANDBOOK — RDH-905.** Price $7.00.*

■ **TRANSISTOR SERVICING GUIDE — IA1673.** Price $3.50.*

■ **COLOR TV SERVICE HANDBOOKS — IA1553** — 1960 - 1966. Price $1.50.* **1A1759** — 1967 - 1968. Price $2.00.*

■ **FIELD SERVICE GUIDES — RCA COLOR TV RECEIVERS,** 1955 - 1968. **ERT-200,** 1955 - 1966. Price $2.00.* **ERT-201** — 1967 - 1968. Price $1.60.* **ERT-202** — 1969 - 1970. Price $1.90*

■ **COLOR TV TROUBLE SHOOTING PICT-O-GUIDE — 1A1389.** Price $5.75.*

■ **"BY-STAGE" GUIDE TO COLOR-TV RECEIVERS — ERT-205A.** Price 50 cents.*

■ **TV SERVICING — TVS-1032.** Price 50 cents.*

TECHNICAL DATA BULLETINS — Complete authorized information on RCA transmitting tubes and other tubes for communications and industry. Be sure to mention tube-type booklet desired. Single copy on any type free on request.

RCA TEST EQUIPMENT — Individual data bulletins containing complete specifications — electrical and mechanical data, uses, features, etc. — coverin the complete line of precision RCA Test Equipment are available.

Copies of the publications listed above may be obtained from authorized RCA Distributors.

ALCOSWITCH®

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.

ALCOSWITCH LOW-VOLTAGE RELAY

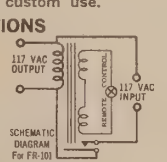
FR-101 SPST
FR-102 SPDT

For safety's sake, control circuits should be isolated from power lines and operated at low voltages such as those obtained from a battery or from any **ALCOSWITCH RELAY** described on this page. Several case styles are available, each incorporating similar electrical characteristics and they all perform the same function, but vary in shape to fit your particular needs.

FR-101, FR-102 and FR-105 are permanently wired and occupy a minimum of space in equipment or appliance. **FRE-103** is a self-contained model that readily adapts to a standard AC outlet receptacle for experimental or for quickly assembled remote-control circuit applications. **FRP-104** is the plug-in model which makes use of a standard octal mount and is designed for electronic equipment which requires ready accessibility for ease of maintenance.

FRE-103 SPDT
Plug-In

All units are capable of handling up to 7 Amps @ 117 VAC and may be operated from remote switches located up to several hundred feet away. The remote circuit carries a low voltage which is fully isolated to minimize any possibility of shock hazards.

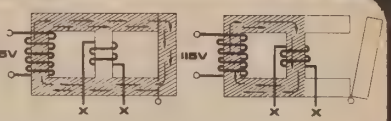


These models illustrated represent "stock relays" available for immediate application, but they may also be supplied with modifications for your special or custom use.

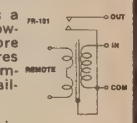
FRP-104 SPDT
Octal

SPECIFICATIONS

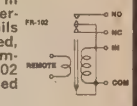
Operating Voltage:
80-125 VAC 60 Hz
Primary Coil Current:
Below 40 mA
Secondary Voltage (open):
Below 30 volts
Contact Voltage:
95-125 volts
Insulation Resistance:
Over 30 megohms @ 500 VDC
Dielectric Strength:
One minute @ 1200 VAC
Coil Temperature Ascent:
Under 158°F.
Load — FR-101: 6 amps (pwr Factor 1)
5 amps (pwr Factor .75)
FR-102: 7 amps (pwr Factor 1)
5 amps (pwr Factor .75)
FRE-103: 7 amps (pwr Factor 1)
5 amps (pwr Factor .75)
FRP-104: 7 amps (pwr Factor 1)
5 amps (pwr Factor .75)
FRP-105: 7 amps (pwr Factor 1)
5.5 amps (pwr Factor .75)



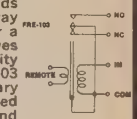
FR-101-230, FR-102-230 & FR-105-230 are 230V Types at 50% of rated power



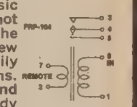
FR-105
SPST



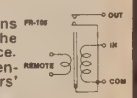
Model	Maximum Control Circuit Resistance
FR-101	1300 ohms
FR-102	300 ohms
FRE-103	400 ohms
FRP-104	150 ohms
FRP-105	280 ohms



FR-101 SPST BASIC relay has a primary and secondary as a step-down transformer, and a third winding acting as a low-voltage relay. 6-inch pigtail leads extend from the inner core to beyond the polypropylene cover. The inner core measures 1¾" long x 1⅛" wide x 1" high. The basic relay is recommended for installations within the equipment housing. Available for 117 VAC or 230 VAC operation.



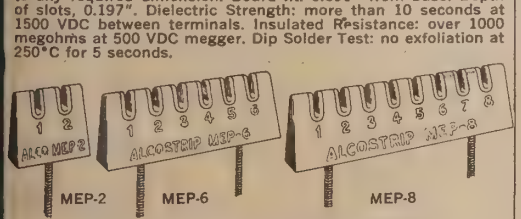
FR-102 SPDT BASIC relay has a SPDT feature and is similar in appearance to the FR-101, but slightly larger. The main difference is the core construction where the FR-102 has two coils — a primary and secondary. When the secondary is shorted, the primary and associated outer core turns into a relay. Complete with dust-proof case and 6-inch pigtail leads. The FR-102 core assembly is the basic unit for all other relays described below. Available for 117 VAC or 230 VAC operation.



FRE-103 SPDT PLUG-IN relay has a stylized plastic case holds the laminated core inside and also has a patented three-way receptacle on the top portion that allows selection of either a Normally Open or Normally Closed circuit. A side jack serves as a plug-in for a remote switch or sensor. The plug-in capability enables the user to insert the ALCOSWITCH RELAY FRE-103 directly into an AC wall outlet. No other wiring is necessary other than the addition of the remote switch and cord attached to a plug. Complete to operate with plug; less cord and remote switch.

FRP-104 SPDT OCTAL base plug feature is added to the basic ALCOSWITCH RELAY for the industrial user. Wiring is not required for the FRP-104, only for the socket mounted in the panel or equipment. The FRP-104 is protected by a clear-view plastic dust cover. The neat finger-gripping size unit easily plugs into an octal socket for horizontal or vertical installations. The plug-in model makes use of a standard octal mount and is designed for electronic equipment which requires ready accessibility for ease of maintenance.

FR-105 SPST BASIC is similar to the FR-102 in specifications and application, but more compact in width and depth. The black plastic molded case is contoured to conserve space. Equipped with normal 6" leads. This particular unit is generally available from stock and could be tailored to customers' particular needs.



Model	Contacts	Description	One-99	100-499	999-999
FR-101	SPST	Basic Relay for 117 VAC	3.85	3.01	2.62

FR-105-230	SPST	Basic Relay for 230 VAC	4.25	3.32	2.89

CERAMIC TERMINAL STRIPS

Ceramic-base terminal strips with fired silver, copperplated and tinned terminals to facilitate high-temperature soldering of components and leads. Features permanent bond between metal and ceramic. Standard 2-56 threaded studs are extra long for cutting to any required dimension. Board ht. 0.590" from base. Depth of slots, 0.197". Dielectric Strength: more than 10 seconds at 1500 VDC between terminals. Insulated Resistance: over 1000 megohms at 500 VDC megger. Dip Solder Test: no exfoliation at 250°C for 5 seconds.

Simplify Circuitry With These DESIGN BOARDS and Plug-In Terminal Strips

Ceramic Alcostrips are ideal for breadboarding which may be quickly inserted or removed as desired to simplify circuit design. A mating circuit board measuring only 5" x 6" is provided to form a base for experimental design work. Complete ceramic kit includes 16 strips (8 sizes) and one board.

CB-1 Board only	.95	.67

ALCO® ELECTRONIC PRODUCTS, INC.

ALLIED CONTROL ALLIED CONTROL COMPANY INC.

GENERAL PURPOSE RELAYS

THE HI-MAG RELAY WAS DESIGNED SPECIFICALLY FOR APPLICATIONS WHERE INPUT POWER IS AT A PREMIUM. The optimized magnetic circuit generates maximum pull forces, resulting in maximum efficiency. The unique patented hinge assembly assures stability and consistency throughout millions of operations. HI-MAG relays are recognized under the Component Recognition Program of Underwriters' Laboratories (File No. E20604).

- Sensitivity — With only 30 milliwatts per pole, input power loads as high as 150 watts are switched reliably for millions of operations
- Life — 10^8 mechanical operations
- Reliability — Greater reliability is assured by the combination of higher contact pressures (15 grams minimum), maximum input sensitivity, and selection of the contact type best suited to switch the required load
- Interchangeability — HI-MAG relays are form, fit, and functionally equivalent to all existing cradle relays
- Contact Configuration — HI-MAG relays feature contact configurations up to 8 form C

HI-MAG relays are designed for use wherever the combinati of low input power and long life reliability is essential. few of the many diversified and sophisticated applicatio include:

Output and interface circuits for data processing equipmen

Teaching devices

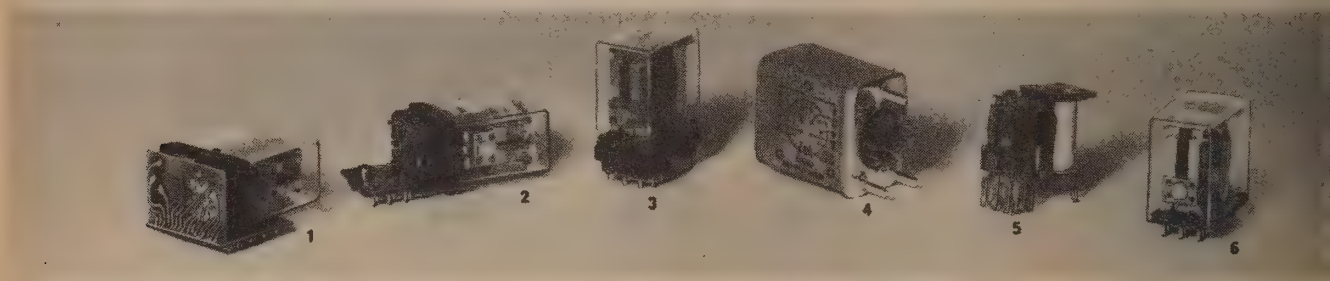
Process control instrumentation

Power supplies

Computer peripheral equipment

Alarm and signal equipment

Airborne instrumentation and navigation



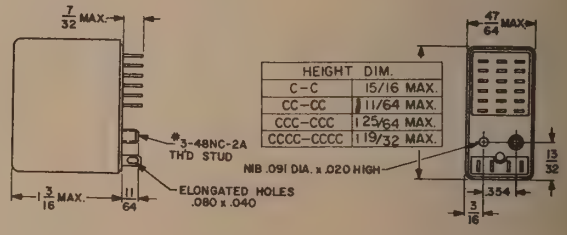
Medical electronics

Telephone interfacing

Communication and test equipment

Office machines

Vending machines



1A ENCLOSURE RIGHT ANGLE IN SOCKET
2A ENCLOSURE RIGHT ANGLE OUT SOCKET
3A ENCLOSURE PC SOCKET
4F ENCLOSURE CHASSIS MOUNT
5C ENCLOSURE PANEL MOUNT
6B ENCLOSURE PC DIRECT MOUNT

DESIGN FEATURES

- Choice of mounting means including socket, solder, PC direct and chassis or panel mount.
- Clear Polycarbonate (Lexan) cover for dust protection.
- Hermetically Sealed for hostile environments.
- Silver, cadmium oxide, gold plated contacts for 5A. switching.
- Bifurcated, silver, gold bonded contacts for dry circuit to 2A. switching.
- Bifurcated crossbar; #1 Alloy for dry circuit applications.
- Single, silver, gold bonded contacts for 2A switching.

DIMENSIONS

HEIGHT DIM.	
C-C	15/16 MAX.
CC-CC	11/64 MAX.
CCC-CCC	1 25/64 MAX.
CCCC-CCCC	1 19/32 MAX.

NEW SOLID STATE HI-MAG TD10 SERIES TIMER

The reliable, low cost, high density package, TD10 Timer utilizes solid state timing networks, featuring repeat accuracy, and Mag Cradle relay output which provides true isolation and high current switching capability.

- Two timing functions; delay to make or interval.
- Repeat accuracy: 2%.
- Time ranges: 0.05 to 300 sec.
- No false operation.
- Internal or external potentiometer.
- Contact configuration — up to 4 Form C.

ALLIED CONTROL ALLIED CONTROL COMPANY INC.

TRI-R DUAL IN-LINE REED RELAYS

- High speed — operate and release time in micro-seconds.
- Low profile — permits 0.5″ PC board stacking.
- Long life — 100 million operations at low level. 20 million operations at 10 watts.
- Total encapsulation — eliminates reed breakage even under severe shock.
- Magnetic and/or electrostatic shielding for high density packaging.
- Solid state circuitry — for input/output protection.
- Color coding — for identification of switching modes.
- Choice of terminal patterns and schematics.
- Self supporting coil — maximum coil efficiency.

SPECIAL FEATURES

he standard IC terminals of the RD Series reed relays are rranged in a 1.3 x 0.1″ pattern assuring trouble-free auto-natic loading of the device. An infinite number of schematics ermits practical and economical PC board layouts.

The round wire terminals of the RF Series relays, positioned in the recessed sections of the molded relay body, are spaced 1.0 x 0.1″. Lead protection is provided without sacrificing the ability of spot testing from either side of the PC board.

APPLICATIONS

ata processing — input/output accessories.

Vhere time restrictions are less critical.

Vhere higher work loads of readout devices must be handled.

Vhere gathering or collection of input data from transducers r sensors is followed by a reduction of the electrical data to usable form (visual displays, charts, printed records).

Vhere contact loads are highly variable.

Vhere the data gathered is a low level signal generated by ensors or strain gages, whereas the correction and control unctions require power switching.

est equipment — oscilloscopes, digital voltmeters, recorders. or switching and counting.

Production test equipment — components testers, sub-assembly checkout. For sequential checking of parameters to preset limits on an accept/reject basis, or punch cards for future reference.

Coin operated machines — vending machines, juke boxes. For programming, sequencing, and/or selecting.

Business machines — teletypewriters, card readers, tape and card punchers.

For routing, sequencing, memory, selection, computing.

Alarm systems — fire alarm, burglar alarm.

For interfacing low signal sensors with power output.

THERMOSTATIC **AMPERITE** DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT

STANDARD

AMPERITE THERMOSTATIC DELAY RELAYS

Amperite Thermostatic Delay Relays are manufactured on automatic high production equipment — resulting a low price — and top quality. Quality is not sacrificed at any point. For example, although contacts are rated 3 amps, 10 amp contacts are actually used. Similarly with all other parts—only the best available are used.

Amperite Thermostatic Delay Relays are actuated by a heater . . . and therefore can be used on A.C., D.C., pulsating current. Being hermetically sealed, Amperite Relays are not affected by altitude, moisture, or other atmospheric conditions. REPLACED AS EASILY AS A RADIO TUBE.

CIRCUITS SPST: Available only — normally open or normally closed.

HEATER VOLTAGES AVAILABLE: 2.5, 5.0, 6.3, 12.6, 26, 50, 115V.
For 220V use a 6000 ohm-5 watt resistor in series, with 115V heater.

HEATER WATTAGE: Standard and Miniature Relays—all voltages—2.3w prox. All heaters may be operated continuously. Heaters will not be damaged by a 50% voltage overload for duration of 1 hour or less.

Amperite Delay Relays are recognized under component program of Underwriters' Laboratories, Inc. for all voltages up to and including 115V.

MINIATURE

VARIATION OF DELAY WITH HEATER VOLTAGE

FIG. 1—Effect of change in heater voltage on delay in seconds. Only low voltage heaters (2.5 to 26 V.) incorporate heater voltage regulations as shown in diagram.

For 22 to 30 V. supply: We recommend Amperite Delay Relays with 26 V. heaters for airplanes and similar power supplies. These heaters are regulated for battery variation of 22 to 30 V. as shown in this diagram.

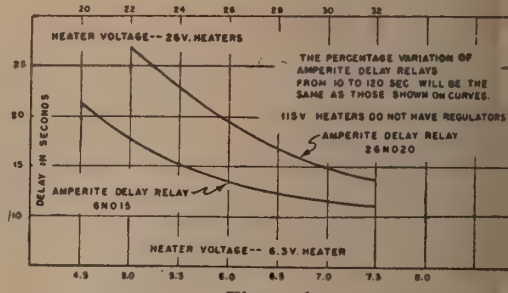

Figure 1

CONTACT RATING

	Delay	Contact Rating Non-Inductive	DC Voltage Breakdown Contact-to-Contact	Heater-to-Contact
STANDARD	2 to 10 Sec.	115V - 3a AC	250V	500V
RELAYS	15 to 180 Sec.	115V - 3a AC	800V	800V
		220V - 1a AC	800V	800V
MINIATURE	2 to 10 Sec.	115V - 2a AC	250V	500V
RELAYS	15 to 120 Sec.	115V - 2a AC	800V	800V
		220V - 1a AC	800V	800V
FLASHERS		- ½a AC		

AMBIENT TEMPERATURES: Relays are compensated for temperatures of −55° to +80°C. (Relays can be operated from −80°C to +125°C without damage). Low voltage heaters 26V or less have better ambient compensation than relays with 115V heaters. If the relays are actually to be used over ambients of −55°C to +80°C it is advisable to have each relay tested at the factory over the ambient. A nominal charge is made for this service.

CONTACT DROP: — 0.1V — Prox. at 1A.

DELAYS AVAILABLE:—From 2 to 180 seconds. Relays can be used in series to obtain longer delays. The delay of any individual relay up to 120 seconds can be increased up to 25% by using a resistor in series with the heater. Delays above 120 seconds cannot be increased. Relays with short delays such as 2 to 5 seconds can be increased 50%.

LIFE of any individual relay will depend on the service the contacts are subjected to. With a 115V — 2A A.C. non inductive load the contacts will withstand at least 250,000 operations. SHELF LIFE of Amperite Delay Relays is over 10 years.

CONTACT FLUTTER:—If encountered, this can be eliminated by flashing approximately 1 amp. through the contacts a dozen times. Contacts of Amperite Delay Relays clean up and get better with use because of the oxygen free atmosphere. **Relay Contacts should not be used on voltages above 220V.**

FOR INSTANTANEOUS RECYCLE AND ELIMINATION OF CHATTER

For instantaneous recycle and elimination of chatter. Cannot be used with Sensitive Relays.

Magnetic Relay requires extra N.O. contact as shown at "E".

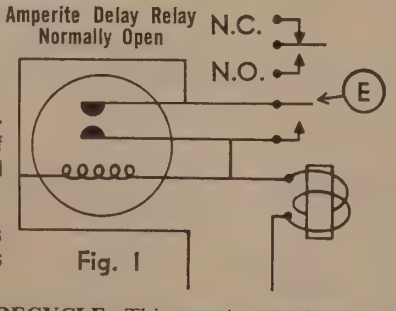

Fig. 1

For instantaneous recycle and elimination of chatter when Sensitive Relay is used.

Magnetic Relay requires an extra SPDT contact as shown at "F".

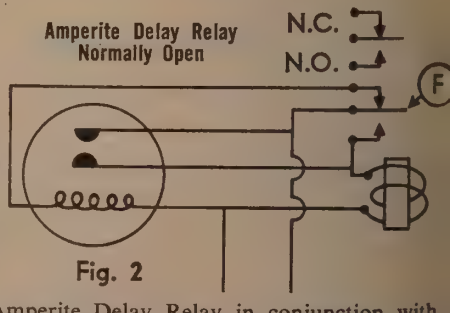

Fig. 2

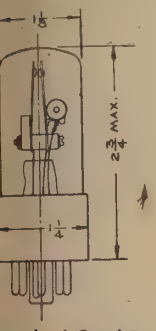
INSTANTANEOUS RECYCLE: This can be obtained by using a normally open Amperite Delay Relay in conjunction with a Magnetic Relay as shown above. If normally closed is required — use a **normally open** Amperite Delay Relay — and use the contacts on the magnetic relay. Choose the Amperite Delay Relay for the voltage required and the delay required (e.g. — 115N030 — would be used on 115 volt supply — for a 30 second delay).

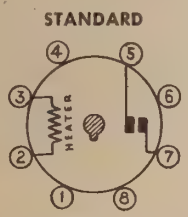
LONG CYCLE RELAYS: are also available. For example, Amperite Delay Relay 115N07T has a delay in closing of 3 to 7 seconds. After heater is disconnected, contacts will remain closed for 30 seconds minimum. Write us about your requirements.

© United Technical Publications



THERMOSTATIC AMPERITE DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT



BREAKING D.C. CURRENT: When Relay contacts open D.C. above 50 volts, a condenser of approximately 0.5 uf with resistor in series with it must be connected across the contacts. Arc suppressors can also be used.

INDUCTIVE A.C. LOADS: When breaking an inductive A.C. load, use a condenser of .01 to .1 mfd. across contacts. In some cases, putting a 20,000 ohm, 5w resistor across the contacts reduces the arcing considerably.

Relay contacts should not be used on voltages over 220V.

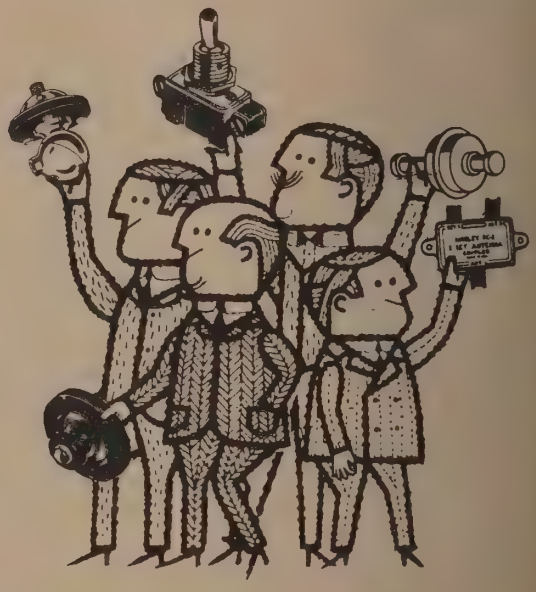
Flashers operate approximately ⅓ on, ⅔ off. The percentage time on can be increased by reducing voltage of heater.

115V Flashers available ONLY in quantities of 12 or less. Cannot be supplied in production quantities.

Normally closed flashers are standard, and are indicated by the letter "F." The number following letter "F" denotes flashes per minute. *For example a 6F30 flasher,* has 6.3V heater, normally closed 30 FPM with a ± 15 flashes per minute tolerance. A 6F30T, would be the same type but in 9-pin miniature. Flashers are available from *30 to 90 Flashes per minute* with tolerances as shown in the chart below:

FLASHERS have contact rating of ½a 115V AC, non-inductive.



Tol. FPM — 20°C	Standard Flashers Available		
30 ± 15	6F30	26F30	115F30
45 ± 15	6F45	26F45	115F45
60 ± 20	6F60	26F60	115F60
75 ± 20	6F75	26F75	
90 ± 25	6F90	26F90

RELAYS

ERIES AZ 530-THINPAK™ MINIATURE RELAY

ACTUAL SIZE

FEATURES

- 0.415" high for 0.6" standard pc board spacing
- Up to 2 Amp SPDT contacts
- 0.1" Terminal Grid spacing
- Insulation resistance greater than 10^{10} ohms
- Contact resistance less than 50×10^{-3}
- No phenolic insulation used

ENERAL DESCRIPTION

The AZ miniature THINPAK relay, Model 530, as been designed for applications with either de-anding space limitations, such as 0.6" center-to-nter PC card mounting, or operating requirements at cannot be met by reed relays or conventional ntact type relays. The high pressure SPDT 1 or amp contacts operating at 26 VDC enables the it to switch capacitance or lamp loads with cur-nt spikes that would normally weld the contacts of reed relays. The high sensitivity of 125 mW pull-in, long life and insulation resistance of more than 10^{10} ohms make it an ideal unit for galvanic separation between electronic circuits. The AZ-530 THINPAK is available in standard coil voltages from 6 to 115 VDC with an operate and release time of less than 2 ms. It has PC terminals in 0.10" grid spacing. A clear plastic dust cover with a mylar bottom plate is provided.

ELECTRICAL SPECIFICATIONS

Contact Rating — noninductive load
Light Duty (Code 1): Fine silver goldplated
1 Amp @ 26 VDC or
0.5 Amp @ 115-VAC
Medium Duty (Code 2): Silver Cadmium-Oxide goldplated
2 Amp @ 26 VDC or
1 Amp @ 115 VAC

Life Expectancy — Mechanical Operations: 10^7
Operations at Rated Load: 10^5

Contact Resistance — 50 milliohms max. initially

Operate Time — < 5 ms at 2 times must operate voltage or current

Release Time — < 2 ms at 2 times must operate voltage or current

Contact Bounce — at 10 mA contact current:
2 ms max. at operate N. O. side
3 ms max. at release N. C. side

Capacity — typical: NC to Movable 0.6 pF
NO to Movable 0.9 pF
contact to coil 12 pF

Dielectric Strength — 500 Vrms across contact gap and contact to coil

Insulation Resistance — 10,000 Megohms min. @ 20° C, 100 VDC, 50% RH

Drop Out — 10% minimum of must operate voltage or current.

Coil Power — Pick UP typical: light duty contact 125 mW
medium duty contact 250 mW
Max. Continuous Dissipation: 1.6 W
@ 20° C (68° F)
1.2W
@ 40° C (105° F)
Temperature Rise: approx. 55° C per Watt

Coil Temperature — Max. 105° C (220° F)

Ambient Temperature —
Operating: −55° C (−72° F) to 80° C (175°F)
@ nominal operating voltage
Storage: −55° C (−72° F) to 105° C (220°F)

Vibration — 0.062 DA @ 10-55 Hz

Shock — 20 g

Enclosure — Clear plastic cover with mylar bottom plate

Terminals — Printed circuit board terminals goldplated in 0.10" standard grid space

Weight — Approx. 10 gr.

ll values at 20° C.
elay will pull in with less than "must operate" value.
here will be a change of less than 10% in must operate if several relays are mounted close together.
ote: To fasten relay on PC board do not bend contact terminals as this damages adjustment! Use coil terminals only. After soldering relay to board, do not dip the board into a cleaning solution.
Solder temperature: Max. 270° C (500° F)
Solder time: Max. 5 sec.

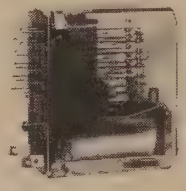
STANDARD AZ 420 AND 430 SERIES RELAYS

General purpose miniature relays in plastic dust cover — Interchangeable with other cradle type relays — Combination sol and plug-in terminals. UL-version listed under UL Component Recognition File E43203.

SERIES AZ 420 — MINIATURE GENERAL PURPOSE RELAYS — UP TO 6 FORM C



• International Standard type • Combination plug in/wire or PC terminals • Low level bifurcated, 2 amp or 5 amp contacts • Life expectancy more than 100 million operations • Form A, B, C and D contacts are available • Molded cradle eliminates phenolic dust inside the relay • Balanced, spring-held armature allows dependable operation in any position • Round core and larger coil volume provides more pull force, eliminating expensive, sensitive version • Slim profile mounting with right-angle socket • Sockets are of unbreakable fiberglass-filled base and have unique knife-type connectors for dependable contact • Available from stock.

DIMENSIONS (inches)

ELECTRICAL SPECIFICATIONS

CONTACT RATING — noninductive load
Light Duty (Code L): Fine silver goldplated — low level to 2 amps @ 26 VDC or 1 amp @ 115 VAC
Heavy Duty (Code H): Silver cadmium oxide — 5 amp @ 26 VDC or 3 amp @ 115 VAC (other contact material available)
LIFE EXPECTANCY — Mechanical Operations: 10^8 — Operations at Rated Load: 10^5
CONTACT RESISTANCE — 50 milliohms max. initially — 200 milliohms at end of life
OPERATE TIME — at two times "must operate" voltage or current: 8ms
RELEASE TIME — at two times "must operate" voltage or current: ≦ 3ms
CONTACT BOUNCE — at 10 ma contact current: 2 ms max. at operate, N.O. contacts 3 ms max. at release, N.C. contacts
DIELECTRIC STRENGTH — 1000 V rms; 500 V rms across contact gap
INSULATION RESISTANCE — 1000 megohms minimum @ 25°C, 100 VDC, 50% RH
COIL TEMPERATURE — Max. 105°C (220°F)
AMBIENT TEMPERATURE — Operating: −55°C (−72°F) to 80°C (175°F) @ nominal operating voltage
Storage: −55°C (−72°F) to 105°C (220°F)
VIBRATION — Operating: .062 DA @ 5-55 Hz; 10g @ 55-110 Hz
Non Operating: 10g @ 5-500 Hz
SHOCK — Operating: 20g @ 11 ms — Non Operating: 30g @ 11 ms
WEIGHT — 23 to 35 grams (approx. 1 oz.)

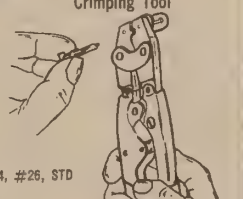
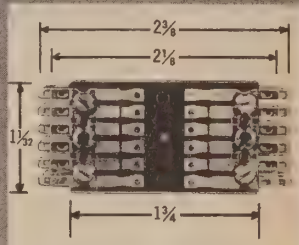
Ganged T-Bar Switches



Toggles may be ganged for controlling additional circuits . . . 48, 72, 108, etc. Shown here, 108 poles.

T-BAR Connectors save time and reduce installation costs using individual snap-in crimp terminals crimped to pre-stripped wire and then snapped into a contact block, which forms the connector. The connector is pushed onto the wafer terminals, eliminating soldering. Because we offer a connector, rather than a receptacle, harness work can be completed outside the chassis and therefore no fancy chassis work is required to accept a receptacle. It not only makes the metal work simpler, but it also saves layout engineering and drafting time. Since T-Bar Switch/Relays are so easily mounted, they are often found on the back of meter panels or on their own brackets.



6 P/N88601 Shown
Can be used with all units shown above

8601-51 Crimping Tool

PHYSICAL PROPERTIES:
Wire Accommodated: (1) #18, #20, #22, #24, #26, STD (2) #22, #24, #26 STR
Connector Material: Nylon Zytel or Lexan®
Snap-in Contact Material: Phosphor Bronze
Snap-in Contact Finish: Tin Plated (other on request)
Retaining Clip Material: Stainless Steel
Connector Weight: Approximately 0.3 oz.

GENERAL FEATURES:

The series 801 T-Bar Relays are solenoid actuated multi-pole relays with a unique design permitting stack-up of enclosed contact "wafers." Each wafer has a maximum of 12 pole double throw contacts thereby allowing ECI to supply the 801 relay with any combination from 4 to 60 poles.

CONTACT RATING:
3 amp, resistive load 150 watt maximum make or break;
5 amp, 500 watt maximum carry.

CONTACT MATERIAL:
Gold bonded, fine silver, standard. Others available on special order.

CONTACT FORMS:
"A" single throw N.O.
"B" single throw N.C.
"C" double throw, break before make
"D" double throw, make before break

NUMBER OF POLES (RELAYS):
One Wafer — 12 poles
Two Wafers — 24 poles
Three Wafers — 36 poles
Four Wafers — 48 poles
Five Wafers — 60 poles ("A" form only)

OPERATE VOLTAGE:
Min. voltage: 80% of nominal at 25°C

RELEASE VOLTAGE:
Max. voltage: 20% of nominal at 25°C

OPERATE TIME:
One Wafer Relay — 15 ms. max.
Two Wafer Relay — 25 ms. max.
Three Wafer Relay — 30 ms. max.
Four Wafer Relay — 35 ms. max.
Five Wafer Relay — 40 ms. max.

RELEASE TIME:
5 ms. max. (36 pole) — 10 ms. max. (12 pole)

TERMINALS:
Solder tab that also mates with T-Bar connector P/N 88601 (two required per wafer)

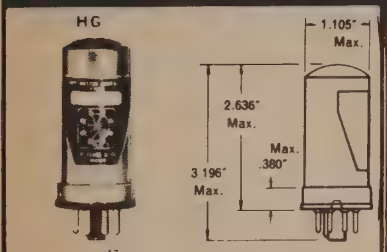
ENCLOSURE:
Contacts enclosed in dust tight plastic enclosure that is separated from the actuator assembly. Withstands Mil. Std. — 202 method 106B moisture resistance test.

LIFE:
Mechanical — 20,000,000 operations minimum for relay
Electrical — 20,000,000 operations minimum at 100 milliamps to 100,000 minimum at 5 amps, 150 watts resistive load.

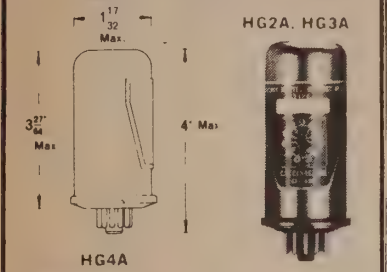
DIELECTRIC:
1000 vrms terminals to case at sea level and 25°C
1000 vrms terminal to terminal at sea level and 25°C
1000 vrms coil to case at sea level and 25°C

TEMPERATURE RANGE:
—55°C to +85°C

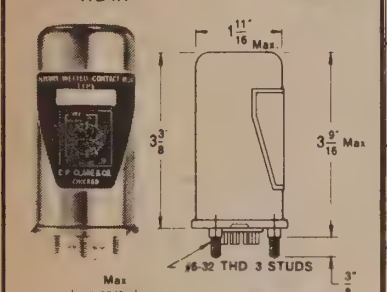
INSULATION RESISTANCE:
5,000 megohms @ 25°C minimum



ORDERING INFORMATION:
Specify Series No. — number of poles plus contact form letter-coil voltage. For example a 36 pole double throw relay with a 24 VDC coil is: 801-36C-24



T-Bar
SWITCHING TECHNOLOGY DIV.
electronic controls, inc.



Manufactured under 1 or more of the following patents: 3,206,990, 3,226,508

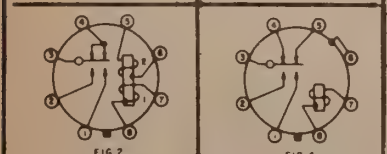
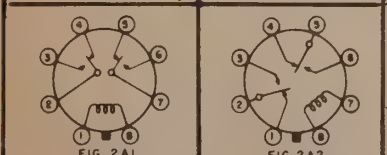
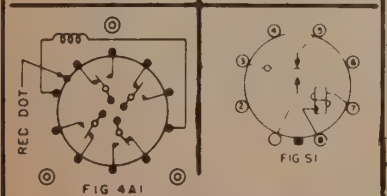
MERCURY-WETTED CONTACT RELAYS







HG Series

HG relays have SPDT make-before-break form D contacts rated at 5 amps, 500 volts, 250 VA max. Operating time can be as short as 2 milliseconds. The Series **HG2** relay utilizes two switch capsules to furnish DPDT, operating time can be as short as 2¼ milliseconds. Series **HG3** relay utilizes three capsules providing 3 PDT, operating time can be as short as 2½ milliseconds. Series **HG4** relay utilizes four capsules providing 4 PDT, operating time can be as short as 3¾ milliseconds. Life expectancy is 22 x 10^9 at specified ratings. Resistance, ±10% tolerance at 25 degrees C. Typical applications include computers, data logging and low-level dry circuits.

HGS Series

HGS Mercury-wetted relay offer increased speed and reliability along with high sensitivity. **HGS 1000** Series provide SPDT make-before-break and **HGS 5000** Series provides SPDT break-before-make. Both are rated at 2 amps, 500 Volts, 100 VA max. Operate time as fast as 1 millisecond. Standard design available only in single element assemblies, they come in the following, single side stable, bi-stable and chopper. Life expectancy is 22 x 10^9 at specified ratings.

HGP

FIG 1

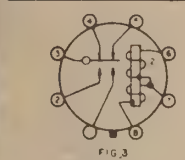

FIG 3

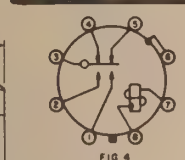

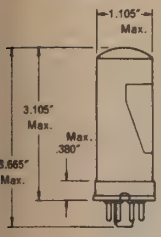

FIG 4

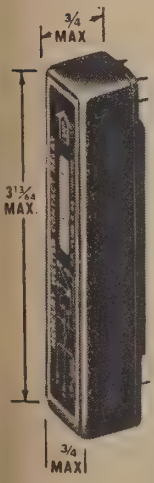

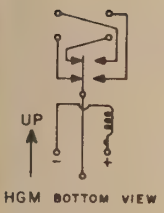

HGP Series

HGP is similar to the HG series except for the inclusion of permanent magnets making a slight increase in height. Magnets provide single-side-stable, bi-stable and chopper operations. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250 VA maximum with operate time as short as 2 milliseconds. Life expectancy is 22 x 10^9 at specified rating.

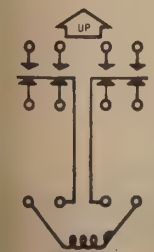
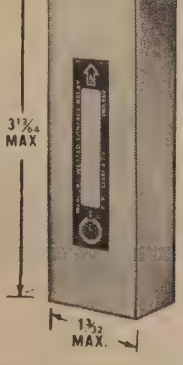
HGM





HGM Series

HGM relays are Clare standard HG switch capsules in module form, are provided with plated steel covers for excellent mechanical protection and magnetic shielding. The standard HG switch in the HGM is not polarity sensitive. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250 VA maximum. Life expectancy is 22 x 10^9 at specified ratings.

Part No.	Coil Resistance	Must Operate Current (ma-dc)	Must Release Current (ma-dc)	Must Operate Voltage (vdc)	Max. Voltage (vdc)	PRICES 1-9	10-24	25-49	50-99	100

MERCURY-WETTED CONTACT RELAYS

HGSM Series

HGSM Relay modules for Printed Circuit Board mounting are available in **HGSM 1000** series SPDT make-before-break **HGSM 5000** series SPDT break-before-make. Contacts are rated in 2 amps, 500 Volts, 100 VA maximum at rated load. Maximum dissipation 2 watts continuous at 25 degrees C. The temperature rise is 30 degrees C per watt at 25 degrees C ambient. Life expectancy is 22 x 10^9.

HGS2MT

Mercury-wetted relay is designed to minimize the noise and thermal problems of low level switching circuits. They are capable of handling the input switching functions for any type of reasonable high speed, low level data acquisition system. Contacts are rated at 2 amps 500 Volts, 100 VA maximum DPDT. Form C break-before-make. Life expectancy 22 x 10^9.

Part No.	Nominal Volts (dc)	Coil Resistance	Must Operate Voltage (Vdc)	Must Release Voltage (Vdc)	PRICES 1-9	10-24	25-49	50-99	100

HGJM

A breakthrough in mercury-wetted contact relays when compared to industry standards. Noise is a mere 15 microvolts at 4 ms after coil energization with 10kHz bandwidth, less than 5 microvolts at 5 ms. Faster response, the relay is ultra-stable to 250 Hz, and the response time approaches one millisecond. Available in low profile (.350″H) for ½″ board centers and high sensitivity (.400″H) models. SPDT contacts rated 2 amperes at 500 volts maximum (100 VA max. either AC or DC).

MR-11

MINIATURE "MR" SERIES
20 AMPERES — 120 VAC
(CSA Listed)

Compact units capable of handling loads nearly twice that of equal size ordinary armature type units. Hermetically sealed, mercury-to-mercury contacts. No contacts to pit, stick or corrode. Full 20 ampere rating (per pole) at 120 Vac with inductive or resistive loads.

Coil current at 120 V, 60 Hz:
MR-1, -2, .042A;
MR-11, .084A;
MR-111, .120A.

Dimensions (H x W x D):
MR-1, 3¼" x 1⅞" x 1½";
MR-2, 4" x 1⅞" x 1½";
MR-11, 4½" x 3" x 2";
MR-111, 5" x 3¼" x 2¾".

EM-111

"EM" SERIES
35 AMPERES — 120 VAC
(UL and CSA Listed)

Rated 35A (per pole) at 120 Vac. Coil operating at 120 Vac 60 Hz: EM-1, EM-2, .050A; EM-11, .120A; EM-111, .200A.

Dimensions (H x W x D):
EM-1, 4½"; x 2⅝" x 2⅜";
EM-2, 5⅛" x 2⅝" x 2⅜";
EM-11, 5⅜" x 3⅜" x 2½";
EM-111, 6¼" x 4" x 3⅜".

HD-111

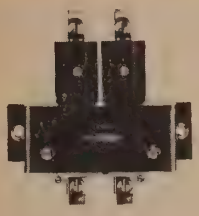
"HD" SERIES
60 AMPERES — 120 VAC
(CSA Listed)

Type HD load rated 60A for 120 Vac and 35A for 230 Vac, 60 Hz. per pole. Coils — 120 Vac 60 Hz.

Dimensions (H x W x D):
HD-1, 5¼" x 4" x 2⅜";
HD-2, 5¼" x 4" x 2⅜";
HD-11, 5¾" x 4" x 2½";
HD-111, 6¼" x 4" x 3⅜".

"100"

"100" RELAY
100 AMPERES — 120 VAC
(CSA Listed)



Rated 100A at 120 Vac or 12kW resistive load capacity. Coil operating current, .260A. Coils, 120 Vac, 60 Hz.

Dimensions: 6½" H x 3¼" W x 3½" D.

"HI-POWER" Encapsulated Relays

High performance relays have hermetically sealed steel shells with ceramic lined electrode chamber, epoxy insulation. Similar to our standard mercury displacement relays, but with higher current capacity, maximum reliability. Impervious to physical or thermal shock, moisture and dirt. Types S and T completely epoxy encapsulated. Rated to switch loads up to 550 volts AC. Coils — 120 Vac, 60 Hz. Special coil voltage available.

TD "HI-POWER" Time Delay Relays

Single-pole, N.O. mercury-to-mercury contacts. The solid-state time delay circuit automatically resets upon completion of the delay. Load contacts are totally isolated from the delay circuit and are capable of switching loads to 60kW. Range, −10° to +65°C. Repeatability, ±2%. Epoxy-clad, hermetically sealed construction. Delay operates from 120 Vac. Preset or adjustable time delays from 100 ms to 120 seconds are offered.

CLARE APPLICATION ENGINEERING SERVICE

Clare distributor stock items shown in this section will handle most relay applications. Clare also provides **free** application engineering assistance for your switching problems, usually saving valuable engineering time. They will also save you work and worry — and probably money, too. If you have a problem — get Clare's suggestions.

Detailed Data Sheets on stock and special relay types are available on request. Call or write Clare.

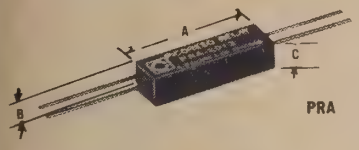
REED RELAYS

DIP

DIP Picoreed® Series PRME

Clare's new TO-116 case DIP Picoreed Relay provides sealed contacts in an epoxy molded package for optimum environmental performance. The DIP Picoreed is ideal for electronic process control equipment applications and they can be operated by integrated circuits with 65 mW outputs. Available with one Form A contact.



High speed — up to 600 μs operate time, including bounce, at nominal coil power.
Contact rating — 0.5 amperes max., 100 volts max., 10 VA max.
1.5 ampere max., carry load
Life expectancy — 100 x 10^6 operations at low-level loads.
5 x 10^6 operations at 28 Vdc, 0.125 ampere.

* The 5 volts series of DIP Picoreed relays have been designed especially for compatibility with standard 5 volt DTL and TTL logic families. These relays have a must operate voltage value of 3.5 volts @ +25°C.

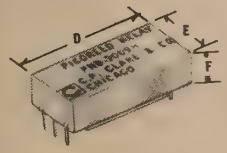
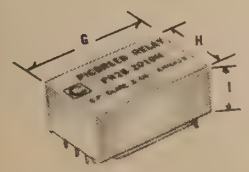
PRA



PRB

Picoreed Series PRB and PRA

The Clare **Picoreed** relays represent a state-of-the-art advancement in sealed contact reed relays; they are the fastest and smallest reed-contact relays made. Their response time, physical size, sensitivity, and reliability characteristics combine to give the **Picoreed** complete electrical and packaging compatibility with IC solid-state devices. These characteristics provide an answer for economical and reliable solid-state input-output isolation buffering.
High speed — up to 500 μs operate time, including bounce, at nominal coil power.
Contact rating — 0.5 amperes max., 100 volts max., 10 VA max.
2.0 ampere max., carry load.
Life expectancy — 100 x 10^6 operations at low-level loads. .
5 x 10^6 operations at 28 Vdc, 0.125 ampere.



* The 5 volts series of **Picoreed** relays have been designed especially for compatibility with standard 5 volt DTL and TTL logic families. These relays have a must operate voltage values of 3.75 volts @ +25°C.

PRB Series has straight pin. High sensitive relays allow P.C.B. spacing of .500 inch centers. H in part number denotes more sensitive unit. Low profile units allow .375 spacing. Molded **PRA & PRB Series** has axial or P.C.B. leads, available in one Form A only.

MicroClareed Series MRMC and MRME

The Clare **MRME** and **MRMC** MicroClareed relays offer you the same high standard Clareed relays in only one-fifth the size. They provide isolation between coil and contacts. They are immune to false operation by the type of transients that affect solid state devices. They are insensitive to overload transients that would damage a solid state device. They offer switching speed as fast as 500 microseconds, which is fully compatible with other mechanics of process control. Type **MRME** is an epoxy molded module and Type **MRMC** is an open type module. Both types are designed for printed circuit board application. Operation and internal construction of both types are the same. Contacts rated at 15 VA maximum ¾ amp maximum.

Clareed — CRT Series

Ultra reliable reed relays for printed circuit boards. Reed contacts are sealed in an inert gas atmosphere within a glass tube. Coils wound on molded bobbins capable of accepting up to six Clareed switch capsules. The standard Clareeds are Form A. Life expectancy is over 20 million operations at rated load. Contacts rated at 15 VA Maximum, non-inductive, 1 amp maximum, 250 Volts maximum with carry load 5 amps maximum (not switched).

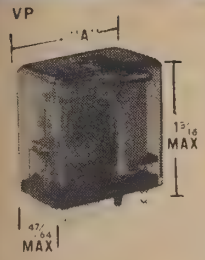
LB

LBP

LA

LA/LB Series — New (Telephone Relays)



Designed for the used who must have high quality at a reasonable price. The **LA** relays have 4PDT contacts and the **LB/LBP** relays have 6PDT contacts. These miniature relays have extraordinary switching capacity and versatility for their size. Contacts rated 2 amps at 28V dc with a life of 100 million operations (Mechanical). **LA/LB Series** is for direct P.C.B. mounting; and the **LBP Series** is for direct plug into socket mounting. These relays are ideal components for military, industrial and commercial application.

VP Series (Telephone Relays)

Has contact configuration of 2 P., 4 P., 6 P. DT; contacts rated at 1 amp 100 volts 30 watts D.C. resistive load. Operating temperature −40°C to +80°C. Operating time is 3-13 milliseconds. **VP** is protected from dust and contamination by a polycarbonate cover. Can be used for P.C.B. mounting with socket. Typical applications are business machines, process controls, communication equipment, digital instruments and many others.

J & JDP Series (Telephone Relays)

Compact, industrial telephone-type relay, for applications ranging from simple switching in alarm circuits to complex computer functions. Switch combination of 2, 4, 6 pole DT with contacts rated at 4 amps 150 watts with an operate time of 5 milliseconds minimum. Mechanical life of 70 x 10^6 operations. **Series JDP** is dust cover enclosed, socket with soldering lug terminals. **Series J** is open type.

Type TF — TO-5 Military Type

The Clare TF relay is a TO-5 transistor case relay engineered to meet or exceed Mil-R-5757/38 and 40. The relay offers you a dependable relay which combines electromechanical performance with packaging compatible with solid state circuitry. Operating temperature range is from −65 degrees C to +125 degrees C, with a 2.0 MS maximum operate time. Must operate voltage at +25°C is 13.0 VDC. All with 1.5″ straight leads.

Type 211

Type F & HF

Clare provides full and half-size military-type relays of unusual versatility, capable of reliable long life operation under adverse environments. These relays are ideal for use in industrial application as well as airborne and aerospace. Relays employ a rigid frame to maintain permanent alignment of all elements. Contact arrangement are 2 form C. These relays are manufactured to meet Mil-R-5757/10 and 5757/19.

Stepping Switches

Clare stepping switches offer an economical answer to switching problems by providing the most working capacity in the smallest space.

Type 20 offers up to 16 levels of 20 points or 12 levels of 40 points with a life expectancy of 50 million steps at 16 levels. Contacts rated at 0.1 amps 115 VAC or 30 VDC with carry of 3 amps. Operate time of approx. 20 MS at 25 degrees C. Release time approx. 10 MS at 25 degrees C. Standard terminals are solder lug.

Type 26 has the same characteristic as above but has the capability of 16 levels of 26 points or 10 levels of 52 points.

Type 210 offers up to 12 levels of 10 points with life expectancy of 100 million steps at 12 levels. Contacts rated at 0.1 amps 115 VAC or 30 VD resistive will carry 3 amps; operate time is approx. 20 MS at 25 degrees C. Standard terminals are solder lug.

Type 211 has the same characteristic as above but has the capability of 12 levels of 11 points.

ALL SWITCHES LISTED ARE NON-BRIDGING WITH 1C OFF-NORMAL CONTACTS AND 1C INTERRUPTER CONTACTS.

GP1 Series — General Purpose

GP1 Relays are miniature 4PDT relays available for AC or DC operation with dust cover enclosure built to meet UL Component recognition. Contacts are fine silver-gold flashed, rated 3 amps at 30 VDC or 120 VAC resistive. Life expectancy in excess of 100 million operations AC. Solder terminals are standard. Sockets come in both solder terminals and printed circuit.

GP2 and GP3 Relays

The GP2 (open) and GP3 (Lexan® dust cover) Relays are designed to meet UL bulletin 508 requirements. The rugged AC or DC relays are available in SPDT, DPDT & 3PDT configurations with Gold flashed Silver Cadmium Oxide contacts rated at either 10 amperes at 28 Vdc resistive or 120/300 Vac, .8 power factor. The GP2 and GP3 plain case models are available with matching molded nylon sockets for plug-in applications. The GP3 bracket case model is available for direct chassis mounting only. Mechanical life expectancy is 100 million operations, electrical life 100,000 operations minimum at rated load. .187" quick connect terminals standard.

DowKey
SUBSIDIARY OF KILOVAC CORPORATION

Kilovac Vacuum Relays • Penta RF Power Tubes • Dow-Key Coaxial Relays

SERIES 310 SPDT
Vacuum Coaxial Relay

FEATURES – Series 310 Relays have high power handling capability in a small package, with continuous powe rating of 3000 watts at frequencies up to 30 MHz. At 400 MHz, the relay will carry 1000 watts. Reliab vacuum-enclosed contacts minimize losses and noise.

SPECIFICATIONS

Operating Time . . . . . 6 ms max.

ELECTRICAL DATA

Peak Voltage
- *At 30 MHz* . . . . . 1500 V
- *At 400 MHz* . . . . . 1000 V

Peak Current –1 μ Sec Pulse
- *At 30 MHz* . . . . . 40 amps
- *At 400 MHz* . . . . . 10 amps

MECHANICAL DATA

Weight . . . . . 8 oz
Life expectancy . . . . . 10^6 cycles
Finish
- *Connectors* . . . . . Silver plate
- *Block* . . . . . Silver plate

ENVIRONMENTAL DATA
(Per MIL-S-3928)

Shock . . . . . 50 g's -11 ms
Vibration (Test condition A) . . . . 10 g's to 2000 Hz
Temperature . . . . . -55°C to +85°C
Salt Spray . . . . . 48 Hrs
Humidity . . . . . 10 days

ORDERING INFORMATION

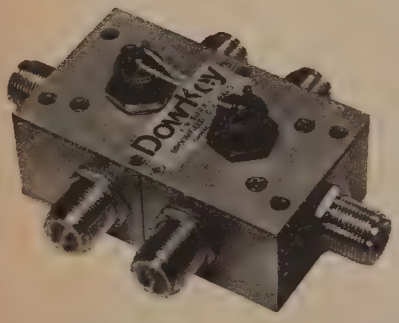
After selecting connector type from the Connector & P/N Table, replace XX shown in the Part Number column with the two digits of the selected coil voltage, shown in the Part No. Digits column of the Coil Characteristics Table.

EXAMPLE: *310-2302 is SPDT Relay with BNC connectors and 26 VDC Coil.*

CONNECTORS AND PART NUMBERS

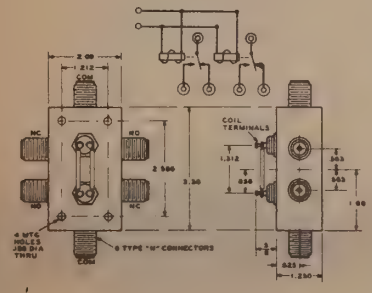
Connector Type	Part Number
N	310-XX01
BNC*	310-XX02
TNC*	310-XX03
C	310-XX06
SC	310-XX53
HN	310-XX51

*Reduced power limits when using these connectors.



ELECTRICAL CHARACTERISTICS

Freq. MHz	VSWR	Isolation Loss	Insertion Loss	RF Power Rating
30	1.05	35 db min.	.1 db typ.	3 KW
400	1.10	20 db typ.	.1 db typ.	1 KW



COIL CHARACTERISTICS
(Part No. Digits to replace XX on Connector Part No.)

Part No. Digits	Nominal Volt	Voltage Range	Resistance Ohms ±10 %
21	6 VDC	4.5-7	15
22	12 VDC	9-14	120
23	26 VDC	19-31	338
24	48 VDC	38-54	1000
25	110 VDC	90-125	6000
26	115 VAC	90-130	6000*

**Divide resistance by 2 on parallel coil units.*
***Requires external diode bridge.*

SERIES 313 DPDT
Transfer/Crossover Coaxial Vacuum Relay

FEATURES – The Series 313 are remote operation ruggedly constructed Transfer Relays designed for high power–high voltage operation. The Series 313 also features Kilovac vacuum-enclosed contacts for high reliability, low contact resistance and long life. It is intended for interchanging two transmitters between an antenna and a dummy load, reversing feed phase for directional antennas, and similar applications. It is capable of handling 3 KW at 30 MHz.

SPECIFICATIONS

Operating Time . . . . . .6 ms. max.

60 SERIES SPDT TYPES

Remote-operation SPDT coaxial relays for low-level to 1-kW operation. Available with 2 Form C auxiliary contacts, and with high isolation "G" connector at NC or receive position in transmit-receive applications. The "G" connector increases isolation to greater than −100 dB at up to 500 MHz, reduces the power rating to 20 W, and increases VSWR above 400 MHz. Range, 0 to 1000 MHz (UHF types not recommended for use above 400 MHz). RF power rating, 1 kW to 100 MHz; 750 W at 400 MHz; 500 W at 1000 MHz. VSWR, 1.05:1 0–50 MHz; 1.3:1 at 1000 MHz. Impedance, 50 ohms. Body size, 3.00″ x 0.88″ x 0.88″. **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC; or 115, 220, 6 or 24 VAC. **See Coil Voltage Table.**

61 SERIES SPDT TYPES

Small switches for military and severe environmental requirements. Withstand applicable requirements of MIL-S-3928B specifications. Balanced armature actuator prevents contact chatter under high-frequency vibration and severe shock. Offered with many connector types and 1 or 2 Form C microswitch aux contacts. RF power rating, 150 W to 50 MHz; 75 W at 1000 MHz. VSWR, 1.03:1 0–50 MHz; 1.18:1 at 1000 MHz. Operating time, 15 msec max. Aux contact rating, 5 A at 115 VAC. Life expectancy, 1,000,000 cycles. Body size, 1.58″ x 0.64″ x 1.20″ h. max. Wt., 3½ to 4 oz. **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC; or 115 VAC. **See Coil Voltage Table.**

77 SERIES SPDT TYPES

Medium-size, lightweight, low-priced coaxial switches for industrial and less critical military uses. T-shaped connector configuration has common connector at one end and NO and NC types 180° apart at other. Available with or without 1 Form C aux contact. RF power rating, 150 W to 50 MHz; 60 W at 1200 MHz. Impedance, 50 ohms. Size, 1.88″ x 0.68″ x 0.68″. Weight, 3 oz. (Other specifications similar to 61 Series above.) **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC (115 VAC available at additional cost). **See Coil Voltage Table.**

Dow-Key Model	Conn. Type	With 1 Form C Aux Cont.	Net Each, Lots of 1-4	5-9	10-24	25-49

77-XX0932	Phono	Yes	11.75	10.70	9.65	8.60

*Available with mating plugs; prices on request. †With NC "G" connector as described.

Space does not permit listing various modifications or variations of the standard relays shown. The following types and variations of relays however, are also available.
1. Additional types of coaxial connectors on many relays.
2. 72-ohm type in some relays (50-ohm standard).
3. Gold plated contacts and others (silver contacts standard).

COIL VOLTAGE TABLE

To specify voltage desired, substitute two digits (21 thru 29) from this table for **XX** in the Dow-Key Model No.; e.g., 260-XX04 with 6 VDC coil becomes 260-2104, etc.

Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage
21	6 VDC	24	48 VDC	27	220 VAC
22	12 VDC	25	110 VDC	28	6 VAC
23	26 VDC	26	115 VAC	29	24 VAC

260/260B SERIES DPDT TYPES

Remote-operation switches for low-level to 1-kW operation. The 260B Series is a standard DPDT switch with six connectors; 260B Series similar but has internal connection between its NC contacts, leaving only four connectors; 260B is widely used for inserting a circuit element between two normally connected elements (e. g., inserting power amplifier between exciter and antenna). RF power rating, 1 kW to 100 MHz; 750 W at 400 MHz. VSWR, 1.05:1 0–50 MHz; 1.06:1 100 MHz; 1.12:1 at 400 MHz. Impedance, 50 ohms. Aux contacts rated 5 A, 115 VAC. Operating time 25 msec approx. Life, 1,000,000 cycles. With UHF connectors (others available). Body size, 3.00″ x 1.75″ x 0.88″. Weight, 12 oz. approx. **Specify Coil Voltage:** 6, 12, 26, 84 or 100 VDC; or 115, 220, 6 or 24 VAC. **See Coil Voltage Table.**

260B-XX0442	Yes	25.55	23.25	20.90	18.60

71/72 SERIES MULTI-POSITION TYPES

Weatherproof, high power switches for switching antennas, transmitters or receivers up to 500 MHz. Separate actuating coil for each position. RF power rating, 1 kW to 200 MHz; 750 W at 500 MHz. VSWR, 1.06:1 0–50 MHz; 1.3:1 at 500 MHz. Impedance, 50 ohms. Operating time, 25 msec approx. Life, 500,000 cycles per position. With UHF connectors (BNC, C, N, TNC connectors available). Body size, 71 Series, 4″ x 3.5″ x 2.62″; 72 Series, 5.75″ dia. x 2.75″ d. Wt., 71 Series, 3 lbs. approx.; 72 Series, 1½ lbs. approx. **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC; or 115, 220, 6 or 24 VAC. **See Coil Voltage Table.**

72-XX0402	SP3T non-shorting	31.35	28.50	25.65	22.80

78 SERIES MULTI-POSITION TYPES

Manually operated switches with true coaxial switching members (not wafer switches). Useful frequency range, 0 to 500 MHz. RF power rating, 1.5 kW at 50 MHz; 1 kW at 100 and 400 MHz. VSWR, 1.05:1 at 50 MHz; 1.15:1 at 400 MHz. Impedance, 50 ohms. Crosstalk, 60 dB at 50 MHz; 45 dB at 400 MHz. Insertion loss, .03 dB at 50 MHz; .05 dB at 400 MHz. Dial plate and knob included. With UHF connectors (also available with BNC, C, N, TNC connectors). Size, 3″ dia. x 1″ deep. Weight, 10 oz. approx.

UHF CONNECTORS AND ADAPTERS

A B C D E F

Types C-201, C-60P and C-60PT have UHF female or male connector to solder terminal, and mount through panels ⅛″ thick max. C-201 mounts through ⅝″ hole. C-60P mounts into ⅝-24 tapped hole or through ⅝″ hole. C-60PT similar to C-60P except Teflon* insulation and better impedance match.

*Registered DuPont TM.

* Magnet coils designed for continuous duty. Do not operate at rate higher than indicated under Mechanical Life.

** Based on steady state test under laboratory environmental conditions. Consult factory if application involves unusual load, speed of operation, off-on ratio, environmental or operating conditions. Electric life substantially greater when operated below rated load.

† Load tests — making inrush ratings (0.4 to 0.5 P.F.) — breaking 125% continuous rating (0.65 to 0.8 P.F.).

• Cross-bar contacts.

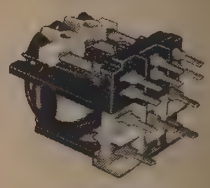
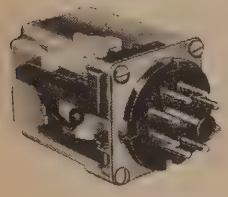
A.C.-D.C. GENERAL PURPOSE RELAYS

TYPE 93



Solder Terminals (Fig. 1a)

Solder terminal type has combined front, single hole screw and stud mounting, screw and stud included. All terminals out front. One piece molded bobbin and terminal board construction. Highly resistant to arc tracking. Printed circuit type may be controlled by SCR if firing angle, is no more than 10 degrees.*

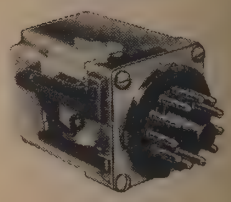


Size: 1 13/16" x 1 3/16" x 1 5/16" U.L. and C.S.A.

TYPE 93

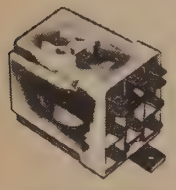
Printed Circuit (Fig. 1b)

TYPE 93P



8 Pin Plug-In (Fig. 2)

8 pin octal base for single and two pole. 11 pin base for three pole. High impact case. Standard pin connections.



Size: 2 1/8" x 1 7/16" x 1 7/16". U.L. and C.S.A.

TYPE 93P

11 Pin Plug-In (Fig. 2)

TYPE 93Q

Quick Connect (Fig. 3)

Enclosed quick connect type designed for front mounting or polarized socket mounting. For socket mounting use 93-153-1 socket kit. Front mounting relay has .20 x .187 terminals. High impact case.

Size: 2 1/8" x 1 7/16" x 1 7/16". U.L. and C.S.A.

TYPE 93Q

Relay Receptacle 93-153-1

CONVERSION INSTRUCTIONS

All 10 and 15 ampere contact assemblies on RBM standard type C contactors are normally open. To convert to normally closed, use screwdriver. No special parts needed.

1. Remove movable contact assembly and lock washer by backing off terminal nut "A".
2. Loosen screws "B" and remove stationary contact assemblies.
3. Invert movable contact assembly, and replace on contactor with flat "I" spring resting on contact block. Contacts facing out.
4. Remove screws "B" from, and reinsert into opposite end of, stationary contact assembly. Re-install stationary contact assemblies; holding contacts in alignment with movable contacts while tightening screws.

When requiring U.L. and/or C.S.A. approval, refer to the file number which will save you time and money. Approval is simplified when product includes components having prior approvals. Regulations then require that a component be checked only for the application within its approved ratings. If a component does not have prior approval — the component must undergo complete testing to determine if it meets U.L. requirements. This entails added expense and time.

The following A.C. Controls have U.L. and C.S.A. recognition.

RBM Type	*U.L. Recognition File #	*C.S.A. Recognition File #
59	E34447	None
75	E12139	LR13360
80	E12139	LR13360
84	E12139 or E22381	LR13360
85	E12139	LR13360
91	E12139	LR13360

RBM Type	*U.L. Recognition File #	*C.S.A. Recognition File #
92	E12139	LR13360
93	E12139	LR13360-31
129	E12139	LR13360
129AR	E12139	LR13360
S30	E12139	LR13360
S40	E12139	LR13360

U.L. and C.S.A. listing covers RBM production part number stamped on relay. Production part number (not standard catalog part number) should be submitted with file number. RBM will supply report date when required.

CONSULT FACTORY FOR POSSIBLE U.L. AND C.S.A. RECOGNITION FOR OTHER THAN ABOVE.

OBSOLETE LISTING

The following standard catalog controls are obsolete as of 3/1/69. Units will be available until 2/28/70 from Chicago warehouse subject to prior sale or discontinuance from RBM production.

GUARDIAN® ELECTRIC *General Purpose Relays*

SERIES 200 RELAY WITH COMPLETELY INTERCHANGEABLE COIL AND CONTACT ASSEMBLIES

The coil consists of the coil and field piece; the contact assembly consists of switch blades, armature, return spring and mounting bracket. The Guardian Midget Contact Assembly is interchangeable with the standard Series 200 contact assembly. Available with SPDT, DPDT or 4PDT contact switch assemblies, each suitable for use with any AC or DC coil.

SERIES 200 RELAY

SERIES 640U—645U
ALL PURPOSE ECONOMY RELAY
10 AMPERE

A compact, lightweight relay capable of unusually heavy power control for its size. Long life, high quality relay available in a variety of AC and DC voltages with a selection of contact combinations. All contact ratings are 10 amps. Contact ratings at 60 cycles. 120V. non-inductive load. 8-32 single screw, center pole mounting. Shpg. wt., 3.5 oz.

SERIES 220 HEAVY DUTY INDUSTRIAL AC RELAY
20 AMPERE

This rugged unit makes and breaks up to 20 amps, a 240 volts. Armature is equipped with phenolic contac mounting block carrying 3/16" dual contacts. Phenolic i tested at 1500 volts breakdown to ground. Contacts ar silver alloy. Relay is available in dual SPST, normall open contact combination only. Contact rating 20 amp at 60 cycles, 230V., AC, non-inductive load. Mounting Mounting holes—clearance for 8-32 with 2 1/32" centers Shpg. wt., 5.5 oz.

SERIES 240U—245U 15 AMPERE RELAY

Designed for contact ratings up to 15 amps, Guardian series 240 AC and 245 DC relays are compact, reliable inexpensive. Factory pretested and adjusted to be ready for assembly into your product. Contact rating is 1 amp, 120V., 60 cycles non-inductive load. Easy assembly with 8-32 single-screw, center-hole mounting. Shpg wt., 4.5 oz.

SERIES 900 & 910 10 AMP RELAY*

- *U/L Recognized Component
- Designed with reduced number of parts for long, trouble-free service
- Has keyed and locked lifters

Series 910 is exactly the same as the 900 relay, both electrically and mechanically, but with 3/16" quick disconnects instead of soldered termination.

ependable, low cost, DPDT relay featuring new, trouble-free design that incorporates a minimum of parts. Contacts all rated 10 amps, 120V., AC resistive oad. Has molded switches, one-piece mounting clip and return spring; molded obbin and coil cover. Average shpg. wt., 6 oz.

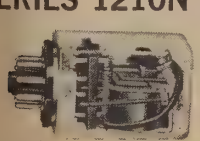
urther savings are available when Series 900 relays are purchased in ulk packs of 50 units. Relays are supplied nested in new convenient form fitted" assembly line trays . . . one package of 50—$76.50 ea.; and up—$67.00 ea.

SERIES 1200—1205 SMALL SIZE — EFFICIENT MEDIUM POWER AC-DC RELAY—10 AMPERE



Small-sized, highly efficient relay applicable to automation, communications, remote control switching devices and experimental uses. Heavy solder lug type terminals molded in phenolic block, with barriers for over-surface insulation. Contacts rated 10 amps at 60 cycles, 115V., AC, non-inductive oad. Mounting: Single mounting hole, 6-32 tap. Shpg. wt., 2.5 oz.

SERIES 1210N ENCLOSED PLUG-IN AC RELAY WITH BUILT-IN NEON LAMP TO INDICATE CIRCUIT FAULTS — 10 AMPERE

This plug-in relay utilizes a miniature neon lamp connected across coil terminals. The lamp lights each time the coil is energized, or indicates a circuit fault when lamp is "dark". Ideal for detecting circuit faults in relay banks, lass arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Available with pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated 10 amps at 120V., C. 60 cycles, non-inductive load. Shpg. wt., 3.5 oz.

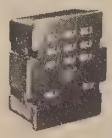
SERIES 1220 AC—1225 DC



Modern design of this relay has become the standard of the industry. Series 1220 and 1225 are reduced in height and cost by eliminating the radio-type plug and all the wiring between the relay and the plug. These series use the terminal panel itself as the male plug. Famous "UNI-GUARD" continuous-loop moving blades eliminate soldered connections. Cover snap-locks in place with a flush fit that guards against shorting. Universal terminals function as solder-lug, .110" quick connect, or socket plug-in. Mounting bracket for above chassis installation included with each relay. Contacts will safely switch 10 amperes at 120 VAC non-inductive in most applications and are U/L approved at 7 amperes.

U/L Recognition File #E-23524.

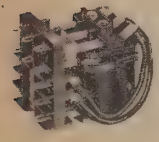
SERIES 1220M AC—1225M DC

MANUAL RESET RELAY



Basic size and cost advantages of the Series 1220 AC and 1225 DC are obtainable off-the-shelf in a manual reset version. Height and cost are reduced through the elimination of the radio-type octal plug and the wiring between the relay and the plug. Unit is built to meet U/L requirements and features the "UNI-GUARD" continuous-loop moving blades. Double pole double throw contacts transfer when coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts re-transfer **only** when manual reset button is pressed.

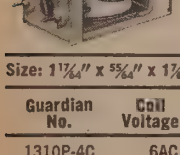
SERIES 1240—1245

NEW SMALL, EFFICIENT MEDIUM POWER RELAY—10 AMPERE



Highly efficient relay for communications, automation, remote control switching circuits and laboratory applications. All terminals are solder lug type and molded in phenolic panel block for coils as well as contacts. Barriers in panel block raised to meet U/L over-surface spacing; U/L insulation throughout. Contacts rated 10 amps at 60 cycles, 120 VAC, non-inductive load. Mounting: Single mounting hole, 6-32 tap. Shpg. wt., 2.5 oz.

SPECIAL PURPOSE RELAYS

SERIES X-300ER

ELECTRICAL RESET OVERLOAD RELAY

Applicable for use in industrial panel insta lation, provides precise protection from cu rent surges and continuous overloads. R mote panel installation of control potentiometer simplifies adjustment of rela to operate on any current value from 250 to 750 milliamperes, DC. Auxiliar SPDT switch for pilot light indication of "overload" or "clear" position. Rese relay can be operated from any point convenient to operator. Insulation betwee coil and ground rated at 3,000 VAC. Shpg. wt., 13 oz.

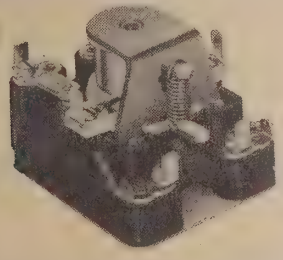
POWER RELAY GROUP



DPDT

NEW 2600U—2605U 25 AMPERE

ew line of power relays with double pole double throw contacts rated at 25 mperes. Inverted coil construction protects armature and contacts from in-dvertent mechanical damage or electrical shorting. Series 2600U-DPDT-AC oils are rated for continuous duty at 240 VAC, with 75% power factor; operating ower requirement is 9.5 volt amperes, 60 cycles. Series 2600U and 2605U have asily accessible screw type terminals as pictured; also available are ¼" AMP uick connect terminals as pictured on series 2620U and 2625U below. (Purchase 600—Q.C. terminal kit for easy "do-it-yourself" conversion.) "Press to Test" rmature lever makes for convenient manual circuit testing. Recessed SPDT uxiliary switch as illustrated is not included but is simple to mount and may e purchased separately if needed; auxiliary switch has solder lug blade tails nd is rated for 10 ampere operation. These new 25 ampere power relays are ery compact with a shipping weight of only 8 ounces. For mounting there are wo .196" diameter holes in the base; these are located on 1⅞" centers.

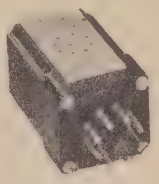
NEW 2620U—2625U 25 AMPERE

DPST—N.O.



ompatible line of power relays with double pole single throw contacts (normally pen). Same inverted coil construction as for double throw units above. Im-ortant note: Series 2620U and 2625U are manufactured with the easily acces-ible screw type terminals as pictured on series 2600U and 2605U above. The ¼" AMP quick connect terminals pictured here are available in the 2600-Q.C. erminal kit for easy "do-it-yourself" installation. Same "Press to Test" arma-ure lever as for 2600U and 2605U shown above. Auxiliary switch described bove may be added if desired. Overall dimensions, shipping weight and nounting provisions are identical to the compatible DPDT units of the 2600U nd 2605U series.

SOLID STATE RELAYS

SERIES 6100—6300

Universal AC or DC control voltage with complete circuit isolation from load switching circuit. Externally adjustable pull-in voltage level from 80-130 volts AC or DC, with close differential between pull-in and drop-out where accurate voltage sensing is required. Control of high inrush lamp, inductive or normal resistive loads from 10 ma to 3 amps. Internal filtering prevents random turn-on of "off" contacts.

SERIES 1220/1220

ENCLOSED INTERLOCK

For an enclosed interlock or electrical reset relay the Guardian Series 1220/1220 has all the mounting and cost advantages of the Series 1220 and Series 1225. Double pole double throw contacts on relay transfer when relay coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts re-transfer **only** when interlock (reset) magnet is energized. Contacts are rated for 10 amperes at 120 VAC non-inductive.

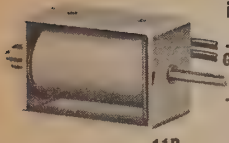
GUARDIAN® ELECTRIC *Solenoids*

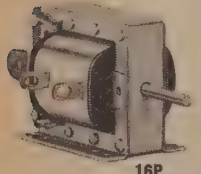
MOST COMPLETE DISTRIBUTOR LINE!

Select from 126 different Guardian solenoids! The Guardian line now includes U-Frame, Box-Frame, and Laminated types as well as Tubular types. Many are available in both pull type and push type, AC or DC, in a range of voltages, for use in either intermittent or continuous duty applications. Several items in the line are furnished complete with a single pole double throw switch which functions simultaneously with the mechanical movement of the plunger linkage.

NOTE: In determining whether to select your solenoid for intermittent or continuous duty, consider the following:

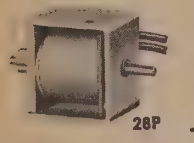


1. Intermittent duty solenoids are generally stron er and will do more work in terms of "lift".



2. However, intermittent duty solenoids shoul not be energized for more than 5 consecutive mi utes, or be permitted to rise more than 85°C. abov 24°C. ambient, without giving them sufficient tim to cool between operation cycles or periods of ene gization.

3. Continuous duty types are designed with a higt er coil resistance so that they will not rise more tha 85°C. above the 24°C. ambient temperature whe operated within maximum lift and stroke rating shown herein.



PUSH TYPE SOLENOIDS—NEW!

The popular Guardian Box-Frame solenoids 11 and 28 are now available as PUSH types under the number 11P and 28P for either AC or DC operation. Guardian's famous Laminated solenoids 16 and 18 are for A operation only and they are introduced as PUSH types under the numbers 16P and 18P. For all push type sole noids in the table below the lengths of the push rods are equal to the *maximum* stroke length specified. Spec ify Guardian No., duty, and AC or DC coil voltage when ordering.

SOLENOID SWITCHES

11S

24S

28S

The very widely used Guardian Box-Frame solenoids 11 and 28 as well as the U-Frame 24 have been function ally enhanced by the addition of a single pole double throw switch actuated by a push rod affixed to the plunger. Respective type numbers for the solenoid switches are 11S, 28S and 24S. All switches in the solenoid switch line are rated for 10 amperes at 120 VAC. Specify Guardian No., duty, and AC or DC coil voltage when ordering.

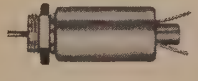
GUARDIAN® ELECTRIC *Solenoids & Switches*



PULL TYPE TUBULAR SOLENOIDS

The clean design of Guardian's tubular solenoids permits side-by-side mounting with ease. The threaded bushing is inserted through the mounting hole and secured with the hex nut furnished with the solenoid. Units available with lifts up to 11 lbs. Life at rated load 10 million operations minimum. Each unit furnished with an "L" shaped bracket for surface mounting. Some of the typical applications are Computers, Aircraft and Missiles, Office Equipment, and Copy Machines.

PUSH TYPE TUBULAR SOLENOIDS—NEW!

Now, several of the most popular tubular solenoids have been designed for push type operation. The T3.5, T4 (in two lengths) and the T6 have been fitted with non-magnetic metal push rods which push out from the threaded mounting end of the solenoid and are designated as TP3.5, TP4, and TP6 types. Note that in tubular solenoid construction the push types are equal in "lift" to their pull type counterparts. For all push type tubular solenoids in the table below the lengths of the push rods are the same as the **maximum** stroke lengths specified. Hex nuts as well as "L" shaped brackets for either panel or surface mounting are furnished.

NEW PUSH BUTTON SWITCH BANKS

Sleek, compact design, features four push buttons on 5/8" centers. Each button actuates four double throw switches with 1½ ampere contacts. Unit has four #6-32 tapped mounting holes on 7/8" x 2 13/16" centers. Switch terminals are .110" quick connect for .016" female receptacle (AMP #42415). Each push button has a 28 Volt lamp no. G.L.-04 and a replaceable white translucent face. Also available in replacement kits: red or green translucent faces and clear faces. Long life: 100,000 mechanical operations. Versatile functions available: **INTERLOCK** Only one button at a time may be pushed, resetting to normal any button previously pushed. **NON-LOCK** Each button has momentary action, returning to normal when pressure is released; two or more buttons may be pushed simultaneously. **PUSH TO LOCK/PUSH TO RELEASE** Each button locks in actuated position or resets to normal upon alternate pushes; each button independent of others; two or more buttons may be actuated or reset simultaneously. **THREE LOCK/MOMENTARY-RESET** One end button and both middle buttons lock when pushed individually or simultaneously; other end button has momentary action, returning to normal when pressure is released and resetting to normal any other buttons previously locked. Shipping weight: 7 oz.

MULTICOLOR ILLUMINATED LEVER SWITCHES

Bushing mounted illuminated lever switches capable of mounting vertically on 1¾" centers and horizontally on ¾" centers. Mount in panels up to 1/8" thick with behind panel size .750" x 1.334" x 2.380" max. Supplied with 28 volt lamp and red and green insertable color filters. (Center position on 3 position switches remains clear). Available in Locked-off-Locked (LOL), Locked-Locked (LL), and Locked-Momentary (LM) in either 4 or 10 amps, (110VAC Resistive). Other switching position configurations possible with easily replaceable cams. Cam kits include cams capable of converting to LOL, MOM, LL, ML, LM, OL, LO, MOL, LOM. Terminals, .110 quick-disconnect.

GUARDIAN® ELECTRIC *Steppers*

STEPPING CONTROLS

or accurate sequence selecting, pulse multiplying, pulse dividing, circuit select-ng, automatic homing, remote homing, counting and latching. Guardian steppers re specified for automatic control of electrically operated business machines. ccumulators (coin and other), animated displays, electrical scoreboards, auto-natic overhead garage doors, assembly line controls, automatic packaging oading) controls, sump pump controls, commercial slide projectors, among thers. All Guardian steppers except Series 705 are intermittent duty. All are irect-drive units with switching operations completed upon energization.

PC

CONTINUOUS ROTATION

MC

The circuit selection wiper on Continuous Rotation Steppers moves in one direction only, upon energization of the step coil. This type of stepper is vailable in standard 24 point (MC) or 40 point (PC). The Guardian MC Midget ontinuous Rotation Stepper is particularly adaptable to repetitive sequence unctions. The 24 bridging contact deck is evenly divisible by eight possible equences. The PC stepper features self-stepping speeds up to 30 steps per econd and mechanical life expectancy of over 4,000,000 steps. The circuit electing wiper on Electrical Reset Steppers can be reset to zero or home from ny desired position, by energization of the reset magnet. They are frequently mployed to record counts by various numerical groups, then resetting utomatically.

PER

ELECTRICAL RESET

MER

Type MER. A direct drive (steps on energization) with positive mechanical reset interlock actuated by the reset magnet and unlocked on the first energization of the step magnet. Assures ositive reset on as short a pulse as one-hundredth of a second. By interonnecting two or more Steppers, count can be increased to any desired total ounting by tens, or any convenient multiple. Will control a sequence of operaon and then automatically reset to starting position.

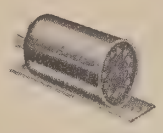
ype PER. Operation same as MER but with up to 36 active contacts.

Type MER-SOL

ll features of the widely used Guardian MER 24 point lectrical reset stepper... PLUS Solenoid "lifts" wiper ontacts when stepping to reduce friction... and arcing. ncreased contact ratings to 5 amps resistive at 120 olts AC. Increased function capability. Increased de-endability. Increased life expectancy — now up to 0,000,000 steps. Compact design.

MAS

ADD AND SUBTRACT

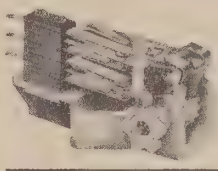


PAS

Add and subtract steppers are basically continuous rotation types with the added feature of being able to reverse the movement of the selecting wiper when required.

ype MAS A midget add and subtract stepper incorporating a cam actuated vitch which operates at zero position. Used primarily to indicate a zero bal-nce between pulses supplied to the "add" coil as compared to pulses received the "subtract" coil.

ype PAS New Bi-directional steppers whereby the selector wiper moves either rection depending on which of the coils are energized. Supplied with .057" a. Amp quick-connect terminals arranged in circle on deck, and also includes form "C" cam switch.



ROTOMITE STEPPER SERIES 705

An entirely new concept in stepper design, the Guardian "Rotomite" is first with maximum stepper control in minimum space. Offering high contact rating of 3 amps resistive, 1 amp inductive (50% PF). Featuring **continuous duty operation** with life well in excess of one million steps, the completely enclosed Rotomite is geared for continuous rotation of 12 positions. A few Rotomite applications presently include computers, business machines, lighting and vending controls, counting and sorting devices, and model trains. Shpg. wt., 5 oz.

SERIES 660—665 SEQUENCE STEPPER

Intended to perform switching operations in a repetitive transfer sequence. Each electrical impulse moves the switch contacts to the opposite position in the sequence. Applications include lights, signs, motors, appliances and similar units. Contacts rated up to 12½ amps, 120V., 60 cycles, non-inductive load. Shpg. wt., 8 oz. Mounting: 4 holes 8-32 (NC-2B).

SERIES 640L ON/OFF STEPPER

New, improved Midget Latching Stepper with all the features of the Series 640. Single coil. SPST or SPDT contact combinations. Recommended for positive on/off control of positioning devices, remote controls, lighting circuits and many additional applications. Impulse as short as 20 MS energizes coil to reverse position of snap-action switches. Holds last position of switch with coil de-energized. Contacts rated for 5 amps at 120 VAC, 60 Hz, non-inductive load. Power requirement: 6VA. Solder lug terminals for coils and contacts. Mounting: Single mounting hole tapped 8-32 (NC-2B).

SOLID STATE CONTROLS

MET SERIES TIME DELAY

The MET Series of Time Delays are designed to replace many expensive units now on the market, they offer close tolerance repeatability at a low price. Designed for on-operate and on-release, with a range of .5 to 300 seconds, these low cost Time Delays provide an output of 10 amp resistive, 120 VAC, 50-60 Hz and operate on inputs of 120 VAC, 50-60 Hz, 24 VAC, 50-60 Hz or 24 VDC, polarity protected. These new Time Delays feature accuracy of ±10% of nominal setting over voltage and temperature range, repeatability to 1% within fixed conditions, a single turn potentiometer and time delays of .5 to 100 and 100 to 300 seconds over a temperature range of 0°C to 55°C.

O in part number indicates delay on operate, R delay on release.

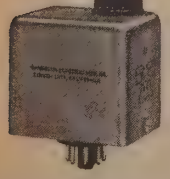
BDT SERIES TIME DELAY



A new commercial Time Delay with unusual features which include operation on high or low line, replaceable electro-mechanical relay, repeatability, temperature stability and small size. The Time Delay incorporates all silicon transistor circuits that operate over a wide input range of 75-125 VAC, 50-60 Hz and draw only 5 ma prior to time out. 24 VDC units also available. Enclosed in a standard relay housing, terminated with an octal plug (8 pin), they are available with time delay periods from 1-10 to 10-60 seconds, adjustable. The BDT Series is one of the smallest internally adjustable time delays on the market, and very competitively priced. BDT Time Delays are designed to operate in the most severe industrial applications. The solid state circuit, by design, is immune to most transient noise found on commercial power lines. Voltage up to 2500 volts peak (short duration) can be tolerated without damage or malfunction. In the area of machine control, where large numbers of control cycles are expected the BDT Series offers another advantage, the ability to replace the internal relay. The solid state timing control has the minimum capability of $5x10^7$ operations under normal conditions.

TDO SERIES TIME DELAY

Series TDO incorporates many features of more expensive units, but is most economical, offering contacts rated at 5 amps, DPDT, 120 VAC with adjustable delay of 0.5 to 30 seconds on attract with a ten turn potentiometer. Repeatability is within 5% after a line interruption of 100 milliseconds. Standard unit available is 120 VAC.

TD SERIES TIME DELAY

Series TD is the most accurate and compact time-delay relay available from stock. Six models provide adjustable delays from 1 to 180 seconds with 24 VDC or 120 VAC inputs. A 15 turn potentiometer provides high adjustment resolution. The TD series is accurate to 5% of nominal setting over its complete temperature and voltage range. Repeatability is 2% after a line interruption of 50 MS. Delays are on attract with 3PDT contacts rated at 10 amps resistive.

TMP & TMT SERIES TIMING MODULES

TMP

TMT

Series TMP/TMT Time Delay Modules are available in "on operate" and "o release" configurations with two time delays and three standard input voltag ranges. Time delay is externally adjustable within two ranges from ½ to 10 seconds and 100 to 300 seconds. Repeatability is ±1% under normal cond tions. Life expectancy is one million cycles. Standard input voltages are 2 VAC, 120 VAC and 24 VDC. TMP is terminated in an octal plug for quick moun ing and remote control of relay and other switching devices. The TMT "Fla Pack" package was designed to accept Guardian relays mounted to it, or t allow the stacking of modules for extension of timing periods, or direct in stallation into a printed circuit board.

O in part number indicates delay on operate, R delay on release.

PROTECTIVE SENSORS

C.T. 1

SENSOR

A complete line of industrial sensors is available from GUARDIAN® including 3-phase (IR-AV2), Close Differential (IR-VS3), Over-Voltage (IR-VS1), Under-Voltage (IR-VS2), 4 wire Phase Sequence (IR-PR1), Adjustable Frequency (IR-FS1) and AC Current Sensors (CS1 & CT1). These sensors are bi-products of designs for military application with solid state networks. The relay is 3PDT 10 amps resistive with either 24VDC or 120 VAC available. Mounting is by socket, chassis mount or directly into a printed circuit (110). Temperature range is from 0°C to +50°C. Life is 100,000 operations minimum and protection for transient voltages is to 600 volts for the 3 phase model, 2500 volts for all others. All units come with a dust cover enclosure except the CT1 series which is a transfer molded part.

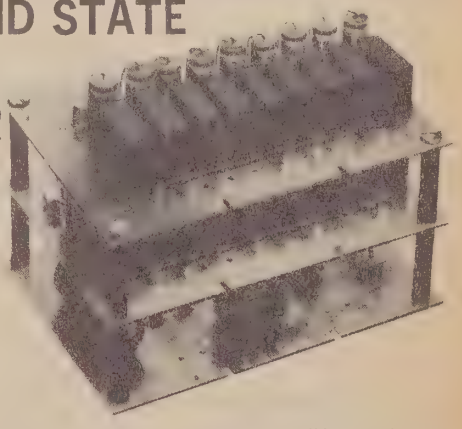
LEVEL DETECTORS

LDT

LDP



A new, inexpensive Voltage Level Detector with unusual operating characteristics is now in production. These molded modules incorporate circuits comprised of silicon semiconductor devices to form a peak detecting voltage differential amplifier, signal amplifier and a solid state output switch suitable for driving a number of GUARDIAN® relays. The unit's sense level is adjustable (either fixed or variable) over ranges of 85-135 VAC, 50-60 Hz, 20-30 VAC, 50-60 Hz, 20-30 VDC, 180-250 VAC, 50-60 Hz by external resistance. This broad adjustment range permits operation as either an under or over level detector. Two units may be used to form band pass or pedestal level sensing. When used with GUARDIAN® CALIFORNIA TMT/TMP timing modules, they provide inexpensive time delayed voltage detection systems that allow them to ignore normal line fluctuations. Transient suppressed, they will withstand 2500 V peak (short duration) without damage or malfunction. On DC units, transient protection is 600 volts.

SLS SOLID STATE LOGIC STEPPER

The SLS 100 Series Solid State Steppers are the only power solid state steppers to accept either high level or logic level inputs with high noise immunity for industrial applications. The output of each step is a 120 VAC 2½ amp switch. They are modularly constructed so that many configurations can be accomplished from stacked modules. Standard "off the shelf" models have ten or twenty steps. Units may be obtained with pulsers to make them self-stepping steppers. They can be cascaded or paralleled to perform complex switching and control functions. GUARDIAN® CALIFORNIA's new Steppers are built for operation on input power of 120 VAC, 50-60 Hz or 400 Hz and 24 VDC. All solid state construction offers the advantages of mechanical noise free operation and, under proper operating conditions, practically unlimited life.

RELAYS WITH EXTRA DIMENSION

TO-5 MICROMINIATURE RELAYS — SERIES MA AND MS

NEW

Product Bulletin 90

All welded, DPDT relays manufactured in accordance with MIL-R-5757.

CONTACT RATING

1 ampere at 32 volts DC max, low level 0 to 0.1 ampere at 50 mV DC or AC, minimum current per MIL-R-5757/40 and /70.

UNIQUE PROCESSING TECHNIQUES ENSURE LONG LIFE

All handling and processing techniques are fully controlled and documented. Complete identification and traceability records are maintained. All parts are 100 percent inspected and cleaned prior to assembly. Critical assembly and inspection stations are housed within laminar flow work stations.

HI-G'S CLEANING PROCESS REMOVES ALL TYPES OF CONTAMINATES

A unique cleaning system entirely housed in a laminar flow bench utilizing vapor degreasing, ultrasonic agitation, spray cleaning, and use of solvents with an organic base, water and detergent is capable of removing organic as well as inorganic soils. A special spray cleaning process using a highly volatile solvent is used as a final cleanup of the completed assembly.

VACUUM DEGASSING

After final cleaning, the relays are immediately placed into a vacuum outgassing station. The vacuum system is fully protected against contamination with molecular sieve traps, liquid nitrogen, and water cooled optical baffles. A high temperature vacuum oven with controls capable of maintaining temperature limits and gradients within ±1°C is connected to the pumping station. Relays are outgassed above 200°C at vacuum levels of 10^{-6} torr (0.001 micron) for 16 hours.

FULL SIZE

FINAL SEAL OPERATION

At the conclusion of the outgassing cycle, the open relays are passed from the vacuum oven through an interlock into an atmospheric controlled dry box. The back filling gas is continuously recirculated through an inert gas purification system, capable of changing the entire volume of gas within the dry box every 5 minutes. Within the dry box is a projection seal welder, which hermetically seals the housing to the relay assembly.

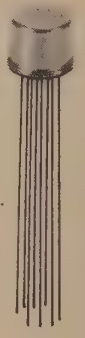
FINAL TEST

All relays are checked for contact resistance, pull in and drop out, dielectric strength, insulation resistance, contact bounce, operate and release time, and coil resistance. Additionally, each relay is submitted to a 5000 cycle low level miss test.

ELECTRICAL CHARACTERISTICS

Sensitivity at 25°C: MA Series — 125 mW.
MS Series — 65 mW.

Life: 50,000 operations at min current loads.
100,000 operations min at max rated load.
1,000,000 operations min at low level.



Overload: 2 amps at 32 VDC for 100 operations min.

Contact Resistance: (a) 100 milliohms initial at rated load.
(b) 200 milliohms after rated life.
(c) 3Ω max during min current life. 0.5Ω after life.
(d) 50Ω max at 15 μA and 15 mV rms.

Contact Bounce: 1.5 ms max.

Operate Time: 2.0 ms max at nom coil voltage at 25°C (MA Series).
4.0 ms max at nom coil voltage at 25°C (MS Series).

Release Time: 1.5 ms at 25°C (MA Series).
2.0 ms max at 25°C (MS Series).

Dielectric Strength: 500 V rms between all mutually insulated points at sea level.

Insulation Resistance: 5000 MΩ min between mutually insulated terminals.

ENVIRONMENTAL CHARACTERISTICS

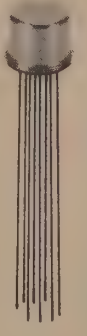
Temperature Range: −65°C to +125°C.

Vibration: 0.5" DA from 5-34 Hz, 30 G from 34-3000 Hz, 10 μs max contact opening.

Shock: 75 G (11 ms duration), saw tooth, 10 μs max contact opening.

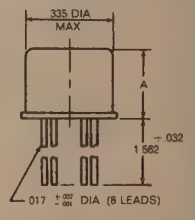
Acceleration: 100 G.

Leakage Rate: 1×10^{-8} cc/s max.



WEIGHT

Series MA: 2.9 grams max.



Series MS: 4.5 grams max.

RELAYS WITH EXTRA DIMENSION

NEW

the MINI- G™

.150 GRID RELAY — SERIES G Product Bulletin 95

All welded, DPDT relay manufactured in accordance with MIL-R-5757.

ELECTRICAL CHARACTERISTICS

Sensitivity at 25°C: 135 mW.

Life: 100,000 operations min at rated load and 125°C.

Overload: 2 amps at 30 VDC for 100 operations min.

Contact Resistance: (a) 50 milliohms initial at rated load.
(b) 150 milliohms after rated life.
(c) 3Ω max during min current life.
(d) 50Ω max at 10 mA and 30 mV rms.

Contact Bounce: 1.2 ms max measured at 100 mA at 6 VDC.

Operate Time: 4.0 ms max at nom coil voltage at 25°C (including bounce)

Release Time: 4.0 ms max at 25°C (including bounce)

Dielectric Strength: 500 V rms between all mutually insulated points at sea level; 750 V rms between contacts and case.

Insulation Resistance: 1000 MΩ min between mutually insulated terminals.

CONTACT RATING

1 ampere resistive at 30 volts DC max, 0.125 ampere resistive at 115 volts rms, 400 Hz, case grounded, low level 0 to 0.1 ampere at 50 mV DC or AC, minimum current per MIL-R-5757/37.
2 ampere resistive at 30 volts DC max (50,000 operations min)

ENVIRONMENTAL CHARACTERISTICS

Temperaure Range: −65°C to +125°C.

Vibration: 0.5″ DA from 5-34 Hz, 30 G from 34-3000 Hz, 10 μs max contact opening.

Shock: 100 G (11 ms duration), saw tooth, 10 μs max contact opening.

Acceleration: 100 G.

Leakage Rate: 1×10^{-8} cc/s max.

WEIGHT

0.13 oz.

QPL PRODUCTS

The following relays are manufactured to meet the requirements of MIL-R-5757.

HALF SIZE CRYSTAL CAN RELAY — SERIES 2K-2299

Hi-G Part Number	MIL Part Number	MIL Type Designation
2K-2299-1	M5757/9-001	RY4XX4B3L11
2K-2299-2	M5757/9-002	RY4XX4B3L12
2K-2299-3	M5757/9-003	RY4YY4B3P11
2K-2299-4	M5757/9-004	RY4YY4B3P12

Coil resistance 700 ohms ±15% @ 25°C
Pull-in 18 Vdc max. } over temperature range
Drop-out 1.5 Vdc min. }
Temperature range −65°C to +125°C
Contact bounce 1 ms max.
Operate and release time 4 ms max.
Vibration 20G @ 10-2000 Hz
Shock 100 G

CRYSTAL CAN RELAY SERIES 2B-1506

Coil resistance 675 ohms ±10% @ 25°C
Pull-in 18 Vdc max. } over temperature range
Drop-out 1.5 Vdc min. }
Temperature range −65°C to +125°C
Operate and release time 6 ms max
Vibration 20 G @ 10-2000 Hz
Shock 100 G

GENERAL PURPOSE RELAYS

MINIATURE OPEN TYPE (SERIES MK)

Open type relay in standard contact arrangements up to 3PDT. 5 or 10 amp contact rating. Voltages up to 230 volts, A.C. or D.C. Factory adjusted to pull in at 75% max. of nominal voltage D.C. and 80% max. of nominal voltage A.C. Designed to pass 1,000 volt A.C. Hipot test between all elements.

PLATE CIRCUIT RELAYS 5 amp. open type

	2500Ω	5000Ω	10,000Ω	20,000Ω
* MKC-1 SPDT	$3.15	$3.25	$3.80	$4.05
* MKC-2 DPDT	3.65	3.80	4.30	4.55
* MKC-3 3PDT	4.10	4.20	4.75	5.00

*10 amp models ask for series MKCO

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* MK1A SPDT	$3.10	$3.55
	* MK2A DPDT	3.75	4.15
	* MK3A 3PDT	4.15	4.55

	5 amp contact rating	6, 12, 24V	110V
DC	* MK1D SPDT	$3.05	$3.45
	* MK2D DPDT	3.40	3.85
	* MK3D 3PDT	3.85	4.25

All models available in 10 amps. DIMENSIONS: 1-11/16 × 1-3/16 × 29/32
* All models available in 10 amps. Ask for series MKO.

MINIATURE PLUG-IN (SERIES MKP)

Plug-in type relay, same factory tested, quality features as above. Will operate continuously in ambient temperature ranges of 45° to 75°C. for D.C. coils and −45° to 55°C. for A.C. coils. Metal or clear C-11 Styrene dust cover.

PLATE CIRCUIT RELAYS 5 amp. enclosed type

	2500Ω	5000Ω	10,000Ω	20,000Ω
* MKF-1 SPDT	$5.90	$6.00	$6.40	$6.65
* MKF-2 DPDT	6.30	6.40	6.80	7.10
* MKF-3 3PDT	7.75	7.90	8.40	8.65

*10 amp models ask for series MKFO

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* MKP1A SPDT	$5.45	$5.90
	* MKP2A DPDT	6.05	6.45
	* MKP3A 3PDT	7.50	7.95

	5 amp contact rating	6, 12, 24V	110V
DC	* MKP1D SPDT	$5.40	$5.85
	* MKP2D DPDT	6.00	6.40
	* MKP3D 3PDT	7.45	7.90

*All models available in 10 amps. Ask for series MKH. DIMENSIONS: 2-1/4 × 1-5/8 × 1-3/8

MINIATURE MULTIPLE LEAF (SERIES MW)

A small, versatile relay available in a variety of contact configurations consisting of forms A, B, C or D (make before break), up to a maximum of 12 springs. Coils can be supplied for operation on D.C. or A.C. 60 cps. Operation on 400 cps. source is available with self-contained rectifiers on relays with covers.

	10 amp contact rating	6, 12, 24, 115V	220V
AC	MW1A SPDT	$2.70	$3.10
	MW2A DPDT	3.30	3.75
	MW3A 3PDT	3.80	4.20
	MW14A 4PDT	6.35	6.75

		6, 12, 24V	110V
DC	MW1D SPDT	$2.60	$3.10
	MW2D DPDT	3.25	3.65
	MW3D 3PDT	3.75	4.15
	MW14D 4PDT	6.35	6.80

DIMENSIONS: 1-17/32 × 1-21/32 × 1-0

SPOTLIGHT RELAYS (SERIES A)

High quality, general purpose plug-in relay with built-in circuit indicator lamp. Available in C-11 Styrene colored cases for circuit identification or in metal can. Saves panel space, reduces costly labor.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* A-1A SPDT	$6.40	$6.85
	* A-2A DPDT	7.00	7.40
	* A-3A 3PDT	8.45	8.85

		6, 12, 24V	110V
DC	* A-1D SPDT	$6.35	$6.75
	* A-2D DPDT	6.95	7.35
	* A-3D 3PDT	8.40	8.80

All models available in 10 amps. AH series.
DIMENSIONS: 2-1/4 × 1-3/8 × 1-3/8

SPOTLIGHT RELAYS. LOW COST. (SERIES ATR)

A plug-in relay which is identical in construction to our miniaturized low profile SERIES MKTR (see page 3) but with built-in circuit indicator lamp. It can be used in conjunction with our 92-67 or 92-82 sockets and 91-49 spring clip.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* ATR1A SPDT	$5.25	$5.60
	* ATR2A DPDT	5.90	6.30
	* ATR3A 3PDT	6.35	6.80

	5 amp contact rating	6, 12, 24V	110V
DC	* ATR1D SPDT	$5.15	$5.55
	* ATR2D DPDT	5.55	6.00
	* ATR3D 3PDT	6.05	6.45

* All models available in 10 amps AHTR Series.
DIMENSIONS: 1-3/16 × 1-3/8 × 1-3/8

GENERAL PURPOSE RELAYS

PRINTED CIRCUIT or TAPER TAB (SERIES MKT)

Printed circuit type relay incorporating coil, frame and load contacts of standard Series MK. Connector lugs fit standard amp terminal #41355. Series MKTE is the MKT with plastic dust cover. Available with studs for chassis mount or taper tab connectors. Price same as MKTR .

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* MKT1A SPDT	$3.25	$3.65
	* MKT2A DPDT	3.95	4.35
	* MKT3A 3PDT	4.40	4.85
		6, 12, 24V	110V
DC	* MKT1D SPDT	3.20	$3.60
	* MKT2D DPDT	3.60	4.05
	* MKT3D 3PDT	4.10	4.50

DIMENSIONS: 2-1/32 × 1-7/32 × 29/32

Also in 10 amps: *Series MKTO

Plate circuit relay: *Series MKTC 5 amps *Series MKTCO 10 amps

QUICK CONNECT TERMINAL RELAYS (SERIES MKA)

Quick connect terminal type miniature relay incorporating coil, frame and load contacts of the standard Series MK. The connector lugs fit standard .110" quick connect terminals.

(SERIES MKD

The MKD has the same quality features as our SERIES MK (see page 1) but the panel is wider and .187 quick connect lugs are used throughout the series. This is also an open type relay.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	MKA1A SPDT	$3.25	$3.65
	MKA2A DPDT	3.95	4.35
	MKA3A 3PDT	4.40	4.85
DC	MKA1D SPDT	$3.20	$3.60
	MKA2D DPDT	3.60	4.05
	MKA3D 3PDT	4.10	4.50

Al DIMENSIONS: 29/32 × 1-7/32 × 1-11/16

Also in 10 amps: Series MKAO

Plate circuit relay: Series MKAC 5 amps Series MKACO 10 amps

SERIES MKD. OPEN TYPE WITH .187 QUICK CONNECT LUGS

	5 amp contact rating	6, 12, 24, 115V	220V
AC	MKD-1A SPDT	$3.25	$3.65
	MKD-2A DPST	3.95	4.35
	MKD-3A 3PDT	4.40	4.80

	5 amp contact rating	6, 12, 24V	110V
DC	MKD-1D SPDT	$3.20	$3.60
	MKD-2D DPDT	3.60	4.05
	MKD-3D 3PDT	4.10	4.50

SERIES MKDO. OPEN TYPE WITH .187 QUICK CONNECT LUGS

	10 amp contact rating	6, 12, 24, 115V	220V
AC	MKDO-1A SPDT	$3.30	$3.75
	MKDO-2A DPDT	4.05	4.45
	MKDO-3A 3PDT	4.55	5.00

	10 amp contact rating	6, 12, 24V	110V
DC	MKDO-1D SPDT	$3.25	$3.65
	MKDO-2D DPDT	3.75	4.15
	MKDO-3D 3PDT	4.25	4.65

SERIES MKDC. PLATE CIRCUIT RELAYS WITH .187 QUICK CONNECT LUGS

5 amp open type	2500Ω	5000Ω	10,000Ω	20,000Ω

MKDCO-3 3PDT	4.40	4.75	5.15	5.40

MINIATURE PLUG-IN *LOW PROFILE LOW COST*

(SERIES MKTR)

Despite its compact size this new totally enclosed, low cost, low profile miniature relay has not compromised the high quality of its progenitor the Series MK open relay. The low mounting profile (dust cover included) has been made possible by incorporating the frame of the relay with the connector-header. Thus a certain basic hardware has been eliminated resulting in important size reduction. Versatility is also assured since the standard terminals can be used with Amp snap-on connectors, printed circuits, or plug-in receptacles. Also available with studs for chassis mounting. Termination can be used for soldered connections. The plug-in-receptacle is true 10 ampere construction. Lugs can be used for either solder or snap-on connections.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	* MKTR1A SPDT	$4.25	$4.65
	* MKTR2A DPDT	4.95	5.35
	* MKTR3A 3PDT	5.40	5.85
		6, 12, 24V	110V
DC	* MKTR1D SPDT	$4.20	$4.60
	* MKTR2D DPDT	4.60	5.05
	* MKTR3D 3PDT	5.10	5.50

DIMENSIONS: 1-27/32 × 1-3/8 × 1-3/8

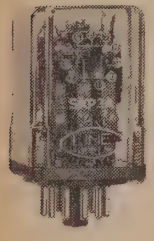
GENERAL PURPOSE RELAYS

NEW MINIATURE SENSITIVE RELAYS (SERIES SK) 60 MILLIWATTS PER POLE

Type SK

Type SKA



This entire series of SK type relays is identical in construction to our MK series miniature relays, with one essential difference —the special alloy used in pole and frame increases the magnetic flux many times thus making the relays very sensitive to ve low power levels—only 60 milliwatts per pole.

SERIES SK OPEN TYPE 5 AMPS

	up to 2500Ω	5000Ω	10,000Ω	15,000Ω	20,000Ω

NEW MINIATURE CRADLE TYPE RELAYS (SERIES JMR) AND (SERIES JMRB BIFURCATED)

The JMR is an imported miniature cradle type relay incorporating a unique reed hinge. The reed hinge eliminates the possibility of binding and wear, thereby providing exceptional long life.
All contact connections are molded directly through the base; the only solder connections in the relay are those to the coil.
The JMR features gold diffused, silver contacts which are suitable for low level as well as full rated 5 amp. loads. The relay is enclosed in a high impact polycarbonate housing and the relay base is black bakelite. All internal phonoelic spacers are baked and out-gassed prior to assembly, thereby assuring reliable operation under the most adverse conditions.

Model Number	Poles	6, 12, 24 VDC	48 VDC	110 VDC

GENERAL PURPOSE RELAYS

MINIATURE 4-POLE RELAY * (SERIES JA)

The series JA is a high quality, miniature 4PDT relay for AC or DC operation. The JA relay features nylon dust cover, gold flashed fine silver contacts rated at 3 amps. This imported relay features exceptional quality and rugged design to meet the most exacting requirements. It is excellent for computers, logic systems and data processing. Standard configuration features solder terminals and 3-48, 23/64" mounting stud. Can be used with our 92-79 solder lug socket or 92-80 P.C. socket (50c each)

	Voltage	Resistance	Nominal Power	Price
DC	6 VDC	40 OHMS	800 MW	$4.10
	12 VDC	160 OHMS	800 MW	4.10
	24 VDC	650 OHMS	800 MW	4.10
	48 VDC	2500 OHMS	800 MW	4.20
	110 VDC	10000 OHMS	800 MW	4.90

DIMENSIONS: 3-1/4 × 1-15/16 × 1-15/16

HEAVY DUTY RELAY OPEN TYPE (SERIES LG)

Open type relay, specifically designed for extremely heavy-duty applications. Standard Fine Silver load contacts are rated at 15 amps. with optional Silver Cadmium Oxide contacts where larger inrush loads are encountered. Loads are rated at 115/60 non-inductive. All load contacts are factory gold-flashed to prevent contact oxidation prior to use.

AC

15 amp contact rating	6, 12, 24, 115V	220V

MECHANICAL LATCH RELAYS

OPEN TYPE (SERIES RL)

Open type for use where a sustained relay closure is required, and current drain of a relay coil is to be eliminated. Incorporates two coils, one to close load contacts, the other to reset them. Requires only momentary electrical contact to operate or release. Provides positive mechanical latch, eliminating chatter during sustained relay closure.

HERMETICALLY SEALED RELAYS

PLUG-IN TYPE (SERIES HKP)

The Series HKP relay incorporates the basic MK frame into hermetically sealed plug-in configuration. All units are thoroughly vacuum baked and out-gassed and back filled with nitrogen before sealing. The HK series will fit any standard octal based receptacle and is in the classification of a general purpose relay.

PLATE CIRCUIT RELAYS 5 Amp

	2500Ω	5000Ω	10,000Ω	20,000Ω

REED RELAYS — 3 STANDARD TYPES

In computer, data processing and guidance system development, design engineers are enthusiastically applying dry reed relays in place of switching diodes. The reasons: miniature profile—life expectancy exceeding 100,000,000 operations—less heat generated compared with switching diodes—3 millisecond operating time and very high resistance in the open contact stage.

To efficiently serve the growing demand for dry reed relays in these and other applications, Line Electric now stocks these 3 standard types for immediate delivery in prototype quantities.

NEW MINIATURE POWER RELAY (SERIES PF)

The PF Series Relays are especially designed for applications where limited space is a factor. This relay, although small in size, is ideally suited for heavy duty industrial control applications where long life and fast action are a requirement. The PF Relay is supplied with ¼" quick connect terminals on the contacts for ease of installation. Other type terminals are available upon request. Consult factory for details.

CONTACTS

Material ¼" dia. silver cadmium oxide gold flashed.
Contact Terminals ¼" quick connect. Pierced for soldering.

COILS

Dielectric Strength 750 V.R.M.S.
Nominal Power D.C. relays - 1.1 watts avg.
A.C. relays - 2.5 volt amps avg.
Over-Voltage D.C. - 140% of nominal. A.C. - 125% of nominal.
Operate Time 15 milliseconds or less.
Weight 3 ounces
Temperature Range —40° C. to +50° C.
Coil Terminals Solder type.

SOLID STATE TIME DELAY RELAY ADJUSTABLE PLUG-IN TYPE (SERIES VTL)

GENERAL DESCRIPTION

The essential difference between solid state electronic timers and other types is the absence of mechanical moving parts within the controlling circuit. For this reason they often require less installation space than the equivalent electro-mechanical models, while delivering longer performance.

Today the incorporation of solid state electronic time controls in original equipment is an indication of advanced engineering design, a strong factor in influencing preference for your company's products. We invite your inquiries.

The Series VTL Time Delay Relay provides an adjustable time delay between the closure of 115 VAC input voltage to the subsequent actuation of a set of SPDT load contacts.

TECHNICAL SPECIFICATIONS

The Series VTL Time Delay Relay has a setting potentiometer with slotted shaft and locking device for adjusting time delay

1. 115 VAC input.
2. Isolated load contacts SPDT.
3. Load capacity 10 amperes non-inductive rated at 115 VAC.
4. Terminals — standard 8 pin octal plug.
5. Temperature range — 30°F. to +120°F.
6. Power consumption 2.0 VA at 115 VAC.
7. Repeat accuracy ±5% of full scale at 115 ±4% VAC.

MODEL	MIN. SETTING	MAX. SETTING

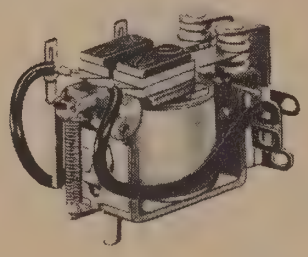
class 88CP plug in

AC or DC operation.
Crackproof, see through plastic dust cover.
SPDT, DPDT, 3PDT — 10 amps.



- Size: 2 1/8 x 1 3/8 x 1 3/8"
- Silver alloy, gold-flashed, contacts rated 10 amps at 115 volts AC or 32 volts DC, resistive load.
- Furnished with 8 or 11 pin std. octal plug.
- Rugged hinge-pin armature for long life and stability of operation.
- Weight: 3 oz. approx.

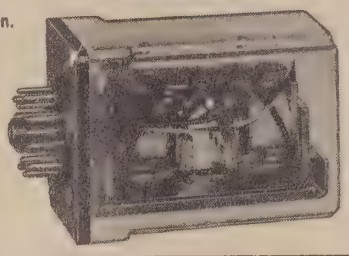
Magnecraft® general purpose relays

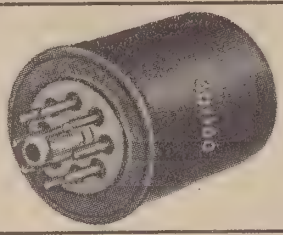
N STOCK FOR IMMEDIATE DELIVERY



:lass 88L latching relay

.C or DC operation — 4PDT and 6PDT — 10 amps.

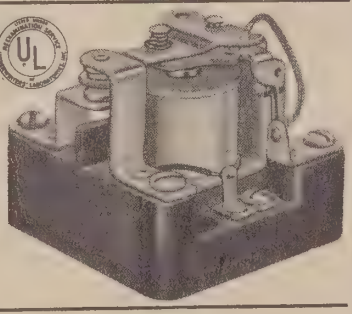
- Size: 3 x 1¾ x 1 15/16"
- Combination of two Class 88 Relays with interlocking latch-in levers mounted on a common base.
- Each armature latches when pulled in. Energizing one armature releases or resets the other.
- Silver alloy, gold-flashed, contacts rated 10 amps at 115 volts AC or 32 VDC resistive load.
- Easy mounting with clearance holes for six #6-32 screws.
- Rugged hinge pin armature for long life and stability of operation.
- Weight: 6½ oz. approx.



class 88LCP enclosed plug-in latching relays — 4 PDT 10 amp

AC or DC operation.

- Size: 2⅜ x 1¾ x 3 1/16"
- Enclosure: Crackproof, see-through plastic dust cover.
- Mounting: 20-pin octal style plug mates with std. amphenol 77-MIP-20 socket.
- Weight: 8 oz. approx.

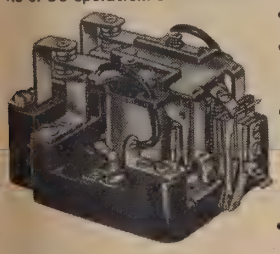


class 88HP hermetically sealed plug-in relay

AC or DC operation — DPDT or 3PDT — 10 amps.

- Size: 2 1/32 x 1 1/16 dia.
- Hermetically sealed to afford maximum protection against severe ambient conditions.
- Silver alloy contacts, gold-flashed, rated 10 amps at 115 volts AC or 32 volts DC, resistive load.
- Mounting: Standard 8 or 11-pin octal style plug.
- Weight: 5 oz. approx.

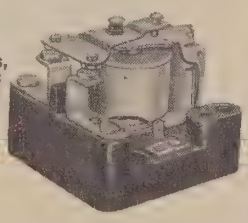
class 99 heavy duty power relays, UL listed



AC or DC operation — 25 amps 1 HP.
SPDT, DPST-NO, and DPDT.

- Size: SPDT — 2½ x 2½ x 2 3/16", DPST-NO — 2½ x 2½ x 2⅜", DPDT — 3 3/16 x 2½ x 2⅜"
- Oversize silver alloy, gold-flashed contacts, rated at 25 amps at 115 VAC or 32 VDC, resistive load, or 1 HP, AC.
- Heavy duty hinge-pin armature for long life and stability of operation. Screw type terminals and molded phenolic base.
- Easy mounting: Two 7/32" diameter clearance holes on 1⅞" centers.

class 99/power relay with aux. contacts



AC or DC operation. DPDT with SPDT Aux. contacts.

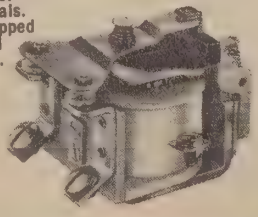
- Size: 4 3/32 x 2½ x 2⅜"
- Basic Class 99 Relay, equipped w/SPDT Auxiliary Contacts.
- DPDT power contacts rated 25 amps or 1 HP, SPDT auxiliary contacts rated 5 amps at 115 VAC or 32 VDC
- Screw type terminals.

class 99D power relay

50 amps — SPST-NO-DM — 2 HP.

- Size: 2½ x 2½ x 2 3/32"
- AC or DC operation
- Oversize silver alloy, gold-flashed, contacts, rated at 50 amps at 115 VAC or 32 VDC resistive load, or 2 HP.

class 99S space saver power relay



25 amps — SPDT — 1 HP.

- Size: 2⅞ x 2 x 1 15/16"
- Power switching in small space.
- One #6-32 tapped mtg. hole and locating boss.
- AC or DC operation.
- Screw terminals.
- SPDT silver alloy, gold-flashed, contacts rated at 25 amps or 1 HP.

class 99SD space saver power relay

50 amps — SPST-NO-DM — 2 HP.

- Size: 2½ x 2 x 1 15/16"
- 50 amp switching in small space.
- Screw terminals.
- One #6-32 tapped mtg. hole and locating boss.
- AC or DC operation.

*Resistance Values ±10% at 25°C.
†Voltage Specified Relays pull in at 80% of nominal or less for DC relays and 85% of nominal or less for AC relays at 25°C.

Magnecraft® telephone type relays

IN STOCK FOR IMMEDIATE DELIVERY

class 33

Sub-miniature 1/16 x 1¼ x 1¼"

- DPDT — 4PDT, 3 amp contacts.
- Hinge pin assures long life.
- Telephone type switching versatility.
- Fast operate and release time.
- Rigid mount — Four 4-40 mtg. holes.
- Weight: 1 oz.

class 33HS

Miniature Hermetically Sealed
Hermetically Sealed to Afford Maximum Protection Against Severe Ambient Conditions.

- Size: 31/32 x 1 11/32 x 1 41/64"
- DPDT — 4PDT 5 amp contacts.
- Telephone versatility and reliability.
- High resistance to shock and vibration.
- Widely used in military and civilian equipment.
- #4-40 3 stud mtg. — 8 or 14 pin solder terminal header.
- Weight: 3 oz.

IN STOCK FOR IMMEDIATE DELIVERY

class 128

- Size: 2 7/8 x 2 5/8 x 1 7/16"
- SPDT RF switching silver alloy contacts.
- Rated 100 watts of RF power.
- Impedance matched to 50 ohms cable.
- Equipped with std. UHF connectors.
- VSWR 1.25: 1 max. from 0 to 500 MC.
- Operate Time: 25 ms. max.
- Long life hinge pin construction.
- Coaxial cavity, machined brass, with removable plug, for contact inspection.
- AC or DC operation.
- Release Time: 25 ms. max.
- 4-40 thd. — 4 mtg. holes.

Magnecraft® miniature dry reed relays

IN STOCK FOR IMMEDIATE DELIVERY

class 101M & 104M

Miniature 1 x ½ x 7/16"

- 101M — SPST-NO — 10 VA @ .05 amp.
- 104M — SPDT — 3 VA @ .25 amp.
- In-line axial lead.
- Molded bobbin.
- Nom. Power: 101M, 600 MW 104M, 500 MW.
- Life: 10 x 10⁶ at rated load.
- Weight: 1 oz. approx.

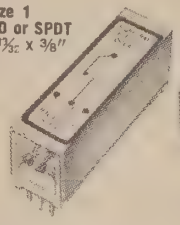
class 101EP & 104EP

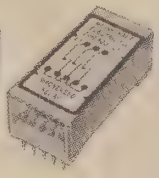
Miniature 1 x 7/16" dia.

- 101EP — SPST-NO — 10 VA @ .5 amp.
- 104EP — SPDT — 3 VA @ .25 amp.
- In-line axial lead.
- Encapsulated.
- Nom. Power: 600 MW.
- Life: 10 x 10⁶ at rated load.
- Weight: 1 oz. approx.

class 101PC & 104PC

Size 1
SPST-NO or SPDT
1½ x ½ x 7/16"





Size 2
DPST-NO or DPDT
1½ x 1 1/16 x 9/16"

- 101PC — 10 VA @ .5 amp.
- SPST-NO — DPST-NO.
- 104PC — 3 VA @ .25 amp.
- SPDT, DPDT.
- Encapsulated — Printed circuit mtg.
- Nom. Power: Size 1: 600 MW Size 2: 900 MW.
- Life: 10 x 10⁶ at rated load.
- Weight: 1 oz. approx.

class 101MPC & 104MPC

Size 1
SPST-NO or SPDT
1⅛ x 13/32 x ⅜"

Size 2
3PST-NO or DPDT
1⅛ x 3 3/64 x ⅜"

- 101MPC — 10 VA @ .5 amp.
- SPST-NO or 3PST-NO.
- 104MPC — 3 VA @ .25 amp.
- SPDT or DPDT.
- Printed circuit mtg. — Low profile.
- Nom. Power: Size 1: 500 MW Size 2: 700MW.
- Life: 10 x 10⁶ at rated load.
- Weight: Size 1: 1 oz. Size 2: 2 oz. approx.

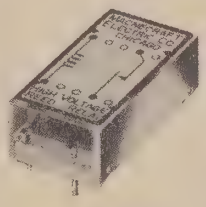
Magnecraft® high voltage reed relays

IN STOCK FOR IMMEDIATE DELIVERY



class 101VM

Miniature
1 x ½ x 7/16"

1,000 volts Peak @
.001 amp.
SPST-NO — Hi-Voltage.
In-Line Axial Leads.
Molded Bobbin.
Nom. Power 600 MW.
Life: 1 x 10⁶ at rated load.
Weight: 1 oz. approx.

class 101VMPC

1,000 volts Peak @ .001 amp.
SPST-NO — Hi-Voltage.
Printed Circuit Mtg. —
Low Profile.
Nom. Power: 700 MW.
Life: 1 x 10⁶
at rated load.
Weight: 2 oz. approx.

Miniature
1⅛ x 3¾ x 3/8"

class 102V

Small
4½ x 1 5/16 x 7/8"

5,000 volts Peak or 50 VA @ 3 amp.
SPST-NO or SPST-NC.
Solder Terminals.
Nom. Power: SPST-NO — 500 MW, SPST-NC — 225 MW.
Life: 10 x 10⁶ at rated load.
Weight: 3 oz. approx.

class 102HV & 102UHV

Molded Case — Encapsulated.
102HV — 10,000 volts Peak
@ .001 amp.
102UHV — 20,000 volts Peak
@ .001 amp.
SPST-NO — Hi-Voltage.
102HV Solder Terminals —
102UHV 6" Coil Leads.
Nom. Power: 1.5 W.
Life: 1 x 10⁶ at rated load.
Weight: 2 oz. approx.

Small
4½ x 7/8 x ¾"

Magnecraft® time delay relays and switches

IN STOCK FOR IMMEDIATE DELIVERY

air dashpot time delay relay

CLASS 112C

Size 3¾6 x 4¾6 x 1¾4"

- DPDT 10 amp output contacts.
- ±10% repeat accuracy.
- Adjustable delay 1 to 150 sec.
- Mounting: Two 3/16" holes on 3" centers.
- Air dashpot delay mechanism.
- Weight: 20 oz. approx.

CLASS 113C

Size 3⅝ x 2¼6 x 1³²⁄₃₂"

- SPDT 10 amp output contacts.
- Manually operated.
- Push button . . . release bottom . . . time delay is on adjustable delay 1 to 180 sec.
- Weight: 8 oz. approx.

CLASS 112M
±10% Repeat Accuracy

Size 4½ x 4½2 x 1½"

- DPDT 10 amp output contacts.
- ±10% repeat accuracy.
- Adjustable delay 1 to 150 sec.
- Mounting: Six 3/16" holes ½" x 4⅛" centers.
- Air dashpot delay mechanism
- Weight: 14 oz. approx.

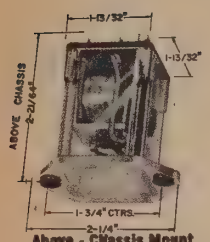
OHMITE general purpose relays

MODEL GPR — INDICATOR, PLATE, THYRATRON AND LATCHING VERSIONS IN UNENCLOSED AND ENCLOSED TYPES

Simple, rugged, low cost relays handling substantial power for small size. Uncomplicated design provides unusual flexibility for making and changing connections and mounting. Stock includes relays in versatile enclosures, some with indicator light, a plate, thyratron and latching versions. Wide commercial a industrial use where economy and versatility are important.

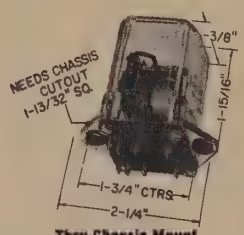
GPR
3-Pole

GPR
4-Pole



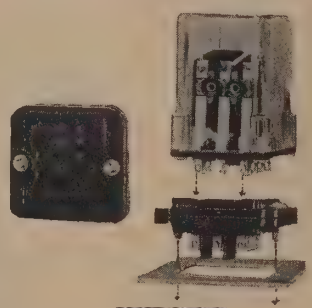
UNENCLOSED RELAYS

Basic (Unenclosed) Relay: All connections terminate on barrier-type terminal panel on combination solder — quick-connect (push-on) lugs which accept AMP 110 female connectors. The terminal panel is conveniently incorporated into printed circuit boards. Fixed contacts are integral inlay on terminal itself. Normally furnished with a 6-32 x ½" mounting stud and non-turn boss (or lug for 4-pole relays). A 6-32 threaded hole is optional. Unenclosed relays can also be mounted by plugging their panels into Ohmite SOG sockets. See "Socket" below.

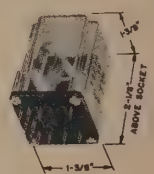


Contact Ratings: Two ratings — fine sil contacts, 5 amps at 115 VAC or 32 VDC sistive; silver-cadmium contacts, 10 am

Insulation: Tested at 1500 VAC.



Coil Wattage: 1.4 watts DC operation; watts (2.0 volt-amps) AC except 2.4 wa (3.70 volt-amps) for 4-pole AC and AC lat ing relays.



Above - Chassis Mount
GPRTA

Thru-Chassis Mount
GPRTT

SOGPR Sockets

For Socket Mount
GPRTS

For Octal Plug
GPRTP

ENCLOSED RELAYS

(GPRTA-, GPRTT-, GPRTS-, GPRTP-)
Four types of clear plastic enclosures as follows:

Chassis Mounting Types: "GPRTA"—("Terminals-Above-Chassis" type) has terminal panel opposite to mounting flange; "GPRTT" —("Terminals-Through-Chassis" type) has terminal panel on same end as mounting flange, requires chassis cutout; "GPRTS" type (Terminals for Socket Use) is similar to GPRTT but has no mounting flanges. It is intended strictly for plug-in mounting in Ohmite socket "SOGPR" (see "Socket" below).

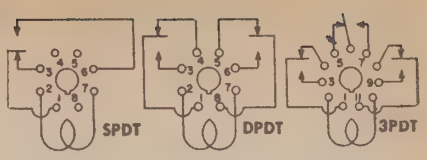
Plug Base Type: "GPRTP" — employs octal plug for 1 and 2 pole relays; 11-pin plug for 3-pole. The octal plug base is integral with relay for rigidity — is designed with recessed pins which meet UL spacing requirements (150V).

Socket (SOGPR): Unique socket fits the terminal panels of all GPR relays and provides over-the-surface spacing to meet UL requirements for 150 volts. Requires chassis cut-out to mount. Hold down springs (see illustration) for unenclosed and enclosed relays, are provided with each socket but are not required except under conditions of vibration or shock. Socket solder terminals will also accept AMP 11 quick-connectors. See socket listings.

SOCKETS FOR GPR, GPRTS RELAYS

For up to 3PDT: 1¾" square, requires 1¼" x 1½" cutout.* 2 holes (for No. 6 screws) on 1⅜" centers.
Catalog No. SOGPR-9

For 4-pole models, 1¾" x 2", requires 1½" x 1½" cutout.* 2 holes (for No. 6 screws) on 1⅜" centers.
Catalog No. SOGPR-12



*Std. punches and dies from Ward Machinery Co., Chicago. No. 28, Style 22N, 1¼ x 1½, for SOGPR-9: No. 28, Style 14R, 1½ x 1½, for SOGPR-12

Indicator Relay: Incorporates light bulb to indicate energized condition of coil. Stocked only in GPRTP enclosures described in preceding. Neon bulb furnished with coil ratings 70 volts and above; incandescent bulbs for coil ratings below 70 volts.

UL & CSA Approval: Column heads in the stock tables carry the UL (Underwriters' Laboratories) or CSA symbol (Canadian Standards Association) where applicable. The gray tint in the column indicates the relays are recognized under the "UL components program." The acceptability of such relays by UL depends upon their combination with other equipment such as sockets etc.

OHMITE general purpose relays

Thyratron Plate Relay: Designed specifically for plate circuit of thyratron tubes 2050 and 2D21 with 115 VAC supply (see diagram). Also suitable for operation in series with silicon controlled rectifiers from a 115 VAC supply. Ready to work, no capacitors or adjustments required, no chatter. Available unenclosed and in most GPR enclosures.

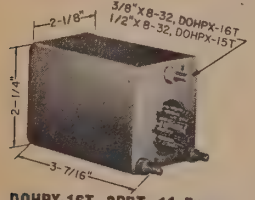
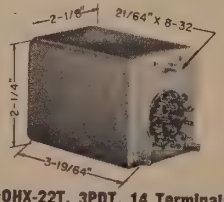
MODEL DO RELAYS AC or DC

Particularly adaptable to aircraft and mobile equipment applications where severe shock and vibration are encountered. Design of molded parts around contact arms protects against mechanical injury. Stocked in 3-pole or 4-pole type, and also in hermetic enclosures and in latching types.



Coil Wattage: 3.00 watts, DC operation; 6.00 watts, 60 cycle AC. Maximum temperature rise 45°C, DC operation; 75°C, AC.
Coil Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycle. Stock voltages in table.
Contacts: 10 amps nominal. Ratings are for 115 VAC or 32 VDC, resistive load.
Weight: Unenclosed 3-pole, 5 oz.; 4-pole, 6 oz.



DO RELAYS IN HERMETIC ENCLOSURES

Stock DO relays with 115 volt coil in hermetically sealed metal enclosures, filled with dry nitrogen. Enclosures provide protection for relay under most adverse ambient conditions. Both 3 and 4-pole DO relays are supplied in these enclosures with plug (DOHPX-) or solder terminal (DOHX-) connectors as illustrated. See listings in stock table above.
Weights: 3-pole hermetic relay approx. 14 oz.; 4-pole approx. 15 oz.

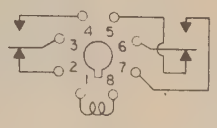
OHMITE general purpose relays

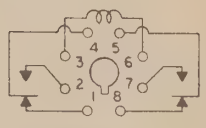
MODEL DOS RELAYS AC or DC

Wide application, general purpose relay, compact and lightweight. Handles loads usually demanded of much larger relays. Meets rigorous aircraft relay standards.



Coil Wattage: 2.5 watts, DC operation; 3 watts, 60 cycle AC. Maximum temperature rise 45°C, DC operation; 65°C, AC.

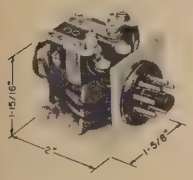
Coil Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycles. Table lists stock voltages.



Contacts: 15 amps nominal. Rating is for 115 VAC or 32 VDC, resistive load.

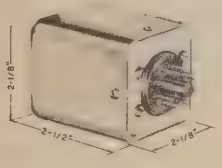
Weight: Unenclosed, 4 ounces.

WIRING FOR PLUG-BASE STOCK DOS RELAYS



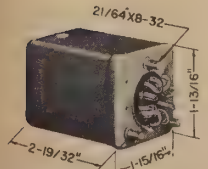
DOS RELAYS WITH PLUG-BASE OR IN DUST-TIGHT OR HERMETIC ENCLOSURES

DOS relays with 115 volt AC coils are available from stock with a standard octal plug base, unenclosed (DOSPX-1T) or with an octal plug base and drawn aluminum, removable dust-tight enclosure (DOSEPX-5T).



Weights: 8 oz. each.

Hermetically Sealed non-removable enclosures, filled with dry nitrogen, are also available to provide protection under adverse ambient conditions. DOS relays with 115 volt AC or DC coils are provided in these enclosures with either octal plug (DOSHPX-) or solder-terminal (DOSHX-) connectors as illustrated. See listings and prices in DOS stock table.



Weights: 8 oz. each approx.

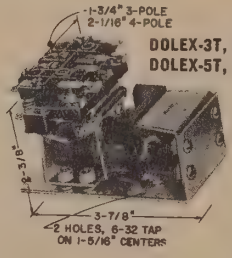
OHMITE latching relays

Enclosed Latching Relay (GPRLETP)

6PDT Latching Relay (GPRLE)



Latching Relay: Consists of two GPR relays with armatures linked so that the n.o. contacts of one are mechanically latched in closed position when, and after, this relay is energized. When 2nd relay is energized, first relay restores and latches 2nd. Permits switching of twice the number of circuits and holding without coil current. Unenclosed type "GPRLE." Enclosed type "GPRLETP" in clear plastic case with Jones plug P-324-SB fitting S-324-AB socket.

STOCK GPR LATCHING RELAYS — 5 AMP CONTACTS

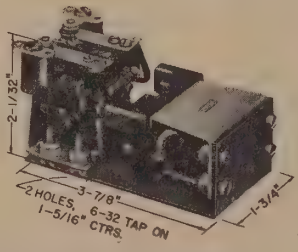
*Column heads carry symbols to indicate UL or CSA (Canadian Standar Assn.) approval. The gray tint indicates that relay is recognized under t "components program" (File No. E33069, Guide No. 380W1.14C, Assig ment No. 62C3559A). CSA File No. is 21309. See explanation in "UL a CSA Approval."

MODEL DO LATCHING RELAY (DOLEX-)

Consists of Model DO relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset co is pulsed. Permits "holding" of circui without continuous coil current. Coi of stock units (both relays and res coils) are 115 VAC. Available with or 4-pole DO relays



Weights: 3-pole — 16.5 oz.; 4-pole — 17 oz.

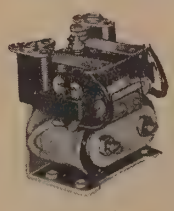
LATCHING TYPE

Catalog No.[1]	Type	Volts	Coil Data † Amps	DC Ohms
DOLEX-3T	3PDT	115VAC	.110	145.0
DOLEX-5T	4PDT	115VAC	.110	145.0

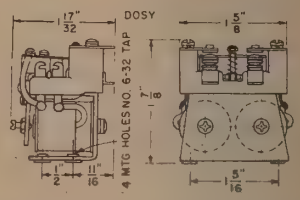
†Coil data applies to relay part of latching assembly. Reset magnet operates 115VAC, 60 cycle also.

MODEL DOS LATCHING RELAY (DOSLEX-)

Consists of Model DOS relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset coil is pulsed. Permits "holding" of circuits without continuous coil current. Coils of stock units (both relay and reset magnet) are 115VAC.



Weight: 14.2 oz.



LATCHING TYPE

Catalog No.[1]	Type	Volts	Coil Data Amps †	DC Ohms
DOSLEX-1T	DPDT	115VAC	.043	450

†Coil data applies to relay part of latching assembly. Reset magnet operates on 115 VAC, 60 cycle also.

MODEL DOSY RELAY FOR PLATE CIRCUITS

Similar in construction to Model DOS relay but equipped with twin coils for increase sensitivity. The DOSY relay is adaptable to a wide range of electronic control appli cations such as plate circuit controls, or as overload or underload controls in D.C circuits to signal attainment of predetermined current levels.

Coil Wattage: 1.00 watt, with maximum temperature rise of 45°C. Lower wattages available.

Contacts: Stock combinations as listed. Ratings are for 115 VAC or 32 VDC, resistive load.

Weight: Approximately 4½ ounces.

Catalog No.[1]	Type	Coil Data DC Ohms	Max. Pull-in Current	Contact Amps

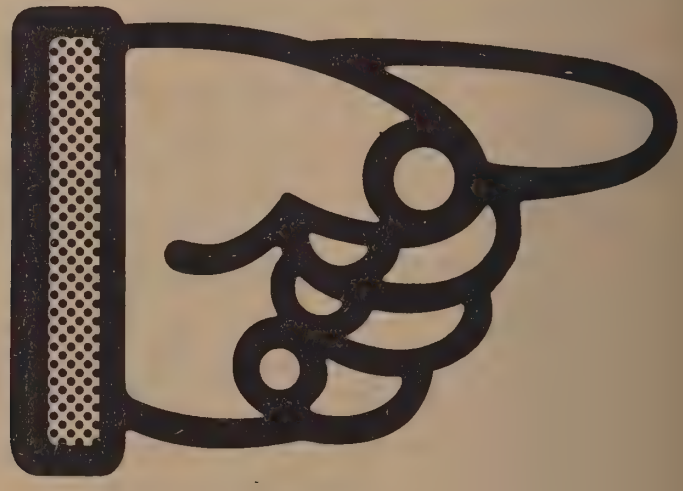
It's so easy to order from this catalog...

When ordering products shown in this book or writing for additional information, please be sure to specify:



1. **The Year and Edition of This MASTER.**
2. **Manufacturer's Catalog Numbers and Page Numbers.**

This will avoid confusion and expedite delivery.

Thank you!

The RADIO-ELECTRONIC MASTER
A United Technical Publication

Pass the inventory buck

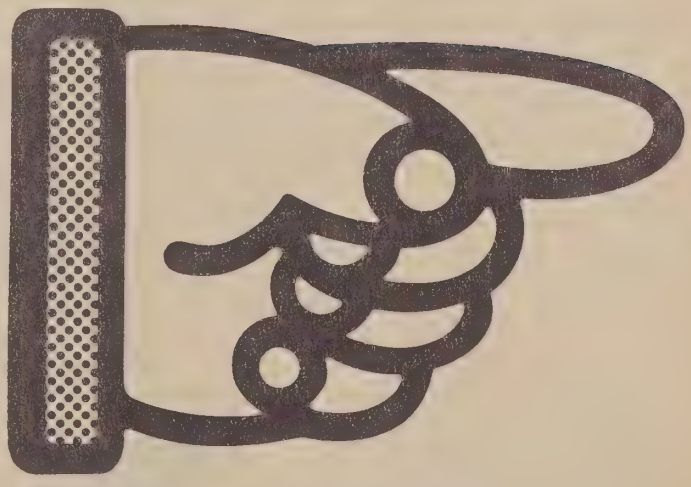
© United Technical Publicatio

The brass has passed the word about inventories, right? Cut down. Tight money and stratospheric interest rates—you know the story.

Cut inventories . . . but don't run out! That's the dilemma. A knotty problem.

Perhaps this suggestion will offer you a partial solution: Let a distributor carry your inventory of electronic parts. Here is how it works:

You need 100 Potter & Brumfield relays a week to meet production schedules. You normally order a six months' supply, 2,600. Freight, cost of possession, warehousing—all must be added to the initial cost of the components.



Now, instead of placing an order with the factory, you order from an Authorized P&B Distributor. He'll have 100 relays on your receiving dock every Tuesday. Or any other day you specify. Every week.

No freight to pay. No warehousing costs. No cost of possessing a big inventory of relays. Your product lines are protected.

Makes sense?

Give it a try. And remember, when you specify P&B relays, you select from the greatest number of standard relays in the industry. More types, more variations. Best of all, your P&B distributor will stock 'em for you.

The brass will be proud of you.

The P&B relays on the following **23 pages** are all available off the shelf from your P&B distributor. But, if you don't see what you want . . . ask him.

GA SERIES Low cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, pierced solder type terminals. Contacts: Silver, designed for maximum self-cleaning action. Mounting: No. 8-32 tapped core with locating boss. Weight: 3½ ozs.

See GF Series for similar relays having 10 amp ratings.

HP SERIES This commercial miniature relay is recommended for applications requiring high reliability in minimum space, such as TV cameras, dictating machines, desk top computers, copying machines and others. For circuit board or socket mounting and encased in a nylon heat-sealed (non hermetic) cover, the HP is a half crystal case size relay with terminals on a .200" grid. Weight: .3 oz.

9HP1 solder terminal socket and retainer for HP relay.
Box of 10 **Net $4.75**

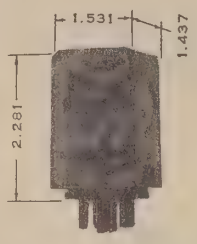
POTTER & BRUMFIELD RELAYS

KA AND KAP SERIES Small, low cost, highly efficient general purpose relays for handling light power loads such as small motors, solenoids and other relays, and general automation work. All KA and KAP relays with "Y" suffix bear CSA listing (File No. LR-15734) and carry U/L component recognition (File No. E22575). Mechanical life expectancy: 10 million operations. Duty: Continuous. Contacts: Movable, Gold-flashed silver; stationary, Silver overlay.

The KA is the open version of this series. Mounting: One No. 6-32 threaded stud and locating tab on .438 centers. Wt: 2 ozs. The KAP is the enclosed model and is protected by a clear polycarbonate dust cover. Terminals: 8 or 11-pin plug. Weight: 3 ozs.



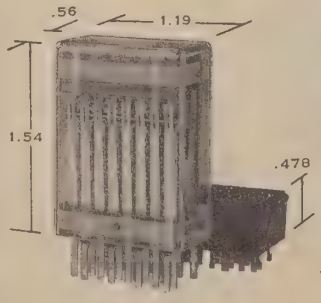
"G" suffix indicates silver-cadmium oxide contacts on movable rated 10 amps.

KAP5

KAP11

KAP14

HOLD DOWN SPRINGS
Designed to insure secure mounting of relays in any position. Will accommodate machine screws or rivets.



For KAP relays: (shown above)
KA1 50 per box **NET $5.80**
For KCP and KRP relays (pages 10 and 5)
KR15 50 per box **NET $5.80**
For KUP plain case relays (page 6)
KU3 50 per box **NET $5.25**

KDP SERIES This compact, general purpose DPC relay offers 8 Form C (8PDT) switching with bifurcated gold over silver contacts rated 1 amp @ 30V DC, resistive, or 0.5 amp @ 120V AC. Designed for dense packaging applications, the KDP provides electrical isolation on both the input and switching sides. Operate speed is 15 milliseconds @ nominal voltage @ 25°C. Mechanical life expectancy: in excess of 10 million operations. Duty: Continuous. Enclosure: Clear polycarbonate dust cover. Mounting: Solder terminal sockets with snap-lock spring for front insertion into chassis or panel. Approximate weight without socket: 1.3 ozs.

KD2 Solder terminal sockets

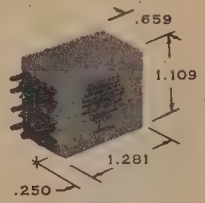
POTTER & BRUMFIELD RELAYS

KHU/KHP/KHS SERIES Small, rugged, 4PDT available for AC or DC operation. Only KHU relays are recognized under the Component Program of Underwriters' Laboratories, Inc. KHU has clear polycarbonate and KHP has nylon dust cover; KHS is hermetically sealed in metal enclosure. These relays are designed to meet the exacting requirements of data processing, computer and process control applications. Contacts are gold-flashed silver rated 3 amps @ 30V DC or 120V AC, resistive, for 100,000 operations. "12" suffix indicates silver-cadmium oxide contacts. Mounting: Solder terminals with a No. 3-48 stud .312" long. Adaptable to sockets (below) with printed circuit or solder lug terminals. Weights without sockets; KHU or KHP 1⅛ ozs.; KHS 1⅝ ozs.

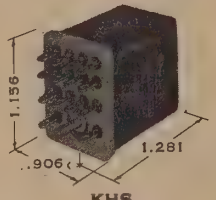
KHU/KHP hold down spring (similar to KCP-KRP shown on page 3).

9KH3 50 per box, weight 3 ozs. **Net $5.50**



9KH1 Solder terminal sockets and retainers, **Box of 10 Net $6.60**

9KH2 Printed circuit terminal sockets, **Box of 10 Net $6.60**



Weight per box, 4 ozs.

SPECIFY COIL VOLTAGE OR RESISTANCE WHEN ORDERING

KL SERIES 4PDT relay has high dielectric phenolic insulation and affords broad versatility and utility. Widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Contacts rated 5 amperes @ 120 volts AC, 50/60 Hz resistive are available. Mounting: All models — two No. 6-32 tapped holes on 1.438" centers. Weight: 5 ozs.

KLT SERIES relays are designed for DC applications that require sensitive coils to operate in transistor circuits. Contact arrangements to 3PDT are rated 3 amperes at 120 volts AC, 50/60 Hz resistive. Coils are designed for continuous duty @ 6 Watts @ +25° on open types. Expected life is 10 million mechanical operations. Mounting: Same as KL Series. Weight: Approximately 4 ozs.

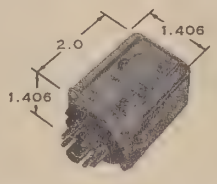
OTTER & BRUMFIELD RELAYS

KR3-H SERIES Ruggedly constructed but of mall size, KR3-H is a heavy duty relay especially esigned for applications where limited space is factor. Its heavy duty copper-alloy movable ontact carrier has twin silver-cadmium oxide ontacts rated 20 amps @ 120V AC 60 Hz, re-istive, or 28V DC; 1 HP 120/240V 60 Hz. Con-act arrangement is 1 Form X (SPST-NO-DB) nly. Terminals: suitable for .250" quick connect, lso solder; for contacts: solder only for coil. ize: 1.6" x 1.671" x 1.52". Seated height: 1.21". Mounting: One No. 6-32 stud and locating tab n .437" center. Weight: 2 ozs.



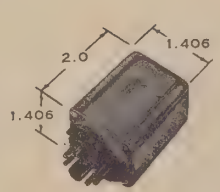
RP3-H SERIES All electrical specifications sted above for the KR3-H series relays apply to he KRP3-H. However, the KRP3-H is enclosed a clear polycarbonate dust cover and features n octal plug-in base. Weight: Approximately 3 zs.

KRP3AH

RP SERIES Versatile, multi-contact arrange-ent. Enclosed in a clear polycarbonate dust over. Standard 8-pin octal-type plug for KRP5 nd KRP11, 11-pin for KRP-14. Weight: Approx. ozs. Contacts: 5 amp, Gold flashed silver, 10 mp silver-cadmium oxide. See KCP-KRP hold own spring for special mounting applications. ee KRP-N indicator lamp relay for current onitoring applications.

KRP5 KRP11 KRP14

RP-N INDICATOR AMP RELAY A general purpose relay incorpo-ating a lamp to indicate current or voltage availa-ility in power circuit. Contacts: Silver-cadmium xide. Enclosures: Clear, polycarbonate dust over. Mounting: Standard octal plug.



Veight: Approx. 3 ozs.

Hold down spring (Please see Page 3).

P"—CASE A clear polycarbonate case for ounting rectifiers, capacitors, resistors, or a mbination of these. Available with octal-type ug with 8 or 11-pins. Comes complete with four rews. Weight: .5 ozs. each. See KCP-KRP Hold own Spring for special mounting applications.

5D070 Case (8-pin plug)	**NET $.65**
5D072 Case (11-pin plug)	**NET $.80**

R10-E1 SERIES DC operated industrial relays provide sensitivity of 125 mw per pole. DPDT to 6PDT contact arrangements are available with three contact styles for 100 mA 2 amps or 5 amps. Operating temperature is −55°C to +72°C. U/L File No. 42810. Solder terminals, No. 3-48 stud or plug-in sockets are available for relay mounting (see sockets below). Wire retainer and pre-installed grounding provision included with sockets. R10-E1-Z SERIES has bifurcated low level contacts. "J" Sensitive Current Adjustment: 85 mw (DPDT); 175 mw (4PDT).

R10-E2 SERIES offers printed circuit board mounting without socket, no mounting stud. Weight: .8 to 1.4 ozs.

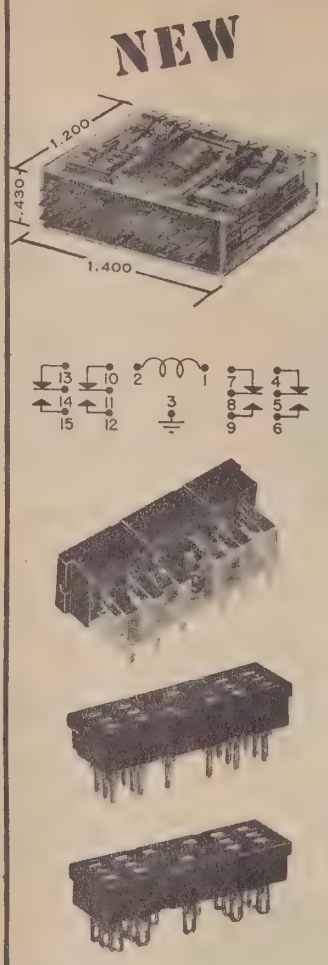
OTTER & BRUMFIELD RELAYS

40 SERIES SLIMLINE DC operated 4PDT lays are designed for printed circuit board use. ovide low profile—only .43" thick. Allows easy C board layout and .6" board mounting centers. vitching range is from true dry circuit to 5 mperes in a variety of contact styles. A wide nge of coil voltages offered. Pull-in power: 400 w.

40-E1 SERIES provides solder terminals or ug-in socket mounting. (See sockets below.) furcated contacts for low level applications ailable or with cross bar contacts for dry cir- it use.



40-E2 SERIES has printed circuit pins for verti- l mounting.

40-E3 SERIES is equipped for mounting flat a printed circuit board. Weight: .8 to 1.05 ozs.

XR40-1 Right angle sockets with printed circuit n terminals for R40 Slimline relays, retainers cluded,
ox of 10 **NET $13.50**

XR40-2 Vertical socket with printed circuit pin rminals for R40 Slimline relays, retainers cluded,
ox of 10 **NET $9.50**

XR40-3 Chassis mount socket with solder termi- als for R40 Slimline relays, retainers and ounting clip included,
ox of 10 **NET $10.00**

POTTER & BRUMFIELD RELAYS

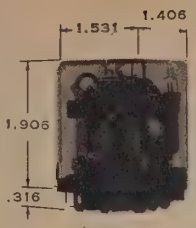
otter & Brumfield offers from its Parelco Opera- ons these reliable, high quality, general purpose lays and time delays for customer selection—

R10 DC OPERATED INDUSTRIAL SERIES • R12 DC TIME DELAY SERIES • R40 DC SLIMLINE SERIES

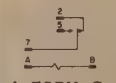
ORDERING INFORMATION

To select your relay:

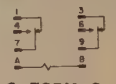
1. Decide on terminal type and mounting.
2. Select rating and contact arrangement.
3. Choose the proper coil resistance.
4. Pick a mating socket, if needed.



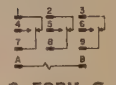
EXAMPLES:



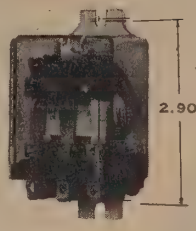
R10	**E1**	**Y4**	**V700**	**9XR10-2 Socket**
R10 Type Relay with Transparent Enclosure	Plug-in Solder Terminals and Mounting Stud	4 Form C Contacts Rated 2 Amps	700 ohm coil for 24V DC Operation or **J2.5K** Sensitive Current Adjustment	Chassis Mount Socket for a 4 Form C Relay
R12	**30**	**12**	**X2**	**E1**
R12 Time Delay (See listing on page 23.)	Time Delay Range 1-30 Seconds	Line Voltage 12V DC	5 amp Contacts 2 Form C	Solder Terminals Stud or Socket Mounting
R40	**E1**	**Z4**	**V200**	**9XR40-1 Socket**
R40 Slimline Series Relay	Plug-in Solder Terminals	.100 amp Contacts 4 Form C Bifurcated	200 Ohm Coil for 12V DC Operation	Right Angle Printed Circuit Socket



POTTER & BRUMFIELD RELAY



KUP SERIES This reliable 10-ampere relay for industrial control is available with a socket that is also rated 10 amperes. The .187″ terminals of the relay are of the quick-connect/solder type. Sockets are priced separately. The KUP is enclosed in a clear polycarbonate dust cover. Silver-cadmium oxide contacts assure long contact life. Operation: Continuous.



KUP SERIES with slotted flange case for direct-to-chassis mounting. Identical in both electrical and mechanical specifications as the KUP described above, except that they are not suitable for socket mounting. The .187″ terminals are of the quick-connect/solder type. Slot width: .156″. Weight: 3 ozs. All models are recognized under the Component Program of Underwriters' Laboratories, Inc. (File No. E29244)

1 FORM C

2 FORM C

3 FORM C

9KU1 pierced solder terminal socket for KUP plain case relays. Rated 10 amperes; molded nylon. Two .165″ dia. mounting holes.

Box of 5 **NET $3.95**

9KU2 printed circuit pin terminal sockets for KUP relays. Will accept .187″ terminals of KUP in plain case. Molded nylon. Two .165″ dia. mounting holes.

Box of 5 **NET $4.75**

9KU3 Hold down spring (see page 3).

9KU4 Screw terminal socket for KUP plain case 2 Form C (2PDT) relay only. The nylon socket (accepts .187″ terminals) is riveted to the bakelite frame that provides screw terminals.

Box of 5 **NET $13.15**

9KU5 sockets with .187″ quick-connect terminals. Two .165″ dia. mounting holes.

Box of 5 **NET $6.30**

All sockets except 9KU5 are included in the U/L Component Recognition of the KUP relays.

9KU1
9KU2
9KU5

9KU4

SUITABLE FOR DPDT RELAY ONLY.

AB SERIES For appliance and general purpose applications where rugged construction, long life and quiet operation are required. All equipped with terminals to fit snap-on connectors and may be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models are recognized under the Component Program of U/L (File No. E29244) and are CSA listed (File No. LR-15734). Mounting: Two No. 8-32 tapped holes, on 1¼″ centers. Silver contacts. Weight: Approx. 5 ozs.

ABC SERIES Medium duty power relay with dust cover. For small motors, industrial control and similar applications. All equipped with terminals to fit snap-on connectors and may be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models are recognized under the Component Program of U/L (File No. E29244) and are CSA listed (File No. LR-15734). Mounting: One No. 8-32 threaded stud ⅜″ long and locating tab on .562″ centers. Contacts: Silver. Weight: Approx. 7 ozs.

GF SERIES Medium duty power relay for industrial control applications. Long contact arms have silver contacts rated at 10 amps at 120V AC or 28VDC, resistive. Contacts have excellent wipe or self-cleaning action. Tinned, pierced solder terminals. Mounting: 8-32 tapped core with locating boss. Weight: 4.75 ozs. (See GA series on page 2 for similar voltage actuated relays.)

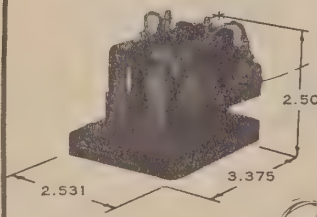
POTTER & BRUMFIELD RELAYS

MR SERIES A medium duty power relay that can handle small motors, transmitters, and general purpose applications. Mounting: Two .156" dia. holes on 2.250" centers for MR 3 and 11, 2.625" centers for MR 5 and 14. Contacts: Silver. Weight: 4 ozs.
MS/MR Metal dust cover similar to PM/PR shown below. Weight: 7.5 ozs.
5D130 fits MS/MR **NET $2.20**



PM SERIES A compact 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has silver-cadium oxide contacts rated at 25 amps at 240V, 50/60 Hz resistive AC, 1 HP per movable arm at 120V or 240V, AC single phase, U/L (File No. E22575) and CSA* listed, except 480V. Mounts by one front key-hole and two rear channel slots for 8-32 screws on 2" x 2.5" triangular centers. Weight: 4 ozs.

PM1 Adaptor plates for mounting PM on PR mounting holes.
Box of 10 **NET $1.75**
Enclosures for PM relay—see below.

PR SERIES Heavy duty relay for industrial control applications requiring long life and fast action. Heavy duty screw-type terminals. All AC and DC models except PR11AL5 carry U/L (File No. E22575) and CSA* listing. Mounting: Two .188" dia. holes on 1.875" centers. Weight: 1 ozs. max. Contacts: Silver. Enclosure: See "PR" cover. The PR11AL5 relay is equipped with silver SPDT auxiliary contacts rated at 5 amps.§

§Open only, auxiliary contact equipped relay will not fit inside cover.

PM AND PR DUST COVERS These dust covers have a sheet metal base with knockouts for .5" dia. conduit and an aluminum cover fitted with two screws. Finished in gray hammertone. Mounting: Three No. 10 holes on 1.875" x 4.125" centers. Approx. weight: 1 lb.

PM:
L: 5.313 MAX.
W: 3.812 MAX.
H: 3.812 MAX.

PR:
L: 5.312 MAX.
W: 3.175 MAX.
H: 3.125 MAX.

5D227 Metal cover for PM only **NET $3.45**
PM2 Plastic dust cover for PM only, box of 4 **NET $1.90**
5D013 Metal cover for PR only **NET $3.45**

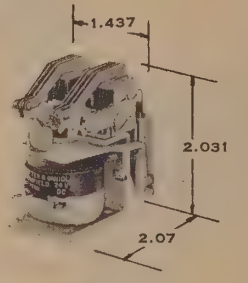
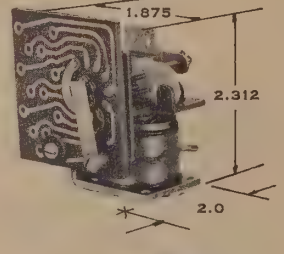
Canadian Standards Association File No. LR-15734

See ordering information on page 2.

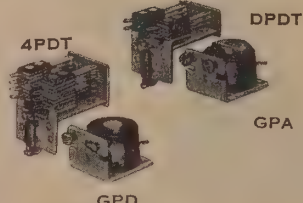


AP SERIES RATCHET, IMPULSE A reliable compact unit for applications requiring on-off or reversing action on alternate operations. Positive ratchet operation at all speeds on impulses as short as 60 ms. Intermittent operation only. Mounting: Three .156″ dia. holes on 3.375″ x .875″ triangular centers. Contacts: Silver. Weight: 7 ozs. Coils for intermittent duty only.

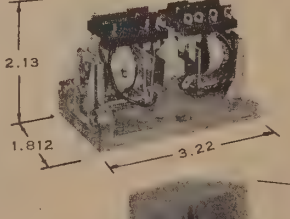


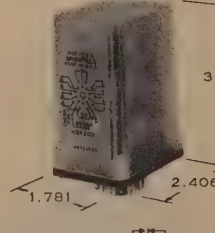
BU BUZZER AC operated coil with a spring steel armature which buzzes when coil is energized. Used extensively in test equipment, laboratories and a host of other applications where a small light weight, dependable buzzer is required. Recognized under the Component Program of Underwriters' Laboratories, Inc. (File No. S1154). Weight: 1⅝ ozs. Mounting: No. 6-32 tapped core.

GM SERIES Unusually versatile switching makes this impulse/sequencing relay especially suitable for single coil latching. The 2 Form C contact arrangement is switched alternately by cam action during drop-out of the armature. It can also be furnished with additional 2 Form C auxiliary contacts (designated by "L"). AC version operates on a 50% coil duty cycle (5 Min. max.). Mounting: 8-32 tapped core with locating boss. Weights: With aux. contacts 4¾ ozs. Without aux. contacts 4 ozs.



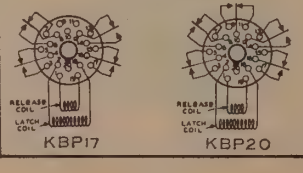
The **GM1N10** and **GM1N12** AC or DC use the basic GM structure with uni-directional printed circuit boards with 10 or 12-steps, respectively. The board is attached to an extension of the ratchet shaft. The movable contact arm advances one position each time the armature drops out. Contact rating: .25 amps. Contact arrangement: SP-10 pos. and SP-12 pos. Size: 2.312″ x 1.875″ x 2″.





GP SERIES Separate AC and DC coils to match with 2PDT or 4PDT switches. AC coils (GPA) available in 6, 12, 24, 120 and 240 volts. DC coils (GPD) available in 6, 12, 24 and 110 volts; current coils: 2,500, 5,000 and 10,000 ohms. Contacts: Silver.

GP11 Switch Assembly DPDT 5 amps **$2.00**
GP17 Switch Assembly 4PDT 5 amps **3.40**



KB SERIES LATCHING RELAY Both release and trip coils must be for the same voltage. One coil operates relay to set latch and other coil releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. Mounting: Two .156″ dia. holes on 1.375″ centers. Weight: 6 ozs. Contacts: Silver, rated 5 amps; "G" suffix indicates silver-cadium oxide contacts on movables rated 10 amps. AC relays with 5 amp. Contacts are recognized under Component Program of Underwriters' Laboratories, Inc. (File No. 29244) and are CSA* listed. AC coil for intermittent duty only.

KBP SERIES LATCHING RELAY Enclosed in a translucent polypropylene dust cover, the KBP is furnished with 20-pin octal-type plugs for socket mounting. Contact arrangements of 4PDT and 5PDT are available. Otherwise all specifications are identical to the KB series described above. U/L component recognition does not apply to the KBP series. Weight: 8 ozs.

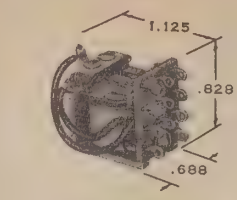
)OTTER & BRUMFIELD RELAYS

M SERIES Subminiature relay for applications quiring unusually small relays with up to 3- ›les. Contacts: Silver. Withstands 30g mechan- al shock and .06″ excursion 10 to 55 Hz echanical vibration. Used extensively in small ısiness machines, alarm systems, automatic toys d communications systems. Mounting: One 2- tapped core and locating .062″ dia. half-punch .187″ centers. Solder terminals. Weight: .58 ozs.

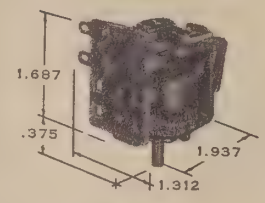
T SERIES ANTENNA SWITCHING RELAY lass base insulation for minimum RF loss to vitch 300 ohm line. Mounting: One No. 6-32 readed stud and locating tab on .438″ centers. ontacts: Gold-flashed silver. Weight: 1½ ozs.

UL SERIES Small, magnetic latching relay quiring approximately half the space needed r mechanical latching relays. Designed for ntinuous duty in applications demanding good emory stability, the KUL is ideal for machine ols, process controls and business machines. PDT or DPDT silver-cadmium oxide contacts e rated 10 amps @ 28V DC, resistive or 120V C, 80% P.F. Recognized under U/L Compo- nt Program, File No. E22575. All AC DPDT lays include diodes inside the clear polycar- nate dust cover. "S" suffix indicates single coil. eset on single coil relays is accomplished by versing voltage polarity. Mounting: Various amp rated nylon sockets available (see KU ckets page 8). Weight: 3.4 ozs.

KUL21 Hold down springs.

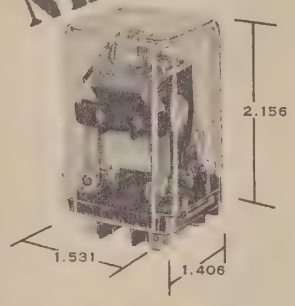


ox of 25 **NET $4.50**

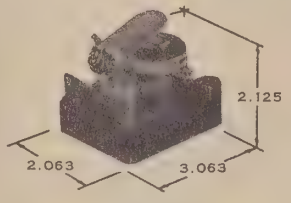


IS SERIES MOTOR STARTING RELAYS or starting capacitor start, induction-run motors. perates on back EMF of start winding. Arma- re gap can be altered to change pick-up. ecognized under Component Program of Un- erwriters' Laboratories, Inc. (File No. 29245). ounting: Two .156″ dia. holes on 1.563″ centers. ontacts: ¾ HP, fine silver; 3 HP, silver cad- ium. Weight: 5 ozs. max. MS/MR Metal dust ver similar to PM/PR shown on page 9. 3.625″ 2.375″ x 2.594″. Weight: 7.5 ozs.

D130 fits MS/MR **NET $2.20**



C SERIES Single coil impulse latching relay for -off and current reversal switching on alternate lses. Mounting: Two .156″ dia. holes on 2.625″ nters. Weight: 5 ozs. Contacts: Gold-flashed ver-cadmium oxide. Coils for intermittent duty ly.



A SERIES STEPPING SWITCH A twelve po- ion stepping relay with printed circuit strips to vitch currents up to 250 milliamps. Armature- iven pawl operates a ratchet wheel to drive the ovable contact in steps of 30 degrees over 12 sitions. Used widely for audio-level switching TV remote control units, scoreboards and ocess controls. Mounting: Two 6-32 holes on 313″ centers. Weight: 4 ozs. AC coil for inter- ttent duty only.

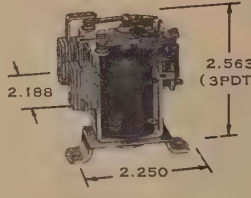
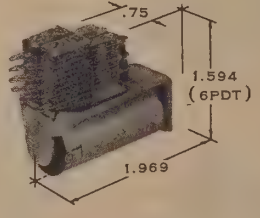
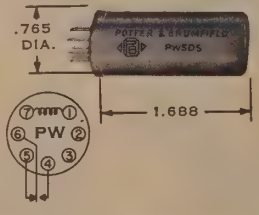
POTTER & BRUMFIELD RELAYS



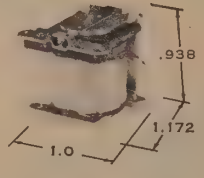
KCP SERIES Low cost sensitive relay enclosed in clear polycarbonate cover. Sensitivity 125 mw single pole; 250 mw double pole; 375 mw three pole. Mounting: Standard octal plug-in type. Eight pin for KCP5 and KCP11. Eleven pin for KCP14. Contacts: Gold-flashed silver. Weight: Approximately 3 ozs. Use KCP-KRP hold down spring when vibration is a factor or when using inverted or horizontal mounting. (See page 3.)



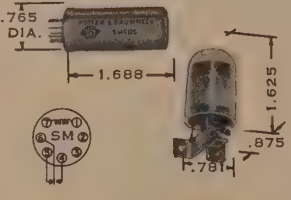
LB SERIES Designed for top performance, long life at an unusually low cost. Each coil is wound with a given coil resistance and factory adjusted to operate on minimum current requirements. Mounting: Two .188″ holes on 2.219″ centers. Contacts: Silver. Weight: Approximately 2 ozs.



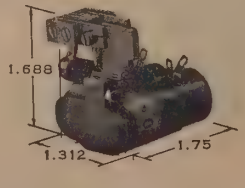
LM SERIES (See KL page 4 for similar voltage actuated relays.) Sensitivity: 100 milliwatts for single pole and 200 milliwatts for double pole. Medium cost, high quality relay with gold-flashed silver contacts. Pick-up adjustable by tail spring adjusting screw. Mounting: Two No. 6-32 tapped holes on 1.813″ centers. Weight: Approximately 5 ozs. DC Coils only.



ML SERIES A small telephone type relay having excellent sensitivity and outstanding switching capabilities. Ideal for transistorized computer networks, telephone systems and battery powered communications equipment. Single contact arms have gold-flashed silver contacts rated at 3 amps for 100,000 operations. Pierced solder terminals. Mounting: Four 3-48 holes on .375″ centers. Weight: 2.5 ozs.



PW SERIES (In both voltage and current actuated models.) Sensitivity: 40 mw for current actuated models, 180 mw for voltage actuated models. Precision, lightweight, hermetically sealed relay for aircraft and missile applications. Will withstand 10g vibration to 500 Hz. Mounting: Standard 7-pin miniature tube base. Weight: Approx. 1 oz.



RS SERIES (In both voltage and current actuated models.) 60 mw sensitivity. Low-cost, small, lightweight, sensitive relay for radio-sonde, light dimmer and model applications. Mounting: Two No. 4-40 tapped holes on diagonal .75″ x .625″ centers. Contacts: Bar palladium. Weight: 1½ ozs.

SM SERIES (In both voltage and current actuated models.) Sensitivity 75 mw for current actuated models. Medium cost, lightweight, dust cover (right) or hermetically sealed (left) relay for light contact loads found in computers, model airplanes and similar applications. Extremely long mechanical life because of reed armature. Mounting: Sealed, standard 7-pin miniature tube socket; dust cover, two .094″ dia. holes on .531″ centers. Contacts: Stationary silver; movable rhodium. Weight: 1 oz. max.

SS SERIES Ultra sensitive precision relay. 10 mw sensitivity. Dual series-connected coils with balanced armature on needle-point bearings for all low energy circuits such as instruments and bridge balancing. May also be used as a differential relay by connecting the two coils in separate circuits. Mounting: Two No. 6-32 tapped holes on .719″ centers. Contacts: Silver. Weight: Approx. 3½ ozs.

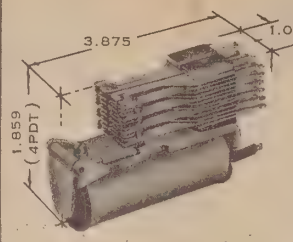
POTTER & BRUMFIELD RELAYS

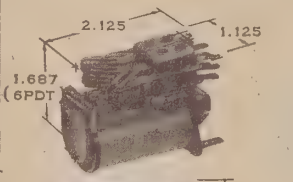
3S SERIES Long coil telephone type. Suited for computer and automatic test equipment applications requiring large numbers of poles. Tinned, pierced solder terminals for rear panel wiring. Mounting: Two No. 8-32 NC 2B tapped holes on .75" centers. Contact arms: Bifurcated with twin palladium contacts. Weight: Approximately 3 ozs.

3S DUST COVER Sheet metal enclosures for 3S relays up to 6 Form C (6PDT, BS23); measures: H: 2.188", W: 1.250", L: 3.844" exclusive .625" knob; weight: 6.5 ozs.
5D188 **NET $2.10**

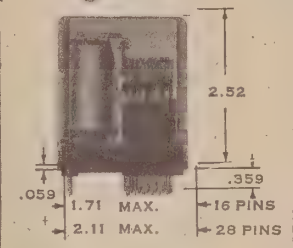
LS SERIES Short springs and lightweight armature provide fast action without sacrificing reliability and long life. Stainless steel hinge bearing designed to give 100 million operations. Tinned, pierced solder terminals. Mounting: Two No. 6-32 tapped holes on .75" centers. Bifurcated contact arms with twin palladium contacts. Weight: Approximately 4 ozs.



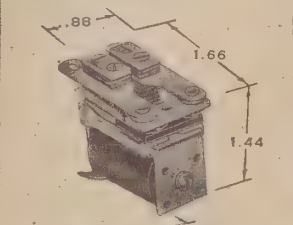
The LSP version has identical specifications as the LS, except that it is enclosed in a clear polycarbonate cover and is provided with a rectangular socket with combination taper tab or solder terminations. Enables plug-in like any other plug-in component. Two sizes of sockets and covers are available: 16-pin for 4 Form C (4PDT) or 28-pin for 6 Form C (6PDT). Dimensions: LSP17D: 1.71" x 1.39" x 2.52" seated; weight 4 ozs. LSP23D 2.11" x 1.39" x 2.52" seated; weight 5½ ozs.



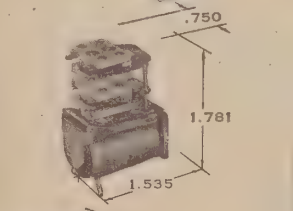
MB SERIES Miniature DC contactor. Designed for very high current applications. Extra rugged construction ensures long life. Contact arms: Stationary, heavy brass, silver contacts pierced solder terminals. Movable, silver bar contact. Mounting: Four No. 3-48 tapped holes on .375" x .375" centers. Weight: 2 ozs.



MC SERIES Built with ceramic contact spacer for RF switching to minimize losses at high frequencies. Intercontact capacitance 1.5 mmfd. max. Tinned, pierced solder type terminals. Mounting: Four No. 3-48 tapped holes on .375" x .375" centers. Contacts: palladium. Weight 2 ozs.



MG SERIES Sub-miniature telephone type relay can be furnished open, sealed or in nylon dust cover. Mounting: Open model has four No. 3-48 tapped holes on .375" x .375" centers. Sealed model has three No. 4-40 threaded studs on 1" x .50" centers. Dust cover model has plug-in header that fits Amphenol receptacle 57-20140 or similar. Contacts: Silver. Weight: Open 1.2 ozs.; Dust cover 2.0 ozs.; Sealed 2.75 ozs.



MH SERIES MINIATURE TYPE Ideal for applications where space and weight are factors. Mounting: Open model, MH11L, one No. 6-32 threaded stud .344" long plus locating boss. All other open models have four No. 3-48 holes on .375" x .375" centers. Sealed models, M enclosures, three 6-32 NC 2 threaded studs on 1.250" x .50" centers. D enclosures, three 6-32 threaded studs on 1.188" x .938" centers. All sealed models have hook solder terminals.
All models have gold-flashed silver contacts. Weight: Open models 2½ oz. max. Sealed models 5 ozs. max.

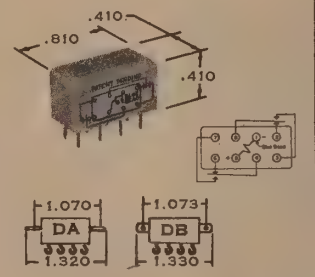
See ordering information on page 2.

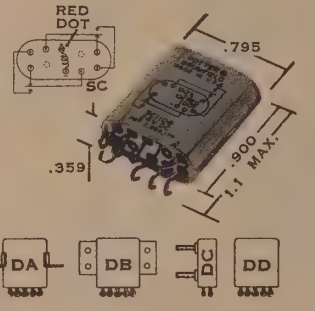
POTTER & BRUMFIELD RELAYS



FC SERIES Conventional miniature relay lies flat on printed circuit board. Withstands 150g shock, 400g linear acceleration, 30g vibration to 2000 Hz. Ambient temperature range: −65° to +125°C. Hermetically welded. Bifurcated contacts. Plugs in on .2″ grid. Meets applicable sections of MIL-R-5757E and MSFC-SPEC-339. Weight: .75 oz.

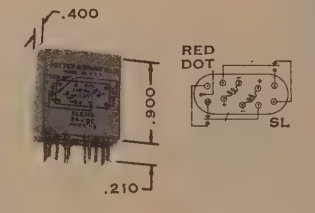
FL SERIES Dual-coil latching relay has same specs as above, except operates by pulsing each coil alternately (observing coil polarity); or connecting the coils in series from a reversing (polarized) source. Remains latched without coil power.

HC SERIES A miniature, non-polarized, non-latching half-size crystal case relay for high reliability performance. Its high-torque motor structure and bifurcated, gold-plated silver DPDT contacts, rated dry circuit to 2 amps @ 28V DC resistive, provide positive performance in low level applications. Temperature range: −65°C to +125°C. Hermetically welded. HC11D has plug-in, plain case; HC11DA has hook-end solder terminals and shoulder brackets; HC11DB has hook-end solder terminals and flat mounting plate with 2 holes. The HC series meets or exceeds all applicable sections of MIL-R-5757E, and complies with MSFC-SPEC-339. Size: Plain case .8″ x .4″ x .4″ (seated). Weight: .5 oz.



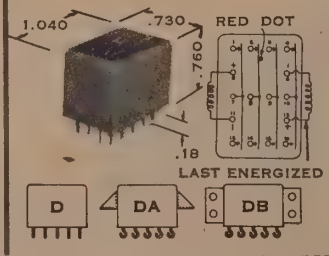
HCM SERIES Military version of miniature HC relay. Same rugged construction features. Hermetically sealed and vibration tested for use in demanding applications such as aircraft and ground support equipment. Meets or exceeds appropriate sections of MIL-R-5757E. Straight pins or hook solder terminals. Shoulder bracket available. HCM has same mountings as HC Series above. Weight: .5 oz.

NEW



SC SERIES Miniature permanent magnet relay for low power, high shock/vibration applications. 200g shock, 30g vibration to 2000 Hz with no contact opening. Ambient temperature range: −65°C to +125°C. Features single coil action and conforms to standard miniature coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Mounting: SC11D**, -DA, -DB, DC and DD correspond to similarly designed SL mountings. SCG11D has rectangular header with terminals on .2″ grid. Weight: ¾ oz.

**Armel No. HRK-1, 8-pin receptacles available from distributors for plug-in applications.



SL SERIES Dual coil miniature magnetic latching relay with same shock/vibration, resistance and ambient temperature range as SC. Coils may be connected in series for polar operation. Mounting: SL11D* for plug-in applications: -DA has shoulder flanges with two .104″ x .136″ holes on a 1.062″ center; -DB has a welded bracket with four .125″ dia. holes on 1.062″ x .281″ centers; -DC has two No. 4-40 NC 2A threaded studs on .488″ x .220″ diagonal centers; -DD has plain case with hook-end solder terminals. SLG11D has plug-in terminals on .2″ grid. Weight: 2 ozs.

*Armel No. HRKB-1, 10-pin receptacles available from distributors for plug-in applications.

TL SERIES High reliability 4PDT miniature magnetic latching relay for severe environments. Hermetically welded relay case. Strong permanent magnetic forces keep the contacts locked in desired position when relay is de-energized. Approx. 0.5 ms transfer time. Temperature range: −65° to +125°C. Meets or exceeds applicable sections MIL-R-5757E and MSFC-SPEC-339. Weight: Approx. 1¼ ozs. Mountings: D-plain case, plug-in header. DA=shoulder bracket. 300″ from base, hook-end solder. DB=flat plate, .593″ wide x 1.60″ long, 4 -.125″ dia. holes on .281″ x 1.30″ centers, hook-end solder.

MDP SERIES
SMALL POLARIZED RELAYS

- **Sensitive**
- **High Speed**
- **Bounce-Free**

For Bi-Stable or Center-Stable Operation

Small size, ultra-sensitivity and high speed switching together with efficient, bounce-free contact action characterize MDP polarized relays. Their operation depends on both the magnitude and direction of the coil current. Two types of contact arrangements provide the following action when the coils are de-energized: Bi-Stable—armature remains in its last energized position; Center-stable—armature remains in center-off position with contacts open. Contact materials as listed. Temperatures: −60°C to +85°C. Measuring only 1.500" sq. by 1.812" high (seated), MDP relays are equipped with a plastic dust cover and 8-pin plugs. Weight: 4¼ ozs.

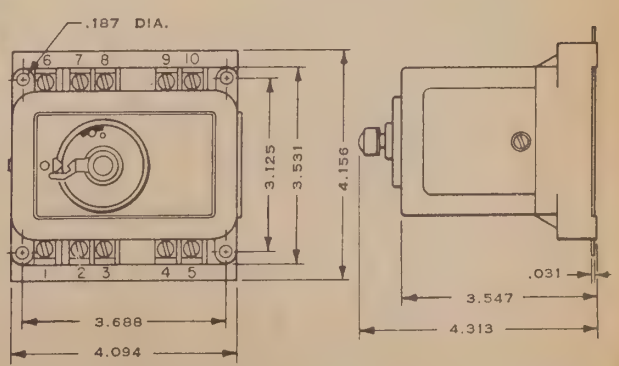
TM SERIES
TIME DELAY RELAYS AND AUTOMATIC RESET TIMERS

- **On Delay**
- **Interval**
- **Off Delay**

Built-in Accuracy and Dependability

TM series timers are available in a wide variety of timing and adjustability ranges. Three types of timing sequences: on delay, interval, and off delay are offered by Type TM-01, Type TM-11, and TM-21, respectively. They assure accurate timing control for motors, pumps, heating, air conditioning, vending machines, machine tools and many other types of equipment. They are easy to install as all internal timer components are connected to external terminals.



A self-lubricated 3-watt, 120V AC, 50/60Hz synchronous motor runs continuously and requires no shut-off switch. Switches are independent of the motor and can be wired to carry 120 to 600 volts AC—690 voltamperes pilot duty. Accuracy is plus or minus 1% of the total dial range. The minimum setting is two dial graduations, or two seconds of the 60 second range, or a setting of zero. If the application requires by-passing the timer, the timer may be set at zero and locked. To provide protection against dust and moisture, TM series timers have a durable, molded phenolic enclosure and base.

OUTLINE DIMENSIONS

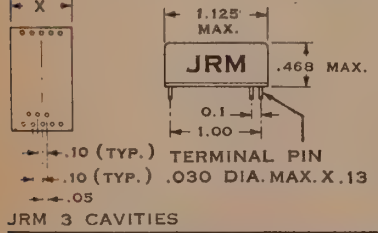
DRY REED

JR STANDARD / JRA LOW COST / JRM MINIATURE

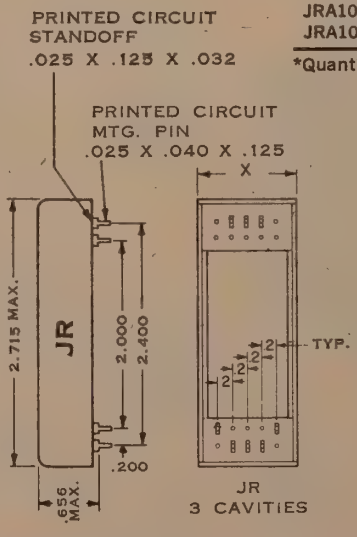
Fast response, reliable performance, high sensitivity and long life are characteristic of the JR Series dry reed relays. JR standard and JRM miniature relays are especially suited for data processing applications, computer equipment, logic circuitry and various other sophisticated control circuits. The JRA Series low cost relays are limited to applications where stray magnetic fields and interaction of coils will not interfere with their operation. Adequate spacing (not less than .75" separation) is recommended.

TWO TYPES OF CAPSULES

The JRA Series is available only in a Form A (SPST-NO) contact arrangement. Both JR and JRM relays have reed switches with either Form A (SPST-NO) or Form C (SPDT) contact configuration. Biasing with a permanent magnet changes Form A to a Form B (SPST-NC). This arrangement requires that coil polarity be observed. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized.



SPECIFICATIONS



Pick-up: 75% of nominal @ 25°C.
Typical Operate Time: At nominal voltage @ 25°C.: JR: 3 ms. JRA: 1.5 ms. JRM: 1 ms.
Release Time: At 25°C: JR:.5 ms. JRM: .05ms.
Coil Power: Based on nominal voltage and resistance.
JR: 1 capsule—240mw; 2 capsules—360mw; 3 capsules—720mw; 4 capsules—960mw; 5 capsules—1.5w. **JRA:** 1 capsule—550mw. **JRM:** 1 capsule—180mw; 2 capsules—275mw; 3 capsules—420mw; 4 capsules—540mw; 5 capsules—720mw. For additional specifications see columnar listings and drawings.

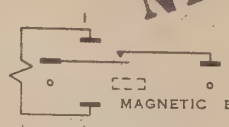
POTTER & BRUMFIELD RELAYS



DRY REED

JRL LATCHING

This bi-stable dry reed latching relay requires no coil current to maintain contact in either position. Reversing the polarity of the coil causes the contacts to transfer. Designed for reliable memory work, JRL latching relays mount on p.c. board and are not position sensitive. 1 Form A and 2 Form A contacts are rated 15 watts, resistive. Operate time at 25°C is 1.0 millisecond (including bounce). Weight: 2.0 ozs.

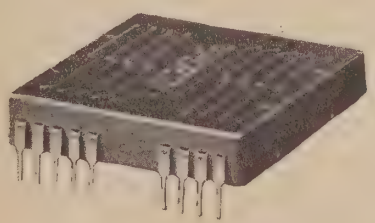
ORDERING INFORMATION
Select the desired nominal operating voltage and contact arrangement. Specify the corresponding P&B type number indicated under TYPE in the columnar listing.



JDT DUAL THIN-LINE

The low profile (only 0.275" max. height) JDT Dual Thin-Line reed relays are ideal for high density packaging applications. Hermetically sealed glass capsules are epoxy encapsulated in 4 pole (4100 Series) or 8 pole (8100 Series) configurations. Dual in-line terminals on .100" centers for p.c. board mounting are featured. Operate time is 3.5 milliseconds including bounce. Release time is 3.5 milliseconds maximum. Weight JDT 4100, ½ oz.; JDT 8100, ¾ oz.

JM SERIES
MERCURY-WETTED CONTACT RELAYS

Rare long life, high speed, and unvarying dependability—all are the result of the basic component of these relays: a hermetically sealed glass capsule. It contains the contact arrangement and a small reservoir of mercury sealed in a high pressure hydrogen atmosphere. A film of mercury is renewed for every operation—that's why you can think in terms of billions of operations without contact bounce, pits or welds.

TWO TYPES OF CAPSULES

The capsule used in JMF and JMF2 (with 2 capsules) modules and JML relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JMD, JMP, JMS and JM1 to JM4 relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML, JMP and JMS Series achieve a high rate of sensitivity by factory-adjusted magnet biasing.

All JM Series mercury-wetted contact relays except the JMF2 relays may be operated up to 5 times the Must Operate current shown in the columnar listings. The JMF2 may be operated up to a maximum voltage of twice the Suggested DC Voltage shown.

Mounting Position: Upright mounting required, but deviation from upright to 30° causes only minor deviation in operating characteristics.

CONTACT RATINGS

JMF, JMF2, JML and JMS: 500V max., and 2 amps max., 100VA max.* JMP, JMD and JM1 to JM4: 500V max., and 5 amps max., 250 VA max.

*With contact protection unless used in a low level circuit. Details of a simple protection circuit consisting of resistor and capacitor in series are packed with each relay.

JM SERIES ORDERING INFORMATION

EXAMPLE: ① JM ② P ③ 1600 — ④ 11

A JMP Series polarized, Form D, bridging, mercury wetted contact relay with an assigned 1160 coil and terminations as shown in Fig. 11.

① BASIC RELAY:
JM Series Mercury-wetted contacts

② TYPE:
F = PC module, Form C, Sensitive non-bridging
F2 = Dual capsule, Form C, non-bridging
L = Sensitive, Form C, non-bridging
P = Polarized, Form D, bridging
S = Sensitive, Form D, bridging

1 = Single capsule, Form D, SPDT, bridging
2 = 2 Capsules, Form D, DPDT, bridging
3 = 3 Capsules, Form D, 3PDT, bridging
4 = 4 Capsules, Form D, 4PDT, bridging
D = PC module, Form D, SPDT, bridging

③ COIL CODE NUMBER:
Factory assigned

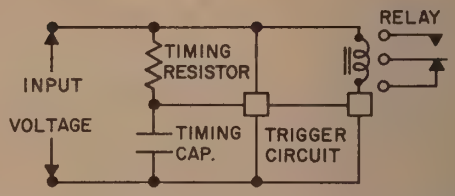
④ TERMINATION FIGURE NUMBER:
11, 12, 21, 22, 23, 31, etc.

SOLID STATE TIME DELAYS

- ON DELAY
- OFF DELAY
- KNOB ADJUSTABLE
- RESISTOR ADJUSTABLE
- FIXED TIME DELAY

A wide selection of solid state time delay controls are represented by Potter & Brumfield. The differences are in their degree of accuracy, the varietv available in each series, and their cost.

BASIC TIMING CIRCUIT



The basic timing circuit consists of a resistor in series with a capacitor. When the input voltage is applied to the resistor-capacitor circuit, the voltage across the capacitor slowly increases. When the firing level is reached a solid state circuit energizes a switching relay or external electrical load.

CD SERIES

Remarkably dependable, accurate and flexible, the CD series offers an unusually wide selection of operational configurations, all with accurate time delay values, fast reset time and excellent repeatability. It is available in two types: Knob-adjustable in two versions, one with the relay in the same enclosure as the solid state unit, the other with an auxiliary relay. A second type is adjustable with an external resistor. The CD series is available for time delay on operate or on release.

CH SERIES

The CH series is intended for a wide range of industrial applications where economy is of greater interest than highly critical performance. It is available in two types: Knob-adjustable with the relay in the same enclosure as the solid state unit. The second type has a fixed time delay period that is set at the factory and cannot be modified; its case has no knob. The CH series is available for time delay on either operate or on release.

CD, CK, CL AND CJ DELAY ON OPERATE CIRCUIT

CH AND CU DELAY ON OPERATE CIRCUIT

If the timing interval is interrupted, the switching contacts may momentarily transfer (pick up and drop out). Reset is accomplished by removal of the input voltage.

SOLID STATE TIME DELAY RELAY ORDERING INFORMATION AND CODE EXPLANATION

	①	②	③	④	⑤	⑥
EXAMPLE:	CD	C	38 —	6	0	003=

CD type, with fixed time value, DC input, 38 style enclosure, 110 volts, standard item, for 10 second delay.

POTTER & BRUMFIELD RELAYS

MORE SOLID STATE TIME DELAYS

CK SERIES

The CK Series is similar to the CH with the exception that they don't false operate† and will time as low as 0.1 second. These time delays include an internally mounted DPDT KU relay rated 10 amperes to form a compact and convenient assembly. Enclosed in white nylon dust covers, CK relays are available in three types: fixed, resistor adjustable and knob adjustable for AC or DC operation. Mounting convenience is provided by plug-in octal type terminals.

CU SERIES

An outstanding value in a solid state time delay relays, the low cost CU Series is designed for delay on operate applications in machine tool controls, copiers, office equipment, coin-operated machines, process controls and many others. Relays are available in three types: Fixed time delay that is set at the factory and cannot be modified, Adjustable with an external resistor, and Knob-Adjustable with a reference scale. For minimum time on external resistor types, two terminals, 2 and 5, must be shorted; for maximum time, the listed external resistor must be added between terminals 2 and 5. For intermediate times select a lesser value resistor or use a potentiometer. Either fixed or resistor adjustable models can be furnished in two types of enclosures with the relay mounted in the same case as the solid state circuit. The CUB series knob-adjustable time delay is offered in a slightly taller enclosure. All CU series time delays have an internal DPDT 10 amp relay of the KUP series featured on page 8. The cases for the CU and KUP are dimensionally the same.

CL SERIES

Designed for delay on operate the CL Series is similar to the CU with the exception that they don't false operate† and will time to 0.1 second. These solid state time delays are ideal for AC or DC applications. A DPDT KU relay rated 10 amperes is mounted in the same enclosure, forming a compact assembly. CL relays are enclosed in yellow polycarbonate dust covers and are available in three types: fixed, resistor adjustable and knob adjustable. Plug-in/quick-connect terminals facilitate handling and hook-up.

CJ SERIES

CJ Series time delay dry reed relays combine the basic timing characteristics of time delay relays with the long life and performance of miniature dry reed relays. Two series are available, the CJC fixed time delay on operate and the CJH external resistor adjustable time delay on operate.

R12 SERIES

The R12 Series time delay relays combine the field proven R10 Series basic relay with a high quality delay circuit. The time delay circuit uses silicon transistors throughout and the critical timing capacitor meets the specifications for military use. These small DC variable time delay relays do not false operate and will time as low as 0.1 second. Timing range of 0.1 to 120 seconds is spanned by three models: 0.1 to 2, 1.0 to 30 and 5.0 to 120 seconds. Each time range is varied with a high resolution 15-turn potentiometer. The internally mounted R10 Series relay is equipped with DPDT contacts rated 5 amperes. Solder terminals are provided and mounting may be accomplished by # 3-48 stud or sockets offering solder or printed circuit board terminals.

COMPARISON OF SPECIFICATIONS OF TIME DELAY RELAYS

POTTER & BRUMFIELD RELAYS

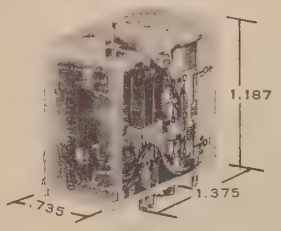
SOLID STATE TIME DELAYS
AS LOW AS $14.20

CUA and CUC are fixed time delays. CUF and CUH are resistor adjustable delays. All with internal DPDT 10 amp contact relay.

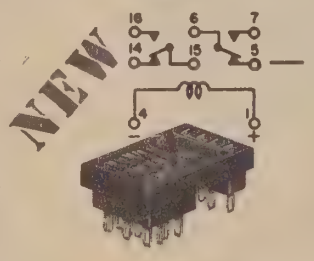
CU-41 is a plain case relay, **CU-42** has a slotted flange case. Diagram A is for fixed delays, diagram B for resistor adjustable delays.

SOCKETS FOR CU-41 PLAIN CASE RELAYS

The plain cases fit the same sockets (except CU resistor-adjustable type will not fit 9KU4) and the same hold down spring (9KU3) can be used. Please use KUP type designators (9KU1, 9KU2 and 9KU4) and prices on page 8 when ordering accessories.



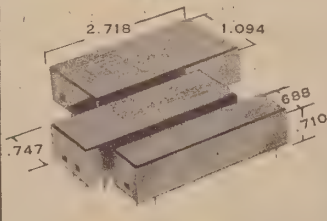
CL-41 is a plain case relay similar to the CU-41 with the exception that it doesn't false operate. See page 8 for mounting accessories (9KU).



CUB/CLB-51. Knob-adjustable versions of CU enclosed in slightly taller 51 style case. Same mounting accessories as CU-41. CLB does not false operate.

R12. Variable time delay with high resolution 15-turn potentiometer. Calibrated timing capacitor meets specifications for military use. Fits sockets below. See notes 9 and 10.

9XR12-1 DPDT Solder terminal sockets and retainers.
Box of 10 **NET $9.00**



9XR12-2 DPDT Printed circuit terminal sockets and retainers.
Box of 10 **NET $9.00**

CJC SERIES. Fixed time delay that is factory set and cannot be modified.

CJH SERIES. Resistor adjustable type with terminal provisions for external resistor or potentiometer for adjusting time delay period to within ±10% at nominal voltage at 25°C ambient temperature. Pin terminations are for printed circuit board mounting.

CS SERIES SOLID-STATE VOLTAGE SENSORS

• CLOSE-DIFFERENTIAL • UNDER-VOLTAGE

A voltage sensor is designed to energize and de-energize a relay at predetermined voltages. These solid state voltage sensors actuate an internally-mounted relay when a specific voltage level is reached. This pick-up level is either fixed or knob adjustable. Fixed sensors are factory set and cannot be changed. Knob-adjustable versions allow the pick-up levels to be varied over a predetermined range.

If the sensing voltage decreases to a pre-set level after pick-up occurs, the internal relay de-energizes. This is the drop-out level and may be fixed or knob-adjustable. The pick-up voltage point must be set higher than the drop-out voltage point.

Voltage sensors consist of a sensing circuit that acts to turn on a solid state switch, energizing the accompanying relay. Both the solid state switch and a DPDT relay rated at 3 amperes are enclosed in the same molded nylon dust cover.

Type 1. A series with factory fixed pick-up and single knob-adjustable drop-out voltage levels.

Type 2. A series with both knob-adjustable pick-up and drop-out for selecting desired voltage levels.

These reliable solid state voltage sensors can be used as protective devices in alarm circuits, motor controls and to activate or cut off a system automatically. It is possible to combine certain of the above sensors into a custom unit designed for specific individual control functions.

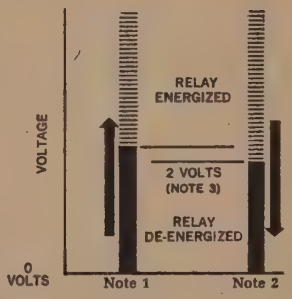
CONTACTS:
Load Switching Relay: Arrangement: 2 Form C (DPDT)
Rated: 3 amps @ 28V DC resistive: 120V AC resistive.
Expected Life: Electrical: 100,000 operations at rated load.
Mechanical: 10,000,000 operations.

COILS:
Operate Power: DC: 1.5 watts approximate.
AC: 1.0 volt-ampere approximate.
Duty: Continuous.

GENERAL:
Operate Time @ 25°C: 25 milliseconds approximately at nominal voltage.
Temperature Range: −10°C to +55°C
Reverse Polarity Protection: Yes, on DC types
Size: 2.375″ x 1.750″ x 3.593″ seated height.
Approximate Weight: 8 ozs.
Mounting: Octal plug.
Enclosures: Nylon dust cover.

Fixed pick-up and adjustable drop-out. One knob for setting drop-out value.

Adjustable pick-up and drop-out. Two knobs for setting desired values.



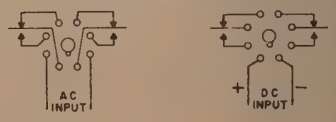
FIXED PICK-UP AND ADJUSTABLE DROP-OUT

Type	Pick-up (Volts)	Drop-out Range (Volts)	Type of Voltage	Sugg. Resale Price
CSJ38-71010	105	90-103	AC(50/60 Hz)	$29.20
CSL38-31010	22	16-20	DC	23.15

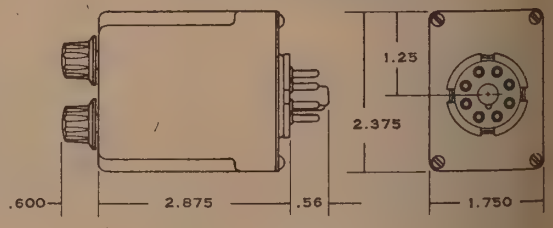
ADJUSTABLE PICK-UP AND DROP-OUT

Type	Pick-up Range (Volts)	Drop-out Range (Volts)	Type of Voltage	Sugg. Resale Price
CSJ38-30010	20-30	18-28	AC(50/60 Hz)	$30.20
CSJ38-70010	92-140	90-138	AC(50/60 Hz)	32.95
CSL38-30010	20-30	18-28	DC	26.20

ADJUSTABLE VOLTAGE SENSOR OPERATIONS



NOTE 1
As voltage increases, the relay will pick up at a predetermined point and remain energized while voltage is maintained at that level or higher.



NOTE 2
As voltage decreases, after pick up, the relay will drop out at a predetermined point.

NOTE 3
Minimum difference between pick-up and drop-out points is 2 volts.

SCHRACK RELAYS

SCREW DOWN SOCKET WITH MOLDED TERMINAL STRIPS

No. RN 73301 — 8 Pin

No. RN 73302 — 11 Pin

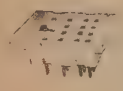
For surface type installations and proto type work where screw terminals are convenient. Adequate barriers for hi-voltage installations.

STANDARD SOLDER LUG SOCKET

No. RN 78710 — 8 Pin

No. RN 78711 — 11 Pin

Conventional type molded socket with numbered pins — screw mounting.

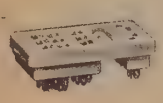


PRINTED CIRCUIT LUG SOCKET

No. RN 78712 — 8 Pin

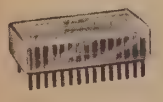
No. RN 78713 — 11 Pin

Standard type for conventional circuit board assemblies — black molded with numbered pins.



MINIATURE SOCKETS FOR RA RELAYS

No. RA 78700 — for screw mounting, made specially for mounting Schrack RA type relays but may be used for miniature modular circuitry with plug base and dust cover available on request. Precision type with spring-hold grounding terminal.



No. RA 78701 — for spring mounting.

No. RA 78702 — for printed circuit mounting.

SOCKETS AND ACCESSORIES FOR RE RELAYS

No. RE 78700 Standard Socket
RE 78702 Printed Circuit Socket
RE 28800 Hold-down Spring

SOCKET FOR TYPE RTM

No. RT 78700 for printed circuits
RT 28406 — Screw type term*
RT 28487 — Solderless term*
RT 28408 — w/solder lugs*

*Available at a later date.

SPECIAL SOCKET FOR CAF SERIES

No. RD 78700 — 8 or 11 Pin

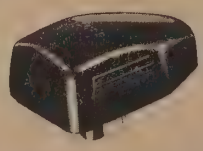
Exclusive with Schrack. This socket accommodates either 8 or 11 pin base. Its small size and design provides for strip mounting with no loss of space.

BASE FOR SCHRACK CAF SERIES

No. RD 78600 — 11 Pins

May be used with above socket and dust cover for building modular component requiring U. L. specs for spacing.
for 8 or 11 wiring

No. RD 78601 — same as above but with printed circuit pins.



STANDARD MOLDED PLUG

No. RN 78600 — 8 Pin

No. RN 78704 — 11 Pin

Accommodates RN 16035 or RN 16019 Dust Covers for building plug is modular circuitry.

SCHRACK TYPE HOODED PLUG

No. RN 78714 — 8 Pin

No. RN 78715

Permits any relay or component to be mounted remotely and to be plugged into standard socket in circuitry.

DUST COVER FOR CAD SERIES

No. RN 16035 POLYSTRENE
with holes in base for screw mounting.

No. RN 16019 — Same as above but molded of Macralone*.

METAL DUST COVER FOR CAF SERIES ONLY

No. RD 10701

PLUG MOUNTED ON METAL PLATE

No. RN 74221 — 8 Pin
No. RN 74104 — 11 Pin

Metal plate provides base for oversize dust cover in order to install components for modular circuitry.

LARGE DUST COVER FOR METAL PLATE

No. RN 16022 Polystyrene

Internal grooves provide means for mounting circuit boards with components.

No. RN 16034

Same as No. RN 16022 but made of Macralone*.

HIGH POLYSTYRENE DUST COVER

No. RN 16020

May be used with CAD Series.
Two holes in top for ventilation.

HOLD DOWN SPRING

No. RN 28623

Provides quick removal of dust cover — fastens to mounting screws of standard type socket.

HOLD DOWN CLIP

No. RN 28611

*Macralone is a polycarbonate resistant to high temperatures.

Self tapping screws for dust covers available on order.

SCHRACK ELECTRICAL SALES CORPORATION

© United Technical Publications

We make resistors for guys who can't stand failures.

New glass tin oxide film resistors—with tighter, ½ to 5% purchase and load-life tolerances, precision temperature coefficients—make CORNING®Resistors more than ever your best buy for stability and reliability. Add these new and improved characteristics to the established physical and electrical integrity of glass tin oxide film resistors and you will see how CORNING Precision, General-purpose, and Power Resistors can add real value to your equipment.

	TYPE AND MIL SPEC	CGW/MIL	RESISTANCE (ohms)		WATTAGE	TOLERANCE
NC	New low ±50 ppm TC with ½ and 1% tolerances for predictable performance. Meets MIL-R 10509F, Char. C.		±1%	±½%	125°C	
		NC4/RN55C	49.9 to 301K	49.9 to 150K	1/10	±½, 1%
		NC5/RN60C	49.9 to 1 meg.	49.9 to 499K	1/8	±½, 1%
		NC6/RN65C	49.9 to 2 meg.	49.9 to 1 meg.	1/4	±½, 1%
NA	Stable ½% and 1% performance at 70°C and 125°C ratings. Meets MIL-R-10509F, Char. D. 100 ppm TC.		±1%	±½%	70°C 125°C	
		NA55/RN55D	10 to 301K	49.9 to 150K	1/8 1/10	±½, 1%
		NA60/RN60D	10 to 1 meg.	49.9 to 499K	1/4 1/8	±½, 1%
		NA65/RN65D	10 to 2 meg.	49.9 to 1 meg.	1/2 1/4	±½, 1%
		NA70/RN70D	51.1 to 1 meg.	51.1 to 1 meg.	3/4 —	±½, 1%
C	Precision stability in a unique multi-use part for both MIL-R-22684B and MIL-R-10509F, Char. D. New C3 style provides ⅛ watt performance in RN50/RC05 size.		100 ppm	200 ppm	70°C 70°C 125°C	
		C3	100Ω-150K	10Ω-150K	1/8	±1, 2, 5, 10%
		C4/RL07S	10Ω-301K		1/4 1/8 1/10	±1, 2, 5%
		C5/RL20S	10Ω-1MEG		1/2 1/4 1/8	±1, 2, 5%
C	General-purpose, low-cost film type. Film resistor performance characteristics at prices comparable to carbon composition types.	C32/RL32S	10 to 1 meg.		1 @ 70°C	±2%, 5%
		C42S/RL42S	10 to 1.5 meg.		2 @ 70°C	±2%, 5%
FP	Low-power resistors that won't burn, even under 100 times-rated overload. FP Style Resistors open up, fuse, but will not flame. Highly stable and non-inductive performance.				40° 70°C	
		FP-½	10 to 470K		— ½	±2, 5%
		FP-2	9 to 90K		3 2	±2, 5, 10%

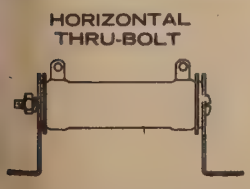
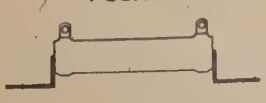
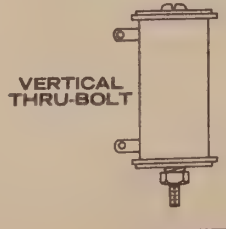
DALE® for Optimum Value in Wirewound Resistors

NDUSTRIAL WIREWOUND POWER RESISTORS, ILICONE OR VITREOUS ENAMEL COATED



ale's expanded industrial wirewound ne provides both silicone and vitre- is coated models. Silicone models e recommended where maintenance tolerance and T.C. is of primary con- ern. Vitreous models are recom- ended where maximum resistance to nemical action is required.





CONTACT DISTRIBUTOR FOR PRICES.

TYPE	APPLICATION	APPLICABLE MIL SPEC AND TYPES	WATTAGE RATING	RESISTANCE RANGE	CORE SIZES	TERMINALS	MOUNTINGS	TOLERANCE

Charles T. Gamble Industries

PRECISION WIRE WOUND RESISTORS & NETWORKS

Charles T. Gamble Industries has engineered and designed non-inductive precision wire wound resistors to meet the requirements of Mil-R-93D. These resistors are completely sealed against the effects of high humidity and salt water immersion cycling. The material used in the manufacture of our resistors has a very high dielectric strength. The bobbin material used in winding the resistors is one and the same as the encapsulating material. All resistors use resistance wire with very low thermal E.M.F. to the copper leads. Where thermal effects can be disregarded, welded construction with nickel alloy leads may be specified.

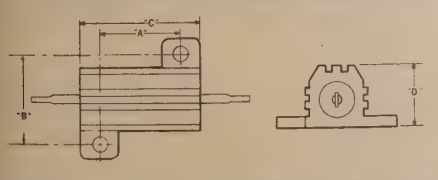
Standard temperature coeficient is ±10 PPM/°C. Lower T.C.'s, and T.C.'s as high as 6000 PPM/°C can be supplied.

Tolerance available (non power styles): 1%, 0.5%, 0.1%, 0.05%, 0.025%, 0.02% and 0.01%. Resistors with tolerances of 0.1% and below are stabilized by artificial aging and temperature cycling.

NETWORKS: RC NETWORKS, LADDER NETWORKS, VOLTAGE DIVIDERS, BINARY NETWORKS

Sub-miniature Axial lead Precision resistors have been designed for applications where space is a prime factor.

Encapsulated printed circuit resistors are designed for printed circuit board application, where space is a factor.



Radial lug type resistors have been designed to meet the requirements of Mil-R-93D.

All resistors are hermetically sealed with epoxy resin to protect the windings against the effects of high humidity and salt water immersion cycling. Resistors can either be inductive or non-inductive wound.

The materials used in the construction of radial lug type resistors are identical to those used in the construction of axial lead types.

These resistors are supplied with a thru hole for mounting to the chassis by means of a #6 thru bolt.

HEAT SINK MOUNTED PRECISION WIREWOUND POWER RESISTORS

POWER RATING	DIMENSIONS A	B	C	D	MAXIMUM OHMS
10 WATT	.562	.625	.750	.390	20,000
25 WATT	.718	.781	1.062	.542	60,000
50 WATT	1.563	.844	1.968	.610	70,000

Ratings shown are based upon use of appropriate chassis mounting.

VITREOUS ENAMELED

MEMCOR Components . . . resistors and rheostats . . . are manufactured by the MEMCOR Components facility of the MEMCOR Division of LTV Electrosystems, Inc.

MEMOR Components represent the cumulative design skill and production knowledge of two great lines of resistance products — Tru-Ohm and Hardwick, Hindle. This "second generation" product maintains all of the proven features of both original lines plus the manufacturing refinements that can only result from industry experience.

The values of resistance listed in this section are in stock for immediate delivery—special resistance values or terminal diversions are readily available. **When ordering** — identify type and value of resistor by stock number.

VITREOUS AXIAL LEADS VL 3 (3 WATTS)

CORE: 1/32" x 3/16"
WEIGHT: .002 LBS.

The VL type lends itself to applications where size is a factor.

These widely-used fixed wire wound vitreous enameled resistors have solidly anchored welded tabs (lugs) and shock-absorbing mounting brackets to withstand vibration. Multi-layer vitreous enamel coating locks the uniformly-wound resistance wire in position and also seals out moisture. MEMCOR resistors have a high-temperature stability and a compatible coefficient of expansion which prevents crazing and cracking.

MEMCOR resistors have a standard tolerance of ±5% on all values above one OHM and a ±10% tolerance on resistance values lower than one OHM (available in closer tolerances).

All MEMCOR resistors listed in this section manufactured to the rigid requirements of MIL-R-26 Specifications . . . MEMCOR resistors meet and exceed all requirements of this specification.

FR TYPES

MEMCOR fixed wire wound vitreous enameled types in 5, 10 and 20 watt sizes FL w/Leads are light enough to be mounted by attached leads and are also available without (FR) tuned leads.

The FR type resistors can be mounted by brackets, vertical through bolts or by their tabs.

The sturdy terminals are hot-tinned for soldering ease, and the holes in the terminals are of suitable size to accommodate screws.

Mounting brackets are furnished **only** on request at **no** additional cost. If required, please specify bracket stock number.

Standard packaging — 5, 10 and 20 watt sizes are packed 10 units per carton and larger sizes are packed individually.

ADJUSTABLE VALUE RESISTORS

MEMCOR adjustable resistors are used in applications where it is necessary to make adjustment in resistance periodically . . . where intermediate values of resistance are needed . . . or when multi-tabs are required. The AR types are especially useful in laboratories for experimental work, circuit design, etc.

A section of the winding is exposed on one side to enable the adjustment band to make contact at any desired point. This adjustable band **should not** be moved unless the screw holding it in position is completely loosened to prevent abrading or possible damage to the resistance wire.

Adjustable lugs are formed to the exact contour of the body of the resistor to assure positive contact with the exposed section of winding. Standard adjustable bands are screw-driven style and have an embossed area on the lug.

Special adjustable lugs are available with a silver contact . . . also, bakelite thumb screw type bands are available.

The AR wattage ratings (and the ±10% tolerance) given in this section are for **the entire** resistor. Never exceed the maximum rating through any portion of the resistor.

OVAL (FLAT CORE) RESISTORS

MEMCOR wire wound flat core resistors are applicable for individual and/or stack mounting. Their high watt rating per unit of space and the bracket construction which facilitates stacking (integral mounting brackets are supplied as standard)... make the MZ and ZR types space savers par excellence.

The line of ovals (ZR) was designed particularly for applications where available space is limited... and the supplementary line of midget ovals (MZ) are very desirable for applications where the size of the components must be kept to an absolute minimum. The through bracket helps dissipate heat and reduces hot spots. This permits higher wattage dissipation without requiring additional space.

When stack mounted, the ZR and MZ resistors should be derated. For an ambient temperature not higher than 40°C. the maximum rise of these resistors will not exceed 300°C. when mounted on a steel panel.

Tapped or adjustable ovals are available.

VITREOUS OVAL ZR 30 (30 WATTS)
CORE: 5/16" x 1" x 1 1/4"
WEIGHT: .055 LBS.

MOULDED SILICONE RESISTORS

These resistors will operate at 350°C. (660°F.) and will withstand thermal shocks to minus 55°C. Because of the moulded construction the resistors are effectively hermetically sealed and will withstand severe moisture conditions without deterioration.

The construction of the resistors are uniform in all dimensions within a few thousandths of an inch, which facilitates their use in automatic-insertion machinery... for which use they may be obtained specially packaged. They will improve the appearance of any assembly in which they are used.

Temperature co-efficients of plus or minus 20 parts per million per C. degree are standard.

The moulding compound used in these resistors was developed through research and development extending over several years, and represents a marked advance in the "state-of-the-art" for such compounds.

PRICES

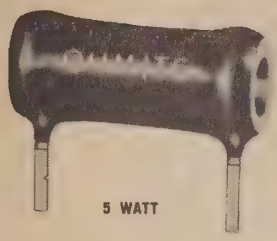
Prices in this MASTER should not be considered as final. INQUIRE ABOUT LATEST PRICES AND DELIVERY.

DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.

ORDERING

Since previous editions of the MASTER are frequently referred to, it is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.



INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

OHMITE radial lead resistors for P.C. boards

CLASS PC-58

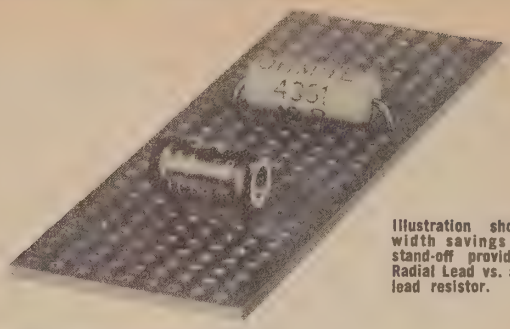


Illustration showing overall width savings and built-in stand-off provided by PC-58 Radial Lead vs. a typical axial lead resistor.

Increases productivity 28.1% — Saves circuit board space

If you are manually inserting axial lead resistors in printed circuit boards, it will pay you to examine the new Ohmite PC-58 resistor.

ADVANTAGES:

LABOR SAVING: Radial Leads eliminate cutting, bending, and forming of leads. Productivity is increased 28.1%. You achieve a 21.9% savings in labor cost. (Time Study Publication No. 163 available on request.)

SPACE SAVING: Radial leads reduce total length dimension required compared to axial lead types, increases packaging density possibilities.

POSITIVE POSITIONING: Built in stand-off automatically provides correct spacing between resistor and P.C. board.

COST SAVING: PC-58 resistors are priced lower than comparable axial lead types: This is in addition to savings in labor as explained above.

STANDARD SIZE: PC-58 Radial Leads fit standard .1 inch matrix boards with standard .046 inch diameter holes.

MARKINGS ALWAYS VISIBLE: Value and Ohmite code markings are always visible from the top of the PC-58. Eliminates time consuming orientation normally required of axial lead types.

CHOICE OF COATINGS: PC-58 resistors are available in ±5% tolerance with Vitreous Enamel (Type 270) for resistance values to 3300 ohms for 3-watt and to 6800 ohms for 5¼-watt or Ohmicone® silicone-ceramic (Type 470) for values over 3300 ohms and 6800 ohms for 3 and 5¼-watt sizes, respectively. For tolerances of ±3% and closer or for low T.C., specify Ohmicone® Type 474.

AVAILABILITY: Now standard PC-58 resistors are in stock at your local Ohmite authorized stocking distributor.

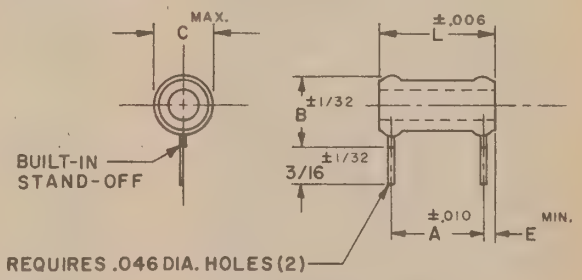
SPECIFICATIONS:

MECHANICAL

Coating: Vitreous Enamel or Ohmicone® (silicone-ceramic), depending on Type.

Terminals: Radial, solder-dipped.

Markings: Ohmite Code and Resistance (Ohms) Value.



Weight: 3-Watt: .002 lbs.; 5¼ Watt: .003 lbs.

ELECTRICAL

Tolerance: ±5% for 1 ohm and above; ±10% below 1 ohm.

Wattage: 3-Watt, derated to 0 at 350°C—5¼-Watt, derated to 0 at 350°C

Temperature Coefficient: Less than 260 ppm/°C.

Rated Watts @ 25°C	DIMENSIONS (Inches)				
	A ±.010	B ±1/32	C Max.	E Min.	L ±.006
3	.300	.335	9/32	3/64	7/16
5¼	.500	.375	5/16	1/32	5/8

3-WATT

Free air rating thru 10K ohms.

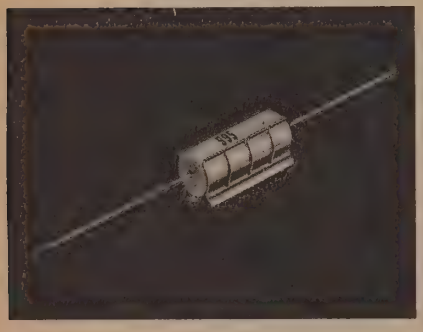
All standard values shown above are popular values and are stocked by authorized OHMITE stocking distributors.

OHMITE type 995 MOLDED axial lead vitreous enameled resistors



- FIRST MOLDED WIREWOUND, VITREOUS ENAMEL RESISTOR
- INSULATED! Meets 1000 VAC Test
- WITHSTANDS 1500°F Temperatures without Distortion
- RESISTS Chipping, Breaking
- VITRIFIED MARKINGS, Resist Abrasion and Active Solvents
- UNIFORM SIZE Permits Clip-Mounting with Significant Heat Sink Benefits
- HIGH OVERLOAD CAPABILITY

An exclusive technique (U. S. Patent No.'s 3,229,237 and 3,489,828) permits application of the vitreous enamel coating by molding instead of the conventional "dip" process. The dimensionally consistent and thicke coating that results, guarantees a 100(VAC insulation rating plus unparallelec capability for withstanding very high tem peratures, high humidity and immersior in salt solution.

These resistors are normally mountec by their axial leads. However, their con sistent form also permits mounting ir clips with heat sink benefits up to 100% (see "Clips" lower left). Resistor markings are also vitreous and will not burn off even under extreme overloads. Resistance tolerance is ±5%. Series 99 resistors meet the requirements of MIL-R-26 for "insulated" resistors. See Catalog 101 for specific MIL types.

MOUNTING CLIPS

Uniform shape and consistent dimensions of Series 99 and 88 (pages 6-7) resistors, permits them to be conveniently mounted in clips. If the clip is on a metal surface, the wattage capability of the resistor can increase by as much as 100%. Holes in clip base permit fastening to chassis by means of machine screws, eyelets or rivets.

CLIPS for TYPE 995 and 884* RESISTORS

Resistor Watts	Resistor Series	Clip Stock No.
1½	99	5900
2¼	99	5902
3	88	5904
3¼	99	5904
5	88	5905
5	99	5906
10	88	5909
11	99	5908

* See pages 6 and 7 for Type 884 resistors

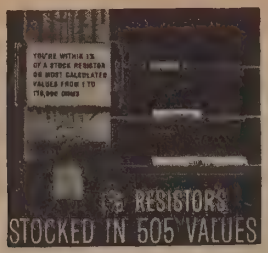
M'S LAW CALCULATOR . . .



Solve Ohm's Law/Parallel Resistance problems with Ohmite's pocket-sized calculator. Also convenient A, B, C, and D slide rule scales for supplementary calculations. Resistance scales from 0.01 ohm to 100 megohms. Varnished cardboard or deluxe plastic model.

Type	Stock No.	Price
Cardboard	5180	$0.25
Plastic	5182	1.50

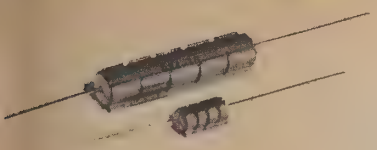
opular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking stributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $15.00 per line item minimum charge.

OHMITE type 884 Riteohm® Resistors—1% tolerance

molded for uniform shape and size

miniature precision resistors—1% tolerance

OHMICONE® molded • wirewound • aged for stability • insulated for 1000 volts • low T.C.



Type 884 Riteohm® Resistors are stocked in power ratings of 3, 5 and 10 watts depending upon resistance. Single layer wound on ceramic cores, Riteohm resistors feature a pressure-molded coating of tough, resilient Ohmicone® silicone-ceramic material which meets the MIL-R-26, 1000 VAC insulation test. Riteohms are aged for long term stability and exhibit negligible inductance at audio frequencies. Temperature coefficient of resistance is 0±10ppm/°C[1] for most values. Values shown are based on the MIL-Bell system of standard values. For non-standard values, closer tolerances, etc. contact your local Ohmite office.

OHMITE

Uniform shape of Riteohms permits clip mounting for extra heat dissipation. The wattage capability can be increased by as much as 100% when clip is mounted to a metal surface. See Series 99 listings for clip ordering information.

T.C. of values in 3 Watt size under 97.6 ohms is as follows: From 97.6 thru 10 ohms, 0±20ppm/°C; from 9.76 thru 1.0 ohms, 0±50ppm/°C; below 1 ohm, 0±90ppm/°C.

Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $15.00 per line item minimum charge.

OHMITE type 270 vitreous enameled fixed resistors

These lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel — the time-proved standard covering that is the best conductor of heat for a material which must also be a good electrical insulator.

Resistance tolerance is ±5% for values 1 ohm or higher; ±10% below 1 ohm.

Wattage ratings are for use in free air. When resistors are mounted in closed spaces or where the circulation of air is restricted, they should not be used at more than one-half rating. Currents and voltages for reduced ratings can be obtained by multiplying full rating by the following factors: 75% load = .86, 66% = .81, 50% = .71, 33% = .57, 25% = .50.

Mounting brackets are automatically supplied in individual unit packs; supplied only when specified in bulk pack orders. See page 18, "Mounting Brackets for Tubular Resistors" to specify other brackets.

OHMITE dividohm® type 210 adjustable vitreous enameled resistors

"Dividohm" resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Such tapped "bleeders" are made by using one or more adjustable lugs, as required. "Dividohms" are also handy for obtaining odd resistance values, for adjusting circuits, and for use on equipment which must be set to meet various line voltages.

"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to any wire in this strip is made by an embossed contact on the adjustable lug (supplied).

WATT RATING: **The stated wattage rating applies only when the entire resistance is in the circuit.** When the adjustable lug is set at an intermediate point, the wattage rating is reduced in approximately the same portion, i.e., if the lug is set at half the resistance, the wattage is reduced by one-half. A safe rule to follow is to make sure that the maximum rated current is not exceeded. This should be carefully checked particularly if the resistor will be used as a voltage divider with several adjustable lugs. Resistance tolerance is ±10% for the total resistance value.

adjustable lugs

One "Screw Driver Type Adjustable Lug" is supplied with each unit. Lugs with a silver contact button can be ordered from the table shown below.

MOVING THE LUGS: Lugs always should be loosened completely before moving and not moved except while the current is off, in order to protect the exposed wire from mechanical or electrical injury and to protect the operator from dangerous voltages.

STANDARD

Core Diam. Inches	Screw Driver Type — New Cat. No.	Screw Driver Type — Old Cat. No.	Bakelite Knob Type — New Cat. No.	Bakelite Knob Type — Old Cat. No.
⅜	2115	1058	—	—

OHMITE type 200 *brown devil*® fixed resistors

BROWN DEVIL® (Type 200) resistors, are vitreous enameled, wirewound units long famous for ruggedness and durability in small power resistors. With the emphasis towards miniaturization and the current industry trend towards higher operating temperatures, Ohmite has been able to increase the ratings on two Brown Devil sizes. The 5 watt size is now rated **8 watts** and the 10 watt size is now rated **12 watts**. The 20 watt unit retains the same rating. The higher ratings may be confidently applied to any 5 or 10 watt unit now in the possession of users or distributors. At this time also, to meet the demand for lower wattage units, Ohmite introduces two, new, small stock sizes — 3 and 5¼ watts.

Standard resistance tolerance is ±5% for values 1 ohm or higher; ±10% for values below 1 ohm. Tinned leads 1½" long: 3 and 5¼ watt, 20 AWG; 8, 12 and 20 watt, 18 AWG.

OHMITE non-inductive
type 270N vitreous enameled fixed resistors

These non-inductively wound power resistors are widely used at radio frequencies for such purposes as dummy antennas, terminating resistors for antennas, and in diathermy apparatus. Their properly proportioned Ayrton-Perry type windings, reduce the inductance to low proportions (less than 1% of regular solenoid type resistors) while the distributed capacity is small. R.F. resistance is the same as the D.C. resistance over the useful range of frequencies.

Change of impedance with frequency is so slight that the resistors can be used throughout the broadcast band and at even higher frequencies, depending on the particular resistance to be used. All the resistors are lug-type tubular units which mount by means of non-magnetic mounting brackets (furnished). Ohmite's high grade ceramic construction and exclusive vitreous enamel coating assure long, reliable performance under full rated load. Resistance tolerance is ±5%.

Mounting brackets are automatically supplied in individual unit packs; supplied only when specified in bulk packs.

lummy-antenna resistors NON-INDUCTIVE

Ohmite Models D-101 and D-251 Dummy Antenna Resistors provide a simple, accurate, and direct means of measuring R.F. power for the radio amateur, experimenter and manufacturer and for operators of aviation, police and broadcast stations. These units consist of a number of special, vitreous enameled resistors connected in parallel in a concentric arrangement and mounted inside a perforated metal cage. The dummy antenna resistors feature constant R.F. resistance (within their recommended frequency range), low reactance, high wattage dissipation, and compactness. Actual D.C. resistance tolerance is ±5%.

The residual inductance and distributed capacitance have been kept to a minimum, thereby making the natural resonant frequency as high as possible. These factors and the D.C. resistance have been proportioned in such a manner as to give the best possible response characteristics. This resistor may be considered practically a "Non-Reactive Resistor."

OHMITE type 250 "THIN" vitreous enameled resistors

Ohmite "Thin" Resistors are intended for use in equipment where space is at a premium. They are wound on flat, oval shaped ceramic cores, and covered with Ohmite's exclusive vitreous enamel coating. Resistance tolerance, ±5%.

Integral mounting brackets extend through the resistor core to equalize heat distribution and to conduct heat directly to the mounting surface — provides equivalent wattage with less bulk and in less space. Wattage ratings assume the use of a metal mounting surface. Reduce ratings 15% for non-metallic surfaces.

"Thin" resistors are mounted or compactly stacked by means of bracke studs which are hollow to receive assembly bolts. The load should be re duced for each unit when resistors are stacked or used in confined, poorl ventilated spaces. Total height from bottom of mounting stud to top o resistor is approximately 9/16" for the Standard units and 1 1/32" for th Miniature units.

For other sizes, closer tolerances, non-stacking brackets, Dividohr adjustable or other features, consult factory.

OHMITE corrib® HIGH CURRENT LOW OHMS resistors

Fixed

Dividohm® Adjustable

High current, low resistance, heavy duty units used in motor starting, dynamic braking, etc. "Corrib" type units employ a corrugated ribbon of resistance alloy. This is space-wound edge-wise around a ceramic tube. Vitreous enamel is fused around the alloy ribbon to lock the turns securely in place. Heavy lug terminals. Resistance tolerance is ±10%.

Available in fixed or Dividohm® adjustable types. Dividohm® type is similar to fixed and includes one adjustable lug. Rating of Fixed or Dividohm® stock units—300 watts—reduce unit load for stack-mounted resistors; core size (bare) 8½" long x1⅛" diameter. Other sizes made to order.

STOCK CORRIBS — 300 WATT SIZE
Type 280 Fixed; 230 Dividohm®

ire: 8½x1⅛" Fixed or Adjustable (DIVIDOHM)
g. Weight (Fixed) .61 lb.; (Dividohm) .64 lb.

)owr-rib® HIGH CURRENT LOW OHMS resistors

ven higher power handling capability—approximately 700 to 1000 vatts—is available in stock, "Powr-Rib" resistors. These are NCOATED types and are wound either edgewise with ribbon 'Edgewound" type) or with round wire (Round-Wire type).

The core of these units consists of ceramic segments on a netal bar which is slotted on both ends for rapid installation. tandard resistance tolerance is ±10%. Terminals clamp onto he resistor wire and may be moved in from the ends for inter-nediate resistance values. Extra terminals available for use as aps. See diagrams for terminals. Terminal Stk. No. 2172G (not hown) has screw connections.

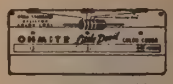
OHMITE *Little Devil*® molded composition resistors on "Tally Tape"

"Tally Tape," Ohmite's wonderfully convenient packaging presently provides for ¼, ½, 1 and 2-watt resistors. Each perforated segment holds 5 resistors — prevents spilling or tangling — simplifies counting — is printed for quick identification — guarantees original, factory-fresh stock.



Now Includes MIL-R-II Types

Little Devils, Ohmite's famous molded composition resistors, find broad use in commercial and military applications. The ⅛, ¼, ½, 1 and 2-watt sizes, which conform respectively to Styles RC05, RC07, RC20, RC32 and RC42 of MIL-R-11, meet all the stringent requirements of this military specification. The five sizes available satisfy a wide range of design and service needs.

Little Devils have molded insulation for high dielectric strength. Noted advantages of these units are great stability, low noise level, low voltage coefficient, high insulation breakdown voltage and rapid heat dissipation. They may be used at full rated wattage at 70°C (158°F) ambient temperature.

Little Devils are available from stock in standard EIA resistance values in the tolerances and resistance ranges shown in the price table. Ratings for maximum continuous RMS voltage drop are high: 150 volts for ⅛ watt units, 250 volts for ¼ watt, 350 volts for ½ watt, 500 volts for 1 watt, and 750 volts for 2 watt units. See "Little Devil" Resistor Assortments page 16.

OHMITE *Little Devil*® industrial and service resistor assortments

RESISTORS AND HANDY CABINET FOR THE PRICE OF THE RESISTORS ALONE

Select the composition resistor you need, right on the job from time-saving Little Devil® Assortments. Ohmite now offers **seven industrial** assortments in addition to the four service assortments that have been so popular for many years. In this complete line, there is an assortment to fill every industrial and service need. An attractive plastic cabinet or cabinet assembly is furnished at no extra cost with each assortment. Each drawer of a single 5-drawer cabinet has eight compartments all individually labeled. Dimensions of the single cabinet are 9" long, 4¾" high 5¼" deep. Dovetail tops and bottoms facilitate stacking. Cabinet assemblies for industrial assortments are riveted to metal strips which afford rigidity and permit hanging of the unit on the wall.

Of the seven industrial assortments, there are three ±10% tolerance assortments of ¼, ½ or 1 watt sizes each containing 80 values. A two-cabinet assembly is furnished for these assortments. Four 5% tolerance assortments provide 160 values each of resistors in the ⅛, ¼, ½, or 1 watt sizes. A four-cabinet assembly is furnished for each of these assortments.

The four popular **service** assortments provide ±10% tolerance resistors in a single cabinet in ¼, ½, 1 or 2 watt sizes.

Cabinets are factory packed in accordance with the tables shown below.

11 ASSORTMENTS

Assortment	Catalog No.	Quantity of Resistors	Wattage Size	Net Price
INDUSTRIAL ±10% Tolerance 80 Resistance Values 2 Cabinets	**CAB-25**	1000	¼	$ 70.0
	CAB-26	1000	½	60.0
	CAB-27	600	1	54.0
INDUSTRIAL ±5% Tolerance 160 Resistance Values 4 Cabinets	**CAB-45**	1000	⅛	225.0
	CAB-46	1500	¼	210.0
	CAB-47	1500	½	180.0
	CAB-48	900	1	160.0
RADIO & TV SERVICE KITS ±10% Tolerance 37 Values—CAB-4 40 Values—Others 1 Cabinet	**CAB-4**	150	¼	19.5
	CAB-10	150	½	18.0
	CAB-2	125	1	22.5
	CAB-3	125	2	30.0

OHMITE 0.1% precision Determ-Ohm® resistance box

The new Ohmite Precision Determ-ohm® is a resistance decade box with an accuracy of ±0.1%. Four models cover the resistance range from 1 ohm to 1 megohm in a choice of three-4 decade and one-6 decade models.

Simplified selection of resistance values is accomplished by operation of rocker-type thumbwheel switches. Resistance setting is indicated by a direct in-line numeric readout. Unique switch feature (pat. pend.) allows advancing or decreasing of values directly from 9 thru 0 to 1 or vice versa, without retracing all the other values.

The housing is a functional sloping panel metal case equipped with universal binding posts and a grounded metallic binding post for effective shielding.

SPECIFICATIONS

Accuracy: 0.1% (plus .01Ω max. contact and circuit resistance per decade).

Selection: Rocker-type thumbwheel switches, continuous rotation in either direction.

Switch Life: In excess of 50,000 operations.

Power: ¼ Watt per resistor.

Operating Temperature: +15 to +35°C.

T.C. of Resistors: ±10 ppm/°C, max. 20 ppm/°C.

MAXIMUM CURRENT RATINGS

(Do not exceed 500 Volts.)

Resistance Range (Ohms)	Maximum Current (Milliamps)
1-9	710
10-99	220
100-999	71
1000-9999	22
10,000-99,999	7.1
100,000-999,999	1.1

SELECTION AND PRICING

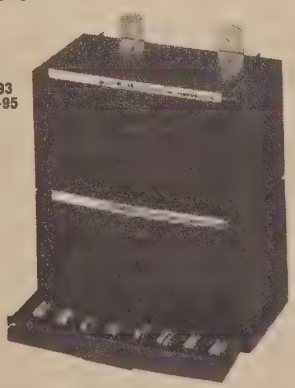
wire-wound

resistor assortments

of type 995 axial lead MOLDED vitreous enamel

- Perfect for R & D and Prototype Labs
- All popular values included.
- Resistors and handy cabinet for the price of the resistors alone.
- 4 Wattage sizes to choose from.
- Contents clearly marked on front of each drawer segment.



Select the wire-wound resistor you need, right on the job. All the popular resistance values, as determined by national usage, are contained in these handy, compact assortments.

The attractive plastic cabinet is furnished at no extra cost with each assortment. Cabinets are factory packed in accordance with the table (shown at right) which states the quantities of each resistance value per assortment. Each drawer segment is individually labeled. Dovetail tops and bottoms of cabinets facilitate stacking. Dimensions for single cabinets are 9" long x 4¾" high x 5¼" deep; double cabinets are 10" high, including wall hanging brackets.

Single Cabinets for CAB-91 and CAB-99

Double Cabinets for CAB-93 and CAB-95

SPRAGUE RESISTORS

KOOLOHM® AXIAL-LEAD WIREWOUND RESISTORS
FOR INDUSTRIAL APPLICATIONS

- Types 450E, 452E, 454E, 456E and 458E are Standard Resistors. Types 451E, 453E, 455E, 457E and 459E are Non-Inductive Resistors

- Insulated-Shell Design for Easy Mounting
- Feature Improved Internal Construction in Which Windings and Leads are Welded to End-Cap for Superior Mechanical Strength
- Ceramic-Insulated Wire is Space Wound and Cemented, to Prevent Turn-to-Turn Shorting. Permits Higher Resistance Values in a Given Size Than in Conventional Resistors
- Non-Porous Tubular Ceramic Shells Sealed With High Temperature Silicone Cement
- Unexcelled Insulation and Mechanical Protection. Can be Mounted in Direct Contact With Chassis
- Call Your Sprague Industrial Distributor for Quantity Prices.
- For Complete Technical Details, Refer to Latest Issue of Sprague Engineering Bulletin 7300

Commercial Tab-Terminal KOOLOHM® Wirewound Resistors

- Ceramic Outer Jacket. May be Mounted Anywhere—Even Flat Against Grounded Parts.
- Each resistor is Tropicallized by a Glazed Ceramic Outer Coating and Improved End Seals Which Offer Complete Protection Seals Which Offer Complete Protection Against Moisture or Any Other Climatic Conditions
- Extremely High Insulation Resistance—10,000 Volts From Surface of Ceramic Jacket to Inner Resistance Elements
- Standard Resistance Tolerance: ±5%
- Insulated Wire Permits Winding Higher Values in Layers Which Means Much Smaller Physical Sizes for Each Wattage Rating
- Insulated Wire Permits True Non-Inductive Wound Designs
- These Resistors Are Also Available in 5 and 10 Watt Ratings, Axial-Lead Style. See Latest Issue of Sprague Catalog C-619
- For Technical Data, See Latest Issue of Sprague Engineering Bulletin 7310

SPRAGUE RESISTORS

BLUE JACKET® INDUSTRIAL WIREWOUND RESISTORS

- Improved Minified Resistors Designed for Thorough Reliability and Stability Under Extreme Operating Conditions
- Matched Coefficient of Expansion Allows Uniform Expansion of Vitreous Enamel Coating, Ceramic Base, and End Caps, Eliminating Crazing, Cracks, and Protects From Fumes and Humidity
- Windings and Leads Welded to End-Caps for Superior Mechanical Strength
- For 2BJ, 3BJ, 5BJ and 10BJ Commercial or Service Equivalents to These Resistors, Refer to the Latest issue of Sprague Catalog C-619
- For Complete Technical Data, See Latest Issue of Sprague Engineering Bulletin 7410

SPRAGUE RESISTORS

ACRASIL® PRECISION/POWER WIREWOUND RESISTORS

- Exclusive Silicone Coating Has Such Excellent Protective Qualities That Extremely Fine Diameter Wire is Used in Winding Resistor Body —Result is Higher Values of Resistance Than Were Previously Available.
- Extended Range of Resistance Values In No Way Impairs the Stability or Reliability of These Resistors, Even Under Extreme Operating Conditions.
- Small Size—Ideal for High-Density Circuitry.
- Both Standard and Non-Inductive Winding Are Available.
- Designed to Meet the Stringent Requirement of MIL-R-26E.
- Standard Resistance Tolerance, ±1%.
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 7450.

STACKPOLE

FIXED COMPOSITION RESISTORS

Stackpole Resistors offer superior performance in terms of load life, moisture resistance, shelf life, and other important characteristics. Available in ¼, ½, 1, and 2 watt insulated types in resistance values with 5%, 10% and 20% tolerances as shown below.

EASIEST SOLDERING

is asured thanks to an exclusive extra solder coating applied after the usual tin dipping. Leads of Stackpole Resistors solder readily by any method—dip or iron—stay tarnish free even after months in storage. And, their baked-on color codes resist solvent scrubbing operations . . . maintain uniform, attractive appearance.

Axiohm® RESISTORS
Vitreous Enamel Wire-Wound Power Type

AXIOHM, the miniaturized, space-saving power resistor line, is designed for automation, printed circuits and advanced miniaturization use. Recommended for electronic and industrial use where high O.L. capacity and high stability are a "must." Ratings based on 325°C rise. Order by Type No. and Ohms.

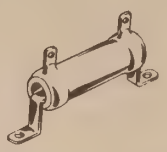
WARD LEONARD

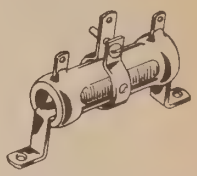
Vitrohm® RESISTORS
Vitreous Enamel Wire-Wound Power Type

ITROHM LUG TERMINAL RESISTORS are the most advanced wire-wound power resistors you can specify. The itreous enamel coating, a high heat conducting medium eveloped and manufactured only by Ward Leonard is ough, hard, moisture and acid resistant. Ceramic cores, oo, are Ward Leonard made. Alloys for resistance wire nd terminals are manufactured to exacting specs. And itrohm lug resistors include a unique two piece terminal alloy band with matched coefficient of expansion and a inned copper tab for best solderability). Result... built-in eliability and uniformity proven through the years.



Vitrohm lug terminal resistors utilize Ward Leonard's new Dual-Power Rating System, i.e. 50/35 watts, 50/35F.

Temperature rise, ambient, resistance, applied voltage and ther factors influence the power that can be safely applied to a resistor. The dual-power rating takes these factors into account. For example, the 50/35 watt unit indicates 50 watts for units in the low resistance range; 35 watts for the higher resistances. 35 watts represents the power rating under the worst normal conditions. See Catalog ww/wl/270 for technical data.



Standard resistance tolerance: ±5% fixed; ±10%-5% adjustable.

Types 5F, 10F, and 20F. Furnished with wire terminal leads. Brackets supplied on request.

Types 25F, 50F, 100F, 160F, 200F. Furnished with lug terminals and mounting brackets.

Types 10A, 25A, 50A, 80A, 100A, 160A, 200A. Furnished with mounting brackets and one adjustable band.

STRIPOHM RESISTORS

itrohm construction but flat design for applications where space for mounting component is extremely limited. Strip shape, low silhouette mounting and terminal arrangement provides extra space saving. Multiple stacking permissible by using 3/32" washers. Push-in mounting brackets furnished. 10, 15, 20 watt sizes based on 300°C rise. Larger sizes 300°C rise with resistor mounted horizontally on a vertical 12" sq. x .040" steel plate. Adjustable types to order. Tolerance: ±5% fixed.

10-WATT TYPE 10S

Size: 1¼" long x 21/32" wide over lugs. Mounting centers, 1".

Resistance Range, Ohms	Net Each
1-1,000	$1.17
1,250-5,000	1.22
7,500-10,000	1.24

15-WATT TYPE 15S

Size: 1½" long x 21/32" wide over lugs. Mounting centers, 1¼".

1-1,000	$1.19
1,250-5,000	1.24
7,500-10,000	1.28
15,000	1.33

20-WATT TYPE 20S

Size: 2 3/32" long x 7/8" wide over lugs. Mounting centers, 2 5/16".

1-1,000	$1.21
1,250-5,000	1.25
7,500-10,000	1.30
15,000-20,000	1.32

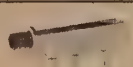
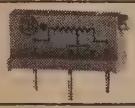
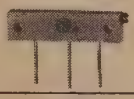
It's so easy to order from this catalog...

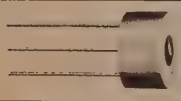
When ordering products shown in this book or writing for additional information, please be sure to specify:

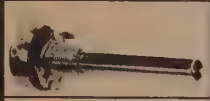
1. **The Year and Edition of This MASTER.**
2. **Manufacturer's Catalog Numbers and Page Numbers.**











This will avoid confusion and expedite delivery.

Thank you!

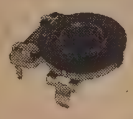
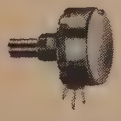
APPLICATION INFORMATION

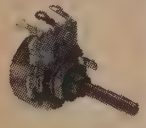
CTS CERMET Potentiometers are designed for applications requiring higher power, temperature and stability than have been previously available with carbon elements and higher resistance and better resolution than have been available with wirewound potentiometers. They are ideal for applications now using carbon element potentiometers where an ultra-conservative rating is desired for high reliability.

CTS CERMET Trimmers are used in applications where wirewound distributed capacitance and inductance are intolerable due to high frequencies and in applications where a trimmer with high stability and better reliability than obtainable from a carbon trimmer is needed.

TRIMMERS/POTENTIOMETERS







CARBON

	CTS Series	Description	Element Type	Resistance Range & Tol.	Power Rating (Watts)	Max. Op. Temp.	No. of Turns	Prices 1-9	Prices 10-24	Prices 25-49
	45	15/16" Panel Mount Shaft: ¼" Dia. x ½" to 3" FMS. 20 shaft styles. Linear and audio tapers. Single and and multi sections	Carbon	500Ω-10 Meg ±20%	½ @ 55°C	85°C	1	Price dependent upon combination of components ordered.		

The CTS 45 series snap-together system was designed to provide a wide variety of combinations of ½ watt controls for industrial applications. This system includes the most commonly used resistance values plus five basic components combining to quickly assemble any of 8,000,000 specifications. Included are 25 resistance values and tapers for single controls (panel section of multi-section controls), 20 popular values and tapers of multi-section or rear control sections, 20 most used shafts, two rotary power switches and a control dust cover.

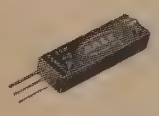
ROTARY SELECTOR SWITCHES

	CTS Series	Description	Electrical Rating	Contact Life	Detent & Detent Rotational Life	Indexing
	212	1 1/16" one-piece molded glass alkyd wafer. Panel mount. Bushing: 3/8"-32 UNEF-2A thd., 3/8" long. Shaft: 1/4" dia. x 2" FMS, Round.	1 amp @ 28V DC 3/4 amp @ 115V AC. Shorting or Non-shorting type.	25,000 cycles through 12 positions and return.	STANDARD balanced double bump formed spring in a hill and valley type detent providing a minimum of 25,000 cycles through 12 positions and return. SPECIAL CTS balanced lever arm and star wheel detent assembly has a rated life of 100,000 cycles through 12 positions and return. (CTS Series 211).	Both hill and valley and star wheel detents provide 30° indexing from 2 to 12 positions; both have one fixed and one adjustable stop.

The CTS series 212 selector switch is available in a number of completed switch configurations and also as individual component parts for customer fabrication. The unique one-piece wafer features rivet-free construction for closer stacking. The molded glass alkyd material will not break if jarred or dropped.

Switch accessories include a selection of attachable CTS AC power switches, open or enclosed detent dust sealing kits, shields and mounting brackets.

DATA SHEETS



Complete electrical and mechanical data on each of the products covered in this catalog are available, upon request, from the local CTS industrial distributor

RHEOSTATS

POWER

VITREOUS ENAMELED

MEMCOR power vitreous enameled rheostats are exceptionally rugged and are "made better than they need be." They exhibit characteristics that meet the most exacting specifications. Special design features assure long life and protection under extremes of humidity and abnormal atmospheric conditions.

In the 225, 500, 750 and 1000 watt sizes the "buss bar" contact arm automatically adjusts for complete, continuous contact, and smooth, flexible control. MEMCOR high temperature enamel gives increased service life with an extreme factor of safety.

MEMCOR rheostats are stocked in eleven sizes; 12½ through 1000 watts resistance from 0.5 to 10,000 ohms with diameters from ⅞" through 12". All standard stock units are identified by stock number.

RHEOSTATS

POWER

VITREOUS ENAMELED

MEMCOR rheostats are made in a wide assortment of variations, among which are included tapers, off - positions, ventilated enclosures, dust - proof enclosures, tandems, toggle switches, micro switches, switching lugs and many variations of shaft and panel mountings. Extra length flattened, round or screw driver shaft assemblies and special length bushings or other special requirements per customer drawing are available.

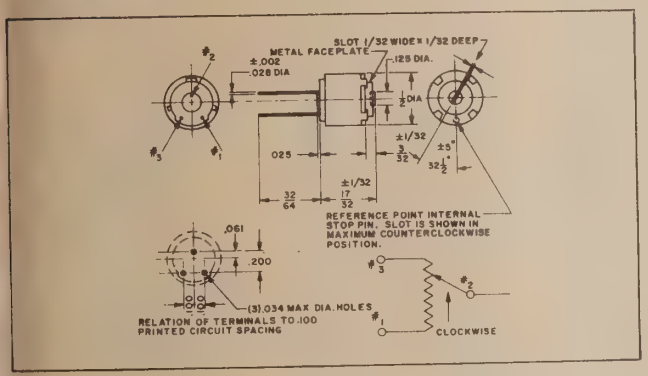
- *Speedy purchasing — one order does the job*

OHMITE hot molded single-turn trimmers



TYPE AFR — SINGLE TURN

OHMITE type AFR Trimmers are single-turn controls built to withstand severe environmental conditions. Their unique design includes a hot-molded resistor track bridged by a single moving molded contact brush. Resistance material, collector track material, insulation material and metal terminals are all molded together at one time into a single, solid, integral structure. There are no cracks or crevices to admit moisture.

Enclosure of the Ohmite type AFR is non-magnetic, corrosion resistant, and splash-proof. Type AFR Trimmers are designed for screwdriver adjustment. Fixed stops withstand a maximum shaft torque of 2 inch-pounds.

In excess of 50,000 operational cycles with low "noise" level initially — decreasing with use — can be expected in conventional applications.

CHARACTERISTICS:

Power Rating: ¼ watt @ +70° C ambient temperature. Derate power linearly to zero at +120° C ambient for resistance values to 0.5 megohms. Additional derating required for resistance values over 0.1 megohms at ambients higher than 70° C.

Resistance Range: 100 ohms to 5.0 megohms. Resistance change is nominally linear with shaft rotation.

Tolerance: ±20% standard.

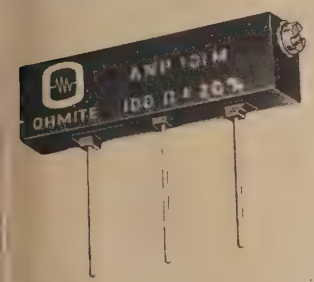
Temperature Range: —55° C to +120° C.

Working Voltage: 350 volts, RMS, maximum.

Dielectric Strength: 750 VAC, RMS, at sea level.

Adjustment: Single turn, 295 ±5 degrees.

Torque: 0.25 to 3.0 inch-ounces.



Leads: Designed for mounting directly on printed wiring boards using the terminal leads which are spaced to fit the 0.1" printed wiring board standard spacing.

hot molded 25-turn trimmers

TYPE ANP — 25-TURN

Ohmite type ANP Hot-Molded Trimmers are continuously adjustable 25-turn variable resistors intended primarily for trimmer applications. Designed for use on printed circuit boards, these dependable three-terminal devices can be applied as either rheostats or potentiometers with equally satisfactory results. Stepless and relatively non-inductive regardless of resistance value. Unexcelled stability of setting in normal environmental conditions.

The type ANP Trimmer is produced by a hot-molding process using a high insulation material together with a hot molded resistance track, low resistance collector track and terminal pins — all combined into a single, solid, integral structure. The type ANP is splash-proof, dust-tight and can be mounted by its own rugged terminals.

CHARACTERISTICS:

Power Rating: ⅓ watt @ 50° C ambient temperature. Derate power linearly to zero at 100° C.

Resistance Range: 100 ohms to 0.1 megohms. Resistance change is nominally linear with shaft rotation.

Tolerance: Standard resistance tolerance is ±20%.

Temperature Range: —55° C to +100° C.

Working Voltage: 350 volts RMS, maximum at sea level.

Dielectric Strength: 700 volts RMS maximum, at sea level.

Insulation Resistance: 1000 megohms minimum.

Adjustment: 25 ± 3 turns for continuous resistance change. Mechanical release at end positions. Turning torque is 0.10 to 8 inches-ounce. Slotted for screwdriver adjustment.

Leads: Pin type terminals, spaced in accordance with 0.1" printed wiring board grid system.

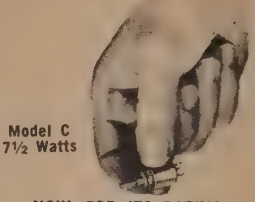
OHMITE vitreous enameled rheostats (potentiometers)



Now, Ohmite offers TWELVE sizes in its line of famous rheostats ranging from 7.5 to 1000 watts. Nothing to shrink or burn, all models are metal and ceramic construction and coated with Ohmite's exclusive vitreous enamel or Ohmicone® silicone ceramic. The revolutionary Model C, 7½ watt miniature unit, **the smallest rheostat of its rating available,** employs this same construction! All Model C stock units and the enclosed Model E unit, are normally supplied in a corrosion-resistant dust-proof case. Model C units are stocked in both standard and locking type bushings.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel or Ohmicone® silicone ceramic. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

Models H, J, G, K, L, P, and N, marked "Series A," are listed under the Underwriter's Laboratories Reexamination Service. RHEOSTAT KNOBS are listed on page 20. Rheostats can be supplied to meet military specification MIL-R-22.

RATINGS: Current ratings shown, assume use in free air. If units are enclosed, currents should be reduced to as much as 50% depending upon ventilation. The rated current causes the rheostat to dissipate its rated wattage when its full resistance is in the circuit.

SPECIAL RHEOSTAT FEATURES: Hundreds of features to meet your special rheostat requirements can be furnished. Submit your specifications.

OHMITE molded composition potentiometers

Ohmite molded composition potentiometers are used in commercial and military electronic applications where high quality and dependable performance are important. Type AB is rated 2 watts at 70°C ambient and is available with 7/8" slotted shaft (CMU), 2" unslotted shaft (CU, CA, CB, CCU) and locking type bushing with slotted shaft (CLU). Type AS is a miniature unit rated ½ watt. It is available with locking type bushing and slotted shaft (Style AS) and standard bushing with longer (slotted) shaft for knob control (Style ASM).

Because the resistance element is a thick, solid-molded ring — not a sprayed film or paint-type resistor — longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are dust and splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94. Styles CMU, CLU, AS and ASM conform respectively to MIL-R-94, Styles RV4N, RV4L, RV6L and RV6N.

Styles and tapers are listed in table. Dimensions of all stock units are shown below. A SPST switch for single AB controls can be supplied (see below table).

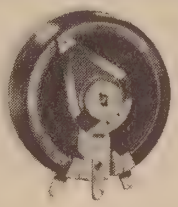
WARD LEONARD

POWER RHEOSTATS

THE STANDARD OF QUALITY FOR ELECTRONIC AND INDUSTRIAL PURPOSES



12.5 Watt — Type MP06

25 Watt — Type MP10

50 Watt — Type MP15

100 Watt — Type 100R

150 Watt — Type 150R

APPLICATIONS

Ward Leonard Power Rheostats are especially suited for use in electronic and electrical circuits where gradual and positive resistance changes are essential.

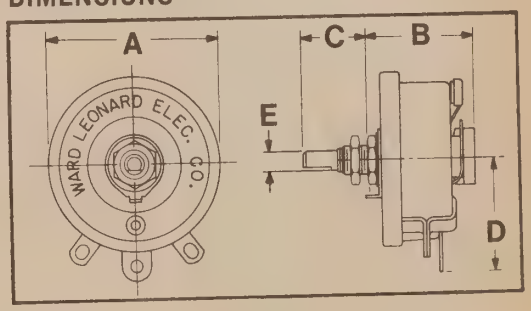
Balanced contact arms, self-lubricating metal graphite contact shoes, and no backlash in the drive shaft combine to ensure uniform contact pressure and smooth operation.

The 12.5, 25, and 50 watt Type MP rheostats, designed and acceptance-tested to the requirements of MIL-R-22, are completely interchangeable with other suppliers' rheostats. The tiny yet exceptionally rugged 12.5 watt rheostat, recently added to Ward Leonard's line, will handle those special low-power requirements with ease.

Immediate shipment from Ward Leonard's vast and varied stock of power rheostats assures you of fast, on-time delivery.

FEATURES

- Compact design
- Standardized for interchangeability
- Suitable for both MIL and industrial uses
- 12.5, 25, 50, 100, 150, and 300 watt sizes
- All ceramic construction—vitreous enamel bonded



300 Watt — Type 300R

SERVICE-DESIGNED ENTERTAINMENT SEMICONDUCTORS

UNIVERSAL REPLACEMENT TRANSISTORS

Highly dependable low-cost germanium and silicon transistors especially designed as general replacements for most types of transistors used in Radio and TV Sets and other home entertainment devices.

Cat. No.	Unit Type	Application(s)	Config-uration	Use	Max. Current	Max. Wattage	Max. Coll/Emit. Volts	Sugg. List Price
GE-1	Germanium	Mixer/Oscillator Converter, RF & IF Amplifiers (AM Radio)	TO-5	PNP	100MA	150MW	12V	$2.00

* Silicon Unijunction

GE GE-504A AND GE-509 UNIVERSAL RECTIFIERS

A silicon rectifier with a 100-amp surge rating. Recommended as a replacement for all selenium, germanium and silicon rectifiers used in TV receivers. The 100-amp surge rating eliminates the need for the surge limiting resistors normally required when silicon rectifiers are used.

Type	PIV	I_{DC}	Sugg. List Price	Type	PIV	I_{DC}	Sugg. List Price
GE-504A	600V	1A	$1.10	GE-509	1000V	1A	$1.25

GE TYPE IN91 GERMANIUM RECTIFIER

This top hat, hermetically sealed rectifier is designed for general-purpose applications.

PIV is 100 volts; maximum I_{DC} is 150 mA. Suggested List Price $1.55.

GE BR-600 SILICON RECTIFIER

This rectifier utilizes GE-504A type units connected in full-wave bridge configuration; the total bridge is encapsulated in plastic.

PRV is 600 volts; maximum I_{DC} is 1.5 amp. Suggested List Price $5.10.

GE VAC-U-SEL® DOUBLE/DIODES

Miniature double diodes for TV horizontal phase detector, replacement and other applications. 7/16 x 9/16 x 3/16".

Type No.	Ifwd	Imr	Description	Max Case Temp.	Sugg. List Price
6GC1	1.1 @ 2.5V	4 @ 20V	Common cathode	85°C	$0.90

SILICON POWER RECTIFIERS

HY-A-SIL
High - Ampere - Silicon

FEATURES

- High operating temperature, 190°C (Up to 120°C ambient)
- High operating voltage (Up to 600 p.i.v.)
- High efficiency (99% compared to about 75% for selenium)
- Excellent regulation (4% compared to about 15% for selenium)

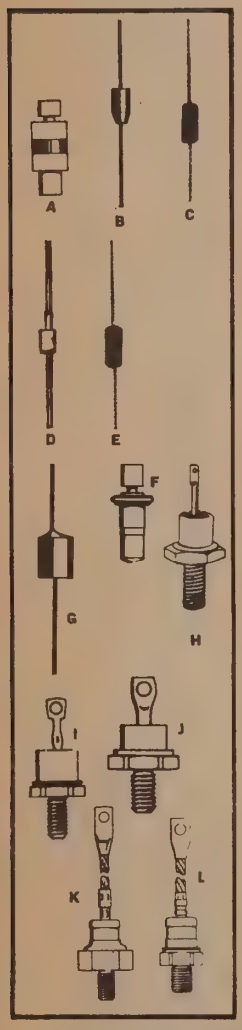
SARKES TARZIAN

Silicon Avalanche Rectifiers



All of the silicon rectifiers listed below are supplied with avalanche characteristics as standard. They are direct replacements, electrically and physically, for ordinary silicon rectifiers, yet they provide important benefits to you and your products, **at no** extra cost.

Overvoltage protection is built into the rectifier. Transient voltage induced failures are virtually eliminated because these units avalanche at voltages well below the destruction point. The overvoltage spike is dissipated through the junction at a point below the critical voltage stress across the edge of the junction.

Lower circuit costs are readily achieved. When avalanche rectifiers are used suppressor and balancing devices, such as resistors, capacitors, R-C networks, etc., are no longer needed. In addition, their elimination improves circuit reliability, due to a reduction in number of components and interconnections.

Dependable performance is assured. Over 20,000,000 of these devices already have been delivered and are in actual use in the field. They are now routinely available from high volume production lines.

1 TO 6 AMP RECTIFIERS

[1] Derate 50% for single phase halfwave with capacitor load.
[2] Derate current 20% for single phase operation on battery motor or capacitive load
[3] Add suffix "N" for anode connected to stud.

KLIPVOLT SURGE SUPPRESSORS

A voltage transient does its damage in a few microseconds—destroying semiconductors or causing circuit malfunction. But Tarzian Klipvolt selenium suppressors protect semiconductor components and circuits from voltage transients in 1/10 the time required for silicon device reaction.

Tarzian Klipvolt selenium suppressors have turn-on and turn-off characteristics that exceed requirements of even the fastest silicon devices available. Typical Klipvolts can turn on, or off, within 200 nanoseconds.

Tarzian Klipvolt surge suppressors inhibit or reduce peak voltages generated in many different kinds of circuits. They are used to protect silicon rectifiers, transistors and other semiconductor devices and to reduce noise transients.

Polarized types function in DC circuitry and non-polarized types in AC circuits. Extremely small units are available for easy mounting on printed circuit boards.

2VR160	160	1	970
2VR180	180	1	1200
2VR200	200	1	1400

NOTES: Maximum Dissipation — 2 Watts.

3 WATT PLASTIC CASE — 3VR SERIES (Style G)

Tarzian Type	Specifications @ 25°C: Breakdown Voltage (VB)	Test Current (Ma)	Dyn. Imped. (Ohms)
3VR6	6	250	1.0
3VR8.5	8.5	250	1.5
3VR12	12	250	2.0
3VR18	18	75	3.0
3VR24	24	75	5.0
3VR33	33	75	8.0
3VR47	47	30	15.0
3VR67	67	30	30.0
3VR90	90	30	60.0
3VR120	120	15	100.0
3VR150	150	15	200.0
3VR180	180	15	300.0
3VR200	200	15	350.0

NOTES: Maximum Dissipation — 3 Watt.

Add Suffix "A" to type number for 10% tolerance; Suffix "B" for 5% tolerance. For reverse polarity add Suffix "R" to type number and Jedec number.

Example: 1TA6-8RA; 1N30168A

10 WATT STUD MOUNT — 10T SERIES (Style H)

Tarzian Type	Specifications @ 25°C: Zener Volt (V)	Test Current (Ma)	Dyn. Imped. (Ohms)	Jedec Type

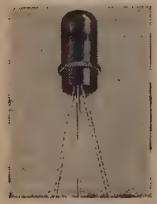
SPRAGUE SEMICONDUCTORS

GERMANIUM & SILICON TRANSISTORS



- Sprague Transistors are Produced by Advanced Equipment and the Latest Manufacturing Techniques.
- Excellent Design Flexibility and Electrical Properties Meet the Most Rigid Performance and Reliability Standards.
- Highest Quality and Outstanding Economy.
- For Complete Technical Data, Refer to Latest Issue of the Applicable Engineering Bulletin.

Call your Sprague Industrial Distributor for current quantity prices.

SPRAGUE SEMICONDUCTORS

ECONOLINE® PLASTIC-MOLDED TRANSISTORS

- An Improved Low-Cost Line of Transistors Priced for Commercial Applications, Yet Retain the Reliability Required in Industrial Equipment.
- Automated Assembly and Plastic Packaging Bring Prices Substantially Under Those of Comparable Metal-Can Types.
- For More Data, See latest Issue of Short-Form Catalog IND-851.

SEMICONDUCTOR DIVISION

ALCOSWITCH®

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.

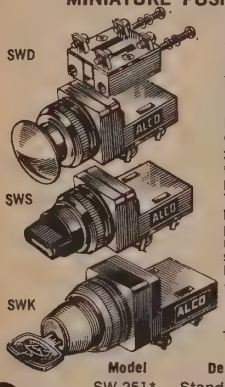
BASE MOUNTED KEYBOARD PUSH BUTTON SWITCH

Reed actuated low profile, single pole Normally Open unit provides the low operating force and high reliability required in keyboards. RSM-41 is suitable for an 0.75 inch matrix, and is free from interaction between units. The switch is molded in high quality glass filled nylon and acetal resin, and is an FR Hamlin reed switch actuated by a permanent magnet.

Model	Description	One-24	25-99	100-499
RSM-41*	Keyboard Push Button Switch	2.55	1.90	1.79
RSB-1**	Blank Key	.15	.12	.105
RSB-1N	Two Shot Molded Keys 0 to 9 (specify)	.20	.16	.14

*Includes Blank Keytop (Black). **Specify color: Black, White, Red, Blue, Gray.

Performance Data		Electrical Ratings	
Total Stroke:	0.140"	Voltage:	50 volts
Minimum Pretravel:	0.060"	Current:	500 mA
Minimum Overtravel:	0.030"	Power:	10 watts
Minimum Travel After Release:	0.032"	Initial Contact Res:	150 milliohms
Min. Operating Force:	1.2 ozs.	Life:	10,000,000 operations



MSS SERIES MINIATURE SLIDE SWITCHES

MSS-22 Miniature Slide Switch with unusual two-circuit N.O.-N.C. (useable as SPDT) anti-tease design. Rated 2 amps @ 120 VAC. Compact ½" case has corrosion-proof metal case and phenolic slide block. Gold on nickel on silver-plated brass contacts. Life cycle, 250,000 operations. Case size, .500" x .305" x .257"; mounts .687" centers.

Model	Description	One-24	25-99	100-499	500-999
MSS-22	SPDT, 2 circuit	1.75	1.17	.88	.73
MSS-44	DPDT	3.15	2.11	1.58	1.31

MINIATURE PUSH BUTTON MOTOR START SWITCHES

Alco Miniature Power Switches combine a compact size, modern appearance and functional flexibility to meet today's control needs and mount in a 1" hole. Rated to carry to carry 6 amps @ 230 VAC. These switches may be used to control circuits independently or with optional relays. All models supplied with a single (N.O.-N.C.) contact block but have provisions for additional (SU) blocks thereby converting to DPDT, 3PDT, 4PDT.

3-Way Selector Power Switch is the same basic model as above but instead has a bar knob with pointer. Electrical and physical specifications are the same. Available in black only.

Key-Lock Push Button type is an accident-proof power switch that has its own key lock to prevent unwanted operations of machines and controls. The switch functions only when the key disengages the lock. Same specs as the series described above.

*Push button models are equipped with spare (snap-on) colored buttons offering a choice of use in red, black, or green.

†Standard snap-on buttons with legend for SW-251 switches.

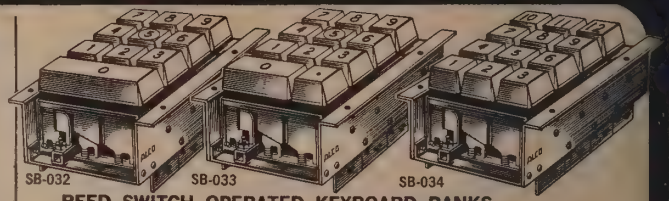
COMPACT FOOT SWITCH FOR RELIABLE OPERATION

SPDT momentary-contact switch has spring return and non-skid base. Size: 3¼"x3¼" x1".

Model	Supplied	One-24	25-99	100-499
SKF	Less Cable	4.65	3.16	2.79
SKF-6	With 6-ft. Cable	5.85	3.98	3.51



LOCK-RELEASE — MODULAR SECTIONS

This series is similar in appearance and specifications to the SB series described to the right. This group differs because a bar is installed that provides a single locking operation. Overall length varies depending on the number of switches involved, each spaced 0.700" apart. Same SBB type keys are used (not supplied) and may be ordered separately. Note, removal of locking bar converts this switch into a momentary model.

Model	Number Positions	Description	One-24	25-99	100-499
SB-1	1	Momentary	2.70	2.16	—
SBL-1	1	Locking	2.95	2.36	—

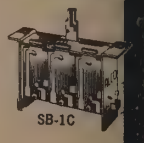
Above switches are supplied less keys; order from listing at right.

REED SWITCH OPERATED KEYBOARD BANKS

Now designers can be assured of highest reliability in data processing equipment. Short strokes provide a smooth operation of the switch plunger resulting in one of the finest keyboard actions obtainable. It is also suitable for test equipment, communication gear, and many other applications. All details of this switch line are designed for light pressure (5 ounces), operator's convenience, and positive input of data with long life under heavy office type of usage. Highly efficient "single-pole open circuit' reed switches are used assuring reliability and extremely long life expectancy. Square light grey keys (⅞") have an industry standard 0-9 marking and format. All switch positions contain a "positive lockout" between sections and rows. This feature prevents more than one position from operating at the same time. This basic keyboard system is designed for flexibility and can be customized to meet the special needs of quantity users. Up to 12 switches may be installed in the basic module in any combination including momentary, or lockout design.

SPECIFICATIONS



Dimensions:	2.81" W. x 3.62" L. x 2.25" D.

*SB-035PC	Momentary 1-12 Numerals	29.50

*With printed circuit connectors

MOMENTARY MODULAR SECTIONS

This modular idea is a simple concept, which allows the design engineer to create his own custom push button layouts. Highly efficient single pole "normally-open" reed switches aer used throughout thus assuring reliability and an extremely long life expectancy. Light pressure (5 ounces) and short strokes result in optimum operators' convenience and positive input of data. The basic module allows use of one to three switches in either momentary or alternate "push-ON-push-OFF" action. Stacking allows any number of these switch sections to be used in a group by themselves or with our matching keyboard assemblies SB-032, SB-033, SB-034, SB-035. Standard size switch Keys are available separately in various colors, either single or extended Keys which span 2 or 3 switches. Note: that by use of wider keys it is also possible to form 2 or 3 pole switch functions.

SPECIFICATIONS

INDEPENDENT LOCKING — MODULAR SECTIONS

New series of inline keyboard switch modules are similar to the SB Series described above except these switches have alternate action, independent of each other. When one switch is depressed, it remains that way regardless of the switching action of the rest of the module. Same SBB type keys are used.

Model	Number Positions	Description	One-24	25-99	100-499

MST SERIES MINIATURE TOGGLE SWITCHES

The original Alcoswitch Series of high quality ultra-miniature toggle switches combines high current capacity and long life in a ½" case. Slim, bat handle or optional plastic caps(*) are provided. Terminals and contacts are solid silver. Case material is black phenolic resin; 1/4-40 threaded bushing. Rated 5 amps at 115 VAC. SPDT and DPDT types have life cycle of over 80,000 on-off operations. High voltage barriers between terminals and contacts. Rated 5 amps @ 115 VAC.

MSTA SERIES MINIATURE TOGGLE SWITCHES

This new Alcoswitch "MSTA" Series fills a need for those who want the best product possible at an optimum price. Similar in appearance and specs to the Alco "E" Series but without the waterproof feature. Has the important features wanted in a good miniature: turret terminals, extra-wide contacts, heavier current capabilities, low-loss, high heat and high impact case construction. "No Tear" shoulder on bushing. 6A 125V/3A 280 VAC.

MSTE SERIES MINIATURE TOGGLE SWITCHES

The new "E" Series has the most-wanted features in miniature switches. Waterproof 'O' rings are located inside the toggle and on the shoulder. A mechanical shoulder on the bottom of the bushing prevents "tear-offs" when a single mounting nut is employed. High voltage barriers between terminals inside as well as outside. Case has a new, superior plastic material capable of withstanding a higher impact; guards against accidental damage. Low-loss case has extremely high resistance between terminals and case ground, and its high temperature coefficient is ideally suited for prolonged soldering and printed circuits. Turret type terminals are used for simplified wiring or for P.C. Extra-wide, solid silver contacts are bonded, not riveted, on copper-silver plated terminals. Long-life cycle over 100,000 On-Off operations at operating conditions (SPDT). Rated 6 amps @ 125 VAC.

MSTG SERIES MINIATURE TOGGLE SWITCHES

Mustang

The Mustang Series is for designers who prefer the feel of a larger toggle switch but have space limitations behind today's compact panel. The familiar ultra-miniature Alcoswitch ½" case is utilized, however the Mustang mounting requirements are the same as the larger switches with 15/32" bushings. This new Alcoswitch concept is a behind-the-panel space-saver in all Mustang models and it is especially true in the 3 Pole and 4 Pole Series where non-miniature switches are bulky in size. The Mustang switches have the most-wanted features as itemized in the "E" Series story (at left) with the exception of the waterproof 'O' rings. The case construction is of low-loss, high impact and high temperature materials with turret terminals and silver contacts. 6 amps @ 125 VAC.

MINIATURE CYLINDRICAL TOGGLE SWITCHES

New design cylindrical case for miniature toggle switches when a positive feel and reliability are prerequisite in the smallest size possible. All metal construction and high impact terminal insulator allows use under all environmental conditions. Rated 10 amps @ 125 VAC. Internal contact resistance; under 20 milliohms @ 2-4 VDC, 1 amp. Life 40,000 on-off operations. Contact material, silver on copper. U/L Approval available on special order.

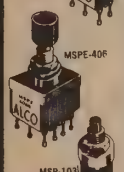
MINIATURE PUSH BUTTON SWITCHES

MSP Miniature Pushbutton Switches, snap-action, 5 amps @ 115VAC. Solid silver contacts, terminals. Bushing size, ¼-40 with keyway. Black phenolic case. 20,000 life cycle.



MSPE Waterproof Pushbutton Switches, 6 amps resistive, 2 amps inductive @ 125VAC. Double "O" waterseals, low-loss "E" Series case; turret terminals. Versatile "double-throw".

MSP-103 Economy Pushbutton Switches, 3 amps @ 125VAC. Low-pressure. Silverplated brass contacts, terminals. Plunger travels .098". Depth behind panel, ¾". 1-pc. ¼-40 bushing.

MSPS-103C is similar to MSP-103C except smaller diameter .310 Rated 0.5 amps @ 125 VAC.

ILLUMINATED PUSH BUTTON SWITCHES

MSPN Illuminated Push Button Switches are snap-action types capable of handling a high current rating for its small size. DPDT action in a miniature case with separate connections to its replaceable T-1¾ grooved base lamps. Side terminals for simplified wiring or P.C. use. Metal construction, phenolic case, solid silver contacts. 6 amps @ 125 VAC. Mounts in 13/32" dia. hole. Wide choice of plastic buttons. **TRANSPARENT** colors: Red, Amber, Blue, Green, Clear. **TRANSLUCENT:** Red, Yellow, Green, White. Uses grooved base lamps.

KEYBOARD MAGNETIC REPULSION PUSH BUTTON SWITCHES

Momentary push button switches designed for data entry in modern electronic equipment. Ceramic magnets eliminate springs and allow for a very unusual touch that is light and snappy with little change in pressure over very long periods of service. Contacts are glass-encapsulated reeds for long-life. Plunger is keyed and non-rotating. Metal case withstands abuse and serves as a shield. Rated 100 mA @ 50 VDC, resistance 100 milliohms. Contact bounce 1 millisecond. Plunger travel 5/64". Operating force, under 2 ozs. Life, 10 million.

MINIATURE ROTARY SWITCHES

MRA Adjustable-Stop Rotary Switches are miniature types rated 500 mA @ 125 VAC. Features: adjustable-stop; non-shorting; 36° spacing; up to 4 poles on single deck; solid silver terminals and contacts. Types with suffix **S,** ⅛", dia. shaft less knob. Bushing, ¼-40.

MRA 12-Position Rotary Switches are slightly larger than standard MRA Series has ⅛" shaft and 30° spacing. Other specs similar to MRA Series. Knobs not included. Type MRA-1-12S can be converted to an adjustable-stop switch when used with KCVS-500 knob (see Alco knob listings).

MSRE Waterproof Rotary Switches are non-adjustable. Similar to MRA Series but feature internal and external 'O' rings. One-piece metal case construction, and terminals are epoxy sealed. ⅛" shaft. Ideal for printed circuits. Supplied less knob. Rated 500 mA @ 125 VAC. Can be converted to an adjustable-stop switch when used with KCVS-500 knob (see knob listings).

A Spanner Wrench designed expressly to expedite the proper installation of ALCOSWITCH. A long, tapered arm extends at a slight angle allowing the user to tighten the lower mounting nut.
Model No. W-1 ..... **Net 25¢ ea.**

Conversion Unit For Rotary Switch Operation. Gangs miniature toggle switches (with ¼" bushings) for controlling multiple circuits simultaneously. Operating as a 2- or 3-position rotary switch, this unit is capable of ganging from 1 to as many as 5 toggle switch combinations that total up to 10 poles. Allows you to have enclosed contacts, and heavier current capabilities. Use with various types of switches to act as a 3-position rotary switch when used with CENTER-OFF or ON-ON-ON type toggle switches, or becomes a 2-position rotary with switches having no center position.

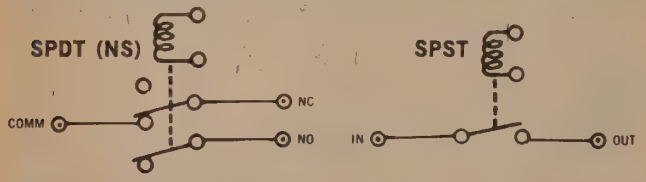
RF SWITCHES

AMPHENOL
THE BUNKER-RAMO CORPORATION

Series 303 High Isolation Microwave Switches



Compact coaxial switches, with superior isolation characteristics over entire operating range, particularly suitable where crosstalk interference must be minimized. Other units are also available, please request additional information and specifications.

CHARACTERISTICS

ELECTRICAL: Frequency Range: standard size and economy 0-12.4 GHz, miniature (303-10179-00) 0-18 GHz. **Characteristic Impedance:** 50 ohms. **Crosstalk (isolation):** 60 db at 12.4 GHz (standard) and at 18 GHz (miniature). **SWR:** 1.5:1 at 12.4 and 18 GHz respectively. **Insertion loss:** 0.5 db maximum. **Contact resistance:** 60.0 milliohms. **RF Power rating:** 100 watts at 1 GHz (power off during switching). **High RF Voltage rating:** 1000 V peak at 60 Hz. **Switching time:** operate 15 ms maximum: release: 10 ms maximum.

MECHANICAL: Minimum life: 1,000,000 cycles.

ENVIRONMENTAL: Temperature range: —55°C to 85°C. **Moisture resistance:** 10 day cycle. **Shock:** operating: 10 g's; non-operating: 100 g's. **Vibration:** operating: Test Cond. B, 10 to 55 cps; non-operating: 20 g's, 10 to 2000 cps. **Altitude and cold:** 0 to 70,000 ft.

Coaxial Relays

Precision coax units. Maximum time to operate and release is 20 milliseconds. Gold-plated, fine silver contacts assure reliable low-level operation. Minimum life expectancy is 1,000,000 cycles, when switch is operated at speeds of less than 10 Hz. Switches are impedance matched to 50-ohm cable, though loss is negligible with 75-ohm cable. Operation is break-before-make. All materials are corrosion resistant.

Units meet applicable portions of military connector specs as follows: BNC — Mil-C-3608 and N — Mil-C-71.

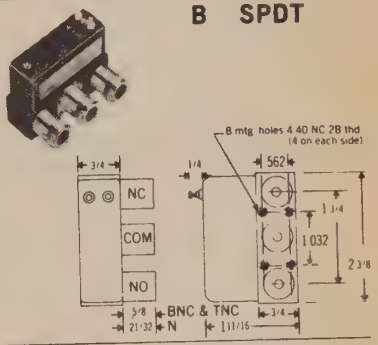
SCHEMATICS



NOTE: High frequency electrical characteristics are typical values (not maximum) as measured in a 50 ohm circuit and may be used for most design analyses. For more exacting applications, maximum values in the frequency range may be obtained upon request. SWR measured to common with a matched 50 ohm termination. **For additional specifications request Amphenol RF Switches Catalog SS-1.**

TRON® SUBMINIATURE PIG-TAIL FUSES

Glass-tube construction with 1-1/2" leads of #24 tinned copper for 1/100-5 amp ratings, #18 tinned copper for 7-15 amp ratings. Hermetically sealed. Color coded to indicate amp ratings. For circuits with fault current of 50 amps or less (1/100-5 amps for 125 V or less, 7-15 amps for 32 V or less). GLN, GLX body size, .140" x .3"; GFA body size, .145" x .3".

Buss No.	Amperes	Net Price For Ten	Net Price For 100
GLN	1/100	$13.10	$110.00
GLN	1/32, 1/20, 1/16, 1/10, 1/8, 3/10, 4/10, 7, 8, 15	11.00	92.00

FUSETRON DUAL-ELEMENT FUSES

Long time-lag prevents useless shut-downs caused by ordinary fuses opening on starting currents or other harmless overloads, yet protects against short-circuits. On normal installations will guard motors against burn-out from overloads or single phasing. U/L Listed for motor running and circuit protection up to 250 volts.

TRON RECTIFIER FUSES

For Protection of Semiconductor Rectifiers and Similar Applications

Especially designed for protection of semiconductor rectifiers, thyristors and other solid state devices. High interrupting capacity and very fast clearing to restrict let-through current and energy to very low values. Give safe short-circuit protection for systems with fault current to 200 kA at 600 volts or less. Carry 100%, open at 1000 secs between 150% and 180% of rating; open within 1 sec at 250% of rating.

GBB SERIES

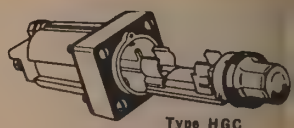
BUSS FUSEHOLDERS

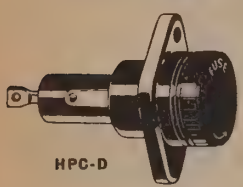


Carton Quantity 10 on all Fuseholders

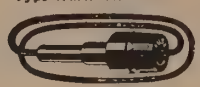
Type HPC

Type HC and HN

Type HKL



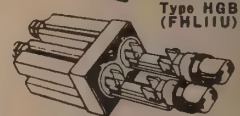
Type HMR and HMS



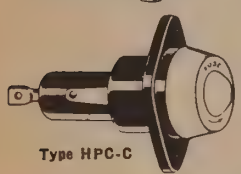
Type HGC (FHLI2U)

Series HJ and HK

Type HKA



Type HGB-C (FHLIIU)



HPC-D

Series HR

Series HCM

Type HLD No. 5487

Type HGA-C (FHLI0U)

Type HPC-C

Series HH and HI

Type HLQ and HLR

Type HTA

*VOLTAGE: On lamp indicating holders shows operating range for lamp indication. On non-indicating holders shows maximum voltage of fuses commercially available that will fit holders.

NON-INDICATING FOR 1/4 x 1 inch FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HDI	In-line	250 or less	15A	$0.17
HHI	In-line	250 or less	15A	.25
HJM	Panel	125 or less	30A	.43
HJM-CC	Panel	125 or less	30A	.43
HJM-H	Panel	125 or less	30A	.46
9969	Spring nut for panel mounting in-line holder			.034

LAMP-INDICATING FOR 1/4 x 1 inch FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HJL	Panel	100 to 250	20A	$1.81

SHIELDED NON-INDICATING FOR 1/4 x 1 inch FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HMS	Panel	250 or less	30A	$5.05

SHIELDED NON-INDICATING FOR 1/4 x 1-1/4 INCH FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HMR	Panel	250 or less	30A	$5.05

SIGNAL ACTIVATING-LAMP INDICATING FOR 1/4 x 1-1/4 inch INDICATING FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HKA	Panel	125 or less	5A	$3.95

LAMP INDICATING FOR 1/4 x 1-1/4 inch FUSES

Buss No.	Type Mounting	*Fuse Voltage	Current Capacity	Net Each
HGA	Panel	100 to 250	30A	$4.40
HGA-C	Panel	100 to 250	30A	4.85

HGC	Panel	200 to 500	30A	$4.7

OTHER STANDARD AND SPECIAL FUSES, BLOCKS AND HOLDERS

If the fuses, fuse blocks and holders shown do not fit your requirements ask for information on other types. Fuses and fuse mountings to meet JAN and Military specifications also available. If you have a special problem in protection, send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

C&K Subminiature Switches

C&K Components manufactures the most complete line of subminiature switches in the world.

The "Specialty of the House" — and what this catalog is all about — is our diversified line of subminiature toggle and pushbutton switches. We make them in just about every shape, size, and configuration imaginable, so they're readily adaptable to a multitude of uses.

C&K high-quality, reliable switches combine maximum performance with minimum weight and size, and are available in one, two, three and four pole models. All of our switches feature rugged construction and simple mounting. This adds up to long-term, trouble-free operation.

Now, more than ever, when you want dependable, top-quality switches at a low price, specify C&K.

We're the people who would rather switch than fight.

Toggle Switches

General Specifications

Contact Ratings:

Coin Silver Contacts — 5 amps resistive load @ 115 VAC or 28 VDC, or 2 amps @ 250 VAC.

Brass Contacts with gold over nickel plate — 0.4 volt-amps max @ 20V MAX (AC or DC).

Coin Silver Contacts with gold over nickel plate — 5 amps resistive load @ 115 VAC or 28 VDC, or 2 amps @ 250 VAC — and 0.4 volt-amps MAX @ 20V MAX (AC or DC).

Insulation Resistance: 1000 megohms minimum. **Dielectric Strength:** 1000 volts rms at sea level.

Electric Life: 100,000 make-and-break cycles minimum on all models ending in 01 only; all other models 40,000 cycles.

Initial Contact Resistance: 10 milliohms maximum at 2-4 VDC, 1 amp.

Operating Lever: Bright chrome-plated brass. **Mounting Bushing:** Cadmium w/clear chromate over brass.

Housing: Stainless steel. **Case Material:** General purpose phenolic.

Momentary Pushbutton Switches

General Specifications

Contact Ratings: Gold contact surfaces on copper alloy terminals (epoxy sealed terminals are standard). 1 Ampere resistive load @ 115 VAC — 28 VDC. Designed for use in dry (very low energy) circuits

Insulation Resistance: 1000 megohms minimum. **Dielectric Strength:** 1000 volts rms at sea level.

Electric Life: 60,000 cycles minimum at full load. **Mechanical Life:** 100,000 make-and-break cycles minimum.

Operating Force: 1.76 oz min per pole. **Release Force:** 1.0 oz min per pole.

Max. Allowable Force on Plunger: 10 lb. **Pushbutton:** Nylon Plunger and cap.

Mounting Bushing: Cadmium w/ clear chromate over brass. High torque to withstand 12 in-lb with no distortion or loosening of parts.

Housing: Stainless steel. **Case Material:** General purpose phenolic.

**These switches are applicable to low voltage D.C. requirements. Available in 3 and 4 Pole Series. For Lighted Tippette add Prefix "L" to above numbers.

Actuator - Suffix # — 1L 5/8" Long Lined (Standard)
— 1C 5/8" Cross Serrated
— 1S 5/8" Smooth
— 2L 5/16" Long Narrow
— 2S 5/16" Short Narrow s/ears
— 3L Offset 5/8" Long Lined
— 3C Offset 5/8" Cross Serrated
— 3S Offset 5/8" Smooth

For Double Actuator Add "D" to end of above number.

For Double Actuator with interlock, Add "DI" to end of above number.

Standard Colors are WHITE, -WH and BLACK, -BL, Other colors available upon request.

Imprinting on Actuators may be had upon request.

Brackets — In addition to the illustrations shown, we offer a variety of brackets — offset, flat, angled, open ear, snap-in, etc. Specials can be made upon request. Snap-in style is designed for panel thickness of approximately .040" to .100". For mounting information and dimensions consult factory. This model bracket is available on single, double and three pole Tippettes — Single and double pole lighted Tippettes. Narrow or wide bezels.

Wire Lead Enclosures — This Snap-On enclosure is available in the single and double pole Tippette and single pole Lighted Tippette series. It is designed to protect and provide safer insulation for normally exposed lead connections.

LIGHTED TIPPETTE FEATURES

Actuators, Brackets & Accessories — Available in the same styles as listed in the Tippette Series. Lenses are Red, Amber, Clear and White. Special variations and colors available.

Lamp Characteristics

Neon (Standard)
120*-240 Volts .002 Amps

Incandescent
6 Volts .20 Amps
12 Volts .08 Amps
24 - 28 Volts .04 Amps.

*Available with "High Brightness" in 120.

MAGNETIC PROXIMITY SWITCH

For Counting Position Limiting Sequence Control Mounts in Any Position

Precision, fast acting, suitable to sequential control functions on machine tools, packaging, material handling and similar industrial devices.

Strong, encapsulated, assures freedom from contamination by cutting oils, dust, powder, chips, etc. Operates up to hundreds of millions of cycles — temperature range −30°C to +105°C. Speed (Max) 200 cycles/sec repeatability within .005".

Switch actuates when brought into proximity with ferrous metals or other magnetic materials. No mechanical linkage necessary for operation. Operating sensitivity in nom. ⅛" make, ½" break. Switch elements sealed in glass, unit is potted in epoxy resin. Case is impervious to oil, water, gas, all common solvents.

Typical actuators include indexing tables, cams, wheels, push rods, die sets, line objects such as food and beverage cans, components, parts, vehicles, rotating and swinging objects, etc.

Note: Additional frame operations available. Contact General Control.

OPERATIONS

B12 POSITIVE LOCK-IN LOCK-OUT
Only one button can be depressed at a time. The Momentary Release button must be actuated to release any previously depressed button before any other button can be actuated.

B13 ACCUMULATIVE LOCK
Buttons pushed in remain locked in position until released by pushing reset button.

B14 NO-TWO-INTERLOCK
Only one button can be pushed in at one time, and releases any other button.

B15 LOCK-RELEASE
Any button pushed in releases any previously pushed in button.

B16 NON-LOCK
Has no locking action; returns to normal position on release of finger pressure.

B17 NON-LOCK, NO-TWO-OPERATIVE
The same as B16 except that no two buttons can be operated simultaneously.

B18 PUSH-LOCK, PUSH-RELEASE
Any button depressed remains locked in until that button is depressed again.

B19 PUSH-LOCK, PUSH-RELEASE, (WITH LOCK-OUT)
This is the same as B18 except that only one button can be depressed at a time.

THUMBWHEEL SWITCHES— PROGRAMMING MODULES & MATRICES

THUMBWHEEL SWITCHES

- SMALLEST PANEL AREA
- SIMPLEST MOUNTING — Snaps into Single Rectangular Cutout!
- WIDEST RANGE OF CODES, STYLES, OPTIONS.

STANDARD TYPES AND CHARACTERISTICS

Type	NOMINAL DIMENSIONS (PER MODULE) Width	Height	Depth*	NO. OF POLES & POSITIONS	TERMINALS** WW	PCP	PCC	SSL	CMC	NOTES
B	1/2"	$2^{1}/_{4}$"	$2^{5}/_{8}$"	2/2, 1/8, 1/11, 1/16	X	0	√	0	√	Largest numerals and widest choice of poles/position formats.
C	3/8"	$1^{5}/_{16}$"	$3^{1}/_{4}$"	2/2, 1/10, 1/11	X	X	0	√	0	Integral circuit board for logic elements to create active code outputs, etc.
F	3/8"	$1^{5}/_{16}$"	$2^{1}/_{16}$"	2/10, 4/2	X	X	0	√	0	Two independent P. C. boards (e.g., for dual binary codes).
H	3/8"	$1^{5}/_{16}$"	$1^{9}/_{16}$"	2/2, 1/10, 1/11	0	0	√	0	√	Largest numeral in a 3/8" switch.
K	3/8"	$1^{5}/_{16}$"	$2^{3}/_{16}$"	2/2, 1/10, 1/11	X	X	0	√	0	Largest numeral in a 3/8" switch.
S	3/8"	$1^{5}/_{16}$"	$1^{9}/_{16}$"	2/2, 1/10, 1/11	0	0	√	0	√	Sealed circuitry.
M	5/16"	$1^{5}/_{16}$"	$1^{1}/_{2}$"	2/2, 1/10, 1/11	0	0	√	0	√	Thinnest thumbwheel switch made.

* Depth of switch body, including longest terminals.
**TERMINAL CODES: WW = Wire Wrap; PCP = Printed-Circuit Pins; PCC = Printed-Circuit Connector; SSL = Short Solder-Lug; CMC = Component-mounting Connecto
TERMINAL AVAILABILITY: √ = STOCK STANDARD, X = SPECIAL ORDER ONLY, 0 = NOT AVAILABLE.

STANDARD OPTIONS AND ACCESSORIES

DIAL STOPS	PROV. FOR ILLUMINATING DIAL	TRANSLUCENT THUMBWHEELS
DIVISION PLATES	DECIMAL POINT ON MODULE	DOUBLE CHARACTERS
SPACER PLATES	DECIMAL POINT ON SPACER	UP TO 7 CHARACTERS/POSITION
BLIND SLAVE MODULES	DECIMAL POINT ON THUMBWHEEL	SPECIAL COLORED CHARACTERS
DIAL-ONLY MODULES	ILLUMINATED DECIMAL POINT	MATING P. C. CONNECTORS
MAKE-BEFORE-BREAK CONTACTS	COLORED THUMBWHEELS	COMPATIBLE GLOW-NUMERIC DISPLAY

MATRIX BOARDS

Interswitch Matrix Boards are available in nine standard 2-level models. Larger switching arrays can be readily built up from them. Appropriate nomenclature, symbols, programming stripes, can be applied. Durable multi-color or monochromatic markings can also be engraved or imprinted on the panel.

Three-level and four-level matrix boards are also available, as are special boards with split busses to accept program input at two board edges and deliver outputs from two board edges.

Standard Hole Patterns:
6mm spacing:

10 x 10	10 x 15	15 x 15	15 x 31
20 x 20	25 x 50	31 x 31	50 x 50

3mm spacing: 20 x 20

Terminal Types: solder, wire-wrap, PCB insertion pin.

Working Voltage: 220 VDC or AC RMS.

Current Rating (per contact bar): 6mm: 10A
3mm: 5A

Contact Resistance: 7 milliohms with short-circuit pin installed.

PROGRAMMING ELEMENTS

Standard elements available for use with the above Matrix Boards are:

Shorting Pins — Plug-In Lamps
Diode Plugs — Cable Plugs
Dummy Plugs — Programming Templates
Dual and Triple Shorting Pins

DATA PROGRAMMING MODULES

These are data-input logic elements (programming plug and switch body) for programming by 4-bit binary codes. They are mounted on either a matrix program board or a printed circuit board. Numerals are available in both horizontal and vertical reading orientation.

Codes: BCD 8-4-2-1
Excess 3
Aiken 2-4-2-1
Operating Voltage: 50V maximum.
Operating Current: 500 mA maximum
Rated Thermal Current: 1A
Switching Cycles (min.): 10^{4}
Contact Resistance: 5mΩ
Test Voltage: 1000V
Colors: Plugs — 7
Inscriptions — 9

TOGGLE SWITCHES — HEAVY DUTY

J-B-T INSTRUMENTS, INC.

J-B-T®

32nd Year

WHY IT PAYS TO SPECIFY J-B-T TOGGLE SWITCHES

• **J-B-T** concentrates on trouble - free switches. Among the four groups of toggle switches J-B-T produces more than 170 models made to Government Specifications. Market studies indicate that while these switches are a must in military applications, almost half are produced for non-military use where the principal requirement is dependability. J-B-T apparently is specified because:

1. **Materials are good.** For instance, in MIL and AN heavy duty models, J-B-T uses generous proportions of selected silver alloys in integral construction for contact surface areas — to add overload protection, dissipate heat, and keep contact resistance under .005 ohms.
2. **The design is good.** All MS models have silicone rubber bushing seal for sand, dust and specified toggle seal tests. Medium-duty types MS25098 and MS25100 also feature case-to-terminal sealing and a new design which provides fast break and wider gap to surpass the 125 VDC endurance tests of MIL-S-3950C.
3. **The value is good.** The many features required to meet Government standards, and J-B-T's rigid in-plant testing pay off in long, useful life. Nevertheless, because J-B-T makes **only** quality MIL or General Purpose switches, quantity production permits a surprisingly small price differential over run-of-the-mill brands.
4. **Deliveries are comparatively good.** See your distributor. Production is scheduled to back up his stocks with factory inventory of finished switches and work in process to meet predictable demand.

Cut-away view showing heavy duty MIL construction

Group I

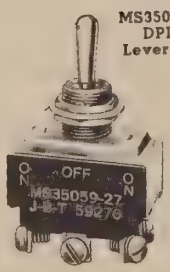
HEAVY DUTY SINGLE- AND DOUBLE-POLE — MIL, AN, AND JAN TYPES

Series MS35058 and MS35059 to MIL-S-3950C;
Series ST40A-H, ST42A-H, ST50K-T, ST52K-T to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

• **MIL-S-3950C SERIES** — Single-pole MS35058 with suffix —21 and above, and double-pole MS35059 types with suffix —21 and above are recommended when maximum reliability is required. Temperature, endurance, and altitude requirements exceed earlier MS types (suffix —1 to —19), AN3021 and AN3027 switches to MIL-S-6745, and ST styles to JAN-S-23 and MIL-S-21195A (Ships). All MS switches contain a silicone rubber bushing seal to meet sand and dust and toggleseal tests.

NOMINAL RATINGS: 20 Amp. at 125 VAC, 10 Amp. at 250 VAC. For MIL Requirements on Electrical Ratings ask for Condensed Catalog TS-966A.

SIZE: Single-hole; bushing 15/32"-32NS-2A by 15/32" high; toggle lever, 11/16" long. Bodies including terminals: **SP:** 1⅛" x ⅝" x 1-1/16" deep; **DP:** 1-21/64" x ¾" x 1-1/32" or 1-13/64" deep.



TERMINALS: Series MS35058 and Series MS35059 MIL-S-3950C switches have solderable 6-32 electro-tinned screw terminals; ST42's and ST52's use solder lug.

For more complete technical data, request Catalog TS-7.

J-B-T TOGGLE SWITCHES — MEDIUM DUTY & CROSS-REFERENCE

32nd Year

J-B-T INSTRUMENTS, INC.

Group II

SINGLE & DOUBLE POLE — GOVERNMENT QUALITY

Series MS25098 and MS25100 to MIL-S-3950C; Series ST12-27 to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

Cut-away view showing self-wiping double-grip contacts

MS25100-23 DPDT Rear Connected; Lever Seal

ST27N, DPDT Side and Rear Connected ¼" Bushing

MEDIUM DUTY refers to current-carrying capacity rather than to life characteristics of these Group II switches which are widely used for both military and non-military applications. Some models are rated at 6 amp. at 125 VAC-DC, 3 amp. at 250 VAC-DC. Other models are rated 3 amp. at 125 VAC-DC, 1 amp. at 250 VAC-DC, as listed on next page. Self-wiping, heavily silver plated double-grip contacts provide exceptional durability. All MS25098 and MS25100 have case-to-terminal seals and silicone rubber bushing seal to meet sand and dust and toggle seal requirements.

DESIGN IMPROVEMENTS AND NOMINAL RATINGS. Significant internal improvements over earlier designs of MS25098 and MS25100 give faster break, wider gap, and increased insulation values, resulting in a longer useful life. Typical uses are: instruments, data processing, and communications circuits.

Although MIL and J-B-T general-purpose switches are substantially similar in materials and construction, differences in test procedures and test conditions cause nominal ratings for military types to differ considerably from the ratings for UL or other non-military models. (Typical ratings are shown on next page.) For instance, under MIL Specifications, switches are tested at pressures corresponding to altitudes of 65,000 ft., while non-military switches are tested to NEMA and UL procedures at sea level pressures.

SIZE AND TERMINALS — Whether MS series to latest MIL-S-3950C or ST series to Specification JAN-S-23 and MIL-S-21195A (Ships), all have solder terminals. Medium-duty types use 11/16" long, toggle lever, bushing 15/32"-32NS-2A by 15/32" (or ¼"). Bodies including terminals are: 1¼" long, 11/16" wide, 29/32" deep, except ST16A, -16B, -16C, -17A, and -27K are 1¾" long by 21/32" deep, while ST16D, -17D, -26N are 1¾" long by 29/32" deep.

Not included in this specification. ** AN3021-6 same as AN3021-5 with jumper. § Same dimensions as MS35059-27.

NOTE A: MS and AN types use internal sand and dust toggle seal and other high performance features involving extra cost over ST types. MS types to MIL-S-3950C have a silicone rubber bushing seal to meet sand and dust, and toggle seal tests. MIL-S-3950 models are superseded by MIL-S-3950C models.
NOTE B: For heavy duty switches in the MS25068, MS35058, and MS35059 Series, MIL-S-3950C calls for SCREW TERMINALS ONLY. These terminals have SOLDERABLE FINISH and may be soldered after removal of screw.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

TOGGLE SWITCHES—4-POLE & SP & DP UL TABLES

J-B-T INSTRUMENTS, INC.

J-B-T

32nd Year

Group III

OUTSTANDING 4-POLE SWITCHES TO MS25068 REQUIREMENTS

MS25068-27
4-pole DT
Lever Seal

• There is no mistaking the light brown color and silver printing of these distinctive J-B-T 4-pole heavy-duty switches. The superior molded body, chosen after extensive tests, features high arc resistance and low shrinkage. As a result the switches exceed the rigorous electrical endurance requirements of MS25068.

Equally important, J-B-T uses generous proportions of selected silver alloys in integral construction for contact surface areas—to add overload protection, dissipate heat, and keep contact resistance under .005 ohms. The 8 models listed here have silicone rubber bushing seals and solderable 6-32 screw terminals, the same as other heavy-duty J-B-T MS switches. Dimensions same as MS35059 except bodies including terminals: $1\frac{11}{32}$" long, $1\frac{9}{16}$" wide, $1\frac{9}{32}$" deep.

4-POLE HEAVY DUTY WITH LEVER SEAL

★ On orders for single switches, add $1.00
X No position * Momentary position

Other MS25068 Numbers: Models with suffix -1 through -13 as set forth in MIL-S-3950 are superseded by MIL-S-3950 Revision C Types. The latter are interchangeable electrically and mechanically but meet additional performance standards above the former types. Specifically, **MS25068-1** has become MS25068-21; **-3** now -23; **-5** now -31; **-7** now -27; **-10** now -26; **-11** now -24; **-12** now -28; **13** now -25.

UL IDENTIFICATION AND RATINGS*: SINGLE AND DOUBLE-POLE; HEAVY DUTY AND MEDIUM DUTY

Underwriters' Laboratories, Inc. lists under "Switches, Special Use" (File E26557) models marked with the J-B-T part number shown below. In some instances, there are minor construction differences from ST switches, but the ratings and external dimensions are the same. UL-marked types are not regularly stocked but only are manufactured in substantial production runs.

SUB-MINIATURE TOGGLE SWITCHES

J-B-T INSTRUMENTS, INC.

Group IV

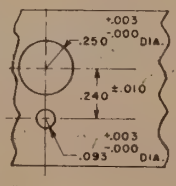
Series JMT Toggle Switches
1-, 2-, 3-, and 4-pole DT.

SERIES JMT, SUB-MINIATURE TOGGLE SWITCHES. A BROAD LINE MANUFACTURED IN CONNECTICUT BY J-B-T.

MANUFACTURED IN J-B-T's new plant, the subminiature types illustrated on this page make up the firm's fourth and newest group of toggle switches. Series JMT combines drastic reduction in size and weight with the trouble-free construction built into standard-size J-B-T switches. Widely used in manually controlled, low-current, solid-state devices and miniaturized circuitry of computers, instruments, space, geophysical, and test apparatus, these tiny switches also have application in aircraft, communications, peripherals and bio-medical systems as well as remote control and reservation systems.

Made with a distinctive GREEN BODY, single-pole types are ¼" thin, double-pole types less than ½" square, 3-pole and 4-pole types correspondingly small. All use single-hole mounting with ¼" threaded bushing which will not turn or work loose in the J-B-T surface plate. Stringent in-plant controls assure terminals that are firmly staked and will withstand repeated soldering. Terminal holes on JMT Series accept up to three #22 wires. Dimensions are shown on the other side of this page.

SPECIFICATIONS



Nominal Rating: 5 Amp. resistive load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max. 3 VDC, 100 Milliamps. **Insulation Resistance:** 20,000 Megohms, min. **Dielectric Strength:** 1,000 volts rms at sea level. **Life Under Load:** 100,000 make-and-break cycles minimum for all suffix-23 models; 60,000 for others. **Weight, Including Hardware:** SP, 0.19 oz.; DP, 0.23 oz.; 3-pole, 0.28 oz.; 4-pole, 0.32 oz.

MATERIALS: Switching contacts and rockers are coin silver; center terminals silver-plated. Bat handle is bright chrome-plated brass. Switch bodies are molded of plastic selected for high strength and arc resistance. Bushing, locking ring, and hex nuts are brass nickel-plated. Lockwashers are made of steel (cadmium plated) with chromate treatment. Clamps are of stainless steel.

HARDWARE AND MOUNTING

(For dimensions, see drawings on preceding page.)

Mounting hardware supplied consists of one locking ring **W-RI-12,** two hex nuts, **W-NU-11,** one internal tooth lockwasher, **W-WA-16** Knurled nut, **W-NU-12** and tapered panel dress nut, **W-NU-14,** are also available.

DIRECTION OF MOVEMENT — All JMT switches make continuity to terminal OPPOSITE throw of lever.

MOUNTING INFORMATION — When mounting switch with locking ring, use drill procedure illustrated. For push button types, see next page.

COLOR CAPS — Switches are normally supplied with bat handles. For color coding, tight-grip insulator caps are available for easy attachment before or after switches are mounted. Price, $10.00 per thousand in bulk; 2c per switch if attached. Specify color and part number:

White —**W-CAP-10A** Black —**W-CAP-10D** Yellow —**W-CAP-10G** Gray —**W-CAP-10J**
Blue —**W-CAP-10B** Brown —**W-CAP-10E** Green —**W-CAP-10H**
Red —**W-CAP-10C** Orange —**W-CAP-10F** Violet —**W-CAP-10I**

SERIES MPC, PC1 and PC2 Sub-miniature toggle switches are made with terminals for insertion in printed circuit boards; MPC for direct insertion, and PC1 and PC2 for right angle insertion. Terminals are gold plated for ease of solderability. MPC Series includes the same models as the standard JMT Series as well as such modifications as FH (Flat Handle), LL (Lever lock), 15-Series (Large Bushing) and other variations. (Illustrations approximately actual size.)

For complete technical data, request Catalog MT-40

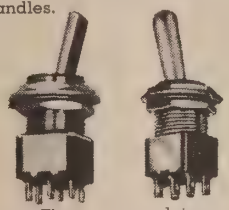
ADDITIONAL SUB-MINIATURE TOGGLE SWITCHES

J-B-T INSTRUMENTS, INC.

J-B-T

32nd Year



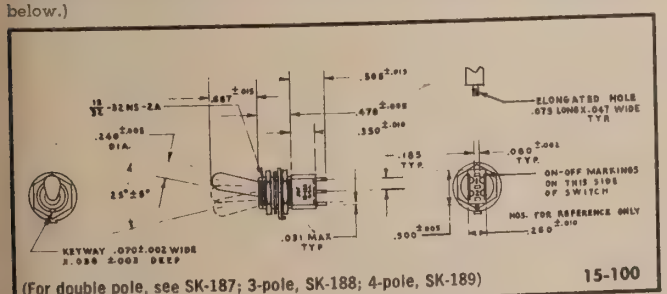
LFH SERIES with Flat Handles

SERIES LFH — provides a human engineering factor, with flat handles (paddle levers) that are easy to grasp, give good sensing of the direction of throw, and orderly panel appearance. Flatted on two sides, each lever is permanently aligned by a patented construction in its operating plane perpendicular to the flat. Standard finish is satin chrome, with bright nickel and other finishes available on special order.

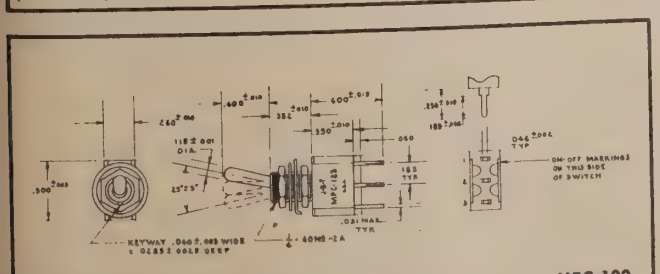
The LFH Series, with .437" bushing and 22° throw is now cataloged and stocked. The earlier models, known as the FH Series, with flat handles, .352" bushing and 25° throw, are now available on special order. Both LFH and FH Series can be made in configurations corresponding to those in the JMT Series; some models are available with MPC terminals for printed circuits; some with UL listing. Also the 15 Series switches are available with flat handles.

15 SERIES with 15/32" Bushings to Match Standard Size J-B-T Toggle Switches

SERIES 15 -- Sub-miniature toggle switches combine the behind-the-panel space saving feature of the standard JMT Series with the front-of-panel appearance of standard size switches. They are used in many applications where circuitry requires switches of different capacities, but good panel design calls for uniformity. Electrical and mechanical characteristics of Series 15 switches are the same as for JMT switches given in Catalog 449, except for the larger (15/32") bushing and slightly greater weight. Mounting and hardware are the same as for standard size J-B-T toggle switches. Circuit identification caps are available in red, white, and black.



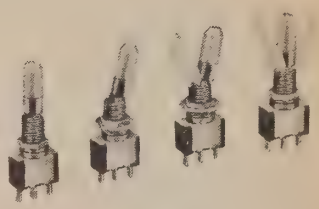
PB SERIES Push Button Switches



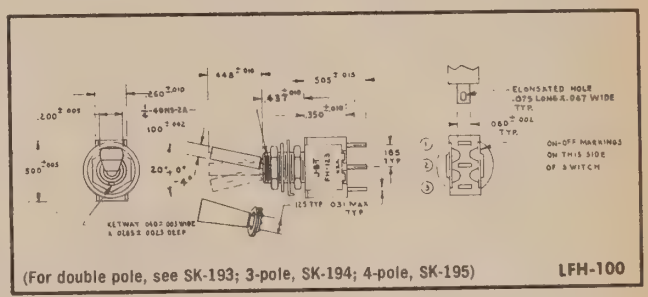
SPECIFICATIONS

Nominal Rating: 5 Amp. resistive load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max., measured at 3 VDC, 100 Milliamps. **Insulation Resistance:** 10,000 Megohms, min. **Dielectric Strength:** 1,000 Volts rms at sea level. **Life Under Load:** 100,000 cycles make-and-break, min. **Force Required To Operate:** Less than 2 lbs. Rapid break generates audible click. **Weight, Including Hardware:** Single-pole 0.4 oz.

Materials And Construction: Switching contacts and rocker are coin silver; center terminal silver plated, standard. Available with gold plated current carrying parts where required for dry circuit applications. Bushing and plunger are nickel plated brass; bushing has shoulder for greater strength. Clamp is stainless steel. Body is high-strength plastic, J-B-T green and black. Standard knob (W-KN-10) is anodized natural aluminum. Anodized colors, green, blue, red, black and gold are also available at slight extra cost. Buttons of other shapes, colors, materials or with imprints are also available on substantial production runs at extra cost. **Mounting Hardware** consists of 2 hex nuts, W-NU-11 nickel plated brass, and an internal tooth lockwasher, W-WA-16. A knurled face nickel plated nut (W-NU-12) is also available. Mounting in panel is in 1/4" D-shaped hole. (See drawing below.)

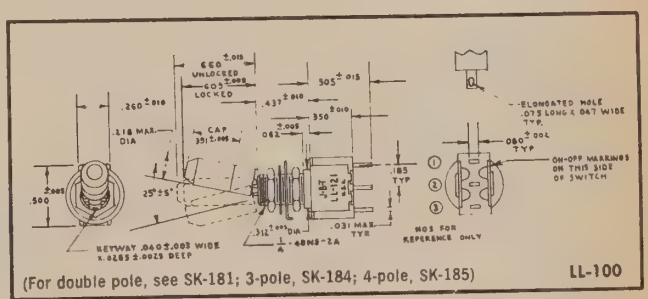


(For double pole, see SK-187; 3-pole, SK-188; 4-pole, SK-189) **15-100**

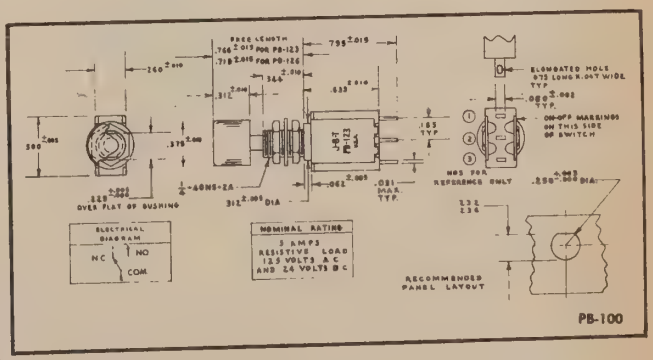


(For double pole, see SK-167; 3-pole, SK-168; 4-pole, SK-169) **MPC-100**

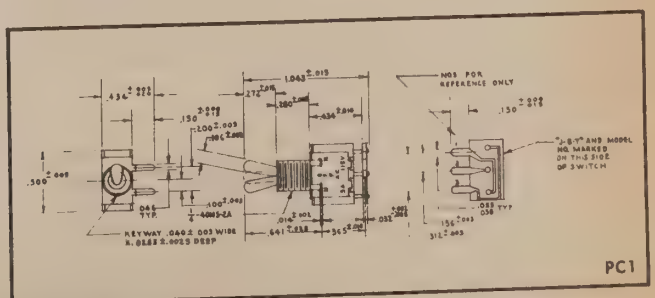
LL SERIES with Locking Levers



SERIES LL -- Made with spring-loaded locking mechanism to prevent accidental shifting of the lever -- a definite advantage on planes, ships, trains, or other vehicles where sudden motion might cause switching errors. Also, for test equipment other instrumentation or computer circuits where accumulated data might be lost through unintentional switching. As a human engineering factor, the operator must **think** about the switching operation before he can complete it.



LL Series switches are normally stocked with natural aluminum caps, but for circuit identification caps can be supplied with anodized colors: red (danger), black, blue, gold or green.



(For double pole, see SK-193; 3-pole, SK-194; 4-pole, SK-195) **LFH-100**

(For double pole, see SK-181; 3-pole, SK-184; 4-pole, SK-185) **LL-100**

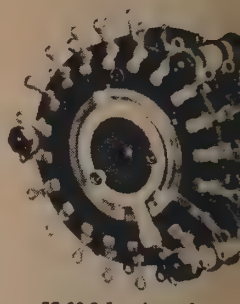
ROTARY SWITCHES — LAMINATED AND MOLDED

J-B-T INSTRUMENTS, INC.



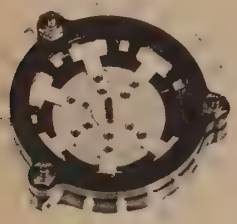
MS-14-1 Molded

- **INSTRUMENT AND TESTER TYPE**
- **14- AND 20-POSITION**
- **SINGLE AND MULTI-DECK**
- **MILITARY OR COMMERCIAL**

USES J-B-T Rotary Selector Switches are extensively used in quality test equipment, portable instruments, inspection setups, and other military aerospace and commercial applications where trouble-free, dependable performance is of major importance.

FEATURES **Extra Contacts** - 14- and 20-position designs provide extra switching capability. **Dependability** - Sturdy rotors and decks with rigid 3-post deck suspension; current-carrying parts heavily silverplated to meet 100 hour salt spray test; sharp detent mechanism to assure positive indexing; insulation resistance above 50,000 megohms. **Low Contact Loss** - Double-grip collector arms, and large area contacts, silver to silver; average contact resistance, .007 ohms or less. **Ample Dielectric** Conservatively rated at 1 amp., 125 VAC, inductive load; maximum momentary capacity (not make-and-break), 5 amp. AC or DC; maximum voltage between contacts, 1500 VAC, R.M.S.; between decks and ground, 2000 VAC, R.M.S

SS-20-2 Laminated



Enclosed - Molded models have all moving contacts enclosed to minimize dirt and corrosion.

Basic 14-Position: 13 circuits and "off" per deck in 2" circle **(SS-14)** or 2-3/32" circle **(MS-14)** with 25° 43' angular indexing. Supplied individually boxed with **1-1/4" Bar Knob, (KN-14),** not on bulk orders unless specified. For details, **SS-14,** 1 to 6 decks, see Print SK-42 Rev. B. **MS-14** 1 to 6 decks, Print SK-111 Rev. D, 7 decks and over, Print SK-112 Rev. C.

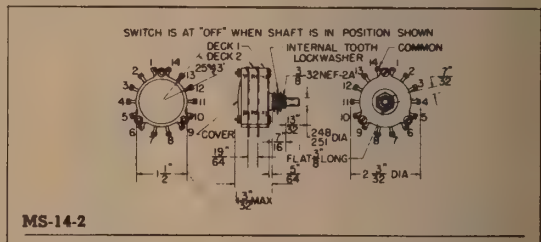
Basic 20-Position: 19 circuits and "off" per deck in 2-23/32" circle **(SS-20)** or 2⅝" circle **(MS-20)** with 18° angular indexing. Supplied individually boxed with 2" **Bar Knob (KN-16),** not on bulk orders unless specified. For details, **SS-20** 1 to 6 decks, see Print SK-116 Rev. A. **MS-20,** 1 to 6 decks, Print SK-113 Rev. D, 7 decks and over, Print SK-114 Rev. C.

Military or Commercial Variations: Special switches too numerous to list now are being made. Typical are: laminated models with 14 or 20 live positions, no off, designated by suffix F as in SS-14-2F or SS-20-1F*. Inquiries are invited.

***BONDED RUGGEDIZED TYPES** As indicated in the table, all molded rotary switches may be ordered with bonded construction as **MS-14B** or **MS-20B** types using cured laminations for ruggedization, shockproofing and further enclosure. This additional dependability factor adds only approx. 1/64" and 35c catalog price per deck.

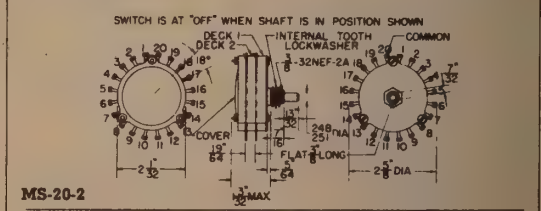
MS-20-1-6DT
Double-throw Switching of 6 circuits per deck

6-POLE DOUBLE-THROW PER DECK —



1 or 2 DECKS (DT Series). Widely used for simultaneous double-throw switching of 6 circuits per deck (18° throw). Fully enclosed - - illustration shows protective cover cut-away. Circuit arrangement printed on switch front. If DTS Shorting Type, 1500 VAC R.M.S. between contacts and ground, 1000 VAC R.M.S. between contacts. See **MS-20-1-6DT, MS-20-1-6DTS,** and **MS-20-2-6DT** in table.

ETCHED DIAL PLATES



For switches below, also 20M Series. Dull black finish, raised bright numerals, 2¾" dia.

NOTES TO TABLES

* Standard Items, but not regularly stocked; check wit your electronic parts distributor.

(a) 5 positions include 4 "live" and 1 "off."

(b) 6 positions include 5 "live" and 1 "off."

(c) Complete shorting—all contacts shorted except one use.

(d) Dimensions given are for continuous rotation switch On Standard SS-14 Models only, adjustable stops also furnished, and when used, increase depth beh panel 3/32" and decrease effective bushing length 3

Non-Shorting — Break before make **Shorting** — Make before break

*"F" type decks (14 full live or 20 full live positions, no "off") available on SS-14 and SS-20 Series only. Add 35c per deck to catalog price.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

MULTI-POLE AND LEVER TYPE SWITCHES

J-B-T INSTRUMENTS, INC.

32nd Year

IMPROVED MULTI-POLE MOLDED ROTARY SWITCHES, SERIES 20M.

• Superior Molded Material • All Models Bonded & Ruggedized • Panel Seal Available

Front View Showing Panel Locator which is Normally at 3 o'clock Position.

Rear View with Back Cover Cut Away to Show 4-Pole Construction with 4 Live Switching Contacts.

Although the new 20M- Series is ¼" longer behind the panel than the 20-position molded switches described on the preceding page, the two styles are otherwise interchangeable in dimensions. Providing 19 live positions and off, the 20M- offers these additional features:

1. **Increased Versatility of Circuitry** — up to and including four poles per deck;
2. **Upgraded Insulation Resistance and Dielectric Qualities** — by use of melamine stators and rotors (or other MIL-M-14 molded materials when specially ordered);
3. **Built-in Panel Locator or Non-Turn Device;**
4. **Extended Switch Life** — new contact design with rotor brushes of phosphor bronze heavily silver-plated;
5. **All 20M- Models are Bonded and Ruggedized Construction;**
6. **Radial Alignment of Multi-Pole Contact Surfaces** — by means of newly-designed double-ball detent with diaphragm-type springs.

VARIATIONS OF 20M- — Please request SK-142, Revision of March, 1967, or later for full dimensions and circuit diagrams. Besides the condensed listing in the accompanying table, various combinations of **shorting and non-shorting contacts for each deck** may be made. **Fixed stops** are built-in but may be altered for single-pole switches when specially ordered. **Over six decks** can be supplied for a reasonable number of poles; extra decks add 5/16" per deck and 5/16" per switch for rear support SU-3. **Ring-contact** (suffix R) may be specially ordered.

PANEL SEAL PS20M- SERIES — Sealed shaft and bushing meet the requirements of MIL-S-3786C for sealing. For details ask for SK-143, Revision of March, 1967, or later. The seal (prefix PS) adds $1.75 per switch to catalog price.

SPECIFICATIONS AND TEST DATA — Available on request.

		2	**20M-2106N**	9 live, 1 off	20 thru 9	14.00

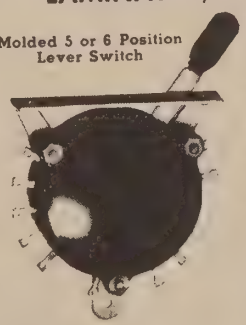
* See MS-20 drawing on following page for location of positions.

Notes: (1) For standard switches, knob pointer (active position) is 180° opposite flat on shaft, and off is at position 20.
(2) **NON**-shorting (N) type — (break-before-make) — is shown. For shorting type (S), add $.05 per pole per deck to catalog price. Example: 3 pole, 3 deck 20M-3053S is $9.45.
(3) All models have 18° angular indexing.
(4) Maximum **LIVE** positions per single pole, 19; per 2-pole, 9; per 3- and 4-pole, 4.
(5) Switches (such as 15 or 18 position) with all live or less than maximum live positions can be provided by fixed stops.
(6) Maximum of 9 decks for 1 pole per deck
6 decks for 2 poles per deck
4 decks for 4 poles per deck.
(7) †Suffix-F denotes all rotation positions shown are **live** with no off.

LEVER ACTION SWITCHES — 6, 5, 4, 3, and 2-Position — LAMINATED, MOLDED, & SUB-MINIATURE

LAMINATED 3- AND 4-POSITION, POSITIVE INDEXING. These lever switches are derived from the J-B-T SS-14 instrument-type rotaries. Specified for tube checkers, inspection equipment, communications systems, control consoles, and other uses where quality is important. 4-position types are interchangeable with 3-position except in length of throw (1" slot for 3-position, 1⅜" for 4-position) — mounting holes for boxed switches come with mounting hardware and KN-17 knob as illustrated; bulk shipments, without knobs. **SINGLE DECK-** spacing between centers: recommended, ¾"; minimum, 9/16". **TWO DECK-** spacing: recommended, 15/16"; minimum, 13/16". ⅜" between decks matches TV twinlead wires. **SPRING RETURN TYPE-** single deck, 3-position switches may be ordered with spring return. Lever returns to position 11°, giving momentary action at positions 9° and 10°. For dimensions on all SS-14-IL series switches, ask for drawing SK-138.

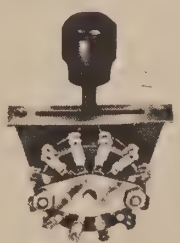
Two-Deck Lever-Action Switch



SS-14-1L4F-2

Positions Per Circuit	Circ. (Poles) Per Deck	Decks or Gangs	Short. Non-Short	Stand.* Contact Pos.	Model	Boxed Incl. Knob
3, no "off"	1	1	N-S	A	**SS-14-1L3**	$1.10
3, no "off"	2	1	N-S	B	**SS-14-1L3A**	1.25
3, no "off"	1	2	N-S	A	**SS-14-1L3-2**	1.80
3, & "off"	1	1	N-S	C	**SS-14-1L4**	1.20
4, no "off"	1	1	N-S	D	**SS-14-1L4F**	1.20
4, no "off"	1	2	N-S	D	**SS-14-1L4F-2**	2.10

* Numbers correspond to contact positions in MS-14-2 drawing on prior page. A—common at 12, contacts at 9, 10, 11; B—common at 9, 10, contacts at 6, 7, 8, 12, 13, 14; C—common and off at 12, contacts at 9, 10, 11; D—common at 12, contacts at 8, 9, 10, 11.



Molded 5 or 6 Position Lever Switch

MOLDED 5- and 6-POSITION, POSITIVE-INDEXING. 5 or 6 live positions, two circuits per deck, in enclosed lustrous black molded construction, adapted from the MS-20 series with electrical characteristics as shown on the next page. These models can simplify circuitry for sound systems, control, inspection, test, experimental, and hobby purposes. Individually-boxed switches come with KN-20 threaded black molded knob; bulk shipments, without knobs. For mounting data see SK-64, Rev. H on 5 position and SK-119, Rev. B on 6-position.

MS-20-1L5A-1, 5-position, 2-circuit (1 deck) $3.45.

MS-20-1L6A-1, 6-position, 2-circuits (1 deck) 3.70

Sub-Miniature 1 Dual Duty Deck

2 AND 3 POSITION, 1 TO 4 DECKS, 2 TO 8 POLES PER DECK.

SUB-MINIATURE LEVER SWITCHES Derived from the high-performance sub-miniature switches described on another page, the VL-7000 and the VL-5000 positive indexing series and the VSRL-7000 and VSRL-5000 spring return types provide excellence in lever switches. MIL materials throughout, crisp 30° indexing. Max. depth behind panel 1.250"; panel slot .962" x .062"; other details to SK-139, Rev. A and Catalog SM-33. Typical switches are:

VL-71031N, single-pole, 3-position, one-deck, non-shorting $4.80

VSRL-71031N, same as above, with spring return to center position from either side 5.80

VL-71032N, single-pole, 3-position, two deck, non-shorting 7.05

TYPE SR31 LEVER-ACTUATED SWITCHES TO MIL-S-3786C, MEDIUM AND HIGH SHOCK

Sub-miniature open construction, lever-actuated switches, similar to the one illustrated above, recently have been added to MIL-S-3786C as SR31 types. This category covers shorting and non-shorting; 1 to 4 poles per section; 1 to 4 sections per switch; Medium Shock M, as in Model VL-71031N-SR31N30C3MGC (M3786/31-034), will normally be supplied, but High Shock H is available. Typical models are priced on next page.

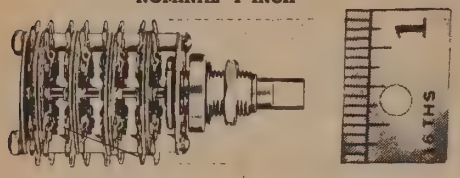
LEVER KNOBS

KN-17, black pointed with metal insert $0.19
KN-18, walnut, same as KN-19 0.08
KN-19, black, round, flat-type, push-on 0.08
KN-20, black, threaded, for MS-20-IL 0.20

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

J-B-T

32nd Year



SUB-MINIATURE ROTARY AND LEVER SWITCHES

J-B-T INSTRUMENTS, INC.

SUB-MINIATURE SWITCHES MADE TO MANY PERFORMANCE LEVELS OF MIL-S-3786C, TYPE SRO5; ALSO NON-MILITARY X AND V VERSIONS.

SERIES 7000, FULL 12 LIVE SWITCHING CONTACTS PER DECK: SERIES 5000, UP TO 8 POLES PER DUAL-DUTY DECK.

NOMINAL 1 INCH

4 DECKS Series 5000

Model Number V-52114N-SRO5S30C3MGC. Terminals have hole to accept two 0.032" dia. wires, and supersede solid "T" terminals formerly supplied.

- **Precision built for Low-Current Usage where Size, Weight, Reliability are Important**
- **Unusual Versatility — More Contacts per Deck**
- **Accelerated Snap-Action Detent**
- **MIL Materials Throughout for Military & Non-Military Applications**

CAUTION—MIL-S-3786C, a sophisticated specification, spells out more than one performance level in each of several categories such as Temperature-Life, Vibration, Shock, and Altitude, J-B-T SRO5 models meet many levels.

- **USES — For test equipment, airborne and transistorized equipment, geophysical apparatus, and other miniaturized electrical and electronic devices.**

TWO BASIC SERIES — Full 12 live switching contacts per deck are available in **Series 7000** using a patented wafer design feature where rotor contacts are on the front, and switching contacts are on the rear of the same deck. 1 to 4 poles per deck 1 to 6 decks, standard.

Up to 8 poles per dual-duty deck are available in **Series 5000** which has up to 12 contacts including common on the front, and up to 12 contacts including common on the rear of the same deck. 1 to 4 poles on each side of dual-duty decks; 1 to 4 decks, standard.

THREE ROTARY TYPES — Both Basic Series are made in 3 types: **MILITARY STYLE SR05,** numbered for specific performance levels of MIL-3786C; **V TYPE,** of similar construction to SR05, but not ordinarily subjected to full military test procedures; and **X TYPE,** using the same materials as V type switches, but intended as replacements for previous models or as original components for non-military devices where requirements are similarly exacting.

LEVER SERIES (L and SR31 Types) — Outstanding design known as VL-7000 or VL-5000 Series, 1 to 4 decks. Illustrated on a preceding page.

KNOBS — Supplied with individually boxed switches on V and X types; not supplied on SR05 because separate military specification applies.

SEALED SRO5 SHAFT AND BUSHING SEAL NOW AVAILABLE ON 1" OPEN CONSTRUCTION ROTARY SWITCHES TO MIL-S-3786C

- The versatility of J-B-T 1" open construction sub-miniature rotary switches described in Catalog SM-33 is increased by the addition of shaft and bushing seals to meet the requirements of SRO5S Type to MIL-S-3786C.

Principal differences:	SRO5N	SRO5S
Sealed Shaft-to-bushing	No	Yes
Sealed Panel Bushing	No	Yes
Bushing Size	Round 3/8-32	Flatted (D-Shape)
Depth behind panel	See Table Preceding Page	.100" longer
Non-Turn Device	Yes (unless otherwise ordered)	Provided by flatted bushing
Other Details	Print SK-135 (E)	Print SK-179

DIFFERENCES BETWEEN SR05 MILITARY, V, and X — Switches other than X types use extra rugged index mechanisms and rotor construction.

	NON-MILITARY		MIL-S-3786C

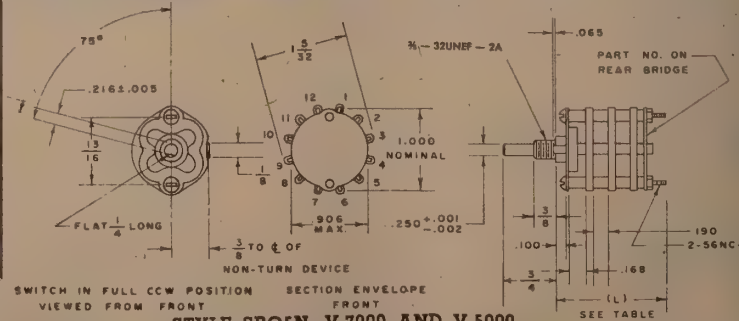
3 2DD	1	12	N-S				V-71123N-SR05S	11.45	10.51



* Complete model number for a typical MIL-S-3786C rotary switch is: V-71121N-SRO5N30C3MGC, which designates specific performance levels. Likewise, for a typical lever-actuated switch; M3786/31-040. Unless otherwise ordered, switches will be furnished to this suffix (N30C3MGC). On certain models, sealed shaft and bushing are available at $2.00 extra cost; or shock type H (high impact), also at $2.00 extra, when so ordered.

SPECIFICATIONS & TEST DATA ON SR05 MILITARY STYLE

NOTE: Most of the values shown here are given in the Specification and do not indicate the extent to which the test results of J-B-T switches were more favorable.
Current-carrying capacity: 5 amps at standard ambient conditions.
Current-breaking capacity: 750 MA at 30 VDC; 300 MA at 120 VDC; 1 AMP at 115 VAC Non-Inductive.
Initial Contact Resistance: 005. ohms max.
Contact Resistance: To MIL-STD-202D, Method 307, which requires Initial — 20 milliohms After Moisture Resistance Test — 30 milliohms; After Life Test — 40 milliohms.
Materials: Terminals (double-wiping): gold-plated 90% silver alloy. **Rotor Contacts** J-B-T #1800 Silver Alloy. **Shaft & Frame:** Stainless steel, passivated.
Insulation: Wafer, glass epoxy laminate to MIL-P-18177C Type GEB, NEMA G-11; Rotor ceramic to MIL-I-10A, Grade L-623.
Life Rotational; Temperature-Life Characteristic C, 25,000 rotational cycles at 10 cpm Temperature —65°C to +125°C; 25,000 cycles at 70,000', room ambient temperature
Vibration: Grade 3 of Table III MIL-S-3786C, 10 to 2000 cps. Tested in accordance with MIL-STD-202D, Method 204. Test Condition B.
SHOCK: Shock Type M, Medium Impact per Table IV, MIL-S-3786C. Tested in accordance with MIL-STD-202D, Method 205. Mating contacts did not open for more than 10 microseconds. Shock Type H, High Impact, Method 207; specifies not more than 5 milliseconds and does not automatically cover Type M Impact.

REMARKABLE NEW 12 POSITION ROTARY SWITCHES

J-B-T INSTRUMENTS, INC.

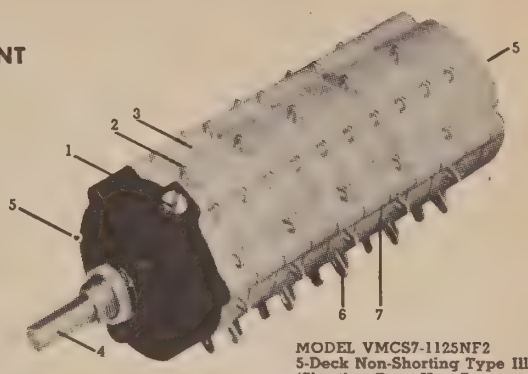
J-B-T

32nd Year

V/M SERIES 12-POSITION ROTARY SWITCHES
ULTRA-HIGH QUALITY WITH ADJUSTABLE TORQUE DETENT

This unusually fine family of fully enclosed rotary switches is being produced in J-B-T's thoroughly modern new plant. Used in precise laboratory test apparatus, test set-ups, telemetering, meter switching, calibration operations, and similar applications where circuit stability is essential to accuracy and repeatability. The V/M Series virtually eliminates the influence of extraneous factors to the circuitry, and the initial electrical and mechanical characteristics remain substantially unchanged throughout the long useful life of the switch.

SPECIFICATIONS (apply only to VMCS7 Models with coin silver contacts and rotor blades.): **Initial Contact Resistance,** .002 ohms; **Maximum Inductance,** less than .03 microhenry; **Capacitance between Segments,** less than 2 PFD; **Thermal EMF,** less than 1 microvolt; **Current Carrying Capacity,** 5 amp.; **Dielectric Strength,** 1000 volts, rms, 60 cy. — terminals to ground and terminals to terminals; **Insulation Resistance,** greater than 500,000 megohms; **Life Cycling** (make and break), 100,000 cycles at 1 amp., 120 VAC, res. and ind., and 28 VDC res. and ind.



DIMENSIONS: diameter over terminals 1⅞"; bushing ⅜-32 x ⅜" long; non-turn device ⅛" diam., 17/32" from shaft centerline.

NOTES:

*Model Number shown is for VMCS7, with coin silver contacts and rotor blades. For nickel silver, model number would be VMNS7; for silver plated brass contacts and nickel silver rotor blades, VMSB7.

**Unlike other J-B-T rotary switches, VM series is normally shorting type; for non-shorting construction add 50¢ per deck per switch, Net. Made only on special order.

† Includes knob and mounting hardware. Quantity prices on request.

MODEL VMCS7-1125NF2
5-Deck Non-Shorting Type Illustrated
(Shorting Type Has Common Deck Adjacent to Front of Switch)

FEATURES:

(1) Adjustable detent action for variable torque (or factory set for 4 inch-lbs. max.) (2) Unusually sturdy molded-in terminals, .032" thick; accomodate two #18 wires. (3) Distinctive color-coded glass alkyd or diallyl phthalate decks — **gray** for coin silver alloy contacts and rotor blades; **blue** for nickel silver; and **green** for silverplated brass. (4) Husky ¼" stainless steel shaft. (5) Permanent identification of positions 0 through 11, cast in detent housing and molded in rear deck. (6) Integral connections between contacts and terminals — no mechanical joints. (7) Enclosed decks may be stacked for explosion-proof switch, per methods 3 and 4 of MIL-E-5272.

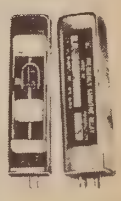
RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Applications: selective-calling mobile communication equipment, remote data transmission, and simultaneous or sequential coding and decoding.



For further data, ask for Bulletins 162-R and D664A. Inquiries are invited on combination relay-oscillator types.

Dual-Reed Oscillator Control RO-B10B-188.0

Single-Reed Oscillator Control RO-D62E-250.3 (Vibration-Isolated in All Planes)

Relay RR-DO2E-250.3 (Vibration-Isolated in All Planes)

J-B-T frequency-sensitive electro-mechanical relays (decoders) are highly stable control devices. They intermittently make and break contacts when a signal of the same frequency as the tuned reed is received. Although the reed has a high Q, the bandwidth at which the relay responds will be proportional to the input signal level.

RO-B Oscillator Controls (sometimes known as tone generators or encoders) are dual-reed units internally shock mounted and of sealed construction. These units control the frequency of oscillation in vacuum tube or transistor oscillator circuits. The RO-B type oscillator control is recommended where accurate and stable AC signals are required.

RR-D types are internally shock-mounted resonant reed relays, which are square, sealed units with 7-pin miniature plug. They now are the most widely used J-B-T relays.

RO-D types are single-reed, internally shock mounted oscillator controls for applications where space saving is of importance. Dimensionally they are identical to RR-D relays.

TYPICAL REED RELAY AND OSCILLATOR CONTROL SPECIFICATIONS

Model	Enclosure	Mounting & Connections	Frequency Range CPS	DC Coil Resistance (Standard)	Accuracy to	Change per °C —40° to + 100°C	Individually Boxed

LICON Type 23 Miniature Series offers excellent mechanical and electrical life. A unique "heat dam" slot to eliminate the flow of solder and flux inside the switch is provided on models having solder terminals. Also available with screw or quick connect terminals. Integral type roller and straight level actuators are available. Tested to over 10 million cycles mechanical life, 5 million at pi duty. Electrical ratings are based on 50,000 cyc at full rated load. At one-half rated load, expect life increases to 200,000 cycles, nominal. Swit case is molded phenolic material. The Type 23 operational to 275°F, ambient.

TYPE 25

25-205

The Type 25 is a unique Form C switch using a coil spring mechanism as opposed to a stressed blade. The mechanism is quite similar to the exclusive LICON Butterfly double-break mechanism, and the off-center plunger version provides extremely light operating forces to 27 grams. The Type 25 offers long life and a 12 Amp rating; excellent conta wiping action, low contact resistance, high sho and vibration resistance. The thin switch is d signed for commercial applications which requi reliability at low price. Typical applications inclu coin and vending machines, timers and counte

MEETS THE REQUIREMENTS OF MIL-S-8805/11

The LICON Type 11 is a general purpose switch for military and industrial applications. Especially adaptable for direct actuation by moving cams. The ammonia-free switch case provides protection against contact corrosion even at extremely high temperatures . . . positive actuator button alignment . . . sturdy base for terminal stability. The two circuit double break switching mechanism, consisting of beryllium copper switch blades and stainless steel operating spring, provides a high current capacity in a small package size. The knife-edge pivot design eliminates "flickering" and "teasing" and assures chatter-free switch operation even when the plunger is within .010 of trip point with vibration resistance of 40G's up to 500 cps and 25G's up to 2000 cps. The Type 11 series has been life tested to over 20 million mechanical cycles. Variations in operating characteristics, terminal types and actuators give added flexibility. Variations in operating and reset forces are available from 70 grams to 40 ounces. Movement differentials are available from .010 to .030 with a maximum of .040 for special switch design. Excellent contact wiping action.

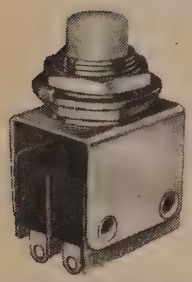
double-break switches

TYPE 16



16-104

TYPE 16-104

76-2230 (ACTUATOR ONLY)

The subminiature double break Type 16 offers twice the electrical rating of most conventional stressed blade switches. Twice as many contact surfaces and air gaps greatly increase heat dissipation ability and permit a big 10 amp rating. Type 16 has been tested to over 20 million mechanical cycles with 100,000 cycles at a full 10 amps, 750,000 cycles at 5 amps. The exclus butterfly double break mechanism provides contact bounce, excellent resistance to shock vibration, dual circuit control, low contact re tance, and substantial contact wiping action. Av able in MIL-approved versions to MIL-S-8805

double-break switches

TYPE 22

TYPE 22-204

TYPE 22-304

Compact double pole break switch utilizing two butterfly mechanisms with simultaneous transfer of both poles (within .004" plunger travel). Eliminates the use of two individual switches in many applications. Features fine silver contacts, resistance to shock and vibration, extra long mechanical and electrical life, self lubricating nylon button, plus positive wiping action. Available in version approved to MIL-S-8805/15.

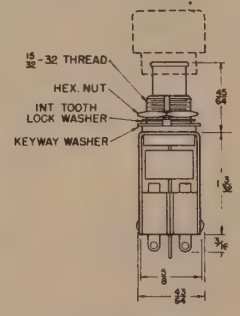
illuminated pushbutton switches

TYPE 01
Illuminated Pushbutton Switch



MOMENTARY CONTACT — **15/32 - 32 BUSHING**

MAINTAINED CONTACT — **15/32 - 32 BUSHING**

The Type 01 lighted pushbutton switch combines a single bulb panel indicator with a multi-pole switch package. Provides visual reminder that circuit is on or off. Available with red, white, yellow, green, or blue lens caps, 5/8" and 3/4" round or square, and 1 1/3" diameter round; solid or projected color illumination. Order lens cap separately. Available in one and two-pole Form C or Form Z contact arrangements. Switch rated at 10 amps, 250 VAC 30 VDC. Momentary, maintained, solenoid held a indicator models. One hole mounting with choi of 15/32" or 5/8" bushing. Uses T-1 3/4 lamps with scre flange 9100R or slide base (not included in price (For electrical and mechanical characteristics basic switch see Type 16 basic switch data). Mee requirements of MIL-S-22885/27.

TYPE 01-800 Snap-in Illuminated Matrix Mounting Switch

Note: A Dimension Momentary 1.56" - Maintained 2.00"

Type 01-800 single-lamp lighted pushbutton switch offers time-saving snap-in front panel mounting without tools for panels 1/16 to 1/8" thick (standard). Bezel barrier designed for horizontal or vertical matrix styles. Choice of screen colors with solid or projected illumination. Choice of momentary or maintained (push-on, push-off) contact types in one, two, three and four pole switch configurations; indicator-only units. SPDT-DB (Form Z) switch rat 10 amps, 125/250 VAC; UL Listed. Uses T-1 flange bulbs (not included in price); simple fro panel lamb servicing without tools. Compact 1 1/8" 7/8" lens cap gives ample space for engraving hot stamping.

YPE 01-600

The Type 01-600 Series is a new line of lighted pushbutton switches from LICON offering versatility and flexibility at low cost. The easy to install snap-in housing is available in bezel, single barrier or double barrier design. Individual or matrix mounting is possible with a single panel cutout. A large selection of ¾" lens caps is available in solid and projected colors.

illuminated pushbutton switches

TYPE 02

Type 02 two-lamp lighted switch is identical in external appearance with 01-800 Series. Features same time-saving snap-in front panel mounting with no tools. Designed for panels 1/16 to 1/8" thick, as standard. Horizontal or vertical matrix mounting. One, two, three and four pole momentary or maintained (push-on, push-off) switch configurations plus indicator-only styles. Size 1 1/8 x 7/8". Employs 76-27XX Series snap-on switch module. Complete unit requires selection of housing, lens cap, and switch module.

TYPE 04 Lighted Pushbutton Switches, Indicators, Components DESIGNED TO MEET REQUIREMENTS OF MIL-S-22885/72

EXTRUDED-BEZEL BARRIER

	"A" dim.	"B" dim.
Momentary action	2 7/8 max.	1 1/16
Maintained action	3 3/16 max.	1 3/32

Type 04 illuminated pushbutton switches combine four-bulb panel indicator 7/8" square with multipole switching. Color display meets all Human Factors Engineering standards for intensity and color distribution. Choice of full or split screens. Projected or solid color illumination. Four different styles: Momentary or maintained contact; solenoid held; with Form C or Form Z contact arrangements; and indicator-only units. Switch rated at 10 amps, 250 VAC or 28 VDC. Uses T-1 3/4 flange bulbs (not included in price). Simple front panel lamp servicing without tools. Choice of flange, barrier, bezel or bezel barrier mounts. Order each module individually. A light module, housing module and switch module make complete assembly. Light module and housing module makes indicator-only. A single Type 04 can replace up to four separate panel lights and four toggle switches in one-fourth the panel area. The extreme short length saves substantial "behind the panel" space.

ORDERING INFORMATION

Licon® Type 04 lighted pushbutton switches can be ordered as completely assembled units, indicator only or components can be ordered separately. Please refer to order guide below, then follow step by step procedure outlined, to determine correct part number for ordering. On matrix mounted assemblies consult factory.

Minimum expected basic switch life is 100,000 cycles at full rated load; 750,000 cycles at one-half rated load.

TYPE 44 Sealed Illuminated Pushbutton Switches

Type 44 switches combines four-bulb indications in a round sealed or unsealed configuration with multi-pole switch control. Display intensity, reliability and electrical capacity meet or exceed most rigid commercial or military requirements. Full or split screens with projected or solid color illumination. Momentary or maintained contact for one, two, three or four pole configurations, solenoid held or as indicator only. Switch rated at 10 Amps, 125/250 VAC or 28 VDC. T-1¾ lamps easily serviced from front of panel without special tools. Easy clamp-on mounting of housing from front panel in 1.140" cut-out. Overall size 3 31/32" x 1 31/32" x 1.343" maximum.

CHARACTERISTICS

	Momentary	Maintained	Solenoid Hold Down
Operating Force	75 oz. max.	96 oz. max.	75 oz. max.
Pretravel	.125 ± .060	.125 ± .060	.125 ± .060
Overtravel	.010 min.	.005 min.	.005 min.
Movement Diff.	.020 ± .010		
Rated Voltage of Solenoid			28 VDC
Drop Out Voltage			17 VDC
Rated Current			.050 amp

ORDERING INFORMATION FOR TYPE 44 LIGHTED SWITCHES

Licon Type 44 lighted pushbutton switches can be be ordered as completely assembled units, indicator only, or components can be ordered separately. Please refer to order guide below, then follow the step by step procedure outlined to determine correct part number for ordering.

ORDERING GUIDE

Item	Consists of	Follow Steps
Complete Switch	Housing, Light Module Switch Module, Solenoid Module*	1, 2A, 3A, 3B, 4, 5
Indicator Only	Housing, Light Module	1, 2A, 3A, 3B
Individual Components Only	—	1, 2A, 2B

EXAMPLES:

TO ORDER COMPLETE SWITCH . . . Refer to charts below and select proper code numbers following the step by step procedure to determine correct part number.

	STEP 1	STEP 2A	STEP 3A	STEP 4	STEP 5	STEP 3B
Sealed	44-0	.....	.....	.....	.....	.....
Unsealed	44-5	.....	.....	.....	.....	.....
	Prefix	Select Housing Code Chart I	Select Light Module Code Chart II	Select Switch Module Code Chart III	Select Solenoid Module Code Chart IV	Select Filter Colors By Quadrant

TO ORDER INDICATOR ONLY . . . Refer to proper charts and select code numbers following the step by step procedure to determine correct part number.

	STEP 1	STEP 2A	STEP 3A	STEP 3B
Sealed	44-0	.....	.....	.....
Unsealed	44-5	.....	.....	.....
	Preffix	Select Housing Code Chart I	Select Light Module Code Chart II	Select Filter Colors By Quadrant

STEP 1 (P/N Prefix) — Select Proper part prefix code.

Item	CODE Sealed	Unsealed
Complete Switch	44-0	44-5
Indicator Only	44-0	44-5
Housing Module Only	44-7	44-2
Light Module Only	44-6	44-1
Switch Module Only	76-27	76-27
Solenoid Module Only	44-9	44-9

STEP 2A (Housing) — For complete switch or indicator select proper code number from Chart I to be added to prefix chosen.

STEP 2B — For individual components only — Refer to proper chart indicated below and select code number to be added to proper prefix.

Item	Chart
Housing	I
Light Module	II
Switch Module	III
Solenoid Module	IV

STEP 3A (Light Module) — For complete switch or indicator — Select proper two digit code number from Chart II to be added to switch or indicator prefix.

CHART I — Housing Module

Item	Cod
Housing for Complete Switch	8
Housing for Indicator Only	9

CHART II — Light Module

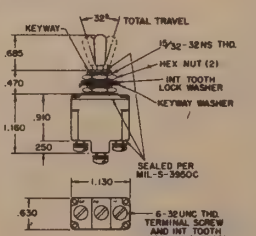
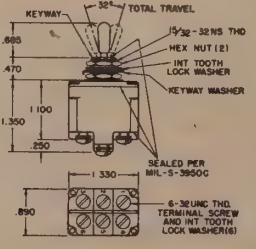
CHART IV — Solenoid Module



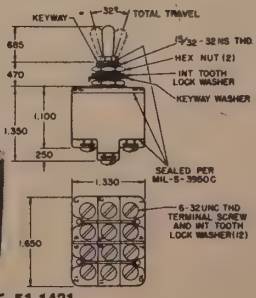
Description	C
Special — All following digits serial	
Solenoid Hold, 28 Volts	
Solenoid Hold, 6 Volts	

STEP 3B — Select display screen color — Refe quadrant drawing above and select by using first letter of the color desired in each quad one through four (ex. all red is RRRR).
STEP 4 (Switch Module) — For complete switch — Select proper 2 digit code from Chart III t added to switch prefix chosen.
STEP 5 — For complete switch only (if require Select proper code from Chart IV to be adde switch prefix chosen.

TYPE 51 Aircraft Toggle Switches



1 POLE 51-1121
(MS 24523-21)



2 POLE 51-1221
(MS 24524-21)

4 POLE 51-1421
(MS 24525-21)

Type 51 heavy duty toggle switches are designed to meet the sealed switch requirements of MIL-S-3 military approvals MS24523, for the one pole version; MS242524, for the two pole version; MS24525, for the four pole version. Designed and constructed for use in heavy duty industrial aircraft applications.

A diallyl phthalate case assures dependable operation in a temperature range of −85° to +25 The Type 51 is designed with contacts that are larger than competitive units for higher load capac and better heat dissipation.

TYPE 65 Subminiature Environment-free Sealed Switch

65-4012 OVERTRAVEL PLUNGER

Type 65 Series offers dependable, environment-free snap-action switching with ratings up to 10 Amps, 30 VDC. Conserve design space, and deliver ruggedness and reliability.

Type 65 consists of a basic Licon® Type 16 subminiature switch enclosed in a seamless, corrosion resistant aluminum housing. A positive "O" ring plunger seal plus epoxy terminal potting provides protection against dust, moisture, oil spray, and corrosive atmospheres. Type 65's meet the immersion requirements of MIL-E-5272 Procedure I. The basic snap action switches conform to military specifications. "O" ring plunger sealing plus ice scraper ring assures trouble-free actuation at high altitudes.

TYPE 70-700 Proximity Switch

Ultra compact switch for precision control without physical contact. Consists of a control module (2.53" x 3.75" x 1.35") which contains a 10 amp DPDT relay plug-in terminal block (2.19" x 2.66" x .84"), potted sensor with 20' cable, and potentiometer for sensitivity control. Senses both ferrous and non-ferrous metals. Up to 1000 operations per minute possible. Sensing range for .750" dia. s is .110" to .261"; for .440" dia. sensor, .048 .148" (sensing ranges based on .235" dia. stai steel target). Nominal power input, 115 V, 6 with 105 amp draw. Ambient operating temper is −30° to +250°F for remote sensor; 0 +150°F for control module.

LICON No.	Description	List Price *
70-7021	Complete unit with .440" Sensor	$90.00
70-7022	Complete unit with .750" Sensor	90.00

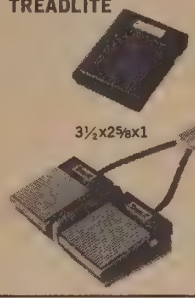
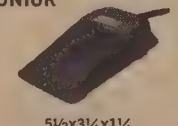
It's so easy to order from this catalog...

When ordering products shown in this book or writing for additional information, please be sure to specify:

1. **The Year and Edition of This MASTER.**
2. **Manufacturer's Catalog Numbers and Page Numbers.**





This will avoid confusion and expedite delivery.

Thank you!

The RADIO-ELECTRONIC **MASTER**

SUBMINIATURE PICOFUSES

For computer, micro-electronic and areo-space circuits of 125 V or less where short-circuit currents as high as 300 amps occur. High accuracy in blowing time at 300% of rating and higher is ideal for sequential switching or in circuits requiring redundancy. Blow time 4 hours min. at 100% of rating; 5 secs. max. at 200%. Amperage printed on body; can be color-coded at additional cost. Ceramic body only 7/32" lg. x 5/64" dia.; tin-coated copper leads .025" dia. Order **275** (prefix) for axial leads 1 9/16" long for diode clip or in-circuit mounting; **276** for radial leads 1 3/8" long for use in printed circuits or receptacles. *Avg., cold.

MICROFUSE SUBMINIATURE FUSES

For printed circuits and other minimum space uses. Ultra-fast blowing. Plug-in types use holder (listed on another page); pigtail types for soldering. Short circuit interrupting capacity 125 V, 10,000 amps DC. **Blow Specs:** 100%, 4-hour min.; 200%, 5-sec. max. **Size:** 1/4" dia. x 1 1/2" (fuse body). Plug-in, transparent cap type listed. Use prefix **272** for plug-in, metal cap; prefix **279** for pigtail, transparent cap; prefix **278** for pigtail, metal cap.

HIGH RELIABILITY MICROFUSES

For zero defect programs. Hermetically sealed; gold-plated terminals for soldered or plug-in connections. Fuse rating identified on each fuse. Test data and traceability records are supplied and maintained. Proven performance in the Gemini "critical parts" manned space program. Voltage rating 125 V, blow time same as 273 series; time/current characteristics certified to 1% AQL per MIL-Std-105, Inspection Level II. Short circuit interrupting capacity at 125 V, 10,000 amps DC. **Size:** Fuse cap and body, .290" lg., leads for 262 "plug-in" series .170". Pigtail on 268 series 1.0". Use prefix **268** for pigtail type (e.g., **268.002**).

HIGH RELIABILITY PICOFUSES

For soldering into circuits or insertion into diode type clips and mtgs. Fuses rated at 125 V or less and will interrupt short circuit currents to 300 amps at 125 VDC Non-hygroscopic ceramic bodies. Withstands 5-lb. axial pull test. Blow time 4 hours min., 100% rating; 5 secs. max., 200% rating. Insulation resistance is 1 meg min. measured with 100 V supply. **Size:** Body 7/32" lg., .078" dia. Leads are .025" dia., 1 9/16" lg., gold-plated copper.

HIGH VOLTAGE FUSES

Designed for use in aircraft radio equipment, transmitting equipment, X-ray apparatus, high voltage rectifiers, etc., for circuits up to 20 kW DC or 30 kVA AC. Fuses are fiber enclosed with cadmium plated end caps. Two principles of arc suppression are employed: (1) Multi-break fuse wire which blows at each half inch of its length; (2) Ceramic baffles break the arc into several parts and quench it. **Blow Time:** 110%, 4-hour min.; 135%, 0–1 hour; 200% 0–2 minutes.

FUSE PULLER ASSORTMENT

• Easy removal & installation

Puller slips over glass body of fuse; metal slide collar holds fuse in locked position. Fuse may then be withdrawn or replaced with ease.

L.F. No. 094091—Net/Assortment. $6.00

OHMITE power tap switches, high current, non-shorting type

Introducing

MODEL 711
Smallest Switch for Its Rating

Ohmite single pole, rotary, multi-position switches have proven their durability over many years in demanding applications. Such applications are found in switchboards, arc welders, spot welders, battery chargers, motor controls, tapped transformers, X-ray equipment, diathermy equipment, radio transmitters, electrical machine tools and many other products. Six sizes, including the new, miniature Model 711, provide a choice of ratings from 7 amperes at 125 volts to 100 amperes at 300 volts AC. A choice of the number of taps is provided up to the maximums indicated. All switches are enclosed except for the Models 711 and 111. All switches feature the slow-break, quick-make action deemed so desirable for switching of AC current.

The five sizes offering ratings from 15 amperes to 100 amperes (Models 111, 212, 312, 412 and 608) feature all ceramic, arc-proof bodies and solid silver alloy, fixed and movable contacts. The large, thick, silver-alloy fixed contact disks are permanently welded to copper studs. These, in turn, are riveted and soldered to sturdy terminal lugs, assuring a permanent mechanical and electrical joint. The rotor (moving) contact, also of solid silver-alloy, is riveted and soldered to the contact arm. Face of the rotor contact is slightly rounded assuring a perfect seating of the contacts with a slight rubbing, self-cleaning motion on every operation.

The new Model 711 tap switch was designed to achieve high curre capability with small size. It is actually smaller than many low curre instrument switches. It interrupts 7 amperes at 125 VAC and can carry amperes AC or DC. The Model 711 features a melamine phenolic body w solid silver alloy fixed and movable contacts. Dual-purpose terminals all connection by soldering or by means of 3/16" quick-connectors. This swit is stocked as a single, unenclosed unit, but is available made-to-order enclosed tandem assemblies up to 10 units or as a single enclosed un

The following Ohmite Tap Switches are listed by the Underwrite Laboratories, Inc., Reexamination Service for use where the acceptability combination (with other apparatus) has been determined by them: Mod 111, 212, 312 and 412. Variations from the basic switch design, identifi by suffixes A, B, C, or X are also Underwriters' approved. When t switches are not factory installed, screw terminals are specified by t Underwriters' Laboratories for Model 312 and soldering lugs for Model 4 Further information on terminal fittings is available on request. When Underwriters' approved unit is required, specify this on the order.

MODEL 711 TAP SWITCH

Alternating Current Rating **7 Amps. 125 Volts** — Diameter 1⅛" — Shaft Diameter ¼" — Standard Mounting: For ⅛" panel maximum, by means of ⅜"-32 threaded bushing and hex. nut. See mounting illustration "A." Weight, single unit: .047 lb. approximately. Dual-purpose terminals accept ¾" quick-connectors as well as soldering. Non-turn lug can be positioned at "12, 3, 6, and 9 o'clock."

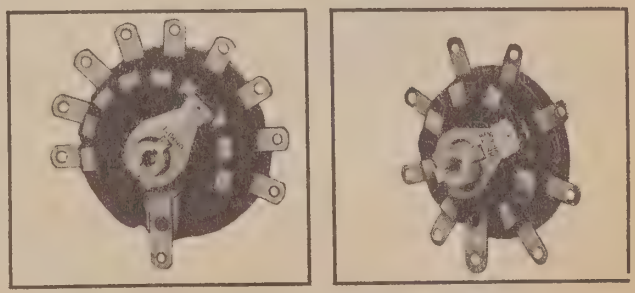
TAP SWITCH MOUNTING DIMENSIONS

ALL CERAMIC OPEN TYPE TAP SWITCHES

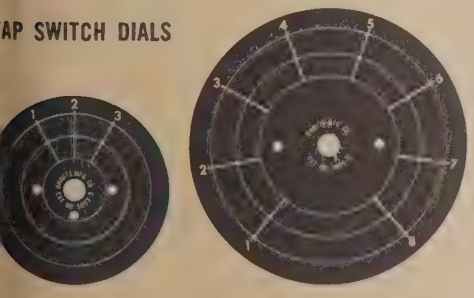


Designed to transfer currents of several amperes in circuits requiring high voltage insulation. Ceramic body construction is the same as employed in Models J and K rheostats (see page 21). Monel metal taps; silver-graphite brush.

SHORTING TYPE SWITCH: Moving contact bridges closely spaced taps completing a new circuit before breaking the previous one. Switch arm is not indexed and can be left in any position.

NON-SHORTING SWITCH: Positively indexed, moving contact completely disconnects from one tap before contacting succeeding tap.

Switches up to 8 taps are approximately 3¼" diameter including lugs; to 12 tap switches are approximately 4¼" diameter. Switches can be ordered assembled 2 to 3 in tandem. Single hole mounting by means of ⅜" diameter bushing and hexagon nut accommodates panels up to ¼" thick (maximum). The "non-turn" lug requires a 3/16" panel hole ½" below the center of the shaft. Shaft diameter is ¼". Recommended knob, Stock No. 5150, see page 22.



Maximum current capacity is 7 amperes but only 3 amperes at 120 V.A.C. should be interrupted. Current ratings are less for all direct current circuits above 20 volts, for inductive circuits and high voltages.

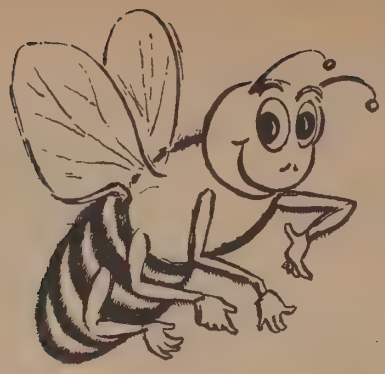
†Avg. Wt. T-500 Series .28 lb.; T-100 Series .68 lb.

TAP SWITCH DIALS



Dials for Ohmite tap switches are made of aluminum, etched and enameled black. Dial markings are bright aluminum. The number of dial calibrations or position markings agree with the actual number of positions on the switch. Note, in the table, that dials for switches Model 212 and 312 are available in two diameters to suit the recommended knob.

Catalog No.[1]	For Model	For Knob	Dial Dia.
